### BT14-50 - Burpee's Golden Beets

55 days. Beta vulgaris. Plant produces good yields of large bright golden beets. Best when harvested when small, but will not become fibrous when large. Leaves can be eaten as greens. pk/50

### BT16-50 - Kestral Beets

#### F-1 Hybrid Variety

53 days. Beta vulgaris. (F1) Plant produces good yields of red beets. A dual purpose variety. It can be harvested early for baby beets, or it can be left in the field to mature to full size. Disease Resistant: Downy Mildew, Powdery Mildew, Bolting, Cercospora and Rhizoctonia. pk/50

### BT24-50 - Little Chicago Beets

#### F-1 Hybrid Variety

**NEW** 53 days. Beta vulgaris. (F1) Plant produces good yields of 1 1/2" diameter baby red beets. This small baby beet is very delicious. Perfect for salads and pickling. pk/50

### BT6-50 - Albino Beets

50 days. Beta vulgaris. Plant produces good yields of very sweet white beets. Beets are white and will never stain again! This gourmet beet is ideal for boiling, pickling, baking, and freezing. pk/50

### BT1-50 - Chioggia Beets

60 days. Beta vulgaris. Plant produces good yields of very sweet pink skinned beet. Beets have red and white circular rings in interior. Ideal for boiling, pickling, baking, and freezing. Leaves can be used as greens. A heirloom variety introduced to the United States in 1840's from Italy. pk/50

### BT23-50 - White Detroit Beets

55 days. Beta vulgaris. Plant produces good yields of large white beets. The beets are very flavorful. The roots retain their sweet flavor during cooking! Perfect for gourmet dishes. pk/50

### BT3-50 - Blankoma Beets

55 days. Beta vulgaris. Plant produces large white beets. Leaves can be eaten as greens. Roots are white and are ideal for boiling, pickling, baking, and freezing. Perfect for gourmet dishes. Suitable for home gardens and market growers. pk/50
