Phyto - Phytosanitary Certificate

A Phytosanitary Certificate is required for seeds sent to Australia only in bulk quantities, and to Japan in any size quantity. Orders sent to Japan also require a testing fee, before a certificate can be issued by the USDA.

TESTING - Phytosanitary Certificate Testing Fees

To obtain Phytosanitary Certificate for an order shipped to Japan, requires that the seeds be tested by a laboratory before the USDA can issue a certificate. This fee charged is for each type of seed ordered. For example, if you order five different types (category) of seeds, you would multiple 5 times \$100 (or enter quantity of 5 for ordering purpose).
