WM20-10 - Yellow Doll Watermelons

F-1 Hybrid Variety

68 days. Citrullus lanatus. (F1) Plant produces good yields of icebox size 7 lb watermelons. It has very sweet yellow flesh. The family will love this variety! One of the earliest yellow varieties on the market that is suitable for small gardens. Grow yellow, red, pink, red, and white watermelons for a beautiful salad. pk/10

WM32-10 - Mountain Sweet Yellow Watermelons

100 days. Citrullus lanatus. Plant produces good yields of large 35 lb dark green watermelons with light green markings. The dark yellow flesh is very sweet. The family will love this variety! Grow yellow, red, pink, red, and white watermelons for a colorful fruit salad. A variety from the USA. pk/10

WM38-20 - Black Diamond Watermelons (Willhite's Yellow Flesh)

90 days. Citrullus lanatus. Plant produces good yields of large 60 to 70 lb watermelons. It is exactly like the Black Diamond in shape and size, except it has the most delicious yellow flesh you ever eaten. Tough rind helps fruit from bruising. Plant has large leaves which help prevent sunburning of watermelons. pk/20

WM43-20 - Tastigold Watermelons PVP

PVP Variety

80 days. Citrullus lanatus. Early plant produces good yields of 24 lb watermelons. This is one of the best tasting yellow flesh watermelons on the market. The flesh is firm and crisp. Excellent for home gardens and market growers. Disease Resistant: Wilt Tolerant. pk/20

WM44-20 - Willhite's Tendergold Watermelons

80 days. Citrullus lanatus. Plant produces good yields of medium size 28 lb watermelons. This is one of the best yellow flesh watermelons on the market. It has solid flesh that is very crisp, very sweet, and very flavorful. The yellow flesh turns more orange as it ripens and taste improves with time. Keeps well and will last 7 - 20 days longer after ripening. Excellent choice for home gardeners and market growers. Grow pink, red, white, and yellow watermelons to make a great tasting salad. Disease Resistant: Anthracnose & Wilt Tolerant. pk/20

WM45-20 - Yellow Crimson Watermelons PVP

WM50-20 - Moon & Stars Watermelons (Yellow Flesh)

PVP Variety

80 days. Citrullus lanatus. Early plant produces good yields of medium size watermelons. The bright yellow flesh is very flavorful. pk/20

PVP Variety - Seeds may be used only to grow for personal use.

Heirloom Variety

95 days. Citrullus lanatus. Plant produces good yields of 25 lb watermelons. The watermelon is dark green speckled with yellow moons and stars. The yellow flesh is very sweet and crisp. A heirloom variety from Georgia. USA. pk/20

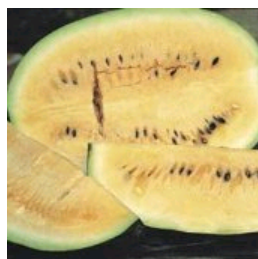

WM53-20 - Sweet Siberian Watermelons

85 days. Citrullus lanatus. Plant produces good yields of 10 lb light green skin watermelons. The watermelon's apricot colored flesh is very sweet and juicy. Introduced by the New Hampshire Agricultural Experiment Station in 1901. pk/20

WM8-20 - Desert King Watermelons

85 days. Citrullus lanatus. Plant produces good yields of watermelons. It has deep yellow flesh that is very delicious. One of the best drought tolerant varieties on the market. They hold on the vine a month or so after ripening and will not sunburn. Every watermelon lover should try this variety. United States Department of Agriculture, NSL 29603. pk/20

WM-KIT - Watermelon Carving Kit

Watermelon Carving Kit has the tools with patterns and instructions on carving unique fruit bowls. Eight full size patterns, and specialized carving tools make it happen. The spectacular watermelon baskets are sure to grab everyone's attention.
