It shows good tolerance to cooler temperatures in late fall and overwintered plantings. Cold Tolerant. It is an excellent choice for home gardens, farmer's markets, and market growers.

[HP651-10 - Barbados Pepper Seeds](#)

100+ days.

Capsicum chinense. Open Pollinated. Barbados Pepper Seeds. The plant produces high yields of 1 1/4" long by 1 1/4" wide wrinkled Habanero hot peppers. Peppers are very hot, have medium thick flesh, and turn from light green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for making salsa, hot sauce, and seasoning powder. Also known as Bonney Pepper. A rare variety from Barbados.

SW14-100 - Barese Swiss Chard

28 days. Beta vulgaris. Open Pollinated. This early maturing plant produces good yields of small glossy dark green leaves with slightly curled edges. Usually used fresh in salads or lightly steamed. It can be grown as baby Swiss Chard and harvested and sold as whole plants. Suitable for hydroponics gardening. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: BR.

HP2337-20 - Barker's Hot Peppers

85 days.

Capsicum annum. Open Pollinated. The plant produces high yields of 7" long by 2" wide Anaheim hot peppers. Peppers are medium-hot, have medium-thick flesh, and turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. Excellent for stuffing, frying, roasting, stir-fries, and canning. It is the hottest of the Anaheim type pepper. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

ON36-250 - Barletta Onion Seeds

70 days. Allium cepa. Open Pollinated. Barletta Onion. The plant produces excellent yields of beautiful small pearl onions. Excellent served whole as a cocktail onion, in sweet and sour sauce, boiled, pickled, whole in soups, and roasted. It is also perfect for shish-ka-bobs and grilled with your favorite steak. Excellent choice for home gardens and specialty market growers. United States Department of Agriculture, PI 342941. A short day heirloom variety from Italy.

GN4-100 - Barley Seeds

100 days.

Hordeum vulgare. Open Pollinated. Barley. The plant produces high yields of barley. This is a good quality cereal grain for milling and cooking. Also great for grazing in pastures. This is an improved disease-resistant variety. Sow seeds in spring for a late-summer harvest for seeds production and sow in spring or summer for cover crop planting. Disease Resistant: Ccu.

Seeding Rate: 85 lbs per acre

TM515-20 - Basinga Tomato

80 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 8 oz pale yellow tomatoes with just a tinge of pink on the blossom end. These tomatoes are very sweet and have a tangy flavor. Cooks down into a sweet delicate sauce. A low acid tomato. Excellent choice for home gardens. United States Department of Agriculture, PI 629218. Indeterminate.

TM350-10 - Basket Vee Tomato

70 days. Solanum

lycopersicum. Open Pollinated. This early maturing bush-type plant produces high yields of 8 to 9 oz red tomatoes. They have thick flesh and are very flavorful. Perfect for sandwiches, salads, and slicing. Crack-Resistant. An excellent choice for home gardens and market growers. A variety developed in Canada. Disease Resistant: V, F. Determinate.

ED1-750 - Batavian Full Hearted Endive

1934 All-America Selections Winner!

90 days. Cichorium endivia. Open Pollinated. The plant produces good yields of 10 to 12" tightly packed heads of dark green endive leaves. The inner leaves are very tasty and creamy yellowish-white. It can be eaten fresh as part of a green salad, sautéed, or chopped and added into soups and stews. Also makes an excellent garnish. Excellent choice for home gardens. An heirloom variety. United States Department of Agriculture, NSL 31573.

HB193-10 - Bay Laurel Seeds

Laurus nobilis. Perennial. Open Pollinated. Bay Laurel. This evergreen plant produces high yields of glossy green bay leaves. Bay leaves are the foundation of fine cooking and are used with soups, stews, meats, fish, poultry dishes, and spaghetti sauce. Can be used fresh or dried for robust spice. The essential oil from leaves is used to alleviate arthritis and rheumatism and to treat earaches and high blood pressure. Also known as Sweet Bay and Bay Leaves. The small shrub plant is frost-sensitive. Suitable for containers that can be moved indoors during winter. An excellent choice for home gardens, farmer's markets, and market growers A variety from Italy.

Note: Germination tends to be slow, but will germinate faster in warmer temperatures.

TM410-20 - Beam's Yellow Pear Tomato

80 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 1 ½" bright yellow pear-shaped tomatoes. A great-tasting tomato. Perfect for fresh eating right off the vine or in salads. Excellent choice for home gardens. A variety from the USA. Indeterminate.

TM420-20 - Baxter's Early Bush Tomato

72 days. Solanum

lycopersicum. Open Pollinated. This early maturing compact plant produces heavy yields of 2 oz red cherry tomatoes. Perfect for salads. This variety produces tomatoes 7 to 10 days earlier than other varieties. Does well under adverse weather conditions. Good storage type tomato. The plant does not require staking or caging. Crack Resistant. Excellent choice for home gardens. Determinate.

BR61-50 - BC 1611 Broccoli Seeds

33 days. Brassica

oleracea. (F1) BC1611 Broccoli. This early-maturing plant produces good yields of bright green broccoli. It is very flavorful. The stems are very tender and pickable at a longer length up to 8" for easier bunching. The plant has fewer leaves on the stems for minimal stripping during harvest. Easy to harvest. Suitable for spring and fall planting. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

TM797-20 - Beauty King Tomato Seeds

80 days. Solanum

lycopersicum. Open Pollinated. Beauty King Tomato. The plant produces good yields of 16 to 20 oz beefsteak tomatoes. They are yellow with red stripes. One of the most beautiful tomatoes around. Perfect for sandwiches, salads, and slicing. A great tomato for specialty markets and chefs. Excellent choice for home gardens and specialty market growers. A cross between Big Rainbow and Green Zebra. Developed by Brad Gates of Wild Boar Farm, Napa Valley, California, USA. Indeterminate.

[TM468-20 - Beauty Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Beauty Tomato. The plant produces high yields of 12 to 16 oz red beefsteak tomatoes. It has the old-fashioned tomato flavor and it has a beautiful tomato appearance. Perfect for sandwiches, salads, and slicing. Excellent choice for home gardens. United States Department of Agriculture, PI 451993. Indeterminate.

[OK35-50 - Beck's Big Buck Okra Seeds](#)

85 days.

Abelmoschus esculentus. Open Pollinated. Beck's Big Buck Okra. The plant produces high yields of large green okra. The pods are remarkably tender and delicious. Harvest pods when they are young and tender. It is also known as the Snapping Okra because of the way it snaps easily off the plant when ready to harvest. An excellent choice for home gardens. An heirloom variety from Germany.

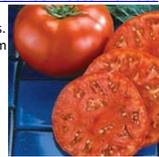

[OK23-10 - Beck's Gardenville Okra](#)

80 days. Abelmoschus esculentus. Open Pollinated. The plant produces heavy yields of okra. Very easy to grow. The pods are ready to pick when they snap off the stalks easily. Drought-Tolerant. An heirloom variety from San Antonio, Texas, USA.

[TM8-20 - Beefmaster Tomato](#)

80 days. Solanum

lycopersicum. (F1) The plant produces enormous yields of large 1 to 2 lb bright red beefsteak tomatoes. These high-quality tomatoes are sweet, meaty, and very flavorful. Perfect for sandwiches, salads, and slicing. The plant requires support, either staking or cages. Crack Resistant. One of the most disease-resistant tomato varieties available. An excellent choice for home gardens and market growers. Disease Resistant: V, F, N, A, St, TSWV. Indeterminate.

[TM744-20 - Beefsteak Determinate Tomato Seeds](#)

80 days. Solanum lycopersicum. Open Pollinated. Beefsteak Determinate Tomato. The plant produces good yields of extremely large 1 to 2 lbs red beefsteak tomatoes. They are solid, juicy, and meaty. Perfect for sandwiches, salads, and slicing. Suitable for hydroponics gardening. An excellent choice for home gardens. Disease Resistant: F, N. Determinate.

[TM9-20 - Beefsteak Indeterminate Tomato](#)

80 days. Solanum

lycopersicum. Open Pollinated. The plant produces good yields of extremely large 1 to 2 lb red beefsteak tomatoes. They are solid, juicy, and meaty. Perfect for sandwiches, salads, and slicing. An excellent choice for home gardens. United States Department of Agriculture, PI 644736. Disease Resistant: F, N. Indeterminate.

Indeterminate.

[CN9-50 - Bloody Butcher Corn Seeds](#)

105 days. Zea mays. Open Pollinated. Bloody Butcher Corn. The plant produces good yields of 8 to 12" long ears of red corn. There are 2 to 6 ears per stalk. These ears weigh approximately 1/2 pounds. It can be eaten fresh when young as corn on the cob or used to make flour and cornmeal. Withstands heavy winds, drought, and heat. Heat-Tolerant. Drought-Tolerant. An excellent choice for home gardens. An 1845 heirloom variety from Virginia, USA. United States Department of Agriculture, PI 230320.

[SN1-100 - Bloomsdale Long Standing Spinach](#)

45 days.

Spinacia oleracea. Open Pollinated. This early maturing plant produces heavy yields of very flavorful glossy dark green spinach leaves. This is the finest spinach variety available. It is sweet and tender with a rich flavor. A very slow bolting variety. An excellent choice for home gardens, greenhouses, market growers, and open field production. A 1908 heirloom variety developed by David Landreth, Delaware, USA. Bloomsdale was the home and farm of David Landreth. United States Department of Agriculture, NSL 6090.

[CN59-50 - Blue Corn Seeds](#)

100 days. Zea mays. Open Pollinated. Blue Corn. The plant produces good yields of 8" long ears of blue kernel corn. Blue Corn is primarily used to make tortillas and blue corn chips. Also used for decorations. Blue corn is grown mostly in the Southwestern part of the United States. An excellent heirloom variety for home gardens. United States Department of Agriculture, PI 420246.

[TM734-20 - Blue Fruit Tomato](#)

78 days.

Solanum lycopersicum. Open Pollinated. The plant produces good yields of 8 to 10 oz purplish-gray blue tomatoes. They have a robust sweet flavor. Perfect for sandwiches, salads, and slicing. A potato leaf variety. Excellent choice for home gardens. Indeterminate.

[CN38-50 - Blue Hopi Corn Seeds](#)

105 days. Zea mays. Open Pollinated. Blue Hopi Corn The plant produces good yields of 9" long ears of blue kernel corn. This blue corn is grown to make tortilla corn chips and blue corn flour. Makes beautiful decorations. Excellent choice for home gardens. A heirloom variety from the Hopi Indians in northern Arizona, USA. United States Department of Agriculture, NSL 232108.

[SQ90-20 - Blue Hubbard Squash](#)

120 days. Cucurbita maxima. Open Pollinated. The plant produces good yields of 20" long weighing up to 40 lb blue-gray hubbard squash. The high-quality fine textured bright orange-yellow flesh is very sweet. This giant squash can feed a large family gathering! Perfect for making pies and also for its large white sweet seeds which when deliciously roasted. A great New England Thanksgiving tradition favorite. Chef's top choice for restaurants. Stores well, up to 6 months. The average yield is 1 or 2 squash per plant. The vines will crawl all over the garden, so select a site in the garden where it can spread without affecting other plants. This is the original strain developed in 1909 by seed breeder J. H. Gregory. The seeds were given by a Captain aboard a ship from the West Indies. Suitable for home garden and market growers. A variety originally from South America. A winter squash variety.

[BN66-50 - Blue Lake Pole Bean Seeds](#)

72 days. Phaseolus vulgaris. Open Pollinated. Blue Lake Pole Bean. The plant produces good yields of 6" long green beans. This is one of the best pole beans on the market. Beans are very flavorful and green in color. Also known as Blue Lake FM1K Pole Bean. An excellent choice for home gardens. United States Department of Agriculture, PI 147398. A variety from the USA.

[SQ68-10 - Blue Hubbard New England Strain Squash Seeds](#)

110 days.

Cucurbita maxima. Open Pollinated. Blue Hubbard New England Strain Squash. The plant produces high yields of extra-large attractive blue-gray squash. This variety has flavorful deep yellow flesh which has a very good texture. Stores well up to 4 months. This is the New England strain of the Blue Hubbard Squash. An excellent choice for home gardens. A winter squash variety.

[BN50-50 - Blue Lake Bush 274 Bean Seeds](#)

58 days.

Phaseolus vulgaris. Open Pollinated. Blue Lake Bush 274 Bean. This small bush plant produces high yields of 6" long dark green beans. The beans are very flavorful and fiber-free. Excellent stir-fried, steamed, or sautéed. The plant continuously produces beans over the entire season. Does well even in adverse weather. An excellent choice for home gardens. An heirloom variety from the USA. Disease Resistant: BCMV (NY 15).

[TM939-20 - Blue Ribbon Tomato Seeds](#)

71 days. Solanum

Lycopersicon. (F1) Blue Ribbon Tomato. This early maturing plant produces good yields of very flavorful 10 to 15 oz red round tomatoes. It has a rich old-fashioned tomato flavor and is very juicy. It was developed to rival the size and great taste of the original Goliath but it is rounder, more uniform, and has stronger disease resistance. Perfect for sandwiches, salads, and slicing. An excellent choice for home gardens. Disease Resistant: ALS, F, FF, N, St, TMV. Indeterminate. A variety from the USA.

[TM811-20 - Blue Streaks Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Blue Streaks Tomato. The plant produces good yields of red tomatoes with a bluish crown. Perfect for sandwiches, salads, and slicing. An excellent choice for home gardens. Indeterminate. A variety from the USA.

[CB63-50 - Blue Vantage Cabbage Seeds](#)

72 days.
Brassica

oleracea. (F1) Blue Vantage Cabbage. This variety produces good yields of 3 to 4 lb blue-green cabbage. The plant is very uniform and holds its shape well. Good for making salads, slaws, stuffed cabbage, and cooked dishes. It has good wrapper leaves for making stuffed cabbage. It holds well in the field, withstands excess moisture, and is slow to split. Heat Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. Disease Resistant: BR, FY, TB.

[HB94-1000 - Blue Vervain](#)

85 days. Valeriana hastata. Perennial. Open Pollinated. The plant produces good yields of green leaves with purple blossoms. Flowers will bloom from summer until fall. A medicinal herb is used as a sedative, relaxant, nerve tonic, antispasmodic, and analgesic, for nervous, and respiratory problems. Also used in combination to combat hot flashes and other symptoms related to menopause. An excellent choice for home gardens.

[CB21-100 - Blues Chinese Cabbage Seeds](#)

57 days.
Brassica
rapa.
(F1)
Blues
Chinese

Cabbage. This early maturing plant produces good yields of Napa Chinese cabbage. The heads average 6 to 8 inches in diameter and weigh 4 to 4 1/2 lbs. The plant has green leaves with white ribs. Leaves are very tender, tasty, and delicious, excellent for cooking and pickling. Very slow to bolt. An excellent choice for home gardens and market growers. Disease Resistant: ALS, BR, BSR, DM, FY.

[TM877-20 - Blush Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 oz bright yellow cherry tomatoes with red stripes. These bi-color tomatoes have the shapes of large olives. They are sweet and very delicious. Perfect for salads and garnishes. Crack Resistant. They are ready to harvest when a pink blush appears over the golden yellow skin. Low acidity variety. An Artisan Series variety. Excellent choice for home gardens and specialty market growers. Developed by Fred Hempel of Baia Nicchia Farm in California, USA. Indeterminate.

[CB57-100 - Bobcat Cabbage Seeds](#)

90 days.

Brassica oleracea. (F1) Bobcat Cabbage. This variety produces good yields of 6 lb blue-green cabbage. The plant is very uniform and holds its shape well. Good for making salads, slaws, stuffed cabbage, and cooked dishes. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

[TM945-10 - Bobcat Tomato Seeds](#)

68 days. Solanum lycopersicum. (F1) Bobcat Tomato. This early maturing plant produces high yields of 10 oz shiny red tomatoes. Great tomato flavor with the right balance of sugars and acids. They have smooth skin and are very sweet, meaty, and juicy. Perfect for sandwiches, salads, and slicing. It is a sister of the Better Bush Tomato. The plant has dense foliage that provides excellent protection to the fruit. Suitable for large patio containers. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: F, FF, V, St, TMV. Determinate.

[CN32-50 - Bodacious Corn Seeds](#)

75 days. Zea mays. (F1)

Bodacious Corn. The plant produces good yields of 8" long ears of bright yellow corn. The ears have 16 to 18 rows of tender kernels. This is a very flavorful variety that holds its flavor well after harvest. It keeps its sugary taste longer than others without getting starchy. Great for fresh eating, freezing, and canning. Also known as Bodacious R/M Corn. This is a Sugary Enhanced Variety (se+). Tolerates cold weather conditions better than most varieties. Cold Tolerant. An excellent choice for home gardens, market growers, Farmer's Markets, and commercial and open field production. Disease Resistant: MDMV, NCLB, R, SW.

[HB154-500 - Bodegold Chamomile](#)

65 days. Matricaria recutita. Annual. Open Pollinated. The plant produces high yields of chamomile flowers. This improved German variety has higher oil, higher yields, and larger flowers. The plant has white daisy-like flowers with yellow centers. Chamomile is used as a calming herbal tea and stimulates the immune system. Also known to treat inflammation, stomach disorders, depression, anxiety, and insomnia. Can be used fresh or dried. Grows well in poor soil. Attracts beneficial insects and is suitable for borders and landscaping. An excellent choice for home gardens

[HP33-10 - Boldog Hungarian Spice Pepper Seeds](#)

85 days.

Capsicum annuum. Open Pollinated. Boldog Hungarian Spice Pepper. The plant produces good yields of 4 to 6" long hot peppers. Peppers are mildly hot, have medium-thin flesh, and turn from green to dark red. The plant has green stems, green leaves, and white flowers. This pepper has a richer taste than most paprika peppers. It has a sweet-spicy flavor. Excellent for making genuine Hungarian Paprika Powder. The town of Boldog is in a well-known spice pepper district northeast of Budapest, Hungary. An excellent choice for home gardens. A variety from Hungary. Scoville Heat Units: 1,000.

[HP479-20 - Bolivian Rainbow Pepper Seeds](#)

90 days. Capsicum annuum. Open Pollinated. Bolivian Rainbow Pepper. The plant produces good yields of small 3/4" long by 1/2" wide hot peppers. Peppers are hot, grow upright, have thin flesh, and turn from purple, to cream-yellow, to orange, to red when mature. The plant has green stems with purple tint, green leaves with purple tint, and purple flowers. A beautiful ornamental pepper plant with all color stages on the plant at the same time. The peppers are edible. Excellent drying pepper for making seasoning powder. A variety from Bolivia. Scoville Heat Units: 29,500.

[BT20-100 - Boltardy Beet Seeds](#)

56 days. Beta vulgaris. Open

Pollinated. Boltardy Beet. The plant produces good yields of large deep crimson red beets. They are ideal pickled with vinegar or used fresh in salads! Resistant to bolting. This is one of the most popular beet varieties in England. A variety from Holland. An excellent choice for home gardens. United States Department of Agriculture, PI 612340.

[LC15-750 - Bon Vivant Premium Blend Lettuce](#)

45 days. Lactuca sativa. Open Pollinated. The plant produces excellent yields of a mixture of gourmet leaf-type lettuce. The mixture contains bronze, green, and red lettuce of various sizes and shapes. Perfect for sandwiches, salads, and garnishes. An excellent choice for home gardens.

[HP1070-10 - Bonda Man Jacques Hot Peppers](#)

100+ days.

Capsicum chinense. Open Pollinated. The plant produces good yields of 2" long by 1 1/4" wide elongated Habanero hot peppers. Peppers are very hot, have medium-thick flesh, and turn from green to golden yellow when mature. The plant has green stems, green leaves, and white flowers. Excellent for making salsa, hot sauce, and seasoning powder. A variety from Guadelupe. Scoville Heat Units: 314,824.

[TM17-20 - Bonny Best Tomato](#)

72 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces heavy yields of 8 to 10 oz red tomatoes. It has the rich old-fashioned tomato flavor and is often judged as one of the 5 best tasting tomatoes! They are solid and meaty. It became one of the most respected canning varieties in America in the first half of the twentieth century. Also great for sandwiches, salads, slicing, salsas, and sauces. Suitable for Northern regions. Grows in clusters of 6 to 8 tomatoes. An excellent choice for home gardens, market growers, and open field production. An heirloom variety from the USA. United States Department of Agriculture, PI 639208. Disease Resistant: V, F, N. Indeterminate.

[TM699-20 - Boondocks Tomato](#)

80 days. Solanum

lycopersicum. Open Pollinated. The plant produces high yields of 1 to 2 lb deep pink beefsteak tomatoes. It has a superb, rich flavor, high in both sugar and acid. They are similar to the Brandywine Tomato. Perfect for sandwiches, salads, and slicing. A potato leaf variety. Excellent choice for home gardens. An heirloom variety from New York, USA. Indeterminate.

[CN64-50 - Boone County White Corn Seeds](#)

120 days. Zea mays. Open Pollinated. Boone County White Corn. The plant produces high yields of delicious sweet white corn. It has huge 9 to 11" long ears of white kernels. The ears have 18 to 22 rows of tender kernels. It is ground for flour, grits, and cornmeal. Boone County White' was once one of the most popular white corn varieties grown in the Southern Corn Belt. The plant is heavily leafed, which shades out unwanted weeds. It yields 70 to 90 bushels per acre. It was created in 1874 by Mr. James Riley of Boone County, Indiana. Papaver

somniferum. Annual. Open Pollinated. Breadseed Poppy. The plant produces excellent yields of poppy seeds. The seeds are used on bread, cakes, and bagels. In Middle Eastern delicacies, such as halva. The seeds also yield good-quality oil that is used in salads and to make soap, ointments, and paints. It has opium, morphine, and codeine, a source of to control pain, coughs, and diarrhea. An excellent choice for home gardens.

