

Corn

[CN63-50 - Rio Grande Blue Corn Seeds](#)

95 days. Zea mays. Open Pollinated. Rio Grande Blue Corn. The plant produces good yields of 12" long beautiful dark blue corn. Can be ground to make blue flour and blue cornmeal, and also to make blue corn chips. Drought Tolerant. An excellent choice for home gardens. It is an heirloom variety from the Hopi Native American tribe in Rio Grande Pueblos, New Mexico.

[CN62-50 - Shades of Blue Corn Seeds](#)

110 days. Zea mays. Open Pollinated. Shades of Blue Corn. The plant produces good yields of 5" long beautiful mixed shades of light and dark blue corn, including sky blue and violet blue. It has attractive

husks that are both white and red. Great for making popcorn. An excellent choice for home gardens.

[CN58-50 - Shaman's Blue Corn Seeds](#)

112 days. Zea mays. (F1) Shaman's Blue Corn. The plant produces high yields of high-quality 7 to 9" long dark blue corn. Ears of popping corn that have light purplish-blue kernels with husks that dry white. It offers eye-catching dark blue kernels that pop up tender and white popcorn. It pops up better too than other varieties. Originally domesticated by Meso Americans. An excellent choice for home gardens. An heirloom from the Andes Mountains of Peru.
