WM16-20 - Red Seeded Citron Watermelons

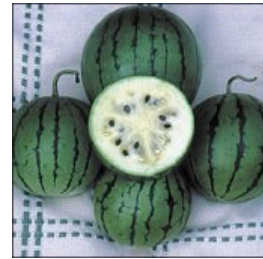

Certified Organic

100 days. Plant produces high yields of small dark green watermelons. This is not your typical watermelon. The white solid flesh is inedible raw. It has been grown to make preserves and sweetmeats that are added to fruitcakes, cookies, and puddings. The best ones can be stored for up to a year. A variety that was widely grown on 1930's and 1940's. pk/20

WM25-20 - Cream of Saskatchewan Watermelons

85 days. Citrullus lanatus. Plant produces good yields of 10 lb white watermelons. The watermelons are very sweet and crisp and flavorful. Plant does well in the New England region. A variety from Russia. pk/20

WM-KIT - Watermelon Carving Kit

Watermelon Carving Kit has the tools with patterns and instructions on carving unique fruit bowls. Eight full size patterns, and specialized carving tools make it happen. The spectacular watermelon baskets are sure to grab everyone's attention.
