

Collards

[CD2-750 - Champion Collards Seeds](#)

60 days. Brassica oleracea. Open Pollinated. Champion Collards. The plant produces excellent yields of dark green collard leaves. Great with a touch of olive oil and garlic and served with ham or pork chops. Perfect steamed, boiled, or stir-fried. This is an improved version of Vates Collards. The most bolt resistant collards on the market. Frost Resistant. Waxy leaf surface provides natural protection from cabbage worms. A traditional green grew in the South. An excellent choice for home gardens and market growers. A 1979 heirloom variety was developed by the Agricultural Experimental Station in Virginia, USA. United States Department of Agriculture, G 30733.

[CD4-750 - Morris Heading Collards Seeds](#)

45 days. Brassica oleracea. Open Pollinated. Morris Heading Collards. This early maturing plant produces heavy yields of delicious blue-green collards. Perfect steamed, boiled, or stir-fried. Harvest young tender leaves for the best flavor. Slow to bolt in hot weather. Heat Tolerant. Also known as Cabbage Collards. Traditional greens are grown in the South. Suitable for hydroponic gardening. Excellent choice for home gardens. An heirloom variety from the USA. United States Department of Agriculture, NSL 6154.

[CD3-750 - Vates Collards Seeds](#)
