Open Field Cucumbers

CU53-20 - Armenian Yard Long Cucumbers

65 days. Cucumis melo. Open Pollinated. The plant produces good yields of 2 to 3 foot long slim light green cucumbers. Best when harvested when 12 to 15" long. This is the longest cucumber on the market. It is an excellent slicer and perfect for salads and gourmet dishes. It has a crisp mild flavor and is easy to digest. Impress your neighbors and grow a 3-foot long cucumber in your home garden! A great selling item at farmer’s markets. An excellent choice for home gardens and market growers. An heirloom from Armenia. United States Department of Agriculture, NSL 65913. Disease Resistant: CMV.

CU46-20 - Ashley Cucumbers

65 days. Cucumis sativus. Open Pollinated. Plant produces excellent yields of 6 to 8" long light green cucumbers. Excellent slicing cucumber for salads. Grows well in hot and humid regions in the South. One of the most profitable cucumbers you can grow. Excellent choice for home gardens and market growers. A heirloom variety developed in 1956 by the Clemson Agricultural Experimental Station, Charleston, South Carolina, USA. United States Department of Agriculture, AMES 4833. Disease Resistant: DM.

CU102-20 - Dasher II Cucumbers

58 days. Cucumis sativus. (F1) Early producing plant produces high yields of 8 to 10" long dark green cucumbers. A quality slicing variety best grown on a fence or trellis for easy harvest. One of the highest yielding cucumber variety available. One of the most disease resistant cucumber on the market. Excellent choice for home gardens and market growers. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

CU24-20 - Diva Cucumbers

2002 All-America Selections Winner!

58 days. Cucumis sativus. (F1) Plant produces high yields of non-bitter burpless and seedless 6 to 8" long glossy dark green cucumbers. Cucumbers are tender, crisp, sweet, and bitter-free. Best when harvested at 4 to 5" long. Excellent for salads or pickling. Plant’s foliage is non-bitter and is not attractive to the cucumber beetles as some varieties. It is a gynoecious and parthenocarpic variety and will produce without pollination! It is known for its big yields. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: ALS, Ccu, CVYV, DM, PM.

CU9-20 - Fanfare Cucumbers

1994 All-America Selections Winner!

63 days. Cucumis sativus. (F1) Semi dwarf plant produces heavy yields of 8 to 10" long deep green cucumbers. They are crisp and very delicious with a mild taste. Great slicing cucumber for salads. Due to its compact vines, this hybrid variety can be planted at closer row spacing than normal cucumbers. It produces high quality cucumbers over a longer period of time than other varieties. One of the most disease resistant cucumber on the market. Excellent choice for home gardens and market growers. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

CU41-20 - Little Leaf Cucumbers

57 days. Cucumis sativus. Open Pollinated. Compact plant produces high yields of 3 to 5" long emerald green color cucumbers. It may be the highest yielding pickling cucumber on the market today, producing 25 to 30 cucumbers per plant! An excellent cucumber for salads and pickling. Parthenocarpic variety and no male pollen is needed, so even if bees are scarce you’ll still get a bumper crop. Perfect for container gardening. Does well under stress and adverse weather conditions. Tolerates heat, drought and cool temperatures. One of the most disease resistant cucumber on the market. Excellent choice for home gardens, hydroponics, greenhouses, market growers, and open field production. Developed in 1991 by the University of Arkansas, USA. Disease Resistant: A, ALS, BW, Ccu, CMV, DM, PM.

CU4-20 - Stonewall Cucumbers
53 days. Cucumis sativus. (F1) Plant produces high yields of 8 to 9" long straight dark green cucumbers. It has received high grades for quality, shape, size, and being the No. 1 cucumber variety for commercial production. Perfect for salads and slicing. Stores well. Agriculture researchers and commercial growers are very familiar with this top performer. One of the most disease resistant cucumber on the market. Excellent choice for home gardens and market growers. Disease Resistant: DM, PM.

CU37-20 - Sumter Cucumbers

CU26-10 - Sweet Slice Cucumbers
63 days. Cucumis sativus. (F1) Plant produces high yields of 9 to 12" long dark green cucumbers. They are sweet, bitter free, burpless, crisp, tender, with thin skin, so thin it requires no peeling. Its superior quality gives it gourmet status. After a sample taste, customers know Sweet Slice is a cut above the rest. Excellent choice for home gardens and market growers. Disease Resistant: CMV, PDM, RSV, WMV, ZYMV.

CU27-10 - Sweet Success Cucumbers
1983 All-America Selections Winner!
58 days. Cucumis sativus. (F1) Plant produces good yields of 12" long seedless and burpless dark green cucumbers. This high quality cucumber has tender skin and grows perfectly straight if grown on trellis or stakes. This is a parthenocarpic variety and sets fruit without bee pollination making it an excellent variety for greenhouse and open field production. One of the most disease resistant cucumber on the market. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: ALS, Ccu, CMV, TLS, WMV.

CU2-20 - Sweeter Yet Cucumbers
48 days. Cucumis sativus. (F1) Semi-bush type plant produces high yields of 10 to 12" long dark green cucumbers. A dual purpose non-bitter cucumber that can be used fresh in salads or pickled. Cucumbers are sweet, burpless, bitter-free, and skins require no peeling. Compact semi-bush type plants produce continually all season long. One of the most disease resistant cucumber on the market. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: CMV, DM, PM, PRSV, ZYMV.

CU3-20 - Tasty Green Cucumbers
55 days. Cucumis sativus. (F1) Plant produces heavy yields of 18 to 20" long dark green cucumbers. It is burpless with no bitterness, crispy, juicy, easy to digest, and very delicious! This variety is the world's most popular cucumber. It produces early in the season and continuously produces heavy yields all season long. Grows well in the South and tolerates high temperatures and humidity. Also great in raised beds or in containers. Suitable for greenhouse production too. For home gardens and greenhouse production, best if grown on trellis or stakes. Does well even under adverse weather conditions. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: DM, PM.
CU72-20 - Tasty Jade Cucumbers

54 days. Cucumis sativus. (F1) Plant produces high yields of 10 to 12” long slender glossy green cucumbers. One of the best Asian cucumbers on the market. They are crisp and bitter free. It is an excellent slicer and perfect for salads and gourmet dishes. The skin is thin and requires no peeling. Suitable for home gardens or greenhouse production. This quality cucumber grows best if grown on trellis or stakes. It will be seedless if isolated from other varieties. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: DM, PM.

CU28-20 - Tasty King Cucumbers

62 days. Cucumis sativus. (F1) Plant produces high yields of 8 to 10” long dark green cucumbers. One of the best tasting burpless cucumbers on the market! They are very crisp and very delicious. Suitable for greenhouse production and hydroponic gardening. Excellent choice for home gardens, greenhouses, market growers, and open field production. Developed in Japan.

CU92-20 - Turbo Cucumbers

67 days. Cucumis sativus. (F1) Plant produces high yields of 9” long dark green slicing type cucumbers. It is crisp and very delicious. This quality cucumber grows best if grown on trellis or stakes. Does well in Northeast parts of the country. One of the most disease resistant cucumber on the market. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

CU49-20 - Wautoma Cucumbers

60 days. Cucumis sativus. Open Pollinated. Plant produces heavy yields of 4 to 5” long cucumbers. The cucumbers are bitter free and burpless. Great for making homemade pickles! One of the most disease resistant cucumber on the market. Excellent choice for home gardens and market growers. Developed by the USDA. United States Department of Agriculture, NSL 197095. Disease Resistant: A, ALS, Ccu, CMV, DM, PM. Grown Organically.
