

Beets

[BT12-100 - Cylindra Beet Seeds](#)

60 days. Beta vulgaris. Open Pollinated. Cylindra Beet. The plant produces good yields of high-quality 8" long by 2" wide carrot-shaped beets. Beets are very sweet and have dark red flesh. This cylindrical beet gives more uniform slices than round beets. Excellent canning variety. Also known as Butter Slicer and Formanova. The roots tend to push upwards out of the ground as they grow. An 1880s heirloom variety from Europe. An excellent choice for home gardens. United States Department of Agriculture, NSL 31342. Disease Resistant: CLS, Ccu.