[TM882-10 - Brenda Tomato Seeds](#)

80 days. Solanum lycopersicum. (F1) Brenda Tomato. The plant produces high yields of 4 to 4 ½ oz red Roma-type tomatoes. It is very flavorful and perfect for salads. The plant is very strong and vigorous and has good foliage protecting tomatoes from sun-scald. An excellent choice for home gardens, market growers, and open field production. Disease Resistance: V, FF, TMV, TSWV, TYLCV. Determinate.

[CU129-20 - Brickyard Cucumber Seeds](#)

50 days. Cucumis sativus. (F1)

Brickyard Cucumber. This early maturing plant produces high yields of 8" long smooth dark green cucumbers. It has a strong vigorous vines. One of the most disease-resistant varieties. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: A, ALS, Ccu, CMV, DM, PM, PRSV, WMV, ZYMV.

[EG74-50 - Bride Eggplants](#)

75 days. Solanum melongena. (F1) The plant produces high yields of 7 to 8" long pink eggplants with white stripes. These beautiful eggplants are slender and straight. An oriental variety with tender white flesh which is perfect for shish kebabs and gourmet dishes. Excellent choice for home gardens and specialty market growers. Disease Resistant: BW.

[SW1-100 - Bright Lights Swiss Chard Seeds](#)

1998 All-America

[Selections Winner!](#)

42 days. Beta vulgaris. Open Pollinated. Bright Lights Swiss Chard. This early maturing plant produces good yields of flavorful burgundy and green leaves. The stems are full of rainbow colors of gold, orange, red, white, and yellow making it a very beautiful plant. Usually used fresh in salads or lightly steamed. Also used as a delightful garnish. Excellent choice for home gardens and specialty market growers.

[CT40-750 - Brilliance Carrot Seeds](#)

75 days. Daucus carota. Open Pollinated. Brilliance Carrot. The plant produces good yields of 8 to 10" long orange carrots. The carrot is smooth, cylindrical, and coreless with a beautiful deep red hue. It is high in beta-carotene. Great cooked or fresh in salads. Kids love them! Try growing orange, purple, red, white, and yellow carrots for a beautiful gourmet dish. Excellent choice for home gardens, farmer's markets, and market growers.

[CL5-100 - Brilliant Celeriac Seeds](#)

110 days. Apium

graveolens. Open Pollinated. Brilliant Celeriac. The plant produces large round crisp white celery-flavored roots. The interiors are white and flavorful. Excellent in soups, and stews, and used for making vegetable juice. Shredded and used in salads with greens. Also called Rooted Celery. Stores well. Harvest late in summer. Excellent choice for home gardens. United States Department of Agriculture, G 32727.

[BN19-25 - Broad Windsor Fava Bean Seeds](#)

75 days. *Vicia faba*. Open Pollinated. Broad Windsor Fava Bean. The plant produces good yields of very large beans. The pods contain large beans (as large as a quarter) which are used fresh or dried. Excellent freezing variety! Plants require cool conditions and are not heat tolerant. Cold Tolerant. An excellent choice for home gardens. An 1800s heirloom variety from England, United Kingdom. United States Department of Agriculture, PI 2375. Disease Resistant.

[SS2-500 - Broccoli Sprouting Seeds](#)

5 to 7 days. Brassica

oleracea. Open Pollinated. The plant produces excellent quality of delicious Broccoli sprouts. The sprouts have a mild broccoli flavor. Excellent in salads and other Asian dishes. One tablespoon of seed yields approximately 1 to 1 1/2 cups of sprouts. It is high in nutrients and has 50 times more cancer-fighting agents than full-grown broccoli. A variety from the USA.

[LC55-750 - Bronze Guard Lettuce](#)

75 days. *Lactuca sativa*. Open Pollinated. The plant produces excellent yields of beautiful bronze/green oak leaf-type lettuce. It stays flavorful, even when other lettuce is starting to get bitter. Does well in most regions and climates. Perfect for salads, garnishes, and gourmet dishes. Excellent choice for home gardens.

[LC27-750 - Bronze Mignonette Lettuce](#)

65 days.

Lactuca sativa. Open Pollinated. The plant produces excellent yields of flavorful butterhead lettuce with frilled leaves. The bronze-green leaves are delicious. Excellent for salads and garnishes. This small variety is ideal for baby lettuce. Heat Tolerant. Drought Tolerant. Slow to bolt. Excellent choice for home gardens and specialty market growers. An heirloom variety dating back to 1898. United States Department of Agriculture, PI 536746.

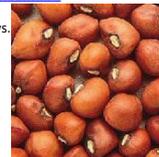

[TM288-20 - Brown Berry Tomato](#)

75 days. *Solanum lycopersicum*. Open Pollinated. The plant produces heavy yields of 1/4 to 3/4 oz brown cherry tomatoes. Just when you thought you saw every possible shade of cherry tomatoes, here comes an earthy brown cherry tomato. They are very sweet, juicy, and flavorful. Perfect for salads, snacks, garnishes, or culinary creations. An excellent choice for home gardens and specialty market growers. A variety from the Netherlands. Indeterminate.

[BN121-50 - Brown Crowder Cowpea Seeds](#)

60 days. Vigna

unguiculata. Open Pollinated. Brown Crowder Cowpeas. This early maturing bush type plant produces heavy yields of long pods of cowpeas. Brown cowpeas. An excellent choice for home gardens. United States Department of Agriculture, PI 293469.

CB42-250 - Brunswick Cabbage Seeds

90 days. Brassica oleracea. Open Pollinated. Brunswick Cabbage. The plant produces a large drumhead-type cabbage. The heads average 9 to 12 inches in diameter and weigh 6 to 9 lbs. Widely used for making sauerkraut. An excellent late-season variety. Very cold hardy! Cold Tolerant. Stores well. Excellent choice for home gardens and market growers. United States Department of Agriculture, PI 261600. A German heirloom variety dating back to 1924.

HP2057-20 - Bubba Jalapeno Hot Peppers

85 days.

Capsicum annum. (F1) The compact plant produces high yields of 3 1/2" long by 1" wide Jalapeno peppers. Peppers are medium hot, have thick flesh, and turn from shiny green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for fresh markets and processing. Suitable for containers. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Scoville Heat Units: 20,000.

GN1-200 - Buckwheat

85 days. Fagopyrum esculentum. Open Pollinated. The plant produces beautiful small white fragrant flowers that attract bees. Very attractive plant for herb and flower gardens. Well known as a grain, cover crop, and bee plant, but not so well known is its medicinal value. The infusion made from the flowering tops is high in rutin which combats arteriosclerosis (hardening of the arteries and veins). For grain harvest, sow 3 months before fall frost. If the seed is grown for cover crop planting, best when grown between May and July.

Seeding Rate: 60 lbs per acre

HP432-20 - Buena Mulata Hot Peppers

75 days.

Capsicum annum. Open Pollinated. The plant produces good yields of 3 1/4" long by 3/4" wide Cayenne peppers. Peppers are hot and turn from green, to purple, to orange when mature. The plant has green stems, green leaves, and white flowers. This ornamental plant is suitable for containers and borders. An heirloom traces back to Horace Pippin (1888-1946), an African-American folk artist. A rare variety from Nicaragua.

GD9-20 - Bule Gourds

125 days. Cucurbita siceraria. Open Pollinated. The plant produces good yields of 6 to 8" long by 6" wide apple-shaped gourds. The entire gourd is covered with bumps and warts. It is pronounced "Boo-Lay". This hardshell gourd is excellent for making crafts. Vines are 15 ft to 35 ft long. An heirloom from France. United States Department of Agriculture, PI 270456.

TM601-20 - Bulgarian 7 Tomato

78 days.

Solanum lycopersicum. Open Pollinated. The plant produces high yields of 6 oz red tomatoes. It is sweet, tangy, very juicy, and flavorful. Perfect for sandwiches, salads, and slicing. Excellent choice for home gardens. An heirloom variety from Bulgaria. Indeterminate.

HP34-20 - Bulgarian Carrot Pepper Seeds

85 days. Capsicum annuum. Open Pollinated. Bulgarian Carrot Pepper. The plant produces good yields of 3 1/4" long carrot-shaped peppers. Peppers are hot and turn from green, to yellow-orange, to orange when mature. The plant has green stems, green leaves, and white flowers. Peppers are crunchy and used to make pickles, salsa, and marinades. An heirloom from Bulgaria. Scoville Heat Units: 30,000.

TM711-20 - Bulgarian Triumph Tomato

80 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 3 to 4 oz bright red tomatoes. They grow in clusters of 6 to 10 tomatoes and resemble supermarket-type cluster tomatoes! The tomato is juicy, sweet, and delicious. Perfect for sandwiches, salads, slicing, and canning. Crack Resistant. Excellent choice for home gardens. An heirloom variety from Manfred Hahm-Hartmann of Bulgaria. Indeterminate.

SP267-10 - Bull Nose Pepper Seeds

70 days. Capsicum annuum. Open Pollinated. Bull Nose Pepper. This early maturing plant produces good yields of sweet bell peppers. Peppers turn from dark green to red when mature. The plant has green stems, green leaves, and white flowers. Peppers have thick walls, and are very sweet and crunchy. Excellent fresh in salads, pickling, roasting, and stuffed. This heirloom variety was grown by Thomas Jefferson in the gardens at Monticello, Virginia, USA. A variety from India.

BT13-100 - Bull's Blood Beet Seeds

33 to 58 days. Beta vulgaris. Open Pollinated. Bull's Blood Beets. The plant produces good yields of 2 to 4" diameter sweet dark red beets. It has the reddest foliage of any other beet. The high-quality beet can be used as a baby beet or full-size beet. Dark reddish-purple leaves can be used as an addition to mesclun mixes and salads. Roots are dark red and are perfect for boiling, pickling, baking, and freezing. Heat Tolerant. Cold Tolerant. An 1840 heirloom variety from the Netherlands. An excellent choice for home gardens. United States Department of Agriculture, W6 44528.

TM338-20 - Bull's Heart Tomato Seeds

87 days. Solanum lycopersicum. Open Pollinated. Bull's Heart Tomato. The plant produces good yields of 1 to 2 lb pink oxeart tomatoes. They are very sweet and flavorful. Perfect for salads and garnishes. An excellent choice for home gardens. An heirloom variety from Russia. Indeterminate.

TM157-20 - Burbank Red Slicing Tomato

70 days. Solanum lycopersicum. Open Pollinated. This early maturing bush-type plant produces heavy yields of 6 to 8 oz deep red tomatoes. They are very flavorful. Perfect for sandwiches, salads, slicing, and canning. Tested very high in amino acids. The plant does well in dry regions and doesn't require staking. Crack Resistant. Also known as Burbank Tomato. An excellent choice for home gardens and market growers. An heirloom variety was developed by master plant breeder Luther Burbank in 1915 in the USA. United States Department of Agriculture, PI 644885. Determinate.

lycopersicum. Open Pollinated. This early maturing bush-type plant produces heavy yields of 6 to 8 oz deep red tomatoes. They are very flavorful. Perfect for sandwiches, salads, slicing, and canning. Tested very high in amino acids. The plant does well in dry regions and doesn't require staking. Crack Resistant. Also known as Burbank Tomato. An excellent choice for home gardens and market growers. An heirloom variety was developed by master plant breeder Luther Burbank in 1915 in the USA. United States Department of Agriculture, PI 644885. Determinate.

[SQ3-20 - Burgess Buttercup Squash Seeds](#)

90 days. Cucurbita maxima. Open Pollinated. Burgess Buttercup Squash. The plant produces heavy yields of 8" long turban-shaped green squash with silvery white stripes. The yellow-orange flesh is very sweet and squash grows 3 to 5 lbs. It has an extended shelf life and stores well. An excellent choice for home gardens and market growers. A winter squash variety.

[TM265-20 - Burgess Climbing Tomato](#)

85 days.
Solanum

lycopersicum. Open Pollinated. The plant produces enormous yields of large 6" wide red tomatoes. They are very meaty and flavorful. Perfect for sandwiches, salads, and slicing. One of the most productive varieties on the market often produces 2 bushels from just one plant. The Burgess Trip-L-Crop outproduces other Trip-L-Crop varieties. Best when grown on a trellis or fence. Impress your neighbors by growing a 25 ft long tomato plant. An excellent choice for home gardens. Indeterminate.

[TM308-20 - Burgess Stuffing Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Burgess Stuffing Tomato. The plant produces good yields of large 4" wide bright red tomatoes. They have the appearance of hollow bell peppers. Stuff with salads or bake like stuffed peppers. A gourmet variety that has very few seeds. An excellent choice for home gardens. An heirloom variety from the USA. United States Department of Agriculture, PI 639210. Indeterminate.

[BR60-25 - Burgundy Sprouting Broccoli Seeds](#)

37 days.
Brassica

oleracea. (F1) Burgundy Sprouting Broccoli. This early maturing plant produces high yields of very flavorful heads of beautiful purple buds and purple-green stems. It has abundant, concentrated side-shoot yields. Excellent color choice for garnishes or using fresh in salads. The tender shoots and heads add wonderful color and flavor to veggie trays and are also great roasted, steamed, or grilled. Easy to harvest because of concentrated side-shoot production. Plant late winter/early spring. An excellent choice for home gardens. A variety from the USA.

[TM491-20 - Burgundy Traveler Tomato Seeds](#)

80 days. Solanum lycopersicum. Open Pollinated. Burgundy Traveler Tomato. The plant produces good yields of 6 to 12 oz red tomatoes. They are very sweet, meaty, juicy, and flavorful. This variety is similar to the Brandywine Tomato. Perfect for sandwiches, salads, and slicing. Heat Tolerant. Excellent choice for home gardens. A variety from the USA. Indeterminate.

[OK16-20 - Burmese Okra](#)

58 days.

Abelmoschus esculentus. Open Pollinated. The plant produces good yields of 7 to 12" long light green okra. The pods are green and turn creamy yellow-green when mature. Large pods are tender, spineless, and very flavorful. At 4 to 10" long they are tender, sweet, and spineless enough to be eaten raw or added to salads. A great pickling variety. A favorite used in restaurants. Excellent choice for home gardens and specialty market growers. An heirloom variety from Burma, now known as Myanmar.

[BR69-100 - Burney Broccoli Seeds](#)

70 days. Brassica oleracea. (F1) Burney Broccoli. The plant produces good yields of mid-green broccoli. It is very flavorful. Resists purpling under stress. Suitable for spring and summer planting. Consistent in trials all over the eastern US including Georgia and other high-temperature areas. Heat Tolerant. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[HP1039-20 - Burning Bush Hot Peppers](#)

85 days.

Capsicum chinense. (F1). The plant produces heavy yields of 3" long by 1 1/2" wide wrinkled Habanero hot peppers. Peppers are very hot and turn from green to orange when mature. The plant has green stems, green leaves, and white flowers. Peppers have a heat flavor with a touch of sweetness. It has the exact right taste with a pleasant aftertaste. Scoville Heat Units: 180,000.

[TM12-20 - Burpee Big Boy Tomato](#)

78 days. Solanum lycopersicum. (F1) The plant produces heavy yields of very flavorful 10 to 16 oz red beefsteak tomatoes. They are juicy, meaty, and very flavorful. Perfect for sandwiches, salads, and slicing. One of the most popular varieties grown by home gardeners. Very productive, yielded 100 tomatoes each through a 10-week harvest season. Crack Resistant. The plant requires support, either staking or cages. Suitable for hydroponics gardening. An excellent choice for home gardens. A variety developed in 1949. Indeterminate.

[SQ4-20 - Burpee Butterbush Squash](#)

75 days.

Cucurbita moschata. Open Pollinated. This bush-type plant produces good yields of 1 to 2 lb butternut squash. The reddish-orange flesh is very delicious. Good for making superb pie. It keeps for months too! Vines are only 20" long making them suitable for small gardens. A winter squash variety. A variety from the USA.

[BN51-25 - Burpee Improved Lima Bean Seeds](#)

75 days. Phaseolus lunatus. Open Pollinated. Burpee Improved Lima Bean. This bush type plant produces high yields of delicious 5" long lima beans. Each pod contains 4 or 5 large beans. An excellent choice for home gardens and market growers.

[BN43-50 - Burpee Stringless Green Pod Bean Seeds](#)

50 days.

Phaseolus vulgaris. Open Pollinated. Burpee Stringless Green Pod Bean. This early maturing bush plant produces good yields of delicious stringless beans. Introduced in 1894 by W. Atlee Burpee who obtained their stock seed from N. B. Kenney. It was claimed to be the only stringless green podded bean at the time. Excellent fresh or canned. An excellent choice for home gardens and market growers. An heirloom variety from the USA.

[TM26-20 - Burpee Supersteak Tomato](#)

80 day. Solanum lycopersicum. (F1) The plant produces high yields of large 1 to 2 lb red beefsteak tomatoes. It has the rich old-fashioned beefsteak tomato flavor. They are juicy, meaty, and very flavorful. Perfect for sandwiches, salads, and slicing. Crack Resistant. An excellent choice for home gardens. Disease Resistant: VFN. Indeterminate

[CU121-20 - Burpless 26 Cucumbers](#)

60 days. Cucumis sativus. (F1) The plant produces high yields of 10 to 12" long dark green slicing type cucumbers. Cucumbers are tasty and burpless with no bitterness. They are more digestible than other varieties. Great in salads, making relish, or pickled. They are straight if grown on a fence or trellis and it will be easier to harvest. Excellent choice for home gardens and market growers.

[TM309-10 - Bush Champion II Tomato](#)

65 days. Solanum lycopersicum. (F1) This early maturing bush-type plant produces good yields of 8 to 12 oz red tomatoes. They are very meaty and flavorful. Perfect for sandwiches, salads, and slicing. Grows in almost any type of climate. One of the best varieties for small space gardens and containers. An excellent choice for home gardens. 80 days.
Solanum

lycopersicum. Open Pollinated. The plant produces high yields of 1 oz red cherry tomatoes. One of the best tasting cherry tomatoes! Perfect for salads and snacks. Grows in clusters of six tomatoes. An excellent choice for home gardens and market growers. An heirloom variety developed by English horticulturalists Alan Chadwick. Indeterminate.

[TM274-20 - Chalk's Early Jewel Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 4 to 6 oz red tomatoes. They are very sweet and flavorful. It has a rich old-fashioned tomato flavor. Perfect for sandwiches, salads, and slicing. Very dependable as it is always ready by June 30th of each year. An excellent choice for home gardens. An 1889 heirloom variety developed by James Chalk of Norristown, Pennsylvania, USA. United States Department of Agriculture, PI 339940. Indeterminate.

[CD2-750 - Champion Collards Seeds](#)

60 days.
Brassica

oleracea. Open Pollinated. Champion Collards. The plant produces excellent yields of dark green collard leaves. Great with a touch of olive oil and garlic and served with ham or pork chops. Perfect steamed, boiled, or stir-fried. This is an improved version of Vates Collards. The most bolt resistant collards on the market. Frost Resistant. Waxy leaf surface provides natural protection from cabbage worms. A traditional green grew in the South. An excellent choice for home gardens and market growers. A 1979 heirloom variety was developed by the Agricultural Experimental Station in Virginia, USA. United States Department of Agriculture, G 30733.

[TM584-10 - Champion II Tomato](#)

65 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 6 to 8 oz red tomatoes. Perfect for sandwiches, salads, and slicing. It has the same desirable qualities and flavor as the original Champion Tomato with even more disease resistance. Heat Tolerant. Excellent choice for home gardens and market growers. Disease Resistant: V, FF, N, A, TMV, TYLCV. Indeterminate.

[HB110-500 - Champion Moss Curled Parsley](#)

70 days.

Petroselinum crispum. Biennial. The plant produces high yields of bright green curled parsley leaves. Excellent for drying, garnishes, soups, and salads. Does well in hot weather. Heat Tolerant. A standard popular strain for home gardens and market growers.

[RD1-100 - Champion Radish Seeds](#)

1957 All-America Selections Winner!

25 days. Raphanus sativus. Open Pollinated. Champion Radish. This early maturing plant produces excellent yields of 1 to 1 1/2" diameter radishes. These radishes are the size of a silver dollar. The bright scarlet red solid skin surrounds a crisp snow-white flesh that has just the right amount of radish taste. They are crunchy and very flavorful. Perfect for salads and garnishes. Grows well in containers. Suitable for short-season climates. Replant every two weeks for a continuous crop. Excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, NSL 20545.

[CT22-750 - Chantenay Red Core Carrot Seeds](#)

65 days. Daucus carota. Open

Pollinated. Chantenay Red Core Carrot. The plant produces high yields of 5 1/2" to 6" long flavorful golden orange carrots with a deep red-orange center. This variety rarely splits and is a good winter keeper. Good fresh, cooked, or used as a juicer. Excellent choice for home gardens and market growers. An heirloom dating back to 1929. United States Department of Agriculture, NSL 80297.

[TM697-20 - Chapman Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of large 1 to 2 lb deep red beefsteak tomatoes. They are meaty and very delicious. Unlike other beefsteak varieties, this plant yields plenty of huge tomatoes continuously all season long. Perfect for sandwiches, salads, and slicing. Excellent choice for home gardens. An heirloom variety from Cindy Tibbetts of Turner, Maine, USA. Indeterminate.

