

Onions & Shallots

SH3-50 - Ambition Shallots

120 days. Allium cepa. (F1) The plant produces high yields of 1 ½ to 2" diameter shallots. Perfect for salad dressings, sauces, meats, and soups. Stores well, they'll store for 60 to 90 days, so you can expect storage through spring. With this French shallot, you can get nearly 2 dozen shallots from every seedling you transplant. An excellent choice for home gardens and specialty market growers. A long day variety.

ON36-250 - Barletta Onion Seeds

70 days. Allium cepa. Open Pollinated. Barletta Onion. The plant produces excellent yields of beautiful small pearl onions. Excellent served whole as a cocktail onion, in sweet-sour sauce, boiled, pickled, whole in soups, and roasted. It is also perfect for shish-ka-bobs and grilled with your favorite steak. Excellent choice for home gardens and specialty market growers. United States Department of Agriculture, PI 342941. A short-day heirloom variety from Italy.

ON34-250 - Bianca Di Maggio Onion Seeds

80 days. Allium cepa. Open Pollinated. Bianca Di Maggio Onion. The plant produces beautiful small 3" wide white onions. Very sweet and mild. It is best when harvested when onions are small. Perfect for soups, salads, pickling, cooking, gourmet dishes, or grilling as shish kabobs. These delicious small white onions command a high price at specialty markets. August to October sowing is possible where winter is moderate. An excellent choice for home gardens and specialty market growers. A long day variety from Italy.

ON22-250 - Crystal White Wax Onions

95 days. Allium cepa. Open Pollinated. The plant produces excellent yields of small white pearl onions. The classic Cocktail Onion! Perfect for pickling or cocktails. Also great for sandwiches, stews, and soups. Pick when onions are 1 to 1 ½" in diameter. Suitable for Southern regions of the country, especially Texas and Southern California. An excellent choice for home gardens, market growers, and open field production. A short-day variety is suitable for Southern regions. United States Department of Agriculture, PI 546166. Disease Resistant: PR.

ON25-250 - Evergreen White Bunching Onion Seeds

120 days. Allium cepa. Open Pollinated. Evergreen White Bunching Onion. The plant produces excellent yields of bunching onions. It has white shanks and white skin making it a very attractive scallion for gourmet dishes. Perfect for salads and garnishes. Slow to bolt. Hardy plants winter over for spring crop. May be handled as a perennial by dividing the clumps the second summer to produce a new crop. This variety is exclusively grown for green bunching onions. Suitable for both Northern and Southern regions. An excellent choice for home gardens and market growers. Disease Resistant: PR.

ON24-250 - Purplette Onions

60 days. Allium cepa. Open Pollinated. This early maturing plant produces excellent yields of small burgundy onions. Best when harvested when very young as bunching onions or when golf ball size. The onion is a glossy rich burgundy color changing to a pastel pink color when cooked or pickled. Perfect in cooked dishes, salads, and pickled. An excellent choice for home gardens and specialty market growers. A short-day variety.

ON45-50 - Red Bull Onions

114 days. Allium cepa. (F1) The plant produces excellent yields of large red onions. It has deep red skins and interior red rings. Great for salads, hamburgers, and sandwiches. Stores well. An excellent choice for home gardens and market growers. A long day variety.

ON8-250 - Red Creole Onion Seeds

110 days. Allium cepa. Open Pollinated. Red Creole Onion. The plant produces excellent yields of sweet red onions. Perfect for salads and sandwiches. They are great additions to salsas, Cajun foods, and other zesty dishes. Stores well. An excellent choice for home gardens. A short-day heirloom variety was developed in 1962 by the Dessert Seed Company. United States Department of Agriculture, PI 662428. Disease Resistant: PR.
