BN13-50 - Top Crop Bush Beans

All-America Selections Winner

1950 All-America Selections Winner! 51 days. Phaseolus vulgaris. Bush type plant produces heavy yields of very flavorful straight 5 1/2" long green beans. This variety was developed by the USDA and is noted for its flavor and disease resistance. The bean is stringless and perfect for canning and freezing. United States Department of Agriculture, PI 549568. Disease Resistant: PMV, BCMV, and NY 15. pk/50

BN43-50 - Burpee Stringless Green Pod Bush Beans

Heirloom Variety

50 days. Phaseolus vulgaris. Bush type plant produces good yields of delicious stringless beans. Introduced in 1894 by W. Atlee Burpee who obtained their stock seed from N. B. Kenney. At the time it was claimed to be the only absolutely stringless green podded bean. Excellent fresh or canned. Suitable for home garden and market growers. A heirloom variety from the USA. Plant Height: 20" tall. pk/50

BN73-50 - Delinel Bush Beans

54 days. Phaseolus vulgaris. Bush type plant produces high yields of 7" long green beans. One of the top yielding French filet beans. Excellent freezing and canning variety. Disease Resistant. pk/50

BN77-25 - Ruth Bible Pole Beans

Heirloom Variety

NEW 70 days. Phaseolus vulgaris. Plant produces heavy yields of 3 1/2" long beans. Popular for planting in cornfields. It has brownish-tan seeds. Best when harvested when the beans are small. This cornfield bean is a drought resistant variety. An 1832 heirloom variety from the Buoy family in Kentucky. USA. pk/25

BN18-50 - Daytona Bush Beans

54 days. Phaseolus vulgaris. Bush type plant produces high yields of 6" long green beans. One of the top producers on the market. Developed by Ferry-Morse. Excellent freezing and canning variety. Disease Resistant: BCMV. pk/50

BN57-50 - Red Mexican Bush Beans

Heirloom Variety

85 days. Phaseolus vulgaris. Bush type plant produces good yields of beans. Beans do not become soggy or fall apart when baked. Excellent for soups. An 1855 heirloom variety from California. Plant Height: 14" tall. pk/50

BN76-25 - Potomac Pole Beans

Certified Organic

Heirloom Variety

NEW 67 days. Phaseolus vulgaris. Plant produces heavy yields of 6 1/2" long green snap beans. Does well in cool regions. A heirloom variety from the Virginia side of the Potomac River dating back before 1860. pk/25

BN79-50 - Dwarf Horticultural Bush Beans (Taylor Strain)

62 days. Phaseolus vulgaris. Bush type plant produces high yields of 5" long light green beans. The pods are thick and flat, and the seeds are thick and oval. Most commonly used as a green shell bean. Does well in cool regions. This is the Taylor Strain variety. pk/50