[CA53-50 - Charentais Melon Seeds](#)

90 days. Cucumis melo. Open

Pollinated. Charentais Melon. The plant produces good yields of 2 to 3 lb smooth cantaloupes with light grey-green skin that matures to a creamy yellow. It has a bright orange flesh, a super sweet rich flavor, and is very fragrant. These melons are top sellers at specialty markets. It is considered by many to be the most divine and flavorful melon in the world. An excellent choice for home gardens and specialty market growers. A 1920s heirloom variety from the Poitou-Charentes region of France. United States Department of Agriculture, PI 315407.

[TM787-20 - Charger Tomato](#)

72 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 10 to 14 oz brilliant red tomatoes. Perfect for sandwiches, salads, salsas, and slicing. They adapt to a large range of climates and temperatures. Crack Resistant. High quality tomatoes are used for commercial production. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: V, FFF, A, St, TYLCV. Determinate.

[WM78-20 - Charlene Watermelons](#)

85 days. Citrullus lanatus. (F1) This plant

produces high yields of 22 to 25 lb oblong watermelons with tough light green rind. This is a blocky Charleston Gray-type watermelon. It has very sweet red flesh. Great for fruit salads and picnics. Great shipper. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and commercial production. A variety from the USA. Disease Resistant: FW.

[SP146-10 - Charleston Belle Sweet Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 4" long by 3" wide sweet bell peppers. Peppers turn from green to red when they mature. Peppers weigh about ¼ lb. Excellent for salads, pickling, and stir fry. This is the first Nematode Resistant bell pepper. Excellent choice for home gardens. Developed by the United States Vegetable Laboratory in Charleston, South Carolina, USA. Disease Resistant: N.

[WM54-20 - Charleston Grey No 133 Watermelons](#)

85 days. Citrullus lanatus. Open

Pollinated. The plant produces a very flavorful deep pink flesh watermelon. The watermelon is very sweet and averages 30 lbs. Exactly like the Charleston Grey, but with more resistance to Fusarium Wilt for Southern regions. An excellent choice for home gardens and market growers. A variety from South Carolina, USA. Disease Resistant: A, FW.

[CB28-250 - Charleston Wakefield Cabbage Seeds](#)

74 days. Brassica oleracea. Open Pollinated. Charleston Wakefield Cabbage. The plant produces good yields of dark green cabbage. The heads average 6 to 8 inches in diameter and weigh 4 to 6 lbs. Very flavorful. It is usually harvested in the summer but overwinters well too. It does well in the Southern parts of the United States, but it can be grown in any climate. It stores extremely well. Heat Tolerant. Excellent choice for home gardens. An heirloom variety dating back to 1892. United States Department of Agriculture, NSL 7460.

[CA32-50 - Charlyne Melon Seeds](#)

90 days. Cucumis melo. Open

Pollinated. Charlyne Melon. The plant produces good yields of 4 lb size melons. Melons turn light orange when ripe. The white flesh is creamy, sweet, aromatic, soft, and juicy. Excellent choice for home gardens and market growers. A variety from the Mediterranean Sea region.

EG71-50 - Charming Eggplants

55 days. Solanum melongena. (F1) This early maturing plant produces high yields of 7 1/2 to 10" long purplish-pink eggplants. A high-quality variety is similar to the Neon Eggplant. Great for cooking and pickling. Does well in subtropical and tropical regions. Excellent choice for home gardens and market growers. Developed in Taiwan.

CF13-25 - Cheddar Cauliflower

68 days.
Brassica

oleracea. (F1) Cheddar Cauliflower. The plant produces excellent yields of 8" heads of orange cauliflower. The color deepens when cooked. It contains 25 times the beta carotene of white varieties! Add color to your salads and gourmet dishes. Holds well in the fields. Prefers moderate to cool temperatures and plenty of water. Do not wrap up leaves, heads should be left open for maximum color. An excellent choice for home gardens and market growers. A variety from the USA.

TM910-20 - Chef's Choice Green Tomato

2016 All-America Selections Winner!

75 days. Solanum lycopersicum. (F1) The plant produces high yields of 9 to 10 oz bright green beefsteak tomatoes with yellow stripes. They have very good flavor and texture. Perfect for sandwiches, salads, and slicing. Low acidity variety. Crack Resistant. An excellent choice for home gardens and specialty market growers. Disease Resistance: A, TMV. Indeterminate.

TM850-20 - Chef's Choice Orange Tomato

2014 All-

America Selections Winner!

75 days. Solanum lycopersicum. (F1) The plant produces high yields of 8 to 12 oz bright orange beefsteak tomatoes. They have a very good flavor and texture. The tomato does not lose its bright orange color when cooked, thus great for soups and sauces. Perfect for sandwiches, salads, and slicing. Low acidity variety. Crack Resistant. An excellent choice for home gardens and specialty market growers. A hybrid tomato developed from the heirloom Amana Orange tomato. Disease Resistance: A, TMV. Indeterminate.

TM845-20 - Chef's Choice Pink Tomato

2015 All-America Selections Winner!

80 days. Solanum lycopersicum. (F1) The plant produces high yields of large 12 to 14 oz pink beefsteak tomatoes. Perfect for stewing, canning, or eating fresh in salads and sandwiches. Crack Resistant. A potato leaf variety. Excellent choice for home gardens. Disease Resistance: V, A, N, St, ToMV. Indeterminate.

TM917-10 - Cherokee Carbon Tomato Seeds

78 days.
Solanum

lycopersicum. Open Pollinated. Cherokee Carbon Tomato. The plant produces high yields of 10 to 12 oz purple beefsteak tomatoes. It has a rich old-fashioned tomato flavor and is very sweet. It has improved yield, earlier maturity, and fewer blemishes while maintaining old-time flavor. Perfect for sandwiches, salads, and slicing. It is a cross between Cherokee Purple and Carbon. Crack Resistant. Indeterminate.

TM748-10 - Cherokee Chocolate Tomato

80 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 10 to 16 oz brownish-red mahogany beefsteak tomatoes. They grow in clusters of 2 to 4 tomatoes. It has a rich old-fashioned tomato flavor. It is tastier, juicier, and more productive than its sister variety, the Cherokee Purple Tomato. A cross between using the Cherokee Purple tomato and an heirloom variety. Perfect for sandwiches, salads, and slicing. The plant requires support, either staking or cages. An excellent choice for home gardens. An heirloom was developed in 1995 by Craig LeHoullier of Tennessee, USA. Disease Resistant: V, F. Indeterminate.

TM761-20 - Cherokee Green Tomato

80 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 8 to 16 oz green beefsteak tomatoes. They have a bold rich flavor. Perfect for sandwiches, salads, and slicing. Yet another wonderful variation of Cherokee Purple, this one features green fleshed fruit blushed with amber at the blossom end. An excellent choice for home gardens. A variety from Tennessee, USA. Indeterminate.

TM34-20 - Cherokee Purple Tomato

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 8 to 12 oz purplish-pink beefsteak tomatoes. It has a rich old-fashioned tomato flavor. It consistently ranks very high in taste tests. Perfect for sandwiches, salads, and slicing. One of the best-tasting heirloom tomatoes. To maximize yield potential, either stake or use cages. It has been grown over 100 years ago by the Cherokee Indians. An excellent choice for home gardens. An 1890 heirloom variety from Tennessee, USA. United States Department of Agriculture, PI 639211. Indeterminate.

BN69-50 - Cherokee Wax Bean Seeds

58 days. Phaseolus vulgaris. Open Pollinated. Cherokee Wax Bean. This bush-type plant produces excellent yields of 6" long yellow wax beans. Excellent fresh, canned, or frozen. The beans are black. Excellent choice for home gardens. Disease Resistant: BCMV, R.

RD14-100 - Cherriette Radishes

20 days. Raphanus sativus. (F1) This early maturing plant produces high yields of 1 1/4 to 2" diameter bright cherry red radishes. It is crisp with a sweet/hot taste. Perfect for salads and garnishes. Very easy to grow. Stores well. Replant every two weeks for a continuous crop. It was developed to produce in higher temperatures, so it holds better for harvesting into summer. Suitable for container gardening. Excellent choice for home gardens, market growers, and open field production.

RD2-100 - Cherry Belle Radishes

1949 All-America Selections Winner! 22 days. Raphanus sativus. Open Pollinated. This early maturing plant produces excellent yields of 1 to 1 1/2" diameter radishes. They are crunchy, crisp, and very flavorful. Perfect for salads and garnishes. Stores well. Suitable for container gardening, hydroponics gardening, and greenhouse production. Also great for bunching and for cello packaging. Excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, NSL 6351.

22 days. Raphanus sativus. Open Pollinated. This early maturing plant produces excellent yields of 1 to 1 1/2" diameter radishes. They are crunchy, crisp, and very flavorful. Perfect for salads and garnishes. Stores well. Suitable for container gardening, hydroponics gardening, and greenhouse production. Also great for bunching and for cello packaging. Excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, NSL 6351.

[SP191-20 - Cherry Pick Sweet Peppers](#)

68 days. Capsicum annuum. (F1) This early maturing plant produces heavy yields of 1 ¼" long by 1 ¼" wide sweet peppers. Peppers turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. Great for salads and gourmet dishes.

[HP345-20 - Cherry Tart Hot Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 1 ½" long by 1 ½" wide Cherry hot peppers. Peppers are hot, have very thick flesh, turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling, stuffing, and canning. A variety from the USA. Scoville Heat Units: 30,000.

[HP1993-10 - Cheyenne Pepper Seeds](#)

64 days. Capsicum annuum. (F1) Cheyenne Pepper. This early maturing plant produces high yields of 9" long by 1 ¼" wide Cayenne hot peppers. Peppers are mildly hot, and turn from light green to red when mature. The plant has green stems, green leaves, and white flowers. This plant produces peppers 10 days earlier than other varieties. Similar to other Cayenne peppers but larger. The compact stronger plants require no staking even with heavy pepper load. It is popular around Philadelphia and New Jersey. Delicious served fresh, grilled, or dried. The glossy flesh is scrunched and tender. Excellent choice for home gardens, market growers, and open field production. Scoville Heat Units: 4,000.

[TM549-20 - Cherry Roma Tomato](#)

80 days.
Solanum

lycopersicum. Open Pollinated. The plant produces heavy yields of 1 oz red plum-shaped tomatoes. It is a miniature Roma tomato that is bursting with an intense sweet flavor. Winner of several tasting tests. Perfect for salads and snacks. Also known as Baby Roma. Excellent choice for home gardens. An heirloom variety from Meilie Moy-Hodnett of Maryland, USA. Indeterminate.

[HB29-500 - Chervil](#)

60 days.

Anthriscus cerefolium. Annual. Open Pollinated. The plant produces good yields of parsley-like leaves. The aromatic leaves have an Anise-like flavor and are used with fish, potatoes, and soups. The flowers are edible and used in salads. The taste is of mild licorice. Attractive garnish! Also known as Brussels Winter and French Parsley. Slow Bolting. An excellent choice for home gardens.

[HB195-500 - Chia](#)

100+ days.
Salvia

hispanica. Annual. Open Pollinated. The plant produces excellent yields of beautiful fuzzy dark green leaves with blue flowers. This herb has many health benefits. The seeds have an excellent source of fiber, protein, calcium, and digestive enzymes. The leaves contain powerful antioxidants that improve overall health as well as increase energy. You can make a therapeutic tea from the leaves that banish lethargy and purifies the body. It is said the fiber and protein in Chia seeds are beneficial for those trying to lose weight. An excellent choice for home gardens. An heirloom variety from Guatemala and Mexico.

[ON51-50 - Chianti Onions](#)

85 days. Allium cepa. (F1) The plant produces high yields of red onions. This is one of the sweetest red onions available. Perfect for soups, salads, slicing, and cooking. Similar to the Red Grano-type onions. A short day variety. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: PR, S.

[HP2028-10 - Chichen Itza Habanero Hot Peppers](#)

85 days.

Capsicum chinense. (F1) This early maturing plant produces high yields of 2 ½" long by 1 ¼" wide orange Habanero hot peppers. Peppers are very hot, crunchy, and turn from green to peach when mature. The plant has green stems, green leaves, and white flowers. Peppers mature 15 to 25 days earlier than other Habanero varieties. Excellent for pickling, and making salsa, hot sauce, and seasoning spice powder. Disease Resistant: TMV. Scoville Heat Units: 180,000.

[TM423-20 - Chico III Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 3 to 4 oz red plum-shaped tomatoes. Perfect for salads and canning. Also, an excellent processing variety is used to make sauces and puree. A variety is suitable for commercial production. Heat Tolerant. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: V, FF. Determinate.

[HP873-10 - Chilcostle Rojo Hot Peppers](#)

85 days.

Capsicum annum. Open Pollinated. The plant produces good yields of 6" long by 1 ¼" wide hot peppers. Peppers are hot, have medium-thin flesh, and turn from green, to brownish red, to red when mature. The plant has green stems with dark purple markings, green leaves, and white flowers. Excellent for making Mexican cuisine and moles. A variety from Oaxaca, Mexico. Scoville Heat Units: 30,000.

[HP2348-10 - Chile Bolita Pepper Seeds](#)

90 days. Capsicum annum. Open Pollinated. Chile Bolita Pepper. The plant produces high yields of ¾" long by ¾" wide hot peppers. Peppers are very hot, grow upright, have thin flesh, and turn from pale green, to orange, to brown, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent drying pepper for making seasoning spice powder. A variety from Oaxaca, Mexico.

[HP1348-10 - Chile Bolito Pepper Seeds](#)

85 days.

Capsicum annum. Open Pollinated. Chile Bolito Pepper. The plant produces good yields of ¾" long by 1" wide cherry hot peppers. Peppers are hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent variety for pickling. United States Department of Agriculture PI 592805. A variety from California, USA.

[HP2073-20 - Chile Criollo Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 4 1/2" long by 3/4" wide hot peppers. Peppers are hot and turn from dark green to deep red when mature. The plant has green stems, green leaves, and white flowers. A variety from Chalcatzingo, Mpio. Jonacatepec, Edo. de Morelos, Mexico. United States Department of Agriculture PI 566811.

[HP1095-20 - Chile de Arbol de Baja California Pepper Seeds](#)

85 days.

Capsicum annuum. Open Pollinated. Chile de Arbol de Baja California Pepper. The plant produces good yields of 4" long hot peppers. Peppers are medium-hot and turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. Peppers are grown on a communal farm south of Guerrero Negro. A variety from Guerrero Negro, Mexico.

[HP51-20 - Chile de Arbol Hot Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3" long by 1/2" wide Cayenne hot peppers. Peppers are very hot, have thin flesh, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for Mexican cuisine, spicy soups, and for drying and making seasoning spice powder. A variety from Mexico. United States Department of Agriculture, PI 438661.

[HP1260-20 - Chile Indio Hot Peppers](#)

85 days.

Capsicum annuum. Open Pollinated. The plant produces good yields of 1 3/4" long by 1/2" wide hot peppers. Peppers turn from green to red when mature. The plant has green stems, green leaves, and white flowers. A variety is found in the marketplaces at Ticulmpio, Yucatan, Mexico. United States Department of Agriculture, PI 574549.

[HP50-20 - Chile Petine Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of small hot peppers. Peppers are very hot, grow upright, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for making hot sauce, stir-frying, and drying for making seasoning spice powder and pepper flakes.

[TM918-20 - Chile Verde Tomato](#)

85 days. Solanum

Lycopersicum. Open Pollinated. The plant produces excellent yields of pepper-shaped paste tomatoes. It ripens to green with gold blush. It has very few seeds making it ideal for making sauce and paste. Perfect for canning or making green ketchup. Suitable for home gardens. It was developed by Tom Wagner. Indeterminate.

[HP52-20 - Chili Grande Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Chili Grande Pepper. The plant produces good yields of 3" long hot peppers. Peppers are very hot and turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. Excellent choice for home gardens, market growers, and open field production. A variety from the USA.

[HP2440-10 - Chili Pie Hot Peppers](#)

2017 All-

America Selections Winner!

70 days. Capsicum annuum. (F1) This early maturing plant produces high yields of large 2" long by 2 1/4" wide mini hot bell peppers.

Peppers are mildly hot, have thick walls, and turn from green to red when mature. The plant has green stems, dark green leaves, and white flowers. Great fresh, stuffed, or used for cooking. The plants yield approximately 25 to 30 fruit each and are even able to set fruit even under hot, humid conditions. Suitable for containers and small gardens. Heat Tolerant. High Humidity Tolerant. An excellent choice for home gardens. Scoville Heat Units: 500.

[HP1138-20 - Chilly Chili Hot Peppers](#)

2002 All-America Selections Winner!

90 days. Capsicum annuum. (F1) The plant produces high yields of 2" long hot peppers. Peppers grow upright and turn from greenish-yellow, to orange, to red when mature. A beautiful ornamental plant. Perfect for containers, pots, patios, and small gardens. An excellent choice for home gardens.

[HP55-20 - Chiltepin Pepper Seeds](#)

100+ days.

Capsicum annuum. Open Pollinated. Chiltepin Pepper. The plant produces good yields of 1/4" long by 1/4" wide pea-shaped hot peppers. Peppers are very hot, grow upright, have thin flesh, and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent drying pepper. A variety from Mexico. United States Department of Agriculture, PI 511887.

[CB16-100 - China Express Chinese Cabbage Seeds](#)

80 days. Brassica rapa. (F1) China Express Chinese Cabbage. This plant produces good yields of Napa Chinese cabbage. The heads average 10 to 12 inches in diameter and weigh 4 to 5 lbs. Cabbage has crisp glossy leaves and is used in stir-fries and raw in salads. Slow to bolt. The most popular Chinese cabbage is grown by home gardeners. Excellent choice for home gardens. Disease Resistant: TB.

[RD16-100 - China Rose Winter Radishes](#)

55 days. Raphanus sativus. Open Pollinated. The plant produces excellent yields of 6 to 8" long

rose-colored radishes. It has rose-colored skin and white flesh. Great for growing as sprouts too. Very easy to grow. Also known as Kaiware Radish. For best results, plant winter storage radish in mid to late August. Excellent choice for home gardens. An heirloom variety that was brought over from China by the Jesuit missionaries in the 1850s.

RD17-100 - China White Winter Radishes

60 days. Raphanus sativus. Open Pollinated. The plant produces excellent yields of 6 to 8" long radishes. The white flesh is crisp, juicy, and pungent. Great for growing as sprouts too. Very easy to grow. Stores well. For best results, plant winter storage radish in mid to late August. Also known as China White Radishes. Excellent choice for home gardens. An heirloom variety dating back to the 1800s.

HP483-10 - Chinese Five Color Hot Peppers

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 1 ¼" long by ¼" wide Pequin hot peppers. Peppers are hot, grow upright, have medium-thin flesh, and turn from purple, to cream, to pale yellow, to orange, to red when mature. The plant has green stems with purple markings, green leaves with purple veins, and purple flowers. A very beautiful ornamental plant. Perfect for containers, pots, patios, and small gardens. An excellent choice for home gardens. A variety from China. Scoville Heat Units: 30,000.

Lot No: R

Germination: 85%

Test Date: 05/23

GD53-20 - Chinese Miniature Gourds

100 days. Lagenaria siceraria. Open Pollinated. The plant produces good yields of miniature 3" wide orange gourds. Great for roasting or for making fall decorations. It is also known as Jack Be Little Gourd and Munchkin Gourd. An excellent choice for home gardens. A variety from China.

SS7-1000 - Chinese Cabbage Sprouting Seeds

4 to 6 days.
Brassica rapa.
Open

Pollinated. The plant produces excellent quality delicious Chinese Cabbage sprouts. The sprouts have a mild Chinese Cabbage flavor. The sprouts are rich in vitamins including vitamins A, B, C, E, and K. Excellent in soups, stews, salads, and other Asian dishes. One tablespoon of seed yields approximately 2 to 3 cups of sprouts. A variety from the USA.

SP16-20 - Chinese Giant Sweet Peppers

75 days.

Capsicum annuum. Open Pollinated. The plant produces high yields of huge 6" long by 4 ¼" wide sweet bell peppers. Peppers turn from green to red when they mature. An heirloom variety from the USA. Excellent for stuffing, salads, and cooking. United States Department of Agriculture, PI 592837.

CB10-250 - Ching Chiang Chinese Cabbage Seeds

40 days.
Brassica rapa.
Open

Pollinated. Ching Chiang Chinese Cabbage. This early maturing plant produces good yields of dwarf Pac Choi-type Chinese cabbage. The heads average 6 to 10 inches in diameter and weigh 2 to 4 lbs. This cabbage has a wonderful mild flavor. The plant has smooth medium green leaves adorn with thick petioles and has very few strings. Best when picked when 6" tall. Tolerates heat, rain, cold, and dampness. Excellent for stir fry. Cold Tolerant. Heat Tolerant. Excellent choice for home gardens.

[BT1-100 - Chioggia Beet Seeds](#)

60 days. Beta vulgaris. Open Pollinated. Chioggia Beet. The plant produces good yields of very sweet 3 to 4" diameter pink-skinned beet. This beet has red and white circular rings in the interior. The flesh is very tender, mild, and sweet. Ideal for boiling, pickling, baking, and freezing. Leaves can be used as greens. An excellent choice for home gardens and specialty markets. An heirloom variety was introduced to the United States in the 1840s from the historic fishing town of Chioggia, Italy.

