Brussels Sprouts

BS8-25 - Hestia Brussels Sprouts Seeds

2015 All-America Selections Winner!

100 days. Brassica oleracea. (F1) Hestia Brussels Sprouts. The plant produces heavy yields of bright green Brussels Sprouts. The heads average 1 inch in diameter. The flavor is outstanding and only gets better as the cool temperatures arrive. One of only two Brussels Sprouts ever to win the AAS award! Cold Tolerant. Heat Tolerant. It's ideal for a

BS2-100 - Jade Cross Brussels Sprouts Seeds

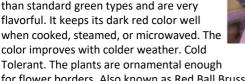

1959 All-America Selections Winner!

80 days. Brassica oleracea. (F1) Jade Cross Brussels Sprouts. The plant produces heavy yields of solid Brussels Sprouts. The heads average 1 ½ to 2 inches in diameter. Excellent freezing variety. One of the earliest Brussels Sprouts for the short growing season. An excellent choice for home gardens.

BS11-250 - Red Bull Brussels Sprouts Seeds

85 days. Brassica oleracea. Open Pollinated. Red Bull Brussels Sprouts. The plant produces high yields of dark red Brussels Sprouts. The heads average 1 to 1 ½" in diameter. They have a milder, nuttier flavor than standard green types and are very flavorful. It keeps its dark red color well when cooked, steamed, or microwaved. The color improves with colder weather. Cold Tolerant. The plants are ornamental enough

for flower borders. Also known as Red Ball Brussels Sprouts. Excellent choice for home gardens.
