

Peppers (Hot)

[HP111-10 - Hot Lemon Pepper Seeds](#)

70 days. Capsicum annum. Open Pollinated. Hot Lemon Pepper. This early maturing plant produces good yields of 4" long by ½" wide wrinkled hot peppers. Peppers are hot and turn from light green to pure lemon yellow when mature. The plant has green stems, green leaves, and white flowers. A hot spicy pepper with a unique flavor. Excellent for making hot sauce and for drying. An heirloom variety from Ecuador. Scoville Heat Units: 30,000.