[BT31-100 - Chioggia Guardsmark Beet Seeds](#)

60 days.
Beta vulgaris.
Open

Pollinated. Chioggia Guardsmark Beet. The plant produces good yields of very sweet 3 to 3 1/2" diameter pink-skinned beet. This high quality beet has red and white circular rings in the interior. This is the improved version of the Chioggia beet. It has better skin color, and candy striping, and is tolerant of bolting. Ideal for boiling, pickling, baking, and freezing. Leaves can be used as greens. This is a new strain of the popular Italian heirloom that was improved for better uniformity and bolt tolerance. An excellent choice for home gardens.

[HB132-500 - Chives Seeds](#)

85 days. Allium schoenoprasum. Perennial. Open Pollinated. Chives. The plant produces heavy yields of chives. The dark green leaves have a mild onion flavor. Use fresh or freeze for year round use. Perfect in salads, stuffed eggs, baked potatoes, soups, omelets, cream cheese, sauces, and garnishes. Cuttings can be made all season long. A herb that can be planted indoors or outdoors. Suitable for containers and hydroponics gardening. They are great in patio pots, planted directly in the garden, and used as borders. Great as companion planting, as it is said that chives planted alongside carrots improve their growth. The lavender flowers attract bees, butterflies, and other beneficial insects. An excellent choice for home gardens. United States Department of Agriculture, PI 261639.

[SP17-20 - Chocolate Beauty Pepper Seeds](#)

85 days.

Capsicum annum. (F1) Chocolate Beauty Pepper. The plant produces good yields of beautiful rich chocolate brown sweet bell peppers. Excellent for salads, stuffing, or cooking. A must for the gourmet dishes. Try growing the Purple Beauty and Red Beauty to complete your gourmet pepper collection. A variety from the USA. Disease Resistant: TMV.

[TM400-20-Base - Chocolate Cherry Tomato Seeds](#)

70 days. Solanum lycopersicum. Open Pollinated. Chocolate Cherry Tomato. This early maturing plant produces high yields of 1/2 to 3/4 oz chocolate cherry tomatoes. They grow in a cluster of 6 to 8 tomatoes. It is very flavorful. They hold very well on the plant. They can be picked several days before completely mature and allowed to ripen off the vine without sacrificing quality. Perfect for salads and for gourmet dishes and vegetable platters. Crack Resistant. Suitable for greenhouse growers that want tall plants to best use their space. An excellent choice for home gardens, greenhouses, and market growers. A variety from the USA. Indeterminate.

[HP887-10 - Chocolate Long Habanero Hot Peppers](#)

100 days.

Capsicum chinense. Open Pollinated. The plant produces heavy yields of 4" long by 1 1/2" wide wrinkled hot peppers. Peppers are very hot and turn from light green to chocolate brown when mature. Pepper's size varies from 2" to 4" in length. The plant has green stems, green leaves, and white flowers. A variety from the Caribbean region.

HPLC Test Results: #4

[TM941-20 - Chocolate Pear Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of chocolate-brown pear-shaped tomatoes. They grow in clusters of 10 to 12 tomatoes. It has a rich old-fashioned tomato flavor. Perfect for salads, pasta, or eating fresh off the plant. The plant requires support, either staking or cages. An excellent choice for home gardens. Indeterminate.

[TM837-10 - Chocolate Sprinkles Tomato](#)

70 days.
Solanum

lycopersicum. (F1) This early maturing plant produces heavy yields of 1 oz chocolate cherry tomatoes. They grow in clusters of 5 to 7. They have a rich sweet flavor. Perfect for salads and snacks. Crack Resistant. The plant requires support, either staking or cages. Excellent choice for home gardens and market growers. Disease Resistant: F, N, TMV. Indeterminate.

[HP509-10 - Christmas Bell Hot Peppers](#)

100 days. Capsicum baccatum. Open Pollinated. The plant produces good yields of 2" long by 2" wide bell-shaped hot peppers. Peppers have a mild spicy flavor and turn from light green to red when mature. The plant has green stems, green leaves, and white flowers with greenish-yellow markings. It looks like a Christmas Bell ornament. A variety from the Netherlands. United States Department of Agriculture, PI 273420.

[BN83-25 - Christmas Lima Bean Seeds](#)

100 days.

Phaseolus lunatus. Open Pollinated. Christmas Lima Bean. The plant produces excellent yields of large lima beans. This plant produces attractive Christmas colored beans - large wide seeds marked in streaks of white and dark maroon. The heavy vines tolerate heat. Heat Tolerant. Also known as Large Speckled Calico Beans. An excellent choice for home gardens. An heirloom variety dating back to the 1840s. United States Department of Agriculture, W6 51281.

[TM696-20 - Church Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 to 2 lb red beefsteak tomatoes. It has a rich old-fashioned tomato flavor. Perfect for sandwiches, salads, and slicing. It produces so many tomatoes that you may need to use some to make a rich sauce. An excellent choice for home gardens. An heirloom variety from the Church family of Hot Springs, Virginia, USA. Indeterminate.

[HP2436-10 - Cienfuegos Orange Pepper Seeds](#)

85 days.

Capsicum chinense. (F1) Cienfuegos Orange Pepper. The plant produces high yields of 1 1/2" long by 3/4" wide Habanero peppers. Peppers are very hot, have thick flesh, and turn from dark green to orange when mature. They have a fruity hot flavor. The plant has green stems, green leaves, and white flowers. It matures ten days earlier than open-pollinated varieties. Excellent for fresh use, cooking, for pickling, making salsa, hot sauce, and seasoning spice powder. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. Scoville Heat Units: 300,000.

[HP2437-10 - Cienfuegos Red Hot Peppers](#)

oleracea. (F1) Destiny Broccoli. The compact plant produces excellent yields of rich blue-green dome-shaped broccoli. It is high in Vitamins A and C. Great for fresh use in salads, steamed, and stir-fries. It is more tolerant to heat and tolerates warmer temperatures. Heat Tolerant. An excellent choice for home gardens and market growers.

[BT5-100 - Detroit Dark Red Beet Seeds](#)

65 days. Beta vulgaris. Open Pollinated. Detroit Dark Red Beet. The plant produces good yields of 3" diameter dark red globe shaped beets. One of the best beets on the market. Ideal for boiling, pickling, canning, baking, and freezing. Excellent storage variety. An 1892 heirloom variety. An excellent choice for home gardens. United States Department of Agriculture, PI 590605. Disease Resistant: DM, LB.

[BT25-100 - Detroit Supreme Beet Seeds](#)

60 days.
Beta
vulgaris.
Open

Pollinated. Detroit Supreme Beet. The plant produces good yields of globe shaped dark red beets. This is an improved version of the Detroit Dark Red Beets with higher yields. The beet has blood red flesh. The beets do not get woody, so perfect for canning and pickling. The glossy green medium tops make tangy boiling greens. It will grow even under adverse weather conditions, even in hot weather. Perfect for salads and pickling. Developed by Alf Christianson Seed Company. An excellent choice for home gardens, farmer's markets, and market growers. Disease Resistant: DM.

HP2009-20 - Devil Serrano Hot Peppers

73 days. Capsicum annuum. (F1) This early maturing plant produces heavy yields of very large 3 1/4" long by 1/2" wide Serrano hot peppers. Peppers are very hot and turn from glossy dark green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent pickling variety. An excellent choice for home gardens, farmer's markets, market growers, greenhouses, open production, and commercial production. Disease Resistant: PVY, TEV, TMV.

HP2322-10 - Devil's Tongue Red Hot Peppers

100+ days.

Capsicum chinense. Open Pollinated. The plant produces good yields of 4" long by 1 1/4" wide elongated Habanero hot peppers. Peppers are very hot, have medium-thick flesh, and turn from green, to orange, to red when mature. The plant has light green stems, light green leaves, and white flowers. Excellent for making salsa, hot sauce, and seasoning spice powder. A rare variety from Pennsylvania, USA.

HP880-10 - Devil's Tongue Yellow Pepper Seeds

100+ days. Capsicum chinense. Open Pollinated. Devil's Tongue Yellow Pepper. The plant produces good yields of 2" long by 1 1/4" wide wrinkled yellow hot peppers. Peppers are very hot and turn from green, to yellow, to golden-yellow when mature. The plant has light green stems, light green leaves, and white flowers. An excellent choice for home gardens. A variety from Pennsylvania, USA.

HP2027-20 - Devil's Yellow Hot Peppers

95 days.

Capsicum chinense. Open Pollinated. This compact plant produces high yields of round hot peppers. The plant produces hundreds of small peppers! Peppers are extremely hot and turn from green to yellow when they mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling. If you've never grown these hot peppers before then you definitely need to grow them in your garden. Scoville Units: 500,000.

HP71-10 - Dhanraj Hot Peppers

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3 1/4" long by 1/2" wide hot peppers. Peppers are very hot, grow upright in clusters, and turn from green, to orange, to red when mature. The shape and size of peppers will vary. The plant has green stems, green leaves, and white flowers. A variety from India.

HB7-500 - Di Genova Basil Seeds

85 days.

basilicum. Annual. Open Pollinated. Di Genova Basil. The plant produces good yields of beautiful 4" long aromatic dark green basil leaves. Very fragrant and tasty. Perfect for salads, sauces, and garnishes. Suitable for containers. An excellent choice for home gardens. A variety from Sicily, Italy.

BR51-100 - Diamante Broccoli Seeds

83 days. Brassica oleracea. (F1) Diamante Broccoli. The plant produces high yields of blue-green broccoli with dome-shaped heads. This variety grows on large plants. It prefers warm growing conditions and holds color well. Suitable for summer and fall planting. Heat Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production.

EG38-20 - Diamond Eggplants

75 days.

Solanum melongena. Open Pollinated. The plant produces good yields of 6 to 9" long slender dark purple eggplants. It has an excellent texture and an old-fashioned eggplant flavor with no bitterness. Does well in cooler areas. Cold Tolerant. Excellent choice for home gardens and market growers. An heirloom variety from Ukraine.

SP178-20 - Diamond White Sweet Peppers

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of beautiful white sweet bell peppers. Peppers turn from translucent white to pale yellow when mature. Excellent for salads, stuffing, or cooking. A must for gourmet home gardeners. Try growing other colors to complete your gourmet pepper collection.

HP2184-10 - Diente de Perro Hot Peppers (Type 3)

85 days.

Capsicum annuum. Open Pollinated. The plant produces good yields of 3 1/4" long by 1/2" wide hot peppers. Peppers turn from green to red when mature. The plant has green stems, green leaves, and white flowers. A variety from Guatemala. United States Department of Agriculture PI 555636 Type 3. Scoville Heat Units: 48,000.

PM4-10 - Dill's Atlantic Giant Pumpkin Seeds

130 days. Cucurbita maxima. Open Pollinated. Dill's Atlantic Giant Pumpkin. The plant produces huge world-record-sized pumpkins. It is the granddaddy of all giant pumpkins. The Dill's Atlantic Giant held the World Record at 1337 lbs, grown by an American in New Boston, NH. These are Genuine seeds from the grower - Howard Dill of Nova Scotia. Try breaking the record yourself! An excellent choice for home gardens and Farmer's Markets. United States Department of Agriculture, PI 601256. A variety from Canada.

Atlantic Giant is a registered trademark of Howard Dill Enterprises.

BN124-50 - Dimpled Brown Cowpea Seeds

70 days. Vigna

unguiculata. Open Pollinated. Dimpled Brown Cowpeas. This bush type plant produces heavy yields of dimpled cowpeas. The 6 1/2" pods have 12 to 15 peas. The pods grow closely bunched together and are green and the peas are brown. The peas have a flattened appearance, thus called Dimpled. Excellent for canning, freezing, or drying. Brown cowpeas. An excellent choice for home gardens.

TM531-20 - Dinner Plate Tomato

90 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of large 1 1/2 to 2 lb scarlet red beefsteak tomatoes. They are so large that one slice can fill a dinner plate. Very delicious and flavorful. Perfect for sandwiches, salads, and slicing. An excellent choice for home gardens. An heirloom variety. Indeterminate.

GD4-20 - Dinosaur Gourds

125 days.

Cucurbita siceraria. Open Pollinated. Produces good yields of 18" to 24" long gourds that resemble a serpentine. Gourds are solid dark green with an 8" wide bowl. Excellent for making crafts. A variety from Louisiana, USA. An excellent choice for home gardens.

BR45-100 - Diplomat Broccoli Seeds

67 days. Brassica oleracea. (F1) Diplomat Broccoli. The plant produces good yields of 6 - 8" dome-shaped dark blue-green broccoli. It is very flavorful. Suitable for spring, summer, or fall harvest. Cold Tolerant. Heat Tolerant. It does well in the Northeast, Canada, and the Pacific Northwest. It is an excellent choice for home gardens, Farmer's Markets, and market growers. Disease Resistant: DM.

GD6-20 - Dipper Gourds

125 days.

Lagenaria siceraria. Open Pollinated. The plant produces good yields of 12" long by 4" diameter pale green gourds. Excellent for making ladles and crafts. Easy to grow variety. An excellent choice for home gardens.

[CB19-50 - Discovery Cabbage Seeds](#)

75 days. Brassica oleracea. (F1) Discovery Cabbage. The plant produces large round 4 lb blue-green cabbage. It is very flavorful and one of the sweetest cabbages around. Excellent fresh for salads, coleslaw, and for making sauerkraut. Excellent choice for home gardens and market growers.

[CU24-20 - Diva Cucumber Seeds](#)

2002 All-America

Selections Winner!

58 days. Cucumis sativus. (F1) Diva Cucumber. The plant produces high yields of non-bitter burpless and seedless 6 to 8" long glossy dark green cucumbers. Cucumbers are tender, crisp, sweet, and bitter-free. Best when harvested at 4 to 5" long. Excellent for salads or pickling. Plant foliage is non-bitter and less attractive to the cucumber beetles than some varieties. It is a gynocious and parthenocarpic variety and will produce without pollination! It is known for its big yields. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: ALS, Ccu, CVYV, DM, PM.

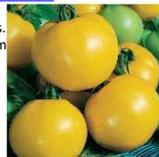

[BS10-50 - Divino Brussels Sprouts Seeds](#)

110 days. Brassica oleracea. (F1) Divino Brussels Sprouts. The tall plant produces good yields of dark green Brussels Sprouts. The heads average 1 inch in diameter. The sprouts are spaced further apart, allowing plants to dry out quickly to avoid the spread of disease and making it easier to harvest the sprouts. They also showed the least aphid damage. The flavor is outstanding and only gets better as the cool temperatures arrive. Excellent storage variety. The leaves shed at maturity leaving a nice, clean stalk. It will mature by Thanksgiving in most areas. It holds well on the stalk for the whole stalk harvest. Holds well in the field. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

[TM178-20 - Dixie Golden Giant Tomato Seeds](#)

85 days. Solanum

lycopersicum. Open Pollinated. Dixie Golden Giant Tomato. The plant produces good yields of large 1 to 2 lb golden yellow beefsteak tomatoes. They are sweet and very delicious with a fruity flavor. Perfect for sandwiches, salads, slicing, or culinary creations. An excellent choice for home gardens and specialty market growers. An Amish heirloom variety from the USA dating back to the 1930s. United States Department of Agriculture, PI 645322. Indeterminate.

[BN125-50 - Dixie Lee Cowpea Seeds](#)

65 days. Vigna unguiculata. Open Pollinated. Dixie Lee Cowpeas. This semi-vine plant produces heavy yields of delicious cowpeas. The pods are green and the peas are brown. The erect plant tends to spread to the vine slightly. Easy to shell variety. Brown cowpeas. An excellent choice for home gardens. United States Department of Agriculture, PI 662996.

[WM31-20 - Dixie Queen Watermelons](#)

75 days.

Citrullus lanatus. Open Pollinated. The plant produces good yields of 40 lb watermelons. It has exceptionally sweet crisp red flesh. Want an early harvest, then you have to try this variety. An excellent choice for home gardens and Farmer's Markets. United States Department of Agriculture, PI 612145.

[TM890-10 - Dixie Red Tomato](#)

85 days. Solanum lycopersicum. (F1) The plant produces high yields of large 8 to 12 oz red tomatoes. Perfect for sandwiches, salads, slicing, and canning. This open-field production variety has a good leaf canopy for sunburn protection and can be used for green ripening. Dixie Red tomato plant will help growers get more fruit out of their fields. It is recommended that you do not prune the plant. The plant will set even in hot conditions. Heat Tolerant. One of the most disease-resistant tomato varieties. Suitable for commercial production in the Southeast. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. This variety is protected by the Plant Variety Protection Act, #9000179. United States Department of Agriculture, PI 674766 PVPO. Disease Resistant: V, FFF, N, A, St, TSWV. Determinate.

[BN62-50 - Dixie Speckled Butterpea Bean Seeds](#)

75 days.

Phaseolus lunatus. Open Pollinated. Dixie Speckled Butterpea Bean. The plant produces good yields of delicious small brownish-red oval beans speckled with darker brown markings. Pods are 4" long with 3 to 4 beans per pod. These baby lima beans are perfect for soups and baking. It grows well in all climates, hot dry regions, and drought conditions. Suitable for Southern parts of the United States. An excellent choice for home gardens.

[SQ9-20 - Dixie Squash](#)

41 days. Cucurbita moschata. (F1) This early maturing plant produces heavy yields of shiny lemon-yellow squash. It has smooth skin, unlike other yellow crookneck varieties. Very flavorful and tender. Great freezing and canning variety. Best when harvested when 6" long. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. A summer squash variety.

[BN106-50 - Dixie White Butterpea Bean Seeds](#)

75 days.

Phaseolus lunatus. Open Pollinated. Dixie White Butterpea Beans. The plant produces good yields of baby white oval beans. Pods are 4" long by 1/2" wide and have 3 to 4 beans per pod. These baby lima beans are excellent for soups and baking. Grows well in all climates, in high temperatures, and in drought conditions. Produces continuously until the first frost. Drought Tolerant. Heat Tolerant. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 549462.

[WM30-20 - Dixielee Watermelons](#)

90 days. Citrullus lanatus. Open Pollinated. The plant produces good yields of great-tasting 20 to 30 lb watermelons. This is a quality round to oblong-shaped watermelon with superior red flesh and high sugar content of 10.8%. The rind color is light green with distinct, fairly narrow, dark green stripes. It has a tough rind which gives it good protection. Widely grown in Florida and other states. Good shipping variety for commercial growers. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, PI 635731. Disease Resistant: A, FW.

[HP1978-10 - Don Emilio Pepper Seeds](#)

81 days.

Capsicum annuum. (F1) Don Emilio Pepper. The plant produces good yields of 5 1/2" long x 2 1/4" wide very dark glossy green (nearly black) hot peppers. Peppers are mildly hot and turn from dark glossy green to red when mature. The plant has green stems, green leaves, and white flowers. A great roasting and stuffing pepper. A variety from the USA. Scoville Heat Units: 1,000.

[HP2010-20 - Don Picoso Hot Peppers](#)

77 days. Capsicum annuum. (F1) The plant produces heavy yields of Serrano-type hot peppers. Peppers are very hot and turn from dark green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent pickling variety. The plant produces peppers continuously all season long. Excellent choice for home gardens, market growers, and open field production.

[TM42-20 - Dona Tomato](#)

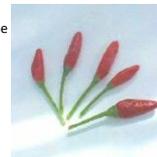

75 days.

Solanum lycopersicum. Open Pollinated. The plant produces good yields of 6 to 8 oz glossy red tomatoes. This variety has a perfect acid/sugar ratio balance and is very flavorful. It is meaty and has very few seeds. Perfect for sandwiches, salads, and slicing. An excellent choice for home gardens. A variety from France. Disease Resistant: V, FF, N, TMV. Indeterminate.

[HP1943-10 - Doomsday Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 1 1/4" long by 1/2" wide hot peppers. Peppers are hot, grow upright, and turn from green, to orange, then red when mature. The plant has green stems, green leaves, and white flowers. A rare variety from South Africa.

[HB174-500 - Double Curled Parsley](#)

70 days.

Petroselinum crispum. Biennial. The plant produces good yields of dense dark green finely crumpled closely curled parsley leaves. Excellent for drying, garnishes, soups, and salads. Frost Tolerant. Suitable for home gardens and market growers.

[CU100-20 - Double Yield Cucumbers](#)

50 days. Cucumis sativus. Open Pollinated. This early maturing plant produces high yields of 5 to 6" long dark green cucumbers. This is a very productive variety - for every pickle that is cut off, two or three more are grown, so keep on picking! Best when picked at 4 to 5" long. Does well in most parts of the country. Excellent choice for home gardens. An heirloom variety was developed in 1924 by Joseph Harris & Company of Coldwater in New York, USA. United States Department of Agriculture, PI 414157.

[TM244-10 - Dr Carolyn Tomato Seeds](#)

75 days.

Solanum lycopersicum. Open Pollinated. Dr Carolyn Tomato. The plant produces heavy yields of small 1 oz size ivory white cherry tomatoes. The tomatoes turn from green, to ivory white, to pale yellow when mature. Very sweet with balanced sugar and acid flavor. Perfect for salads and garnishes. Grows in clusters of 6. This variety was named after Dr. Carolyn Male, who wrote the book on heirloom tomatoes. An excellent choice for home gardens. Indeterminate.

[TL18-50 - Dr Wyche's Yellow Tomatillo Seeds](#)

90 days. Physalis philadelphica. Open Pollinated. Dr Wyche's Yellow Tomatillo. The plant produces heavy yields of the yellow tomatillo. The fruit is covered with papery brown husk. Excellent for Salsa Verde and Chili Verde. An excellent choice for home gardens and market growers. A variety was developed by the late Dr. John Wyche.

