**WM23-20 - Micklelee Watermelons PVP**

88 days. Citrullus lanatus. Plant produces good yields of very flavorful 15 lb watermelons. The watermelons are very sweet and have bright red flesh. A single serving size watermelon. Capable of producing 5 melons per vine. Excellent shelf life. It is protected by the Plant Variety Protection Act, #8600104. United States Department of Agriculture, PI 601307 PVPO. pk/20

PVP Variety - Seeds may be used only to grow for personal use.

**WM33-20 - Au Jubilant Watermelons PVP**

90 days. Citrullus lanatus. Plant produces good yields of large 35 lb dark green watermelons with light green markings. The red flesh is very sweet. This is an improved variety of the Jubilee. A variety from the USA. Disease Resistant: Anthracnose & Wilt Tolerant. pk/20

PVP Variety - Seeds may be used only to grow for personal use.

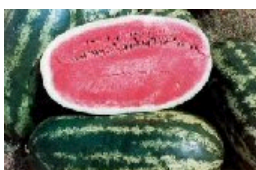

**WM35-20 - Au Sweet Scarlet Watermelons PVP**

85 days. Citrullus lanatus. Plant produces good yields of large 22 lb dark green watermelons with light green markings. This variety has beautiful red flesh and high sugar content. A variety from the USA. Disease Resistant: Anthracnose & Wilt Tolerant. pk/20

PVP Variety - Seeds may be used only to grow for personal use.

**WM39-20 - Long Crimson Watermelons PVP**

85 days. Citrullus lanatus. Plant produces very high yields of 28 lb watermelons. It has very sweet red flesh. The shape is similar to the Chubby Gray and the flesh is similar to the Crimson Sweet. The tough rind helps fruit from bruising and is a good shipper variety. pk/20

PVP Variety - Seeds may be used only to grow for personal use.

**WM29-20 - Chubby Gray Watermelons**

90 days. Citrullus lantus. Plant produces great tasting 30 lb watermelons. This is a short blocky (chubby) rectangular watermelon with beautiful red flesh. It is more productive and has better flavor than other varieties. United States Department of Agriculture, PI 600951. pk/20

PVP Variety - Seeds may be used only to grow for personal use.

**WM34-20 - Au Producer Watermelons PVP**

85 days. Citrullus lanatus. Plant produces very high yields of large 22 lb dark green watermelons with light green markings. The red flesh is very sweet. This is a variety similar to the Crimson Sweet, but with higher sugar content and better flesh color. A variety from the USA. Disease Resistant: Anthracnose Race 1 and Anthracnose Race 2, Fusarium Wilt, and Downy Mildew. pk/20

PVP Variety - Seeds may be used only to grow for personal use.

**WM36-20 - Big Crimson Watermelons PVP**

90 days. Citrullus lanatus. Plant produces very high yields of large 30 lb dark green watermelons with light green markings. This variety has sweet red flesh. It is identical to the Crimson Sweet except it is larger and more productive. A variety from the USA. pk/20

PVP Variety - Seeds may be used only to grow for personal use.

**WM45-20 - Yellow Crimson Watermelons PVP**

80 days. Citrullus lanatus. Early plant produces good yields of medium size watermelons. The bright yellow flesh is very flavorful. pk/20

PVP Variety - Seeds may be used only to grow for personal use.
