

# Kohlrabi

## [KO3-100 - Gigante Kohlrabi Seeds](#)

130 days. Brassica oleracea. Open Pollinated. Gigante Kohlrabi. The plant produces excellent yields of huge kohlrabi bulbs. The creamy white bulbs are very flavorful, very mild, and very tender with no woody taste. They can be eaten raw, used in slaws, cooked, or used in Hungarian soups. These huge kohlrabies can reach 10 lbs. Impress your neighbors by growing a world record size kohlrabi. It was a former Guinness World Record Holder. An excellent choice for home gardens. A Czechoslovakian heirloom.

## [KO7-25 - Kossak Kohlrabi Seeds](#)

80 days. Brassica oleracea. (F1) Kossak Kohlrabi. The plant produces excellent yields of incredibly large kohlrabi bulbs. The bulbs can grow up to 10" wide, up to 10 lbs. It is very sweet, very flavorful, and very tender with no trace of woodiness. They can be eaten raw, used in coleslaw, cooked, or used in Hungarian soups. Impress your neighbors by growing a World Record Giant Kohlrabi. Keeps well, and has good storage variety. It is an excellent choice for home gardens.