[TM727-10 - Dr Wyche's Yellow Tomato](#)

78 days.

Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 10 to 16 oz yellow beefsteak tomatoes. They start out as a golden-yellow color and turn a tangerine orange color when mature. It is meaty, sweet, and tangy and one of the best-tasting orange beefsteak tomatoes. Perfect for sandwiches, salads, and slicing. Low acidity variety. The plant requires support, either staking or cages. Also known as Hot Yellow Tomato and was renamed after Dr. Wyche in his honor after his passing. An excellent choice for home gardens. An heirloom variety from Dr. John Wyche. Indeterminate.

[HP879-10 - Dragon's Claw Hot Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 8 1/2" long by 1" wide Cayenne hot peppers. Peppers are hot, have medium-thin flesh, and turn from green to dark red when mature. The plant has green stems, green leaves, and white flowers. Peppers curled at the lower end resembling a claw. Excellent drying pepper and great for making salsa and hot sauce. A variety from the USA. Scoville Heat Units: 75,000.

[TM172-20 - Druzba Tomato](#)

85 days. Solanum

lycopersicum. Open Pollinated. The plant produces heavy yields of 4 to 8 oz deep red mini beefsteak tomatoes. This variety has superb flavor. We've never seen such a beautiful heirloom tomato that is perfectly formed, pure red, and smooth-skinned! Perfect for sandwiches, burgers, salads, and slicing. Also known as Drushba and Druzba. Grows in clusters of 2 to 4. Crack Resistant. Always a great seller at Farmer's Markets! Excellent choice for home gardens and market growers. An heirloom variety from Bulgaria. United States Department of Agriculture, PI 407445. Disease Resistant. BER. Indeterminate.

[HB171-250 - Dukat Dill Seeds](#)

85 days. Anethum graveolens. Annual. Open Pollinated. Dukat Dill. The plant produces very flavorful leaves and seeds. Seeds are used as a pickling spice and leaves are used in omelets, fish dishes, and salads. Also used as a garnish. Leaves can be dried for later use.

[CS2-250 - Dutch Corn Salad Seeds](#)

45 days.

Valerianella oleria. Open Pollinated. Dutch Corn Salad. This early maturing plant produces good yields of 3 to 4" of glossy green salad leaves. It has a mild taste with a nutty flavor and is usually mixed together with Endive, Mustard, and Arugula. Also known as Lamb's Lettuce. Excellent for salads and garnishes. It can also be cooked like spinach or used as an herb for flavoring. Best if sown every 2 weeks for continued crops. It is quick to grow in cool weather. An excellent choice for home gardens.

[KL5-750 - Dwarf Blue Curled Scotch Kale](#)

56 days. Brassica oleracea. Open Pollinated. This early variety produces flavorful green leaves. Great in salads, sandwiches, and soups. Also great steamed, boiled, baked, or stir-fried. Great freezing variety too! This variety withstands colder weather better than other varieties. It is one of the best frost-resistant kales on the market. Cold Resistant. An excellent choice for home gardens. An heirloom variety dating back to 1863. United States Department of Agriculture, NSL 80302.

[KL6-750 - Dwarf Essex Rape](#)

60 days.
Brassica napus.
Open

Pollinated. This early maturing plant produces excellent yields of kale. It is sweet, tender, and crunchy. Great for use in salads and on sandwiches. It is cooked in the same way as broccoli, boiled, steamed, or stir-fried. Dwarf Essex Rape is an excellent forage crop for livestock and wildlife including deer. Excellent choice for home gardens, market growers, and open field production. Heat Tolerant. Drought Tolerant. Cold Tolerant. United States Department of Agriculture, NSL 80306.

Seeding Rate: 8-10 lbs. per acre

[HB117-500 - Dwarf Greek Basil](#)

85 days. Ocimum basilicum. Annual. Open Pollinated. The plant produces good yields of fragrant green basil leaves with white flowers. Excellent as a garnish or seasoning for poultry, beef, stews, and soups. This variety is preferred by most chefs. It can be grown indoors in containers.

[PE10-50 - Dwarf Grey Sugar Snow Pea Seeds](#)

57 days.
Pisum sativum.
Open

Pollinated. Dwarf Grey Sugar Snow Peas. The plant produces high yields of 2 to 3" long snow peas. Pods are sweet, crisp, and very flavorful. Perfect for salads, stir-fries, and Oriental dishes. Suitable for both Northern and Southern regions, as it is tolerant of both heat and cold. The plant doesn't require staking. Cold Tolerant-Heat Tolerant. Excellent choice for home gardens. An heirloom variety dating back to 1773. United States Department of Agriculture, PI 261665. Disease Resistant: FW.

[OK9-50 - Dwarf Long Green Pod Okra Seeds](#)

50 days. Abelmoschus esculentus. Open Pollinated. Dwarf Long Green Pod Okra. This early maturing plant produces heavy yields of 7 to 8" long okra. This spineless variety produces earlier and higher yields than other varieties. A great choice for Northern growers because it doesn't require as long of a hot growing season. Suitable for Southern and Northern regions. An excellent choice for home gardens and market growers.

[KL4-750 - Dwarf Siberian Improved Kale](#)

50 days.

Brassica oleracea. Open Pollinated. The plant produces excellent yields of very flavorful dark green kale leaves. Used fresh in salads, on sandwiches, or steamed, in stir-fries, or as a colorful garnish. An excellent choice for home gardens. An heirloom variety from Russia. United States Department of Agriculture, NSL 6148.

[PE35-50 - Dwarf White Sugar Snow Peas Seeds](#)

50 days. Pisum sativum. Open Pollinated. Dwarf White Sugar Snow Peas. The plant produces high yields of 2 to 2 1/2" long snow peas. Pods are very sweet, tender, flavorful, and completely stringless! Perfect for stir fry and salads, and Oriental dishes. It's one of the earliest snow peas available. An heirloom variety dating back to the 1800s. United States Department of Agriculture, PI 629295.

[CB48-50 - Earliana Cabbage Seeds](#)

60 days. Brassica

oleracea. Open Pollinated. Earliana Cabbage. This early maturing produces small round green cabbage. One of the earliest maturing cabbage varieties on the market! The heads average 4 1/2 to 5 inches in diameter and weigh 2 to 3 lbs. This variety takes less time to mature than other varieties. It will cut your growing time in half. Excellent choice for home gardens. United States Department of Agriculture, NSL 20190.

[TM692-10 - Earl's Faux Tomato Seeds](#)

80 days. Solanum lycopersicum. Open Pollinated. Earl's Faux Tomato. The plant produces good yields of large 12 to 16 oz deep pink beefsteak tomatoes. They are smooth and have a deliciously rich flavor that is both sweet and complex. The flavor is so good that this variety has won several awards in tomato-tasting contests. Perfect for sandwiches, salads, and slicing. A potato leaf variety. Excellent choice for home gardens. An heirloom variety from Earl Cadenhead of Franklin, Ohio, USA. Indeterminate.

[SQ61-20 - Early Butternut Squash](#)

1979 All-America

Selections Winner!

85 days. Cucurbita pepo. (F1) The plant produces very high yields of 2 to 2 1/2 lb yellowish butternut squash. The squash has a small seed cavity. The deep reddish-orange flesh has a nutty and extremely sweet flavor. The flesh has a firm texture that does not become mushy or watery in baking or when pureed to make pies and soups. Stores well. An excellent choice for home gardens. A winter squash variety.

[TM752-20 - Early Doll Tomato Seeds](#)

55 days. Solanum lycopersicum. (F1) Early Doll Tomato. This early variety produces heavy yields of 4 to 5 oz bright red tomatoes. They have excellent flavor. Perfect for sandwiches, salads, slicing, and salsa. Every home garden should have an early maturing tomato and this is one you must try! Excellent choice for home gardens. Disease Resistant: V, F. Determinate.

[BR27-500 - Early Fall Rapini Broccoli Raab Seeds](#)

45 days. Brassica rapa. Open

Pollinated. Early Fall Rapini Broccoli Raab. This early maturing plant produces good yields of large dark green broccoli raab. It has a zesty, mustard-like flavor! The head averages 1 inch in diameter. Excellent for stir fry and salads. This variety prefers a cooler short-day season. It does best in 60 to 65 F weather. Suitable for spring, summer, and fall planting, but thrives when planted in the early fall. Excellent choice for home gardens.

CB49-250 - Early Flat Dutch Cabbage Seeds

85 days. Brassica oleracea. Open Pollinated. Early Flat Dutch Cabbage. The plant produces very large round dark green cabbage. The heads average 7 to 9 inches in diameter and weigh 10 to 15 lbs. It is very solid with few outside leaves. Stores well. Excellent for making stuffed cabbage and sauerkraut. Excellent choice for home gardens. A pre-1855 heirloom variety from the USA.

CU109-20 - Early Fortune Cucumbers

55 days. Cucumis sativus. Open

Pollinated. The plant produces good yields of 7 to 8" long dark green cucumbers. Very delicious and a perfect slicing cucumber for salads and pickling. Also known as Special Dark Green Cucumber. Does well in most parts of the United States. An excellent choice for home gardens. A 1906 heirloom variety from George Starr of Royal Oak, Michigan, USA. United States Department of Agriculture, NSL 5726.

PE28-50 - Early Frosty Sweet Pea Seeds

60 days. Pisum sativum. Open Pollinated. Early Frosty Sweet Pea. The plant produces high yields of 3 1/2 to 4" long sweet peas. The pods have 6 to 8 tender and flavorful peas. Very delicious. Suitable for canning and freezing. Adapts well to a wide range of growing conditions. The plant doesn't require staking. An excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, NSL 5157. Disease Resistant: FW.

PM69-10 - Early Giant Pumpkins

95 days.

Cucurbita maxima. (F1) The plant produces large 20 - 30 lb tall dark orange pumpkins. This pumpkin matures early and has a beautiful dark orange color. It has smooth skin and strong, dark green carrying handles. The full vines are very productive with tolerance to powdery mildew. The tall dark orange pumpkins attract attention at roadside stands and Farmer's Markets. An excellent choice for home gardens and Farmer's Markets. A variety from the USA. Disease Resistant: PM.

TM160-20 - Early Girl Tomato Seeds

52 days. Solanum lycopersicum. (F1) Early Girl Tomato. This early maturing plant produces heavy yields of flavorful 4 to 6 oz red tomatoes. They are meaty with incredible flavor and aroma. Perfect for sandwiches, salads, and slicing. High in Vitamin A and C. One of the earliest slicing tomatoes on the market. Produces very heavy yields averaging 300 tomatoes from each plant! To maximize yield potential, either stake or use cages. The plant keeps bearing heavily throughout the summer. Heat Tolerant. Excellent choice for home gardens and market growers. Disease Resistant: V, FF. Indeterminate.

SQ33-20 - Early Golden Summer Crookneck Squash Seeds

42 days.

Cucurbita moschata. Open Pollinated. Early Golden Summer Crookneck Squash. This early maturing bush-type plant produces high yields of 3" wide by 8" long buttery yellow squash with a narrow curved neck. Very tender and flavorful. Turns darker yellow as it matures. Excellent fried, steamed, or baked. Best harvested when 4 to 6" long. One of the earliest crookneck squash on the market which keeps producing all summer long. An excellent choice for home gardens, farmer's markets, and market growers. A summer squash variety.

[SN9-100 - Early Hybrid No 7 Spinach Seeds](#)

37 days. Spinacia oleracea. (F1) Early Hybrid No 7 Spinach. This early maturing plant produces heavy yields of very flavorful medium-dark green spinach leaves. Usually steamed or boiled for nutritious greens and used to make an exciting salad. Excellent choice for home gardens and market growers. Disease Resistant: CMV, DM.

[HP76-20 - Early Jalapeno Hot Peppers](#)

80 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 2 1/2" long by 1" wide hot peppers. Peppers are medium-hot and turn from dark green to red when mature. The plant has green stems, green leaves, and white flowers. Peppers ripen 1 week earlier than other varieties. Commonly used when green color. Excellent for making salsa, pickles, and Mexican dishes. The type found in your Supermarkets! Suitable for Northern states. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from Mexico. Scoville Heat Units: 5,000.

[BR81-500 - Early Jade Chinese Broccoli Seeds](#)

50 days.
Brassica

oleracea. (F1) Early Jade Chinese Broccoli. This early-maturing plant produces good yields of dark green broccoli. The leaves are big and dark green with thick stems. It is a popular Oriental green vegetable that is grown for its stalks and leaves. Slow to bolt. Suitable for spring, and fall planting. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[CB32-250 - Early Jersey Wakefield Cabbage Seeds](#)

63 days.
Brassica

oleracea. Open Pollinated. Early Jersey Wakefield Cabbage. The plant produces a flavorful head of dark green cabbage. The heads average 6 to 7 inches in diameter and weigh 2 to 3 lbs. One of the earliest and best cabbages around. Excellent for salads and coleslaws, cooking, or pickling. Very reliable! Suitable for Northern gardens. Excellent choice for home gardens. An heirloom variety dating back to the 1840s. United States Department of Agriculture, NSL 22991.

PE7-50 - Early Perfection Sweet Peas Seeds

66 days. *Pisum sativum*. Early Perfection Sweet Peas. This early maturing plant produces good yields of pods that are filled with 7 to 8 sweet peas. The peas are very flavorful. High in Vitamins A, B, & C. Excellent freezing variety. Suitable for containers. Drought Tolerant. Excellent for regions with a short spring season or poor soil. A heirloom variety from the USA.

TM43-10 - Early Pick Tomato Seeds

62 days. *Solanum lycopersicum*. (F1) Early Pick Tomato. This early maturing plant produces good yields of 8 to 16 oz scarlet red beefsteak tomatoes. It has a rich old-fashioned tomato flavor. Perfect for sandwiches, salads, and slicing. This variety can set fruit in a wide range of temperatures. The plant produces well with low night temperatures and West Coast weather. Plants produce bumper crops all summer. An excellent choice for home gardens and market growers. Disease Resistant: V, F. Indeterminate.

[SQ10-20 - Early Prolific Straightneck Squash Seeds](#)

1938 All-America Selections Winner!

48 days. Cucurbita pepo. Open Pollinated. Early Prolific Straightneck Squash. This early maturing plant produces high yields of creamy-yellow slightly club shaped squash. This is a quality squash. Best when harvested when 7" long or smaller. An excellent choice for home gardens. United States Department of Agriculture, NSL 5232. A summer squash variety.

[BR62-500 - Early Pugliese Broccoli Raab Seeds](#)

60 days.
Brassica
rapa.
Open

Pollinated. Early Pugliese Broccoli Raab. The plant produces good yields of green broccoli raab. This plant has tender tops and flower shoots. The plants should be cut at the base before they have finished flowering. Their tender tops can be served as a side dish when boiled, stewed, or lightly fried. Excellent for stir fry and salads. Plant from early spring to late summer. Also known as Italian Turnip Greens. An excellent choice for home gardens. A variety from Italy.

[BR17-500 - Early Purple Sprouting Broccoli Seeds](#)

60 days. Brassica oleracea. Open Pollinated. Early Purple Sprouting Broccoli. The plant produces very flavorful heads of purple broccoli. Once the main head has been removed this variety will continuously produce many offshoots during the season. Also can be used as sprouting broccoli. Broccoli turns green when cooked. Excellent color choice for garnishes or using fresh in salads. An extremely easy-to-grow hardy winter vegetable. Plant late winter/early spring. An excellent choice for home gardens. United States Department of Agriculture, G 32267.

[KO1-250 - Early Purple Vienna Kohlrabi Seeds](#)

55 days.
Brassica

oleracea. Open Pollinated. Early Purple Vienna Kohlrabi. The plant produces heavy yields of tender purple round bulbs. The skin is purple and the flesh is white. The bulbs are crisp and very flavorful. Leaves are eaten like kale. An excellent choice for home gardens. It is larger and more heat resistant than the White Vienna Kohlrabi. Heat Tolerant. An heirloom variety that was first introduced sometime just before the Civil War. United States Department of Agriculture, NSL 6270.

[CB56-250 - Early Round Dutch Cabbage Seeds](#)

85 days. Brassica oleracea. Open Pollinated. Early Round Dutch Cabbage. This small compact plant produces solid heads of dark blue-green cabbage. The heads average 10 to 12 inches in diameter and weigh 4 to 5 lbs. Excellent flavor with dark green cup-shaped leaves. This variety has good wrapping leaves for stuffing and fillings. A southern favorite. Slow to bolt. Excellent choice for home gardens. United States Department of Agriculture, NSL 3865.

[RD3-100 - Early Scarlet Globe Radishes](#)

23 days.

Raphanus sativus. Open Pollinated. This early maturing plant produces high yields of 1 to 1 1/2" diameter red radishes. They are crisp, tender, juicy, mild, and flavorful. Excellent for salads, vegetable platters, and garnishes. It doesn't get hot or spicy like other varieties. Replant every two weeks for a continuous crop. Suitable for greenhouse production. Thomas Jefferson grew this variety at his grown in Monticello home in Virginia, USA. An heirloom dating back to the 1800s. Excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 6369.

[CF2-500 - Early Snowball Cauliflower Seeds](#)

60 days. Brassica oleracea. Open Pollinated. Early Snowball Cauliflower. The plant produces good yields of 6 to 8" heads of pure white cauliflower. It is very flavorful, solid, crisp, and tender. Good fresh or steamed. Freezes well. It is a self-blanching variety, but many growers still tie the leaves up and around the head to protect it. Excellent choice for home gardens and market growers. An heirloom variety was introduced to the United States in 1888 by Peter Henderson & Company. United States Department of Agriculture, PI 303134.

[PN2-20 - Early Spanish Peanut Seeds](#)

100 days.
Arachis

hypogaea. Open Pollinated. Early Spanish Peanuts. The plant produces high yields of large peanuts. There are 2 to 4 peanuts per pod. They are very delicious when roasted. High in protein. Try making your homemade peanut butter. This is the same peanut sold in supermarkets. An excellent choice for home gardens, market growers, and open field production. (SHELLED PEANUTS)

[CU93-20 - Early Spring Burpless Cucumber Seeds](#)

52 days. Cucumis sativus. (F1) Early Spring Burpless Cucumber. The plant produces high yields of slender 10 to 12" long dark green slicing type cucumbers. Cucumbers are crisp and bitter free. It has thin skin that never needs peeling. They are uniformly straight and smooth. Best grown on a fence or trellis for easy harvest. It will grow straight when staked or will curl when not staked. A good choice for small gardens. Excellent for home gardens and market growers.

[SP331-10 - Early Summer Sweet Peppers](#)

70 days.

Capsicum annum. (F1) The plant produces high yields of 4" long by 5" wide bright yellow sweet bell peppers. Peppers have thick walls and are perfect for grilling, stuffing, stir-fries, or salads. An excellent choice for home gardens and specialty market growers. Disease Resistant: TMV.

[CN13-50 - Early Sunglow Corn Seeds](#)

62 days. Zea mays. (F1) Early Sunglow Corn. This early maturing plant produces good yields of 7 to 8" long ears of yellow kernels. The ears have 12 to 14 rows of tender kernels. It has 2 ears per stalk. It has an old-fashioned creamy sweet flavor. This variety grows well in adverse weather conditions. Tolerant to cooler soils. It has a high resistance to frost, cold, and wet ground permitting early spring planting and first corn as early as July. Cold Tolerant. Perfect for a small garden as height is only 4½ tall. An excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 166229.

[SP24-10 - Early Sunstation Pepper Seeds](#)

69 days.

Capsicum annum. (F1) Early Sunstation Pepper. This early maturing plant produces good yields of extra-large 4 ½" long by 4 ½" wide golden yellow sweet bell peppers. The earliest, biggest, and brightest yellow bell ever! Excellent for salads and stuffing. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: BS.

[BN92-50 - Early Thorogreen Lima Bean Seeds](#)

65 days. Phaseolus lunatus. Open Pollinated. Early Thorogreen Lima Bean. This early maturing dwarf plant produces heavy yields of large 2 ½" long by ½" wide plump pale green lima beans. The plant does not require staking. It is a flat thin lima bean without the meaty texture that characterizes many of their thicker cousins. This baby lima bean is excellent for soups and casseroles. This variety is a good choice for the Northern regions. An excellent choice for home gardens. United States Department of Agriculture, PI 549480. Disease Resistant: DM.

[CA59-50 - Early Valencia Melon Seeds](#)

90 days.

Cucumis melo. Open Pollinated. Early Valencia Melon. The plant produces good yields of melons with dark green skin. It has the shape of a coconut. The flesh is white and sweet. Good storage keeps for 4 months. Excellent choice for home gardens. An heirloom variety dating back to the 1830s and thought to come from Italy.

[SQ16-20 - Early White Bush Scallop Squash Seeds](#)

49 days. Cucurbita pepo. Open Pollinated. Early White Bush Scallop Squash. This early maturing plant bush-type plant produces good yields of 4 to 6" diameter white pattypan squash. It has a creamy texture and is very flavorful. They are low in calories and a good source of vitamin A. It is easy to grow and rarely bothered by insects. Also known as Patty Pan. An excellent choice for home gardens and market growers. A summer squash variety.

[ON37-250 - Early White Granonions](#)

100 days.
Allium cepa.
Open

Pollinated. The plant produces excellent yields of white onions. They are mild and very flavorful. Perfect for soups, salads, and cooking. Slow bolting. An excellent choice for home gardens, market growers, and open field production. A short stay onion. United States Department of Agriculture, PI 546094. Disease Resistant: PR.

