

Chicory

[CE6-750 - Red Treviso Chicory Seeds](#)

85 days. Cichorium endivia. Open Pollinated. Red Treviso Chicory. The plant produces good yields of beautiful red chicory with white veins. The leaves are tender yet crisp. Adds zest and color for a unique mixed salad. Used in salads or cooked as a vegetable. Try Treviso grilled on the barbecue and drizzled with olive oil and balsamic vinegar. Colder weather will produce the best color. Ideal for autumn and early winter use. Cold Tolerant. Also known as Rossa di Treviso Radicchio. Excellent choice for home gardens. A heirloom variety from Treviso, Italy.

[CE7-750 - Verona Red Chicory Seeds](#)

85 days. Cichorium endivia. Open Pollinated. Verona Red Chicory. The plant produces excellent yields of 6" round burgundy red chicory. Adds sharp flavor to salads. Used in salads or cooked as a vegetable. May also be sauteed, steamed, or grilled with meats. Colder weather will produce the best color. Cold Tolerant. Also known as Rossa di Verona Radicchio. Excellent choice for home gardens. An heirloom variety from Italy.

[CE9-750 - Witloof Chicory Seeds](#)

55 days. Cichorium endivia. Open Pollinated. Witloof Chicory. The plant produces excellent yields of 12 to 18" tall light green chicory. A European delicacy is now popular in America. It is very sweet and delicious. Adds color and flavor to mixed salad. Also great when lightly cooked. Also known as Belgium Endive. Excellent choice for home gardens and specialty market growers. An 1800s heirloom variety from Belgium.
