It may be the highest yielding pickling cucumber on the market today, producing 25 to 30 cucumbers per plant! An excellent cucumber for salads and pickling. It is a parthenocarpic variety and no male pollen is needed, so even if bees are scarce you'll still get a bumper crop. Perfect for container gardening. Does well under stress and adverse weather conditions. Heat Tolerant. Drought Tolerant, Cold Tolerant. One of the most disease resistant cucumbers on the market. An excellent choice for home gardens, hydroponics, greenhouses, market growers, and open field production. Developed in 1991 by the University of Arkansas, USA. Disease Resistant: A, ALS, BW, Ccu, CMV, DM, PM.

CU125-10 - Manny Cucumber Seeds

50 days. Cucumis sativus. (F1) Manny Cucumber. The plant produces good yields of 5 to 7" long shiny medium green cucumbers. This Beit Alpha cucumber has tender skin and a delicious mild flavor. It grows best if grown on trellis or stakes. This is a parthenocarpic variety and sets fruit without bee pollination making it an excellent variety for greenhouse and open field production. It is ideal for those growing in tunnels. Impressive yields in open field production too. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: PM.

CU132-10 - Mini-Me Cucumber Seeds

45 days. Cucumis sativus. (F1) Mini-Me Cucumber. This early maturing plant produces high yields of 3 1/2" long sweet, bitter-free, and burpless cucumbers. This mini Beit Alpha is smooth and with shiny green skin. The flesh is crunchy and delicious, and the skin is so mild it does not have to be peeled. It is usually picked small for the best quality. It can be used for pickling or sliced in salads. Long shelf life. Very disease-resistant cucumbers. It is a parthenocar[ic variety, producing only female flowers, and does not require pollination, making cultivation super easy. The plant continues to produce all season long. This is the high variety you find in supermarkets. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant. CMV, CVYV, DM, PM.

CU135-10 - Pepinex Cucumber Seeds

65 days. Cucumis sativus. (F1) Pepinex Cucumber. The plant produces high yields of 12 to 14" long slender glossy dark green cucumbers. One of the best high quality cucumbers on the market. They are sweet, crisp, and bitter-free. It is an excellent slicer and perfect for salads and gourmet dishes. The skin is thin and requires no peeling. Suitable for home gardens or greenhouse production. This quality cucumber grows best if grown on trellis or stakes. An excellent choice for home gardens, greenhouses, farmer's markets, market growers, commercial production, and open field production. Disease Resistant: DM, PM.

CU27-10 - Sweet Success Cucumber Seeds

1983 All-America Selections Winner!
58 days. Cucumis sativus. (F1) Sweet Success Cucumber. The plant produces good yields of 12" long seedless and burpless dark green cucumbers. This high quality cucumber has tender skin and grows perfectly straight if grown on trellis or stakes. This is a parthenocarpic variety and sets fruit without bee pollination making it an excellent variety for greenhouse and open field production. One of the most disease resistant cucumbers on the market. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: ALS, Ccu, CMV, TLS, WMV.

CU122-10 - Tanja Cucumber Seeds

60 days. Cucumis sativus. Open Pollinated. Tanja Cucumber. The plant produces very heavy yields of 12 to 14" long dark green slicing-type cucumbers. Cucumbers are tasty with no bitterness. They are uniformly straight if grown on a fence or trellis and it will be easier to harvest. Plants yield prolifically and continue to bear over a long harvest period. You should get about 20 cucumbers from each plant. Suitable for growing in greenhouses. An excellent choice for home gardens, greenhouses, and market growers.

CU3-10 - Tasty Green Cucumber Seeds

62 days. Cucumis sativus. (F1) Tasty Green Cucumber. The plant produces heavy yields of 18 to 20" long dark green cucumbers. It is burpless with no bitterness, crispy, juicy, easy to digest, and very delicious! This variety is the world's most popular cucumber. It produces early in the season and continuously produces heavy yields all season. It grows well in the South and tolerates high temperatures and humidity. It is also great in raised beds or containers. Suitable for greenhouse production too. For home gardens and greenhouse production, best if grown on a trellis or stakes. Does well even under adverse weather conditions. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: DM, PM.

CU72-10 - Tasty Jade Cucumbers

54 days. Cucumis sativus. (F1) The plant produces high yields of 10 to 12" long slender glossy green cucumbers. One of the best Asian cucumbers on the market. They are crisp and bitter-free. It is an excellent slicer and perfect for salads and gourmet dishes. The skin is thin and requires no peeling. This is a parthenocarpic variety and sets fruit without bee pollination making it an excellent variety for greenhouse and open field production. Suitable for home gardens or greenhouse production. This quality cucumber grows best if grown on trellis or stakes. It will be seedless if isolated from other varieties. An excellent choice for home gardens, greenhouses, farmer's markets, market growers, commercial production, and open field production. Disease Resistant: DM, PM.

CU28-10 - Tasty King Cucumbers

62 days. Cucumis sativus. (F1) The plant produces high yields of 8 to 10" long dark green cucumbers. One of the best-tasting burpless cucumbers on the market! They are very crisp and very delicious. Suitable for greenhouse production and hydroponic gardening. An excellent choice for home gardens, greenhouses, market growers, and open field production. A variety developed in Japan.

CU115-20 - Telegraph Improved Cucumber Seeds

62 days. Cucumis sativus. Open Pollinated. Telegraph Improved Cucumber. The plant produces excellent yields of 15 to 18" long dark green cucumbers. These are just like the ones found at the grocery store but much fresher because they come straight from your garden. These long cucumbers stay crisp and fresher longer than other varieties. They are burpless, mild-flavored, and never bitter. Also known as English Telegraph Cucumber. Good for summer or winter production. This is an excellent greenhouse variety. The plants will grow up to 8 feet in a greenhouse, are easily trellised, and set fruit without pollination. Does well in the garden outdoors too. An excellent choice for home gardens, greenhouses, and market growers. An English heirloom variety dating back to 1897.

CU58-20 - White Wonder Cucumbers

60 days. Cucumis sativus. Open Pollinated. The plant produces high yields of 6 to 8" long lovely ivory-skinned cucumbers. They are exceptionally crisp and very delicious without the bitter taste. Great for salads, pickles, or gourmet dishes. It looks great in salads to adds extra color to gourmet dishes. The tender white skins are so thin that they won't even need peeling. Great for making chips, spears, and whole pickles. Suitable for greenhouses too! Impress your neighbors by growing some white cucumbers! Also known as Albino Cucumber, Ivory King Cucumber, Jack Frost Cucumber, Landreth's White Slicing Cucumber, Long White Cucumber, and White Albino Cucumber. Does well in hot weather. An excellent choice for home gardens, greenhouses, and specialty market growers. An 1893 heirloom variety from New York, USA. United States Department of Agriculture, NSL 5773.
