FZ1 - Bulbs Alive

An organic fertilizer that helps produce stronger plants and bigger crops. Apply a tablespoon of Bulbs Alive twice each season for healthier plants. Side dress Bulbs Alive after seedlings emerge, then use it as a side-dressing when plants start active growth. Research has shown that Bulbs Alive produces 150% greater yield than without any feeding. It is great for all types of bulb type plants - flowers, herbs, and vegetables! Your plants will produce more blossoms, set higher yields, and produce larger plants. Package: 1/4 lb

ON14-100 - Tokyo Long White Bunching Onions

65 days. Allium cepa. Plant produces good yields of Japanese type bunching onions. Onions have stiff shanks and are mostly single stems. A sweet and mild non-bulbing onion. Looks like a long slim leek. Excellent for salads and garnishes. Suitable for summer and fall harvests. Plant Height: 30" tall. pk/100

ON25-100 - Evergreen White Bunching Onions

120 days. Allium cepa. Plant produces very long and slender bunching onions. Onions have white shanks and white skin making it a very attractive scallion for gourmet dishes. A high quality plant which are slow to bolt. Hardy plants winter over for spring crop. This variety is exclusively grown for green bunching onions. Great in salads! Disease Resistant: Pink Root Smut. Suitable for Northern and Southern regions. pk/100

ON31-100 - Red Baron Bunching Onions

110 days. Allium cepa. Plant produces beautiful red bunching onions. The first red bunching onion to stay red through all stages of growth and wide ranges of temperature. Excellent for salads. pk/100

ON42-100 - Southport 404 Bunching Onions

110 days. Allium cepa. Plant produces good quality bunching onions. It has dark green foliage and long white stalks with little bulbing. Excellent for salads and garnishes. pk/100

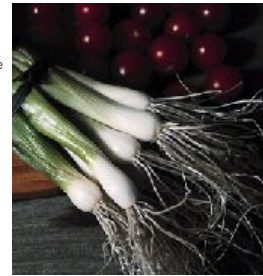

ON48-100 - Crimson Forest Bunching Onions

60 days. Allium cepa. Plant produces good quality dark red to purple bunching onions. Excellent for salads and garnishes. pk/100

ON11-100 - Southport White Bunching Onions

65 days. Allium cepa. Plant produces excellent yields of white bunching onions. Grown for mild and delicious scallions. They have clear white stems, slightly bulbed, with good strong tops. They mature early and should be harvested promptly. Sow any time from very early spring to mid-summer. pk/100

ON17-100 - White Spear Onions

70 days. Allium cepa. Plant produces good quality 7" long stalks that never form to bulb. Can be left in winter all year around as tops are weather tolerant. Very easy to grow. Sow in spring or fall. pk/100

ON27-100 - He Ski Ko Bunching Onions

66 days. Allium cepa. Plant produces very flavorful bunching onions (does not form bulbs). Excellent for spring or late summer harvests. Easy to grow. Suitable for home garden or market growers. Disease Resistant: YD.Smut, PR, Thrips. pk/100

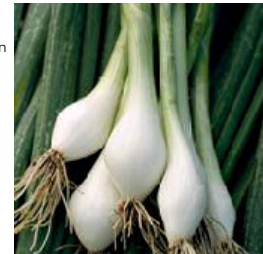

ON41-100 - K 99 Bunching Onions

NEW 70 days. Allium cepa. Plant produces good quality bunching onions. An improved Southport variety. Excellent for salads and garnishes. pk/100

ON43-100 - White Lisbon Bunching Onions

60 days. Allium cepa. Plant produces good quality bunching onions. This variety can be used in greenhouse. It has dark green foliage and long white stalks that hold up well after harvest. Excellent for salads and garnishes. A heat and cold resistant variety. Best for spring planting, but also good for fall and winter planting. pk/100

ON5-100 - Ishikura Bunching Onions

66 days. Allium cepa. Plant produces very flavorful bunching onions. Excellent for spring or late summer harvests. Easy to grow. A variety that has improved long distance shipping qualities. Suitable for home garden or market growers. pk/100
