

## Year 1966

### SQ104-20 - Gold Nugget Squash

#### **1966 All-America Selections Winner!**

85 days. Cucurbita pepo. Open Pollinated. This bush-type plant produces good yields of 1 to 3 lb pumpkin-shaped buttercup squash. The orange flesh is very sweet and used as a substitute for sweet potatoes. It is usually steamed or baked and added to soups, stews, curries, and desserts. It keeps well too. Plant close together and it can be a real space saver. Suitable for small gardens. An excellent choice for home gardens. A winter squash variety.
