

Leeks

LK6-100 - Carantan Leeks

95 days. *Allium ampeloprasum*. Open Pollinated. The plant produces heavy yields of leeks. The plant has dark green leaves and white tender stalks. It has a delicious mild flavor. Used in soups, stews, and salads. Also known as Large Rouen Leek. This is a vigorous and fast-growing variety. Plant for fall or winter harvest. Excellent choice for home gardens. An 1879 heirloom variety from France.