[KO2-250 - Early White Vienna Kohlrabi](#)

55 days. Brassica oleracea. Open Pollinated. The plant produces heavy yields of tender round Kohlrabi bulbs. The skin is greenish-white and the flesh is creamy white. The bulbs are crisp and very flavorful. Leaves are eaten like kale. Best to harvest when bulbs are 2 to 3" across. Heat Tolerant. Excellent choice for home gardens. An heirloom variety that was first introduced sometime just before the Civil War. United States Department of Agriculture, NSL 6269.

[BT4-100 - Early Wonder Beet Seeds](#)

50 days.
Beta vulgaris.
Open

Pollinated. Early Wonder Beet. The early maturing plant produces high yields of 3 to 4" diameter deep crimson red beets. Ideal for boiling, pickling, baking, and freezing. Also, tops can be used as beet greens. High in Vitamin A and C. Suitable for container gardening. An heirloom variety dating back to 1911. An excellent choice for home gardens. United States Department of Agriculture, PI 92180.

[TM590-20 - Early Wonder Tomato](#)

54 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 6 oz dark pink tomatoes. It has a rich old-fashioned tomato flavor. Perfect for sandwiches, salads, and slicing. Suitable for container gardening. An excellent choice for home gardens. An heirloom was developed by Burgess Seed in 1950. United States Department of Agriculture, PI 303729. Determinate.

[HB58-500 - East Indian Lemongrass](#)

85 days.

Cymbopogon flexuosus. Perennial. Open Pollinated. The plant produces good yields of grass-like herbs. It is used for flavoring soups, curries, and teas. Lemongrass oil is used to flavor ice cream, candy, pastries, desserts, and chewing gum. Also used to treat digestive problems and fever. An important ingredient in cosmetics and perfumes. It is a good insect repellent too. Easy to grow. Excellent choice for home gardens. A variety from India.

Note: Lemongrass seeds are naturally low in germination because of their imperfect pollination. Outer husk must be removed prior to planting seeds.

[RD4-100 - Easter Egg Radishes](#)

28 days. Raphanus sativus. Open Pollinated. This early maturing plant produces excellent yields of 1 to 1 1/2" diameter multi-colored radishes. Radishes are in shades of purple, lavender, pink, rose, scarlet, white. The flesh is firm, crisp, spicy, and flavorful. Perfect for salads, vegetable platters, and garnishes. Easter egg radishes are perfect for a children's garden for two really good reasons: one, they grow very fast, and two, they produce amazing bright, happy colors that kids are just drawn to. Excellent choice for home gardens.

[BR65-100 - Eastern Crown Broccoli Seeds](#)

58 days.
Brassica

oleracea. (F1) Eastern Crown Broccoli. This early maturing plant produces high yields of dark blue-green broccoli with dome-shaped heads. It holds color well in hot weather. Holds in the fields well too. Suitable for spring and summer planting. Heat Tolerant. It is perfect for East Coast growing conditions. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production.

[BR33-100 - Eastern Magic Broccoli Seeds](#)

62 days. Brassica oleracea. (F1) Eastern Magic Broccoli. The plant produces excellent yields of blue-green dome-shaped broccoli. It is very flavorful. Great for fresh use in salads, steamed, and stir-fries. Suitable for summer and fall harvest. It was developed especially for the Mid-Atlantic, Northeast, and Canada. Heat Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production.

[BN64-50 - Eastland Lima Bean Seeds](#)

70 days.

Phaseolus lunatus. Open Pollinated. Eastland Lima Bean. The plant produces heavy yields of delicious baby Lima beans. Perfect for soups and baking. Grows well in all climates. Suitable for small gardens and square foot gardening where space is limited. An excellent choice for home gardens.

[ON38-100 - Eclipse Onion Seeds](#)

180 days. Allium cepa. Open Pollinated. Eclipse Onion. The plant produces excellent yields of medium size onions. They are crisp, mild, and very flavorful. Perfect for soups, salads, and cooking. Relatively free from bolting and splitting. An excellent choice for home gardens, market growers, and open field production. A short stay onion. United States Department of Agriculture, PI 546138. Disease Resistant: PR.

[HB196-500 - Edible Wildflower & Herb Mix Seeds](#)

100 days.

Annual/Perennial. Open Pollinated. Edible Wildflower & Herb Mix. This seed mix has a variety of colorful and tasty edible wildflowers and herbs. Includes Cilantro Coriander, Nasturtium, Chives, Dianthus, Borage, Calendula, Cornflower, Johnny Jump-Up, Pansy, English Daisy, Lavender Hyssop, and Lemon Mint. Suitable for borders, herb gardens, and flower gardens. An excellent choice for home gardens.

Coverage Rate: 1 lb covers 1,000 - 2,000 sq ft

[CA19-50 - Edisto 47 Melon Seeds](#)

86 days. Cucumis melo. Open Pollinated. Edisto 47 Melon. The plant produces good yields of 4 ½ lb size cantaloupes. Its deep salmon flesh is juicy and very delicious. Excellent for hot, humid conditions and a popular variety for the Southern states. Heat Tolerant. High Humidity Tolerant. Excellent choice for home gardens and market growers. Developed Clemson University, Blackville, South Carolina, USA. United States Department of Agriculture, NSL 34600. Disease Resistant: ALS, DM, PM.

[SN12-100 - Edna Spinach Seeds](#)

25 days. Spinacia

oleracea. (F1) Edna Spinach. This early maturing plant produces heavy yields of very flavorful dark green spinach leaves. Excellent for baby leaf Spinach. Usually steamed or boiled for nutritious greens and used to make a beautiful salad. Suitable for both spring and fall plantings. Excellent choice for home gardens and market growers. Disease Resistant: DM, R.

[TM597-20 - Egg Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of red tomatoes. The tomatoes are the size and shape of an egg. Perfect for salads and garnishes. An excellent choice for home gardens. United States Department of Agriculture, PI 303730. Indeterminate.

[SW19-100 - El Dorado Swiss Chard](#)

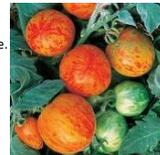

35 to 65 days. Beta

vulgaris. Open Pollinated. The plant produces good yields of beautiful Swiss Chard with golden yellow stalks and glossy dark green leaves. The stalks turn to a golden yellow when mature. Usually used fresh in salads, sandwiches, or lightly steamed. May be harvested as a baby vegetable at 35 days. Great for Gourmet dishes. Excellent choice for home gardens.

[TM412-20 - Elberta Peach Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 3 oz bright orange-red tomatoes striped in gold. They are fuzzy like a peach and resembles the famous Elberta Peach! One of the most beautiful tomatoes you have ever seen. Perfect for salads, garnishes, and gourmet dishes. The plant has fuzzy leaves. Excellent choice for home gardens. An heirloom variety. Determinate.

[HP279-10 - Elephant's Trunk Hot Peppers](#)

75 days.

Capsicum annum. Open Pollinated. The plant produces high yields of 6" long by 1" wide Cayenne hot peppers. They are medium hot, have medium-thin flesh, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Peppers resemble an elephant's trunk. Excellent for Indian cuisine and drying pepper and for making seasoning spice powder. A variety from India. Scoville Heat Units: 6,000.

TM669-20 - Elfin Tomato

54 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces good yields of ¼ to ½ oz red grape tomatoes. They are very sweet and flavorful. Perfect for salads and garnishes. It is the size and shape of the original Grape Tomato but has the advantage of shorter plants. Grow in clusters. Excellent choice for home gardens. Determinate.

BN126-50-Base - Elite Cowpea Seeds

75 days. Vigna

unguiculata. Open Pollinated. Elite Cowpeas. This bush-type plant produces heavy yields of 7" long cowpeas. Peas are easy to shell. This is one of the most productive of all the cream peas. Cream-colored cowpeas. An excellent choice for home gardens. This variety was developed by the University of Arkansas, Fayetteville, Arkansas, USA. United States Department of Agriculture, PI 666253.

BR46-100 - Emerald Crown Broccoli Seeds

59 days. Brassica oleracea. (F1) Emerald Crown Broccoli. This early maturing compact plant produces good yields of blue-green broccoli with dome-shaped heads. This high-quality variety is very flavorful and sweet. It is highly resistant to purpling during cool growing periods. Suitable for spring, summer, or fall harvest. Cold Tolerant. Heat Tolerant. Suitable for summer and fall harvest. It does well on both coasts and in the Midwest and Southeast. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production.

HP2249-10 - Emerald Fire Pepper Seeds

2015 All-

America Selections Winner!

65 days. Capsicum annuum. (F1) Emerald Fire Pepper. This early maturing plant produces huge yields of extra-large 4" long Jalapeno peppers. Peppers are mildly hot and turn from glossy green to red when mature. The plant has green stems, green leaves, and white flowers. These extra-large Jalapeno peppers have thick walls and are great for stuffing, grilling, canning, and making salsa. Scoville Heat Units: 2,500.

SP25-20 - Emerald Giant Sweet Peppers

74 days. Capsicum annuum. Open Pollinated. This early maturing plant produces heavy yields of 4 ½" long by 3 ½" wide sweet bell peppers. Peppers have thick walls and turn from dark green to red when they mature. Peppers are very sweet and have more vitamin C than an orange pepper. Excellent for salads, stuffing, or baking. Drought Tolerant. Suitable for the Southern States. A variety developed in the USA in 1963. United States Department of Agriculture, PI 617085. Disease Resistant: TMV

CE1-750 - Emerald Ice Chicory Seeds

75 days.

Cichorium endivia. Open Pollinated. Emerald Ice Chicory. The plant produces 12 to 16" tall light green leaves and white stalks which are used as greens. Very flavorful. Great cooked or fresh in salads. The dandelion-type leaves produce tender and flavorful stalks. It has an asparagus-like flavor. High in Vitamin A, Vitamin C, Calcium, and Iron. Cold Tolerant. Heat Tolerant. Also known as Catalogna Emerald Chicory. Excellent choice for home gardens.

[BR66-100 - Emerald Jewel Broccoli Seeds](#)

70 days. Brassica oleracea. (F1) Emerald Jewel Broccoli. The plant produces good yields of dark blue-green broccoli with dome-shaped heads. Suitable for spring, summer, and fall planting. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: CR.

[OK5-50 - Emerald Okra](#)

55 days.

Abelmoschus esculentus. Open Pollinated. The plant produces heavy yields of 6 to 8" long dark green okra. The pods are thick-walled, smooth, tender, and spineless. Stay tender even when very large. Best to harvest when 4" long. Retains color when frozen or canned. Perfect for soups, stews, fried, or boiled. Also known as Emerald Green Velvet Okra. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A 1950 heirloom variety developed by the Campbell Soup Company, Riverton, New Jersey, USA. United States Department of Agriculture, PI 675122

[BR70-100 - Emerald Star Broccoli Seeds](#)

74 days. Brassica oleracea. (F1) Emerald Star Broccoli. The plant produces good yields of large blue-green broccoli. It can handle extreme temperatures better than most other varieties. Cold Tolerant. Heat Tolerant. Suitable for spring and fall planting. Holds well in the field. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[SQ77-20 - Emerald Strain Buttercup Squash](#)

90 days.

Cucurbita maxima. Open Pollinated. The plant produces heavy yields of 5 lb buttercup squash. This squash has a classic turban shape and color. It has sweet yellow-orange flesh. An excellent choice for home gardens and market growers. A winter squash variety.

[ESS - Emergency Survival Herb Seeds Kit \(15 Herb Varieties\)](#)

This Emergency Survival Herb Seeds Kit has 15 different herb varieties. The seeds are specially dried and sealed for long-term emergency survival seed storage. All seeds are open-pollinated heirloom varieties and 100% non-GMO. This kit should be a priority for any preparedness plan for national food shortages, war, or national disasters. The seeds selected are adaptable to short-season climates and do well in all regions of the country and are easy to grow for first-time gardeners. It includes planting instructions and a seed-saving guide. The kit includes Anise, Basil, Borage, Chamomile, Cilantro, Dandelions, Echinacea, Fennel, Lavender, Lemon Balm, Marjoram, Mountain Mint, Peppermint, Rosemary, and Thyme. Buy and keep a supply of kits to provide for family security during times of uncertainty in the food supply chain. The kits are moisture-proof and come in a resealable bag.

[ES2 - Emergency Survival Seeds Kit \(16 Vegetable Varieties\)](#)

This

Emergency Survival Seeds Kit has 16 different vegetable varieties with a shelf life of up to 10 years. The seeds are specially dried and sealed for long-term emergency survival seed storage. All seeds are open-pollinated varieties. Emergency Survival Seed Kit should be a priority for any preparedness plan for war or national disasters. The seeds selected are adaptable to short-season climates and do well in all regions of the country and are easy to grow for first-time gardeners. The sealed can contain approximately 1.4 lbs of seeds which is enough to grow a ¼ of an acre.

Includes: Bush Beans, Beets, Cabbage, Carrots, Corn, Cucumbers, Lettuce, Onions, Peas, Sweet Peppers, Radishes, Spinach, Summer Zucchini Squash, Winter Squash, Swiss Chard, Tomatoes.

[ES4 - Emergency Survival Seeds Kit \(20 Vegetables Varieties\)](#)

This Emergency Survival Seeds Kit has 20 different vegetable varieties. The seeds are specially dried and sealed for long-term emergency survival seed storage. All seeds are open-pollinated heirloom varieties and 100% non-GMO. This kit should be a priority for any preparedness plan for national food shortages, war, or national disasters. The seeds selected are adaptable to short-season climates and do well in all regions of the country and are easy to grow for first-time gardeners. It includes planting instructions and a seed-saving guide. The kit includes Beets, Broccoli, Brussels Sprouts, Cabbage, Cauliflower, Celery, Cucumbers, Eggplants, Hot Peppers, Kohlrabi, Okra, Pumpkins, Radishes, Squash, Sweet Peppers, and Tomatoes. Buy and keep a supply of kits to provide for family security during times of uncertainty in the food supply chain. The kits are moisture-proof and come in a resealable bag.

[ES1 - Emergency Survival Seeds Kit \(21 Vegetable Varieties\)](#)

This

Emergency Survival Seeds Kit has 21 different vegetable varieties with a shelf life of up to 10 years. The seeds are specially dried and sealed for long-term emergency survival seed storage. All seeds are open-pollinated varieties. Emergency Survival Seed Kit should be a priority for any preparedness plan for war or national disasters. The seeds selected are adaptable to short-season climates and do well in all regions of the country and are easy to grow for first-time gardeners. The sealed can contain approximately 1.4 lbs of seeds which is enough to grow a ¼ of an acre.

Includes: Bush Beans, Beets, Cabbage, Cantaloupes, Carrots, Corn, Cucumbers, Hot Peppers, Kale, Lettuce, Onions, Peas, Sweet Peppers, Radishes, Romaine, Spinach, Summer Squash, Winter Squash, Cherry Tomato, Slicing Tomato, Watermelons.

[ES3 - Emergency Survival Seeds Kit \(32 Vegetable Varieties\)](#)

This Emergency Survival Seeds Kit has 32 different vegetable varieties. The seeds are specially dried and sealed for long-term emergency survival seed storage. All seeds are open-pollinated heirloom varieties and 100% non-GMO. Emergency Survival Seed Kit should be a priority for any preparedness plan for national food shortages, war, or national disasters. The seeds selected are adaptable to short-season climates and do well in all regions of the country and are easy to grow for first-time gardeners. It includes planting instructions and a seed-saving guide. The kit includes Beans, Beets, Broccoli, Brussels Sprouts, Cabbage, Cantaloupes, Carrots, Cauliflower, Celery, Corn, Cucumbers, Eggplants, Kale, Lettuce, Okra, Onions, Peas, Parsnips, Pumpkins, Radishes, Spinach, Squash, Sunflowers, Sweet Peppers, Swiss Chard, Tomatoes, Turnips, and Watermelons. Buy and keep a supply of kits to provide for family security during times of uncertainty in the food supply chain. The kits are moisture-proof and come in a resealable bag.

[TM488-20 - Empire Tomato](#)

72 days.
Solanum

lycopersicum. (F1) This early maturing plant produces high yields of 8 to 11 oz red tomatoes. Perfect for sandwiches, salads, and slicing. This is a main crop high-quality variety that grows well in the mid-Atlantic region and Northeast region. Crack Resistant. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: V, F, N, A, St. Determinate.

[HB158-1000 - English Lavender Seeds](#)

100 days. *Lavandula angustifolia*. Perennial. Open Pollinated. English Lavender. The plant produces good yields of silver-green leaves and beautiful lavender-blue flowers. It is the most fragrant of the lavenders, The flowers are fragrant and edible. The leaves can be used fresh or dried. Used to treat headaches, burns, and cuts. Also used to repel moths, mosquitoes, and gnats. Tolerates frost. An excellent choice for home gardens.

Taxus baccata. Open Pollinated. This Bonsai tree produces has small dark green shiny evergreen needles. The bark is thin, scaly brown, coming off in small flakes aligned with the stem. It is a very long-lived tree, of 2,000 years. There are confirmed claims that trees can live for 5,000 to 9,500 years. Also known as Common Yew Bonsai Tree. A variety is native to Europe.

[CT32-250 - Envy Carrot Seeds](#)

66 days.
Daucus carota.
(F1)
Envy
Carrot.
This
early

maturing plant produces heavy yields of 12" long bright orange carrots. It has an extra-sweet flavor and is the very best for fresh eating! Excellent for freezing and canning. It grows well in poor soil, even clay soil. Heat Tolerant. Top variety for the production of jumbo carrots. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production.
Disease Resistant: ALS.

[BN34-25 - Envy Soybean Seeds](#)

75 days. *Glycine max*. Open Pollinated. Envy Soybeans. The plant produces good yields of flavorful bright green beans. A good short-season variety. An excellent choice for home gardens. Developed by Professor Meader, University of New Hampshire, USA. United States Department of Agriculture, PI 567179.

[EG6-20 - Epic Eggplant Seeds](#)

64 days.
Solanum

melongena. (F1) Epic Eggplant. The plant produces high yields of 6 to 8" long glossy purple-black teardrop shaped eggplants. Great for slicing, stuffing, and baking. Plants are strong and are especially good for market growers. Excellent choice for home gardens and market growers.
Disease Resistant: TMV.

[CO3-5 - Erlene's Green Cotton Seeds](#)

130 days. *Gossypium hirsutum*. Open Pollinated. Erlene's Green Cotton. The plant produces good yields of naturally olive green tinted cotton. Naturally colored cotton is now very rare. Prior to the Civil War, green, blue, yellow, and pink colored cotton was grown by slaves. An excellent choice for home gardens. An heirloom variety from the family of Erlene Melancon of Texas, USA.

[SP321-10 - Eros Sweet Peppers](#)

55 days.

Capsicum annuum. (F1) This early maturing plant produces good yields of early 2" by 1 3/4" sweet bell peppers with a fruity sweet taste. Peppers turn from green to orange to red when mature. Plants have green leaves, green stems, and white flowers. These mini sweet bell peppers are great for tuna stuffers, salads, and gourmet dishes. The large leaves protect the peppers from sun-scaud.

[SP346-10 - Escamillo Sweet Peppers](#)

2016 All-America Selections Winner!

60 days. *Capsicum annuum*. (F1) This early maturing plant produces high yields of 6" long by 2" wide yellow sweet peppers. These beautiful peppers are perfect for grilling, roasting, and stuffing. An excellent choice for home gardens and Farmer's Markets.

[HP355-20 - Escondida Hot Peppers](#)

85 days.

Capsicum annuum. Open Pollinated. The plant produces good yields of 3" long by 1" wide hot peppers. Peppers are medium-hot and sweet and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Peppers are grown at 5,000 feet above sea level in Escondida, New Mexico.

[HP525-10 - Espanola Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3" long by 1/4" wide hot peppers. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for stuffing, roasting, frying, and canning. A variety from New Mexico, USA. Scoville Heat Units: 2,000.

[CU89-20 - Eureka Cucumbers](#)

57 days. Cucumis sativus. (F1) This early producing plant produces high yields of 5 to 7" long dark green cucumbers. Best when harvested when 2 to 5" for pickling. Monoecious and virtually trouble-free. Very flavorful and crisp. One of the most disease-resistant cucumbers on the market. An excellent choice for home gardens and market growers. Disease Resistant: A, ALS, Ccu, CMV, DM, PM, PRSV, WMV, ZYMV.

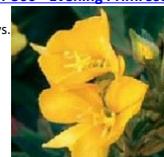

[TM166-20 - Eva Purple Ball Tomato Seeds](#)

70 days. Solanum lycopersicum. Open Pollinated. Eva Purple Ball Tomato. This early maturing plant produces high yields of 6 to 8 oz deep pink tomatoes. They are sweet, juicy, smooth, round, and very delicious. Perfect for salads, sandwiches, salsas, canning, and sauces. Very easy to peel. A great all-purpose tomato with excellent flavor. [SP377-10 - Grenada Sweet Peppers](#)

82 days. Capsicum annum. (F1) The plant produces heavy yields of extra-large sweet Cubanelle peppers. Peppers have thick walls and turn from light green to red when mature. A smooth and attractive Cubanelle pepper. The plant has a good leaf canopy providing protection against sunscald. Grows well in Midwest and Southeast regions in the USA and the Caribbean region. An excellent choice for home gardens and market growers. Disease Resistant: BLS.

