

## Pumpkins

### [PM10-10 - New England Pie Pumpkins](#)

105 days. Cucurbita pepo. Open Pollinated. The plant produces 4 to 7 lb dark orange pumpkins. The flesh is dry and stringless, making it one of the best for pumpkin pies. A good variety for the home garden. An excellent choice for home gardens, farmer's markets, market growers, and open field production. Grown Organically.
