

Ground Cherry

[TL9-100 - Aunt Molly's Ground Cherry Seeds](#)

70 days. *Physalis peruviana*. Open Pollinated. Aunt Molly's Ground Cherry. This early maturing plant produces heavy yields of flavorful ground cherries. This Ground Cherry is one of the sweetest and fruity tastings, turning from green to golden orange when mature. Excellent for making jam or pies. Stores well up to 3 months in the husk. An excellent choice for home gardens. A variety from Poland.

[TL20-100 - Huckleberry Seeds](#)

80 days. *Solanum melanocerasum*. Open Pollinated. Huckleberry. The plant produces hundreds of round 3/4" shiny berries in clusters. They are best when berries turn from glossy to dull black. It makes delicious blueberry pies and preserves. Good for freezing and canning. A variety from the USA.