[WM27-20 - Greybelle Watermelons](#)

80 days. Citrullus lanatus. Open Pollinated. The plant produces good yields of nearly 15 lb round watermelons. It has a grey-green rind. The watermelons have dark red flesh and are very sweet and delicious. Resists sunburn. Drought-Tolerant. An excellent choice for home gardens and market growers. An heirloom variety from the USA. Disease Resistant: A, FW.

[RD49-100 - Groundhog Radishes](#)

24 days. Raphanus sativus. Open Pollinated. The plant produces very large radishes. The radishes have an extensive root mass that aerates the soil & pulls nitrogen & other nutrients back to the soil surface for ready use for next season's crop. If planted in late summer, the radishes are not harvested or turned under but left to die off in the winter and decay to contribute to a nitrogen store for spring planting. Excellent soil builder, cover crops, and livestock wildlife feed. Excellent choice for home gardens, market growers, and open field production.

[TM469-20 - Grushovka Tomato](#)

65 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 6 oz pinkish-red egg-shaped tomatoes. They are very delicious. Perfect for canning and gourmet dishes. Suitable for container gardening. Excellent choice for home gardens. A variety from Siberia, Russia. United States Department of Agriculture, G 33017. Determinate.

[HP92-20 - Guajillo Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3 ¼" long by ¼" wide hot peppers. Peppers are medium-hot and turn from green to an orange-red-brown color when mature. The plant has green stems, green leaves, and white flowers. Guajillo means "little gourd" for the rattling sound the seeds make in dried pods. Excellent for salsa or sauces. Also good for drying. United States Department of Agriculture, PI 281389. A variety from Mexico. Scoville Heat Units: 5,000.

[HP2445-10 - Guampinho de Veado Hot Peppers](#)

85 days. Capsicum baccatum. Open Pollinated. This tall plant produces heavy yields of 1 ½" long by ¼" wide hot peppers. Peppers are medium-hot, grow upright, and turn from green to red when they mature. The plant has green stems, green leaves, and creamy yellow flowers. The peppers have a nice fruity flavor with medium heat. Excellent drying pepper for making spice powder. Also known as Deer's Horn. An excellent choice for home gardens. A very rare variety from Piratini, Rio Grande do Sul, Brazil.

[SQ125-20 - Guatemalan Blue Banana Squash](#)

90 days. Cucurbita maxima. Open Pollinated. The plant produces high yields of 5 to 8 lb blue-grey banana-shaped squash with light stripes. The squash flesh is very sweet. It has smooth delicious orange flesh. Perfect for baking, roasting, frying, and making pies. Easy to grow. It stores well and holds its quality when frozen. Cold Tolerant. Drought Tolerant. An excellent choice for home gardens. Farmers Markets, and specialty market growers. A very old heirloom variety from Guatemala dating back to the Maya civilization. A winter squash variety.

[CA1-20 - Gurney's Giant Melon Seeds](#)

80 days. Cucumis melo. (F1) Gurney's Giant Melon. This early maturing plant produces good yields of giant 18 lb flavorful cantaloupes. The cantaloupes ripen in August. It has orange flesh that is extremely sweet. Try growing a record-sized Giant Cantaloupe in your home garden. A variety from the USA.

[HP93-10 - Guam Boonies Hot Peppers](#)

110+ days. Capsicum frutescens. Open Pollinating. The plant produces good yields of ¾" long by ¼" wide hot peppers. Peppers are very hot, grow upright, have thin flesh, and turn from light green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers with a tint of green. Excellent drying pepper and for making hot sauce. Similar to the Tabasco variety. A variety from the island of Guam. Scoville Heat Units: 160,000.

[HP2324-10 - Guapito Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 1 ½" long by ½" wide hot peppers. Peppers are hot, grow in clusters, and turn from green to red mature. The plant has green stems, green leaves, and white flowers. Developed by Mario Dadomo. A variety from Parma, Italy.

[TM539-10 - Gulf State Market Tomato Seeds](#)

78 days. Solanum lycopersicum. Open Pollinated. Gulf State Market Tomato. The plant produces excellent yields of 6 to 8 oz pinkish-red tomatoes. They are smooth and very flavorful. A good all-around tomato. Perfect for sandwiches, salads, slicing, and canning. An old market variety that has proven itself for generations. Suitable for the Gulf states as well as other parts of the country. It excels in the Southern states where high heat and humidity are common during the summer. Crack Resistant. An excellent choice for home gardens and market growers. An heirloom variety dating back to the 1930s. United States Department of Agriculture, PI 270190. Indeterminate.

[BR34-100 - Gypsy Broccoli Seeds](#)

60 days. Brassica oleracea. (F1) Gypsy Broccoli. The strong uniform plant produces excellent yields of large blue-green 8" diameter dome-shaped broccoli. It has excellent flavor. Great for fresh use in salads, steamed, and stir-fries. It has the ability to thrive in many different environments. It does well on hot summer days, cool autumn days, in less-than-stellar soil, and holds well in the field. Heat Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: DM.

[SP32-20 - Gypsy Sweet Peppers](#)

1981 All-America Selections Winner!

60 days. Capsicum annuum. (F1) The plant produces heavy yields of 5" long by 2" wide sweet bell peppers. Peppers turn from light yellow to red when mature. This small plant is suitable for containers. It does well in cool and hot regions. Disease Resistant: TMV.

[HP1314-10 - Habanero Brown Hot Peppers](#)

100 days. Capsicum chinense. Open Pollinated. The plant produces heavy yields of 2 ½" long by 1 ¼" wide wrinkled hot peppers. Peppers are extremely hot and turn from green to brown when mature. The plant has green stems, green leaves, and white flowers. This variety is much larger than the other Habanero Chocolate Pepper varieties. A variety from the Caribbean region.

HPLC Test Results: #17

[HP1946-20 - Habanero Chocolate Pepper Seeds \(Strain 4\)](#)

100+ days. Capsicum chinense. Open Pollinated. Habanero Chocolate Pepper. The plant produces heavy yields of 2 ½" long by 1 ½" wide wrinkled hot peppers. Peppers are extremely hot and turn from green to chocolate brown when they mature. The plant has green stems, green leaves, and white flowers. The Chocolate Habanero is recognized as the world's 4th hottest pepper. It is a favorite in the Caribbean to make barbecue sauces and marinades, A variety from the Caribbean region.

[HP1930-10 - Habanero Orange Hot Peppers \(Strain 5\)](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces good yields of 1 ¾" long by 1" wide wrinkled Habanero hot peppers. Peppers are very hot, have medium-thick flesh, and turn from green, to light orange, to dark orange when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling, and making salsa, hot sauce, and seasoning spice powder. A variety from Mexico.

[HP1785-10 - Habanero Red Hot Peppers \(Strain 3\)](#)

100 days. Capsicum chinense. Open Pollinated. The plant produces high yields of 1 ½" long by 1 ½" wide wrinkled hot peppers. Peppers are very hot and turn from light green to brilliant red when mature. The plant has green stems, green leaves, and white flowers. Excellent for making hot sauce, salsa, and pepper flakes. A variety from the Caribbean region. Scoville Heat Units: 285,000.

[HP2323-20 - Habanada Hot Peppers](#)

90+ days. Capsicum chinense. Open Pollinated. The plant produces high yields of 2" long by 1 ¼" wide Habanero hot peppers. Peppers have no pungent, are sweet, have medium-thick flesh, and turn from creamy white to orange when mature. The plant has green stems, green leaves, and white flowers. Peppers have the Habanero flavor without the heat! Excellent pickling variety and for making hot sauce and salsa. It holds well for a long time on the plant. A heatless habanero with irresistible tropical flavor bred by Dr. Michael Mazourek of Cornell University. A variety from New York, USA.

[HP1982-10 - Habanero Chocolate Hot Peppers \(Strain 5\)](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces good yields of 2" long by 1" wide brown Habanero hot peppers. Peppers are extremely hot and turn from green to chocolate brown when mature. The plant has green stems, green leaves, and white flowers. A variety from the Caribbean.

[HP2039-10 - Habanero Mayan Hot Peppers](#)

90 days. Capsicum chinense. Open Pollinated. The plant produces high yields of 4" long glossy bright red Habanero hot peppers. Peppers are hot and turn from green to glossy bright red when mature. The plant has green stems, green leaves, and white flowers. Peppers are lantern-shaped, longer, and more slender than a typical Habanero. This is an early maturity variety that is good for cooler climates. Cold Tolerant. Scoville Heat Units: 150,000.

[HP2001-20 - Habanero Orange Pepper Seeds \(Strain 8\)](#)

100+ days. Capsicum chinense. Open Pollinated. Habanero Orange Pepper. The plant produces heavy yields of wrinkled lantern shaped Habanero peppers. Peppers are very hot and turn from green to golden orange when mature. The plant has green stems, green leaves, and creamy-yellow flowers. Excellent for pickling, and making salsa, hot sauce, and seasoning spice powder. A variety from Mexico.

[HP1983-20 - Habanero Red Hot Peppers \(Strain 7\)](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces heavy yields of 2" long by 1" wide wrinkled hot peppers. Peppers are very hot and turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. Excellent choice for home gardens. A variety from the Caribbean region.

[HP1984-10 - Habanero White Hot Peppers \(Strain 3\)](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces heavy yields of 2" long by 1" wide Habanero hot peppers. Peppers are very hot, have thin flesh, and turn from a greenish-white color to a creamish-white color when mature. The plant has green stems, green leaves, and white flowers. Excellent for making beef jerky, salsa, pickling, and hot sauce. A variety from Mexico.

[HP2059-10 - Habanero White Pepper Seeds \(Strain 5\)](#)

100+ days. Capsicum chinense. Open Pollinated. Habanero White Peppers. The plant produces heavy yields of 1 1/2" long by 3/4" wide hot peppers. Peppers are very hot, have medium-thin flesh, and turn from a green to a pure white color when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling and making salsa, hot sauce, and seasoning powder. A variety from the Yucatan region of Mexico.

[HP855-20 - Haitian Purple Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 1 1/2" long by 3/4" wide hot peppers. Peppers are hot, grow upright, and turn from purple to orange-red when mature. The plant has green stems, green leaves, and white-purple flowers. A very beautiful ornamental plant. Excellent choice for home gardens.

HPLC Test Results: #1

[CA2-50 - Hale's Best Jumbo Melon Seeds](#)

85 days. Cucumis melo. Open Pollinated. Hale's Best Jumbo Melon. The plant produces good yields of 3 1/2 to 5 lb sweet cantaloupes. The outer skin is tan to beige color, while its inner flesh is creamy salmon-orange and very sweet. One of the finest all-around cantaloupes available today! Stores well. This variety tolerates drought well. Drought Tolerant. An excellent choice for home gardens and market growers. A 1920s heirloom variety developed in California, USA. United States Department of Agriculture, NSL 53717.

[HP2489-10 - Hanjiao HJ10 Afterglow Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Hanjiao HJ10 Afterglow Pepper. The plant produces high yields of 8" long by 3/4" wide Cayenne peppers. Peppers are medium hot, have medium thin flesh, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Great in salads, rice & beans, stuffed and salsa. It was developed by the Chinese Space Agency by growing them in space in the 1980s. Also known as the Afterglow Space Chile. A variety from China. Scoville Heat Units: 6,000.

[EG59-20 - Hansel Eggplants](#)

2008 All-America Selections Winner!

55 days. Solanum melongena. (F1) This early maturing plant produces high yields of 3 to 10" long shiny dark purple eggplants. It is non-bitter and perfect for slicing thin onto pizza, casseroles, grilling, or stuffing. This variety is perfect for gourmet dishes. With most eggplants, you must remove the glossy purple skin to dispose of the bad taste, but not so with this variety. They are tender and non-bitter. Best when harvested when 2 to 4" long. It has very few seeds. Grows extremely well in containers. Excellent choice for home gardens.

[HP1969-20 - Habanero White Pepper Seeds \(Strain 2\)](#)

100+ days. Capsicum chinense. Open Pollinated. Habanero White Pepper. The plant produces good yields of white Habanero hot peppers. Peppers turn from green to white when they mature. The plant has green stems, green leaves, and white flowers. Peppers are very hot. Excellent for making beef jerky, salsa, pickling, and hot sauce. A rare variety from Peru. Scoville Heat Units: 500,000.

[RD19-100 - Hailstone Radishes](#)

23 days. Raphanus sativus. Open Pollinated. This early maturing plant produces excellent yields of 3/4 to 1" diameter white radishes. Simply one of the best-tasting radishes available. Radishes are very mild, crisp, and tender. Perfect for salads, stir-fry, gourmet garnishes, or on a vegetable tray. Stores well. Also known as White Button Radish or White Globe Radish. An heirloom variety dating back to 1903. Excellent choice for home gardens.

[HP2111-20 - Halawatha Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 4 1/2" long by 2" wide hot peppers. Peppers are very hot and turn from green to orange when mature. The plant has green stems, green leaves, and white flowers. United States Department of Agriculture PI 640877. A variety from Sri Lanka.

[HB74-500 - Hamburg Rooted Parsley](#)

85 days. Petroselinum crispum. Open Pollinated. The plant produces excellent yields of 8" long white roots. The large edible white roots are smooth and have a mild parsley flavor. Easy to grow. Used by many European cooks as a savory ingredient for salads, soups, and stews. An excellent choice for home gardens.

[HP105-20 - Hanoi Red Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 2" long by 3/4" wide hot peppers. Peppers are very hot, have medium-thin flesh, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent drying pepper for making hot pepper flakes and seasoning spice powder. A variety from the marketplaces in Hanoi, Vietnam.

[LC37-750 - Hanson Improved Lettuce](#)

80 days. Lactuca sativa. Open Pollinated. The plant produces good yields of very large crisphead lettuce. Very crisp, sweet, and flavorful. The crisp leaves are perfect for sandwiches, salads, and garnishes. This high-quality thrives in cooler weather. Also known as Gardener's Favorite Lettuce or King of the Market Lettuce. Excellent choice for home gardens and market growers. A pre-1855 heirloom variety. United States Department of Agriculture, PI 536738.

[CP1-200 - Hard Red Spring Wheat Cover Crop Seeds](#)

90 days. Triticum aestivum. Open Pollinated. Hard Red Spring Wheat Cover Crops. The plant produces excellent yields of Red Spring Wheat. The Hard Red Spring Wheat is one of the most productive and beneficial cover crops for home gardens. It is grown in early spring, in late March or early April, and mowed to revitalize poor soil. It adds nitrogen and breaks up heavily compacted soils. Sow as early as possible in spring for fall harvest. A variety from the USA.

Seeding Rate: 7 lbs per 1,000 square feet, 120 lbs per acre

[TM545-10 - Hard Rock Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 3 oz deep red tomatoes. It has a rich old-fashioned tomato flavor. Perfect for salads and canning. The plant has good foliage protecting tomatoes from sun-scald. An excellent choice for home gardens. An heirloom variety. Disease Resistant: V, F, N. Determinate.

[PS2-100 - Harris Model Parsnip Seeds](#)

130 days. Pastinaca sativa. Open Pollinated. Harris Model Parsnip. The plant produces excellent yields of flavorful 12 to 15" long parsnips. It has a sweet nutty flavor. Perfect boiled, fried, or sauteed in butter. This improved variety has tender, whiter, and smoother roots and is free of side roots. It can be left in the ground all winter without protection for spring use. Freezing improves the flavor. Cold Tolerant. An excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 6128.

[TB6-100 - Havana Tobacco](#)

65 days. Nicotiana tabacum. Open Pollinated. The plant produces high yields of quality tobacco leaves. Havana is one of the best-known Cuban varieties for chewing tobacco and making cigars. Try growing your own tobacco. Seeds are very tiny. A variety from Cuba. (Approximately 100 Seeds per Pack)

[CP2-200 - Hard Red Winter Wheat Cover Crops](#)

90 days. Triticum aestivum. Open Pollinated. The plant produces excellent yields of Red Winter Wheat. The Hard Red Winter Wheat is one of the most productive and beneficial cover crops for home gardens. It is grown in late fall, from August to September, and mowed to revitalize poor soil. It adds nitrogen and breaks up heavily compacted soils. Sow as early as possible in fall for spring harvest. A variety from the USA.

Seeding Rate: 7 lbs per 1,000 square feet, 120 lbs per acre

[HP949-10 - Harold's St Barts Pepper Seeds](#)

100+ days. Capsicum chinense. Open Pollinated. Harold's St Barts Pepper. The plant produces good yields of 1 3/4" long by 1 1/4" wide wrinkled hot peppers. Peppers are very hot, have medium-thick flesh, and turn from light green to yellow when mature. The plant has light green stems, light green leaves, and white flowers. It has a smoky flavor and is great for making hot sauce and seasoning powder, Harold Langlois brought this variety back from St Barts Island. Scoville Heat Units: 129,816.

HPLC Test Results: #6

[WM74-5 - Harvest Moon Watermelons \(Seedless\)](#)

[2013 All-America Selections Winner!](#)

90 days. Citrullus lanatus. (F1) The plant produces high yields of 18 to 20 lb elongated round watermelons with dark green rind with freckles and splotches of bright yellow, similar to the Moon and Stars Watermelons. It has many advantages - it is seedless, ripens earlier, has higher yields, shorter vines, and tastes better! It has crisp pinkish-red red flesh. It is the first-ever hybrid, triploid seedless watermelon to ever win the All-America Selection Award! This is perfect for picnics. To produce seedless watermelons, a pollinator is required. We suggest growing Sugar Baby watermelons alongside Harvest Moon as a pollinator. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and commercial production.

Seedless Watermelons Require Special Attention. The seeds must be started indoors and the Miracle-Gro Seed Starting Mix must be kept at a constant 85 F. Start the seeds at the same time you plant the Sugar Baby pollinator.

[TR27-10 - Hawaiian Lilikoi Fruit Tree \(Passion Fruit\)](#)

Passiflora edulis. Open Pollinated. This seed produces vine-type trees that have edible tropical golden passion fruit. When ripe, passion fruit is enjoyed as a fruit, fruit juice, and used in cakes and frostings. Single passion fruit contains only 16 calories. A good source of potassium, iron, and vitamins A, C.

[TR25-20 - Hawaiian Papaya Tree](#)

Carica papaya. Open Pollinated. The tree produces high yields of edible fruit. When ripe, papaya is enjoyed as a breakfast fruit. As a green fruit, islanders cook papaya in soups and stews. It is a good source of calcium, sugar, and vitamins A, and C. The trees can produce up to 100 fruits per year. Grows well in tropical regions. A variety from the USA.

[HP1926-20 - Hawaiian Red Kona Hot Peppers](#)

100+ days. Capsicum frutescens. Open Pollinated. The plant produces good yields of 1" long by ½" wide hot peppers. Peppers are very hot, grow upright, have medium thin flesh, and turn from light green, to orange, to red when mature. The plant has green leaves, green stems, and white flowers. Peppers are similar to Tabasco. Excellent for making hot sauce. A variety from Hawaii, USA.

[HP1081-10 - HDV Hot Peppers](#)

90 days. Capsicum frutescens. Open Pollinated. The plant produces heavy yields of 1 ½" long by ½" wide hot peppers. Peppers are very hot and turn from green to red when mature. The plant has fuzzy green stems, green stems, and green leaves. It is similar to the Tabasco Pepper and can be used to make hot sauce.

HPLC Test Results: #9

[CA62-20 - Healy's Pride Melon Seeds](#)

85 days. Cucumis melo. Open Pollinated. Healy's Pride Melon. The plant produces high yields of 10 to 15 lb melons. This quality melon has orange flesh and the old-time sweet muskmelon flavor. Suitable for the Midwest region of the United States. Excellent choice for home gardens. A 1952 heirloom variety was developed by Elmer James Healy of Saint Francisville, Illinois, USA. United States Department of Agriculture, NSL 6432.

[TM852-10 - Heatmaster Tomato](#)

75 days. Solanum lycopersicum. (F1) The plant produces high yields of 7 oz deep red tomatoes. Perfect for sandwiches, salads, and slicing. A great storage variety. The plant has the ability to set fruit under higher temperatures than other varieties. Heat Tolerant. Developed for the hot climate of the Southeast. One of the most disease-resistant tomato varieties. An excellent choice for home gardens and market growers. Disease Resistant: V, FF, N, A, St, ToMV. Determinate.

[TM333-20 - Hawaiian Pineapple Tomato](#)

93 day. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 to 2 lb bi-colored yellow-orange beefsteak tomatoes with pinkish streaks. It is fruity, sweet, and rich in pineapple-like flavor. Perfect for sandwiches, salads, slicing, and gourmet dishes. An excellent choice for home gardens. An heirloom variety from the USA. Indeterminate.

[HP278-20 - Hawaiian Sweet Hot Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Hawaiian Sweet Pepper. The plant produces good yields of 2" long by ½" wide hot peppers. Peppers are medium hot, grow upright, have medium thick flesh, and turn from light green to bright red when mature. The plant has green stems, green leaves, and white flowers. Peppers have a sweet hot flavor. Excellent for making salsa. A variety from the Hawaiian Islands, USA.

[TM277-10 - Health Kick Tomato Seeds](#)

72 days. Solanum lycopersicum. (F1) Health Kick Tomato. This early maturing plant produces high yields of 4 to 6 oz red plum tomatoes. Perfect in salads or for making sauce and paste. This variety has 50% more Lycopene than any other tomato. Lycopene is an antioxidant that is proving helpful in preventing cancer and other diseases. One of the most disease-resistant tomato varieties. To maximize yield potential, either stake or use cages. An excellent choice for home gardens, farmer's markets, and market growers. Disease Resistant: V, FF, A, St, BS, TMV, TSWV. Determinate.

