

## Year 1950

### WM6-20 - Congo Watermelon Seeds

#### **1950 All-America Selections Winner!**

95 days. Citrullus lanatus. Open Pollinated. Congo Watermelon. The plant produces good yields of 35 lb watermelons. It has a very tough rind that will resist bruising. This variety has very delicious sweet red flesh. Suitable for home garden and market growers. United States Department of Agriculture, NSL 5271. A variety from the USA. Disease Resistant: A.

### BN13-50 - Topcrop Bean Seeds

#### **1950 All-America Selections Winner!**

50 days. Phaseolus vulgaris. Open Pollinated. Topcrop Bean. This early maturing bush plant produces heavy yields of very flavorful straight 5 ½" long by ½" wide green beans. This high quality variety was developed by the USDA and is noted for its flavor and disease resistance. The bean is stringless and perfect for canning and freezing. An excellent choice for home gardens. United States Department of Agriculture, PI 549568. Disease Resistant: BCMV (NY 15 and PV-1).
