

Okra

[OK15-20 - Alabama Red Okra](#)

55 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of red okra. This okra is delicious fried, and adds color and unique flavor added to salads when young. Makes some of the best fried okra. Harvest regularly when 4 to 6" long. A heirloom variety from Alabama, USA. Excellent choice for home gardens.

[OK32-10 - Baby Bubba Okra](#)

53 days. *Abelmoschus esculentus*. (F1) Early maturing plant produces good yields of okra. Best when harvested when 3 to 4" long. The plant is baby sized, only half as tall as other okras, and perfect for a large container. Perfect for containers or small gardens. Excellent choice for home gardens.

[OK35-20 - Beck's Big Buck Okra](#)

85 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces high yields of large green okra. The pods are remarkably tender and delicious. Harvest pods when they are young and tender. It is also known as the Snapping Okra because of the way it snaps easily off the plant when ready to harvest. Excellent choice for home gardens. A heirloom variety from Germany. Certified Organic.

[OK16-20 - Burmese Okra](#)

58 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of 7 to 12" long light green okra. The pods are green and turn creamy yellow green when mature. Large pods are tender, spineless, and very flavorful. At 4 to 10" long they are tender, sweet, and spineless enough to be eaten raw or added to salads. A great pickling variety. A favorite used in restaurants. Excellent choice for home gardens and specialty market growers. A heirloom variety from Burma, now known as Myanmar. Certified Organic

[OK6-10 - Cajun Delight Okra](#)

1997 All-America Selections Winner! 49 days. *Abelmoschus esculentus*. (F1) Plant produces high yields of dark green okra. This is one of the best okras on the market. Pods can be harvested up to 5" long and still remain tender. Pods retain their shape when stir-fried or added to casseroles. Great for making gumbo. Suitable for Northern regions too. Excellent choice for home gardens.

[OK19-20 - Cajun Jewel Okra](#)

53 days. *Abelmoschus esculentus*. Open Pollinated. Early producing plant produces high yields of 7 to 8" long okra. It is a spineless variety that is great for fried okra and making gumbo. Popular in the Southern parts of the USA. Excellent choice for home gardens and market growers. A 1950s heirloom variety from the USA. Certified Organic

[OK33-20 - Choppee Okra](#)

55 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces high yields of okra. It is almost as spineless as the Clemson Spineless Okra. Great for making fried okra and gumbo. It is named after the Choppee Indians native to the area. Excellent choice for home gardens. A heirloom variety that dates back to 1850 from Georgetown, South Carolina, USA. Certified Organic

[OK24-20 - Clemson Spineless 80 Okra](#)

55 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces high yields of flavorful okra. Leaves are spineless making it easier to harvest. Taller, more open, and more productive than the Clemson Spineless Okra. Best if picked when 3 to 4" long. Used for making fried okra, soups, stews, meats dishes, and gumbos. Excellent choice for home gardens and market growers. Developed in 1980 by Clemson University, Clemson, South Carolina, USA.

ELECTRONIC CATALOG

[OK4-20 - Clemson Spineless Okra](#)

1939 All-America Selections Winner! 56 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces heavy yields of flavorful 9" long dark green okra. It is still the most popular variety on the market. Leaves are spineless making it easier to harvest. Best if picked when 3" long. Used in making fried okra, gumbo, soups, stews, and meats dishes. Excellent choice for home gardens and market growers. A heirloom variety. United States Department of Agriculture, NSL 26508.

[OK13-20 - Cow Horn Okra](#)

60 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces high yields of 14" long okra. The large pods remain spineless and tender up to 10" long, but are best when the pods are picked at 6" long. Great for making fried okra and gumbo. Excellent choice for home gardens and market growers. A heirloom variety dating back to pre-1865. Certified Organic

[OK9-20 - Dwarf Long Green Pod Okra](#)

50 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces heavy yields of 7 to 8" long okra. This spineless variety produces earlier and higher yields than other varieties. A great choice for Northern growers because it doesn't require as long of a hot growing season. Suitable for Southern and Northern regions. Excellent choice for home gardens and market growers.

[OK5-20 - Emerald Okra](#)

55 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces heavy yields of 6 to 8" long dark green okra. The pods are thick walled, smooth, tender, and spineless. Stays tender even when very large. Best to harvest when 4" long. Retains color when frozen or canned. Perfect for soups, stews, fried, or boiled. Also known as Emerald Green Velvet Okra. Excellent choice for home gardens and market growers. A 1950 heirloom variety developed by the Campbell Soup Company, Riverton, New Jersey, USA. United States Department of Agriculture, PI 675122

[OK17-20 - Evertender Okra](#)

75 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of 8" long okra. It is very tender and delicious fried or used in soups. Adds color to salads and Southern dishes. The pods remain tender for a long period. Excellent choice for home gardens. A variety from India. Certified Organic

EVO PDF Tools Demo [OK31-10 - Fife Creek Cowhorn Okra](#)

55 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of 8 to 12" long cowhorn shaped okra. This variety stays tender longer than other varieties. Great for making fried okra and gumbo. Excellent choice for home gardens. This variety was given to the Fife family by an elderly Creek Indian woman over 100 years ago. A 1900 heirloom variety from Jackson, Mississippi, USA.

[OK36-20 - Gold Coast Okra](#)

75 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of 6" long spineless green okra. Great for making fried okra and gumbo. Drought tolerant. Heat tolerant. Tolerant to root-knot nematodes. Excellent choice for home gardens. A variety from Louisiana, USA. United States Department of Agriculture, PI 675123.

[OK38-10 - Gurney's Gumbo Okra](#)

56 days. *Abelmoschus esculentus*. (F1) Plant produces high yields of dark green okra. This variety has an incredible improvement over other varieties. The spineless pods stay tender much longer allowing you more time to harvest. The pods are very flavorful. Can be roasted, grilled, tossed into stir-fries, and used in Gumbo and Jambalaya. Can be harvested from mid-summer until frost. Excellent choice for home gardens.

OK14-20 - Hill Country Red Okra

70 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of 3 to 5" long green and red okra. The pods are green with red tips and red ribs. Great for making fried okra, soups, stews, and gumbo. An excellent pickling variety. Drought tolerant. Excellent choice for home gardens. A heirloom variety from Texas, USA. Certified Organic

OK18-20 - Jade Okra

70 days. *Abelmoschus esculentus*. Open Pollinated. Early producing plant produces high yields of dark green okra. The okra stays tender up to 6" long.
