

Okra

[OK15-20 - Alabama Red Okra](#)

55 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of red okra. This okra is delicious fried, and adds color and unique flavor added to salads when young. Makes some of the best fried okra. Harvest regularly when 4 to 6" long. A heirloom variety from Alabama, USA. Excellent choice for home gardens.

[OK35-20 - Beck's Big Buck Okra](#)

85 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces high yields of large green okra. The pods are remarkably tender and delicious. Harvest pods when they are young and tender. It is also known as the Snapping Okra because of the way it snaps easily off the plant when ready to harvest. Excellent choice for home gardens. A heirloom variety from Germany. Certified Organic.

[OK16-20 - Burmese Okra](#)

58 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of 7 to 12" long light green okra. The pods are green and turn creamy yellow green when mature. Large pods are tender, spineless, and very flavorful. At 4 to 10" long they are tender, sweet, and spineless enough to be eaten raw or added to salads. A great pickling variety. A favorite used in restaurants. Excellent choice for home gardens and specialty market growers. A heirloom variety from Burma, now known as Myanmar. Certified Organic

[OK19-20 - Cajun Jewel Okra](#)

53 days. *Abelmoschus esculentus*. Open Pollinated. Early producing plant produces high yields of 7 to 8" long okra. It is a spineless variety that is great for fried okra and making gumbo. Popular in the Southern parts of the USA. Excellent choice for home gardens and market growers. A 1950s heirloom variety from the USA. Certified Organic

[OK4-20 - Clemson Spineless Okra](#)

1939 All-America Selections Winner!

56 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces heavy yields of flavorful 9" long dark green okra. It is still the most popular variety on the market. Leaves are spineless making it easier to harvest. Best if picked when 3" long. Used in making fried okra, gumbo, soups, stews, and meats dishes. Excellent choice for home gardens and market growers. A heirloom variety. United States Department of Agriculture, NSL 26508.

[OK13-20 - Cow Horn Okra](#)

60 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces high yields of 14" long okra. The large pods remain spineless and tender up to 10" long, but are best when the pods are picked at 6" long. Great for making fried okra and gumbo. Excellent choice for home gardens and market growers. A heirloom variety dating back to pre-1865. Certified Organic

OK9-20 - Dwarf Long Green Pod Okra

50 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces heavy yields of 7 to 8" long okra. This spineless variety produces earlier and higher yields than other varieties. A great choice for Northern growers because it doesn't require as long of a hot growing season. Suitable for Southern and Northern regions. Excellent choice for home gardens and market growers.

OK5-20 - Emerald Okra

55 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces heavy yields of 6 to 8" long dark green okra. The pods are thick walled, smooth, tender, and spineless. Stays tender even when very large. Best to harvest when 4" long. Retains color when frozen or canned. Perfect for soups, stews, fried, or boiled. Also known as Emerald Green Velvet Okra. Excellent choice for home gardens and market growers. A 1950 heirloom variety developed by the Campbell Soup Company, Riverton, New Jersey, USA. United States Department of Agriculture, PI 675122

OK31-20 - Fife Creek Cowhorn Okra

55 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of 8 to 12" long cowhorn shaped okra. This variety stays tender longer than other varieties. Great for making fried okra and gumbo. Excellent choice for home gardens. This variety was given to the Fife family by an elderly Creek Indian woman over 100 years ago. A 1900 heirloom variety from Jackson, Mississippi, USA.

OK36-20 - Gold Coast Okra

75 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of 6" long spineless green okra. Great for making fried okra and gumbo. Drought tolerant. Heat tolerant. Excellent choice for home gardens. A variety from Louisiana, USA. United States Department of Agriculture, PI 675123. Disease Resistant: N.

OK38-10 - Gurney's Gumbo Okra

56 days. *Abelmoschus esculentus*. (F1) Plant produces high yields of dark green okra. This variety has an incredible improvement over other varieties. The spineless pods stay tender much longer allowing you more time to harvest. The pods are very flavorful. Can be roasted, grilled, tossed into stir-fries, and used in Gumbo and Jambalaya. Can be harvested from mid-summer until frost. Excellent choice for home gardens.

OK14-20 - Hill Country Red Okra

70 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces good yields of 3 to 5" long green and red okra. The pods are green with red tips and red ribs. Great for making fried okra, soups, stews, and gumbo. An excellent pickling variety. Drought tolerant. Excellent choice for home gardens. A heirloom variety from Texas, USA. Certified Organic

OK18-20 - Jade Okra

70 days. *Abelmoschus esculentus*. Open Pollinated. Early producing plant produces high yields of dark green okra. The okra stays tender up to 6" long. Great for making fried okra, soups, stews, and gumbo. Excellent choice for home gardens. Developed in 1991 by the University of Arkansas, Arkansas, USA. Certified Organic

OK30-20 - Jambalaya Okra

50 days. *Abelmoschus esculentus*. (F1) This extra early maturing plant produces high yields of 6 to 7" long shiny dark green okra. Great for making fried okra, soups, stews, gumbo, and casseroles. This compact plant is just the right size for a home garden. Suitable for containers. Excellent choice for home gardens.

ELECTRONIC CATALOG

[OK8-20 - Lee Okra](#)

50 days. *Abelmoschus esculentus*. Open Pollinated. Semi dwarf plant produces good yields of 7 to 8" long dark green okra. Great for making fried okra, soups, stews, gumbo, and casseroles. Suitable for container gardening. Excellent choice for home gardens. Developed by University of Arkansas, USA.

[OK25-20 - Perkins Dwarf Long Green Okra](#)

55 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces high yields of flavorful 8 to 9" long okra. An extra large pod that is tender and very delicious. Great for making fried okra, soups, stews, gumbo, and casseroles. Perfect type canning. Excellent choice for home gardens. A heirloom variety.

[OK2-20 - Red Burgundy Okra](#)

1988 All-America Selections Winner!

60 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces high yields of 6 to 8" long burgundy colored okra. This variety has deep red colored stems with green leaves and would be great for an ornamental plant. Pods can be harvested up to 8" long and still remain tender. Great for making fried okra, soups, stews, gumbo, and casseroles. Excellent choice for home gardens and specialty market growers. Developed by Leon Robbins at the Clemson University, Clemson, South Carolina, USA.

[OK22-20 - Silver Queen Okra](#)

80 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces huge yields of 7" long whitish-green okra. Very tender when picked young. Great for making fried okra, soups, stews, gumbo, and casseroles. Excellent choice for home gardens.

[OK26-20 - White Velvet Okra](#)

65 days. *Abelmoschus esculentus*. Open Pollinated. Plant produces high yields of 6 to 8" long flavorful light green okra. Great for making fried okra, soups, stews, gumbo, and casseroles. A long time Southern favorite in the United States. Excellent choice for home gardens. It was first introduced in 1890 in the Henderson & Company seed catalog. A 1930s heirloom variety from Alabama, USA. United States Department of Agriculture, PI 675125.
