

Cucumbers

[CU20-20 - Bush Crop Cucumbers](#)

55 days. Cucumis sativus. (F1) This compact bush plant produces high yields of 6 to 8" green cucumbers. They are crisp, tender, and flavorful. Excellent in salads or for making dills or fancy sweet pickles. Bush cucumbers produce very nice straight cucumbers. It grows very short vines, only 1 to 2 feet long, and is one of the best varieties for container gardens and small gardens. An excellent choice for home gardens. Disease Resistant: Ccu.

[CU5-20 - Bush Pickle Cucumbers](#)

45 days. Cucumis sativus. (F1) This compact plant produces very flavorful 4 to 5" long green cucumbers. One of the best variety for making crisp whole dill pickles. If you make your own pickles, you have to try this variety! Great for containers or small gardens. An excellent choice for home gardens.

[CU41-20 - Little Leaf Cucumbers](#)

57 days. Cucumis sativus. Open Pollinated. This compact plant produces high yields of 3 to 5" long emerald green colored cucumbers. It may be the highest-yielding pickling cucumber on the market today, producing 25 to 30 cucumbers per plant! An excellent cucumber for salads and pickling. It is a parthenocarpic variety and no male pollen is needed, so even if bees are scarce you'll still get a bumper crop. Perfect for container gardening. Does well under stress and adverse weather conditions. Heat tolerant, drought-tolerant, and cool temperatures. One of the most Disease-Resistant cucumbers on the market. An excellent choice for home gardens, hydroponics, greenhouses, market growers, and open field production. Developed in 1991 by the University of Arkansas, USA. Disease Resistant: A, ALS, BW, Ccu, CMV, DM, PM.

[CU124-10 - Pick a Bushel Cucumbers](#)

2014 All-America Selections Winner!

60 days. Cucumis sativus. (F1) Semi bush plant produces high yields of 3 to 6" long green cucumbers. These cucumbers can be picked when they are 3" long for gherkin size or left to grow into 6" long for use in salads. They are tasty with no bitterness. The semi-bush vines grow only 24" long, so they are great for growing in patio containers as well as in small gardens. An excellent choice for home gardens. Heat tolerant. Disease Resistant: Ccu, CGMMV, CMV.

[CU98-10 - Salad Bush Cucumbers](#)

1988 All-America Selections Winner!

57 days. Cucumis sativus. (F1) This early maturing compact bushy plant produces good yields of 8" long by 2 1/4" wide glossy dark green cucumbers. Cucumbers are tender and crisp. This small plant is the perfect variety for growing indoors in containers and small gardens as it only uses 2 square feet of space. Also grows well in hanging baskets. An excellent choice for home gardens. Disease Resistant: Ccu, CMV.

[BK2 - Saving Container Plants](#)

Saving Container Plants. Overwintering techniques for keeping tender plants alive year after year. Includes step by step instructions of what to do to keep your plants alive during the winter. Discusses diseases, insect issues, hardening off conditions, and how to store plants outdoors and indoors. This book is a must for small gardens, patios, raised gardens, and container gardening.

CU3-20 - Tasty Green Cucumbers

62 days. Cucumis sativus. (F1) The plant produces heavy yields of 18 to 20" long dark green cucumbers. It is burpless with no bitterness, crispy, juicy, easy to digest, and very delicious! This variety is the world's most popular cucumber. It produces early in the season and continuously produces heavy yields all season long. Grows well in the South and tolerates high temperatures and humidity. Also great in raised beds or in containers. Suitable for greenhouse production too. For home gardens and greenhouse production, best if grown on trellis or stakes. Does well even under adverse weather conditions. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: DM, PM.
