GS1 - AquaSpikes

AquaSpikes - Vacation Watering Made Easy! This handy device that turns an ordinary 2-liter bottle into a time-released watering system. AquaSpikes Time Release Watering System is an easy to use, worry free system, for unattended watering of plants, both indoor and outdoor. There are 4 AquaSpikes per package.

AquaSpikes Can:

Help Prevent Dead Plants when on Vacation - Have you ever spent months cultivating precious plants just to go on vacation, and come back to dying or dead plants? The solution is **AquaSpikes**, a slow-drip irrigation system. When used with **AquaRocks**, one application can keep the soil moist for weeks!

Also great for every day watering. AquaSpikes deliver water directly to the roots zone, where plants need it most.

GS2 - AquaRocks

AquaRocks - Super Absorbent Polymer! It absorbs 400 times its weight in water. When mixed into the soil, AquaRocks acts like a water sponge, absorbing and retaining water and nutrients for use by your plants when they need it. As your plants consume water, AquaRocks will gradually release the water, and be ready to store more with the next watering. AquaRocks can repeat this process over and over again!

AquaRocks Can:

Save time and money

Promote healthier plants

Prevent spills and runoffs

Improve root growth

AquaRocks is an environmentally, safe, biodegradable product that uses potassium-based polymers, which are safer for plants than sodium-based products.

GS3-8 - Miracle Gro Seed Starting Potting Mix

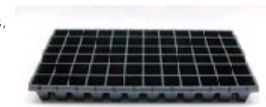

Miracle Gro Seed Starting Potting Mix Lightweight mix of sphagnum peat moss and perlite. Excellent for germinating plants and ideal for rooting leaf, stem or root cuttings. This Miracle Gro Seed Starting Potting Mix is the only product we recommend for growing hot peppers. 8 QT
