### WM25-20 - Cream of Saskatchewan Watermelons

85 days. Citrullus lanatus. Plant produces good yields of 10 lb white watermelons. The watermelons are very sweet and crisp and flavorful. Plant does well in the New England region. A variety from Russia. pk/20

### WM48-20 - Black Diamond Watermelons (Blue Ribbon Winner)

85 days. Citrullus lanatus. Plant produces good yields of large 40 to 75 lb watermelons. It has very flavorful bright red flesh. Tough black-green rind helps fruit from bruising. Plant has large leaves which help prevent sunburning of watermelons. This is the Blue Ribbon Winner strain! An excellent mid-season variety for home gardeners and market growers. Good shipper variety! pk/20

### WM49-20 - Verona Watermelons

80 days. Citrullus lanatus. Plant produces good yields of large 30 lb watermelons. It has very flavorful bright red flesh. It has a black-green rind. Verona is recommended over the Black Diamond types as it is very productive, one of the earliest, and one of the best tasting watermelons. An excellent early season variety for home gardeners and market growers. Good shipper variety! Disease Resistant: Wilt Tolerant, Anthracnose. pk/20
