

# Mustard

## MU4-500 - Giant Red Mustard

40 days. Brassica juncea. Open Pollinated. This early maturing plant produces good yields of purplish-red mustard leaves. The plant has large thick and tender leaves. They are very flavorful with a spicy taste. They have purple-red leaves on the top and light green underneath. Used in salads or cooked. Great in salads, steamed or stir-fried. Makes fine pickled mustard greens. Slow to bolt. Color intensifies in cooler temperatures.

Very winter hardy. An excellent choice for home gardens. A variety from Japan.
