

Cumin

[HB28-100 - Black Cumin](#)

65 days. *Nigella sativa*. Annual. The plant produces good yields of black aromatic seeds that are used in the Middle East and Indian cooking. Also used for making Russian rye bread and rolls. Seeds can be ground and used like Black Pepper.

[HB133-100 - Cumin](#)

95 days. *Cuminum cyminum*. Annual. Open Pollinated. The plant produces pungent flavor seeds. Used in cheese, bread, beans, rice, sausages, and pickling. Excellent in Mexican, Indian, and Middle Eastern dishes. Used in Curry Powder. An excellent choice for home gardens.
