Greenhouse Cucumbers

**CU78-20 - County Fair Cucumbers**
52 days. Cucumis sativus. (F1) Early producing plant produces high yields of 6 to 8" long green cucumbers. A high quality cucumber that is sweet, non-bitter, firm, and crunchy. Perfect variety for making chips, spears, and whole pickles. Best when harvested when 2 to 4" for pickling. Also makes a good slicer. Parthenocarpic variety and no male pollen is needed, so even if bees are scarce you'll still get a bumper crop. Perfect for greenhouse production. Excellent choice for home gardens, greenhouses, and market growers. Disease Resistant: BW.

**CU24-20 - Diva Cucumbers**
2002 All-America Selections Winner!
58 days. Cucumis sativus. (F1) Plant produces high yields of non-bitter burpless and seedless 6 to 8" long glossy dark green cucumbers. Cucumbers are tender, crisp, sweet, and bitter-free. Best when harvested at 4 to 5" long. Excellent for salads or pickling. Plant's foliage is non-bitter and is not attractive to the cucumber beetles as some varieties. It is a gynoecious and parthenocarpic variety and will produce without pollination! It is known for its big yields. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: ALS, Ccu, CVYV, DM, PM.

**CU111-20 - Greenhouse Long Burpless Cucumbers**
46 days. Cucumis sativus. (F1) Plant produces excellent yields of 8 to 12" long burpless bright green greenhouse cucumbers. These long cucumbers are bitter free and burpless. Excellent for salads. Excellent choice for home gardens, greenhouses, market growers, and open field production.

**CU41-20 - Little Leaf Cucumbers**
57 days. Cucumis sativus. Open Pollinated. Compact plant produces high yields of 3 to 5" long emerald green color cucumbers. It may be the highest yielding pickling cucumber on the market today, producing 25 to 30 cucumbers per plant! An excellent cucumber for salads and pickling. Parthenocarpic variety and no male pollen is needed, so even if bees are scarce you'll still get a bumper crop. Perfect for container gardening. Does well under stress and adverse weather conditions. Tolerates heat, drought and cool temperatures. One of the most disease resistant cucumber on the market. Excellent choice for home gardens, hydroponics, greenhouses, market growers, and open field production. Developed in 1991 by the University of Arkansas, USA. Disease Resistant: A, ALS, BW, Ccu, CMV, DM, PM.

**CU125-10 - Manny Cucumbers**
50 days. Cucumis sativus. (F1) Plant produces good yields of 5 to 7" long shiny medium green cucumbers. This quality cucumber has tender skin and grows best if grown on trellis or stakes. This is a parthenocarpic variety and sets fruit without bee pollination making it an excellent variety for greenhouse and open field production. It is ideal for those growing in tunnels. Impressive yields in open field production too. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: PM. Certified Organic.

**CU27-10 - Sweet Success Cucumbers**
1983 All-America Selections Winner!

This high quality cucumber has tender skin and grows perfectly straight if grown on trellis or stakes. This is a parthenocarpic variety and sets fruit without bee pollination making it an excellent variety for greenhouse and open field production. One of the most disease resistant cucumber on the market. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: ALS, Ccu, CMV, TLS, WMV.
**CU3-20 - Tasty Green Cucumbers**

55 days. Cucumis sativus. (F1) Plant produces heavy yields of 18 to 20" long dark green cucumbers. It is burpless with no bitterness, crispy, juicy, easy to digest, and very delicious! This variety is the world’s most popular cucumber. It produces early in the season and continuously produces heavy yields all season long. Grows well in the South and tolerates high temperatures and humidity. Also great in raised beds or in containers. Suitable for greenhouse production too. For home gardens and greenhouse production, best if grown on trellis or stakes. Does well even under adverse weather conditions. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: DM, PM.

**CU72-20 - Tasty Jade Cucumbers**

54 days. Cucumis sativus. (F1) Plant produces high yields of 10 to 12" long slender glossy green cucumbers. One of the best Asian cucumbers on the market. They are crisp and bitter free. It is an excellent slicer and perfect for salads and gourmet dishes. The skin is thin and requires no peeling. Suitable for home gardens or greenhouse production. This quality cucumber grows best if grown on trellis or stakes. It will be seedless if isolated from other varieties. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: DM, PM.

**CU28-20 - Tasty King Cucumbers**

62 days. Cucumis sativus. (F1) Plant produces high yields of 8 to 10" long dark green cucumbers. One of the best tasting burpless cucumbers on the market! They are very crisp and very delicious. Suitable for greenhouse production and hydroponic gardening. Excellent choice for home gardens, greenhouses, market growers, and open field production. Developed in Japan.

**CU115-20 - Telegraph Improved Cucumbers**

62 days. Cucumis sativus. Open Pollinated. Plant produces excellent yields of 15 to 18" long dark green cucumbers. These are just like the ones found at the grocery store but much fresher because they come straight from your garden. These long cucumbers stay crisp and fresher longer than other varieties. They are burpless, mild flavored, and never bitter. Good for summer or winter production. This is an excellent greenhouse variety. The plants will grow up to 8 feet in a greenhouse, are easily trellised, and set fruit without pollination. Does well in garden outdoors too. Excellent choice for home gardens, greenhouses, and market growers. An English heirloom variety dating back to 1897.

**CU58-20 - White Wonder Cucumbers**

60 days. Cucumis sativus. Open Pollinated. Plant produces high yields of 6 to 8" long lovely ivory skinned cucumbers. They are exceptionally crisp and very delicious without the bitter taste. Great for salads, pickles, or gourmet dishes. It looks great in salads to adds extra color to gourmet dishes. The tender white skins are so thin that they won't even need peeling. Great for making chips, spears, and whole pickles. Suitable for greenhouses too! Impress your neighbors by growing some white cucumbers! Also known as Albino Cucumber, Ivory King Cucumber, Jack Frost Cucumber, Landreth’s White Slicing Cucumber, Long White Cucumber, and White Albino Cucumber. Does well in hot weather. Excellent choice for home gardens, greenhouses, and specialty market growers. An 1893 heirloom variety dating from New York, USA. United States Department of Agriculture, NSL 5773.
