## [CN64-50 - Boone County White Corn Seeds](#)

120 days. Zea mays. Open Pollinated. Boone County White Corn. The plant produces high yields of delicious sweet white corn. It has huge 9 to 11" long ears of white kernels. The ears have 18 to 22 rows of tender kernels. It is ground for flour, grits, and cornmeal. Boone County White<sup>1</sup> was once one of the most popular white corn varieties grown in the Southern Corn Belt. The plant is heavily leafed, which shades out unwanted weeds. It yields 70 to 90 bushels per acre. It was created in 1874 by Mr. James Riley of Boone County, Indiana. He released his new corn and named it Boone County White Corn. This variety does well under adverse weather conditions. Heat Tolerant. Drought Tolerant. An excellent choice for Southern home gardens. An 1899 heirloom variety from the USA.

## [CN48-50 - Country Gentleman Corn Seeds](#)

92 days. Zea mays. Open Pollinated. Country Gentleman Corn. The plant produces heavy yields of 7 to 8" long ears of white corn. It has 3 ears per stalk. The delicious corn is one of the most unusual varieties because the white kernels are arranged irregularly, not in rows. It holds well much longer than most heirloom varieties. Also known as Shoepeg Corn. An excellent choice for home gardens. An 1890 heirloom variety from Orange, Connecticut, USA. United States Department of Agriculture, NSL 5613. Disease Resistant: SW.

## [CN30-50 - Golden Bantam Corn Seeds](#)

88 days. Zea mays. Open Pollinated. Golden Bantam Corn. The plant produces good yields of 7 to 8" long ears of golden yellow corn. The ears have 12 to 14 rows of tender kernels. Great for fresh eating or freezing. This variety grows well in most soils. Grows well in cooler areas such as coastal regions. Cold Tolerant. An excellent choice for home gardens and market growers. A 1902 heirloom variety from Greenfield, Massachusetts, USA. United States Department of Agriculture, NSL 20179.

### **CN1-50 - Hickory King Corn Seeds**

115 days. Zea mays. Open Pollinated. Hickory King Corn. The plant produces good yields of 8 to 9" long white corn. The ears have 10 to 12 rows of tender kernels. It has two ears per stalk. Great for making grits, cornmeal, and flour. One of the best varieties for hominy because the skin slips off so easily. It has the largest kernels of any other variety and grows in the cotton belt regions. Also known as Bingo Corn in the South as the kernels are so big they were used as bingo chips. Husks are tighter than most varieties and give excellent protection from beetles and earworms. It does well in a wide variety of soils. An excellent choice for home gardens and market growers. An 1800s heirloom variety from Virginia, USA. United States Department of Agriculture, NSL 34753. Disease Resistant: NCLB, SCLB.
