

# Eggplants

## EG41-50 - Red Ruffled Eggplants

75 days. Solanum melongena. Open Pollinated. The plant produces good yields of small 2 to 3" round bright red eggplants. Perfect for grilling, frying, stuffing, baking, and pickling. Well known in Asian cuisine and used in stir-fries. It is not bitter unless allowed to ripen to the red stage. Picked green and prepared as you would any other eggplant. They are unusual, attractive, and very tasty. Used extensively in Asian dishes and Vietnamese cooking. Also, known as Hmong Red Eggplant and Miniature Pumpkin Eggplants. An excellent choice for home gardens and specialty market growers. A variety from Thailand.

## EG44-20 - Thai Long Green Eggplants

85 days. Solanum melongena. Open Pollinated. The plant produces good yields of beautiful 10 to 12" long light green eggplants. One of the best-tasting eggplants. The white flesh is mild and flavorful. The tender skin does not require peeling. Used extensively in Thai dishes. Drought Tolerant. Suitable for container gardening. Excellent choice for home gardens and market growers. United States Department of Agriculture, PI 666079. An heirloom variety from Thailand.
