

AAS Winners Watermelons

WM6-20 - Congo Watermelons

1950 All-America Selections Winner!

95 days. Citrullus lanatus. Open Pollinated. The plant produces good yields of 35 lb watermelons. It has a very tough rind that will resist bruising. This variety has very delicious sweet red flesh. Suitable for home garden and market growers. United States Department of Agriculture, NSL 5271. Disease Resistant: A.

WM74-5 - Harvest Moon Watermelons (Seedless)

2013 All-America Selections Winner!

90 days. Citrullus lanatus. (F1) The plant produces high yields of 18 to 20 lb elongated round watermelons with dark green rind with freckles and splotches of bright yellow, similar to the Moon and Stars Watermelons. It has many advantages - it is seedless, ripens earlier, has higher yields, shorter vines, and tastes better! It has crisp pinkish-red red flesh. It is the first-ever hybrid, triploid seedless watermelon to ever win the All-America Selection Award! This is perfect for picnics. To produce seedless watermelons, a pollinator is required. We suggest growing Sugar Baby watermelons alongside Harvest Moon as a pollinator. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and commercial production.

Seedless Watermelons Require Special Attention. The seeds must be started indoors and the Miracle-Gro Seed Starting Mix must be kept at a constant 85 F. Start the seeds at the same time you plant the Sugar Baby pollinator.