[CA3-50 - Hearts of Gold Melon Seeds](#)

92 days. Cucumis melo. Open Pollinated. Hearts of Gold Melon. The plant produces good yields of 3 to 5 lb cantaloupes. The deep orange flesh is very flavorful and sweet. Try this variety at least once! This melon was developed by Roland Morrill in 1895 and granted a trademark on December 15, 1914. Hearts of Gold is an excellent melon and became the most popular variety grown for market in the entire Midwest in the 1930s. An excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 5671. Disease Resistant: ALS.

[TM59-10 - Heatwave II Tomato Seeds](#)

68 days. Solanum lycopersicum. (F1) Heatwave II Tomato. This early maturing plant produces good yields of 6 to 7 oz red tomatoes. Perfect for salads, sandwiches, and eating fresh off the vine. This heat-tolerant variety is suitable for those in the deep South where daytime temperatures average in the 90s. Everyone should grow at least one plant in hot weather regions. An excellent choice for home gardens. Disease Resistant: V, F, A, St. Determinate.

[TM613-10 - Heinz 1350 Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 4 to 6 oz bright red tomatoes. Perfect for sandwiches, salads, and slicing. A great processing variety for canning, sauce, or cooking. A 1963 variety developed by the H. J. Heinz Company primarily for Eastern Canada and the Northeast USA. These seeds originated from tomato plants grown from HEINZ 1439. Crack Resistant. Excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, PI 341133. Disease Resistant: V, F. Determinate.

[TM424-10 - Heinz 2274 Tomato Seeds](#)

77 days. Solanum lycopersicum. Open Pollinated. Heinz 2274 Tomato. The plant produces good yields of 6 oz red tomatoes. The tomatoes were specially developed by Heinz for making ketchup, puree, and sauces. Perfect processing and canning variety. Also great for sandwiches, salads, and slicing. An excellent choice for home gardens, market growers, and open field production. A variety from the USA. Determinate.

[HP2241-20 - Helios Habanero Pepper Seeds](#)

87 days. Capsicum chinense. (F1) Helios Habanero Pepper. The plant produces high yields of 2 3/4" long by 1 1/2" wide dark orange habanero peppers. Peppers are very hot and turn from green to orange when mature. The plant has green stems, green leaves, and white flowers. The plants produce much earlier with bigger peppers than the standard Habanero. Suitable for northern and short season regions. Scoville Heat Units: 75,000.

[TM374-10 - Henderson's Winsall Tomato](#)

90 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of large 1 to 2 lb pink beefsteak tomatoes. They are very sweet and flavorful. Perfect for sandwiches, salads, and slicing. One of the most favored tomato varieties and won approval from 40,000 people. Also known as the Number 400 Tomato and the Winsall Tomato. This is the original stock seed from the USDA Seed Bank. Excellent choice for home gardens. An heirloom from the Henderson Seed Company dating back to 1924. United States Department of Agriculture, PI 644794. Indeterminate.

[TM494-20 - Heritage Rainbow Mix Tomato](#)

75-90 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of great-tasting tomatoes. The mix includes a mix of ten heirloom tomato varieties in various colors, shapes, and sizes. It includes a mixture of colors: orange, red, green, yellow, pink, and black. They are very sweet, meaty, juicy, and flavorful. Perfect for sandwiches, salads, and slicing. Excellent choice for home gardens. Indeterminate.

[TM60-10 - Heinz 1439 Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Heinz 1439 Tomato. The plant produces heavy yields of 6 oz red tomatoes. This variety was developed by Heinz for making ketchup, puree, and sauces. Perfect processing and canning variety. Also great for sandwiches, salads, and slicing. Crack Resistant. Excellent choice for home gardens, market growers, and open field production. These seeds originated from tomato plants grown from HEINZ 1439. United States Department of Agriculture, PI 341137. Disease Resistant: V, F, A. Determinate.

[TM750-10 - Heirloom Cherry Blend Tomato](#)

70-80 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of cherry tomatoes. The blend includes seven different varieties of heirloom cherry tomatoes of various colors: bi-colors, red, pink, green, white, yellow, and black. They are very sweet, juicy, and flavorful. Perfect for salads, snacks, and garnishes. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. Indeterminate.

[BN4-50 - Henderson Lima Bean Seeds](#)

65 days. Phaseolus lunatus. Open Pollinated. Henderson Lima Bean. The plant produces high yields of flavorful creamy white baby lima beans. Pods are 3 1/4" long and dark green and have 3 to 4 seeds per pod. High in Vitamins A, B, and C. These baby lima beans are excellent canning and freezing varieties. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 549466.

[CT53-750 - Hercules Carrot Seeds](#)

90 days. Daucus carota. (F1) Hercules Carrot. The plant produces high yields of very flavorful 7" long orange carrots. Excellent for making carrot juice. They are great for harvesting in the summer or winter. Unlike other carrots, these carrots can grow well in hard rocky soil. It has strong tops making it easy to harvest. Stores well. An excellent choice for home gardens, farmer's markets, and market growers.

[HP2210-20 - Hermosillo Hot Peppers](#)

90+ days. Capsicum annuum. Open Pollinated. The plant produces good yields of 1/2" long by 1/8" wide Chiltepin hot peppers. Peppers are hot, grow upright, have thin flesh, and turn from green to red when mature. The plant has green leaves, green stems, and white flowers. Excellent drying pepper for making seasoning spice powder. A variety from Hermosillo, Sonora, Mexico. Scoville Heat Units: 50,000.

[ON27-250 - Heshiko Bunching Onion Seeds](#)

66 days. Allium cepa. Open Pollinated. Heshiko Bunching Onion. The plant produces excellent yields of very flavorful bunching onions. Perfect for salads and garnishes. These onions never form bulbs. Also known as He Shi Ko Bunching Onions. An excellent choice for home gardens, farmer's markets, and market growers. An heirloom from Japan. Disease Resistant: OYDV, PR, TH.

[CN1-50 - Hickory King Corn Seeds](#)

115 days. Zea mays. Open Pollinated. Hickory King Corn. The plant produces good yields of 8 to 9" long white corn. The ears have 10 to 12 rows of tender kernels. It has two ears per stalk. Great for making grits, cornmeal, and flour. One of the best varieties for hominy because the skin slips off so easily. It has the largest kernels of any other variety and grows in the cotton belt regions. Also known as Bingo Corn in the South as the kernels are so big they were used as bingo chips. Husks are tighter than most varieties and give excellent protection from beetles and earworms. It does well in a wide variety of soils. An excellent choice for home gardens and market growers. An 1800s heirloom variety from Virginia, USA. United States Department of Agriculture, NSL 34753. Disease Resistant: NCLB, SCLB.

[TM451-20 - High Carotene Tomato](#)

76 days. Solanum lycopersicum. Open Pollinated. Plant produces good yields of 3 oz red tomatoes. It has 2 to 3 times more beta-carotene than other varieties. Perfect for sandwiches, salads, slicing, and canning. Excellent choice for home gardens. Indeterminate.

90 days. *Capsicum baccatum*. Open Pollinated. The plant produces heavy yields of 1" long by ¼" wide hot peppers. Peppers are hot and turn from green to orange to red when they mature. The pepper resembles a red drop. The plant has green stems, green leaves, and white flowers with greenish-yellow markings. An excellent choice for home gardens. A variety from Peru.

[TM526-10 - Incas Tomato Seeds](#)

70 days. *Solanum lycopersicum*. (F1) Incas Tomato. This early maturing plant produces good yields of 3 oz bright red Roma tomatoes. It has firm, thick, and meaty flesh. Perfect for making pastes, purees, sauces, or canning. An early San Marzano-type variety ripening as early as late June. Excellent shelf life. Suitable for container gardening. Excellent choice for home gardens. A variety from the USA. Disease Resistant: V, FF. Determinate.

[HP1016-20 - Indian Hot Peppers](#)

90 days. *Capsicum annuum*. The plant produces good yields of 7" long by ¾" wide Cayenne-type hot peppers. Peppers are very hot and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for stir-frying and drying for making seasoning spice powder and pepper flakes. A variety from the markets in India.

HPLC Test Results: #12

[TM866-10 - Indian Stripe Tomato](#)

85 days. *Solanum lycopersicum*. Open Pollinated. The plant produces high yields of 8 to 10 oz bi-colored burgundy-purple tomatoes with faint green stripes that fade as tomatoes ripen. It has the exquisite taste of richness and complexity of fine wine. Perfect for sandwiches, salads, slicing, and making sauce. Similar to the Cherokee Purple but produces bigger tomatoes. Excellent choice for home gardens. An heirloom variety from Arkansas, USA. Indeterminate.

[TM779-20 - Indigo Apple Tomato Seeds](#)

70 days. Solanum lycopersicum. Open Pollinated. Indigo Apple Tomato. This early maturing plant produces high yields of 2 to 4 oz red tomatoes with purplish black coloration. They are very sweet and flavorful. Perfect for sandwiches, salads, and slicing. They are rich in antioxidant anthocyanin. It is a cross between Indigo Rose and a red cherry tomato. The plant has good foliage protecting tomatoes from sun-scald. Grows in clusters. Excellent shelf life. Crack Resistant. Suitable for hydroponics gardening. An excellent choice for home gardens and market growers. Indeterminate.

[TM781-20 - Indigo Blue Berries Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of ½ to ¾ oz bi-colored purple-crimson red cherry tomatoes. The green fruit quickly develops purple tops and crimson bottoms, ripening to a stunning, almost black, with a brick-red bottom. They are very sweet and flavorful. Perfect for salads and garnishes. Always a great seller at Farmer's Markets! Excellent choice for home gardens and market growers. Indeterminate.

[TM783-20 - Indigo Gold Berries Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of ½ to ¾ oz bi-colored golden yellow cherry tomatoes with a hint of purple markings. They are very sweet and flavorful. Perfect for salads and garnishes. Crack Resistant. Always a great seller at Farmer's Markets! Excellent choice for home gardens and market growers. Indeterminate.

[HP604-20 - Inferno Hot Banana Peppers](#)

62 days. Capsicum annuum. (F1) This early maturing plant produces high yields of 8" long by 1 ½" wide banana-shaped hot peppers. Peppers are mildly hot and turn from yellow to red when mature. The plant has green stems, green leaves, and white flowers. An excellent early variety is used fresh in salads, frying, or pickling. A variety from the USA. Scoville Heat Units: 1,000.

[TM780-20 - Indigo Blue Beauty Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 4 to 8 oz red beefsteak tomatoes with blue-black coloration. They are very sweet, juicy, and flavorful. Perfect for sandwiches, salads, and slicing. It is a cross between Beauty King and a blue tomato. Crack-Resistant. The plant has good foliage protecting tomatoes from sun-scald. Hold well on the vine until you are ready to pick them. Always a great seller at Farmer's Markets! Excellent choice for home gardens and farmer's markets. Indeterminate.

[TM782-20 - Indigo Cherry Drops Tomato](#)

65 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces heavy yields of 1 to 2 oz bi-colored rosy-red cherry tomatoes with purple-black markings. It has the same dark blue anthocyanin coloration over red flesh. They are very sweet and flavorful. Perfect for salads and garnishes. Expect huge yields of 500 to 1,000 tomatoes per plant. Crack Resistant. The plant has good foliage protecting tomatoes from sun-scald. An excellent choice for home gardens. A variety was developed by Dr. Jim Myers at Oregon State University, USA. Indeterminate.

[TM784-20 - Indigo Rose Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 1 to 2 oz bi-colored red cherry tomatoes with deep purple tops. They are very sweet and flavorful. Perfect for salads and garnishes. The purple skin has high levels of anthocyanins, a disease-fighting compound that helps fight cancer, reduce inflammation, and slow the aging process. Grows in clusters of 6 to 8. Crack Resistant. Excellent choice for home gardens. A variety was developed by Jim Myers at Oregon State University, USA. This variety is protected by the Plant Variety Protection Act, #201100302. United States Department of Agriculture, PI 661213 PVPO. Disease Resistant: EB, LB. Semi-Determinate.

[BN127-50 - Iron & Clay Cowpea Seeds](#)

65 days. Vigna unguiculata. Open Pollinated. Iron & Clay Cowpeas. This bush-type plant produces heavy yields of cowpeas. Unlike other cowpea varieties, iron and clays continue to grow and produce forage after the seed has dropped. Excellent for baking, soups, dried beans, and canning. It can also be planted in fields to attract deer and game birds. Deer love these cowpeas. Quail & other game birds relish the seed if the plant is allowed to seed. Drought Tolerant. An excellent choice for home gardens. A variety from the USA.

[BR50-100 - Ironman Broccoli Seeds](#)

80 days. Brassica oleracea. (F1) Ironman Broccoli. The plant produces good yields of blue-green broccoli with dome-shaped heads. This high-quality variety is easy to harvest due to fewer leaves to remove on the stem. A reliable variety due to its outstanding consistency and quality. Suitable for spring and fall planting. Heat Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production.

[ON5-100 - Ishikura Improved Bunching Onions](#)

66 days. Allium cepa. Open Pollinated. The plant produces very flavorful bunching onions. These salad onions have long white stalks. Most of the plants can be eaten with little waste. Great for sukiyaki, soups, and salads. Excellent for spring or late summer harvests. This improved version of the Ishikura Onion has long-distance shipping qualities. These green onions do not form bulbs and do not multiply by division. The stalks can be harvested when pencil-thin or left to grow as thick as a mature carrot. It is tolerant to warm and cool temperatures and is suitable for winter harvesting in some areas. One of the most popular bunching onions in Japan. An excellent choice for home gardens, farmer's markets, and market growers.

[HP2365-10 - Island Hellfire Hot Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces high yields of 2 3/4" long by 1/2" wide Cayenne-type hot peppers. Peppers are very hot, have thin flesh, and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Peppers are usually used when green but can be used when red. Great for fresh salsa. Excellent drying pepper for making seasoning spice powder. A variety from the USA.

[HP1096-20 - Isleta Long Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 7" long Anaheim-type hot peppers. Peppers are medium hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for frying, roasting, grilling, pickling, and cooking. A variety from 4,900 feet above sea level from Isleta Pueblo in New Mexico, USA.

[HB57-500 - Italian Dark Green Parsley](#)

78 days. Petroselinum crispum. Biennial. Open Pollinated. The plant produces good yields of rich flavor shiny dark green flat parsley leaves. It has more flavor than curled varieties. Excellent drying variety that has a strong parsley taste and crisp stems. Great for soups, stews, and sauces. An excellent choice for home gardens, A heirloom variety from Italy.

[CA9-50 - Iroquois Melon Seeds](#)

80 days. Cucumis melo. Open Pollinated. Iroquois Melon. This early maturing variety produces good yields of 5 to 7 lb melons with gray-green skin. They have deep orange flesh. Good shipper. It is known for being the first melon resistant to Fusarium Wilt. Does well in midwestern and northeastern US and eastern Canada. An excellent choice for home gardens and market growers. Developed in 1944 by Dr. Henry M. Munger at Cornell University in Ithaca, New York, USA. United States Department of Agriculture, NSL 5684. Disease Resistant. FW.

[TM181-20 - Isis Candy Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Isis Candy Tomato. The plant produces high yields of 1 to 2 oz bi-colored golden cherry tomatoes with red marbling inside and outside. They are very sweet with a fruity flavor. Perfect for salads and snacks. Grows in clusters of 6 to 8. Excellent choice for home gardens. Indeterminate.

[SP383-10 - Island Sweet Peppers](#)

81 days. Capsicum annuum. (F1) The plant produces good yields of 3 1/2" long by 3 1/2" wide sweet bell peppers. Peppers turn from green to light lavender, to yellow and orange streaks, to very dark red when mature. The peppers are mild with a slightly sweet flavor. Excellent for stuffing, salads, gourmet dishes, and cooking. An excellent choice for home gardens and Farmer's Markets. A variety from the USA. Disease Resistant: TMV.

[ST4-100 - Italian Alpine Strawberries](#)

Fragaria vesca. Open Pollinated. The compact plant produces excellent yields of miniature deep red strawberries. It has a rich flavor and is more flavorful than other full-size varieties. Kids love them! It has few runners making it perfect for patio pots. The leaves can be used to make herbal tea with woodruff leaves. Suitable for containers, rock gardens, and edging plants. An excellent choice for home gardens.

[HB160-500 - Italian Flat Leaf Parsley](#)

78 days. Petroselinum crispum. Biennial. Open Pollinated. The plant produces good yields of flat dark green parsley leaves. Excellent drying variety that has a strong parsley taste. One of the most popular varieties used for seasoning in Italy. Repels asparagus beetles. An excellent choice for home gardens. A variety from Italy.

[TM216-20 - Italian Giant Beefsteak Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 lb deep red beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, sandwiches, salsas, sauces, and Italian dishes. The plant requires support, either staking or cages. An excellent choice for home gardens. An heirloom variety from Italy was brought to the USA over 80 years ago. Indeterminate.

[HP859-20 - Italian Hot Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3 1/4" long by 1" wide hot peppers. Peppers are medium hot, grow upright, have medium-thin flesh, and turn from light green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for Italian cuisine and drying pepper for making seasoning spice powder. A variety from Italy.

HPLC Test Results: #6

[HB181-1000 - Italian Lavender Seeds](#)

85 days. Lavandula angustifolia. Perennial. Italian Lavender. Open Pollinated. The plant produces silver-green leaves and beautiful lavender-blue flowers. Flowers are fragrant and edible. The plant flowers in June and July. Leaves can be used fresh or dried. Used to treat headaches, burns, and cuts. Also used to repel moths, mosquitoes, and gnats. The plant will continue to flower for 6 to 10 years. Suitable for containers. An excellent choice for home gardens. A variety from Italy.

[SP282-20 - Italian Peppercini Sweet Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 5" long by 1 1/2" wide peppers. Peppers are very flavorful and sweet and turn green when mature. The plant has green stems, green leaves, and white flowers. Should be harvested when peppers are young, and then pickled. These peppers are like the type you see in supermarkets. Excellent in salads. A variety from Italy.

[TM320-20 - Italian Red Pear Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Italian Red Pear Tomato. The plant produces high yields of 6 to 12 oz red pear-shaped tomatoes. They are very sweet and flavorful. Perfect for making Italian tomato sauce and paste. Excellent choice for home gardens. A variety from Italy. Indeterminate.

[TM940-20 - Italian Roma Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of large 6 oz red plum-shaped tomatoes. They have a thick wall, are meaty, and very flavorful with very few seeds. Perfect for making sauce, puree, and paste. Perfect canning variety. An excellent choice for home gardens. A heirloom variety from Italy. Determinate.

[TM69-10 - Italian Gold Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 3 to 6 oz golden-orange Roma tomatoes. They are very sweet, meaty, and flavorful. Perfect for paste, sauces, canning, and freezing. Grows in clusters of 6. An excellent choice for home gardens. Disease Resistant: V, FF. Determinate.

[HB10-500 - Italian Large Leaf Basil](#)

78 days. Ocimum basilicum. Annual. Open Pollinated. The plant produces excellent yields of very flavorful and tender large 4" long medium-dark basil leaves. Preferred by chefs because it is sweeter and less clover-like than other varieties. Used in sauces, salads, and Italian dishes. An excellent choice for home gardens.

[HB122-1000 - Italian Oregano Seeds](#)

90 days. Origanum vulgare. Perennial. Open Pollinated. Italian Oregano. The plant produces good yields of very flavorful dark green Oregano leaves. It has a mild pepper taste and a pungent scent similar to mint. One of the best tasting Italian Oregano varieties around. Excellent for pizza and Italian dishes. Suitable for containers. An excellent choice for home gardens. A variety from Italy.

[HB178-500 - Italian Plain Parsley](#)

78 days. Petroselinum crispum. Biennial. Open Pollinated. The plant produces good yields of curled glossy dark green parsley leaves. This variety has plain flat curled leaves. It is very attractive and used to garnish many dishes like fish, sauces, and pasta. Excellent drying variety that has a strong parsley taste. Also known as Celery Leaf Parsley. Excellent choice for home gardens and specialty markets.

[HP943-10 - Italian Roaster II Pepper Seeds](#)

85 days. Capsicum annuum. (F1) Italian Roaster II Pepper. The plant produces good yields of 6" long by 1 1/2" wide hot peppers. Peppers are very mild, just a little heat, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Superb flavor. Excellent for salads, pizza, and grilling.

[BR77-500 - Italian Sprouting Broccoli Seeds](#)

80 days. Brassica oleracea. Open Pollinated. Italian Sprouting Broccoli. The plant produces heavy yields of large dark green broccoli. It is very flavorful with delicious side shoots. Suitable for spring and summer planting. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[TM690-20 - Italian Sweet Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 3 lb red beefsteak tomatoes. It has a rich old-fashioned tomato flavor. They are very sweet, juicy, and flavorful. Perfect for sandwiches, salads, and slicing. A potato leaf variety. An excellent choice for home gardens. Indeterminate.

[LC38-750 - Ithaca Lettuce](#)

72 days. Lactuca sativa. Open Pollinated. The plant produces good yields of crisphead lettuce. The crisp leaves are perfect for sandwiches, salads, and garnishes. It has long been an industry standard for Eastern commercial growers because of its quality. Also great for Southern growers too as a fall crop. Slow to bolt. Excellent choice for home gardens, market growers, and open field production. Developed by Dr. Minotti of Cornell University, Ithaca, New York, USA. United States Department of Agriculture, PI 536843. Disease Resistant: BR, BRib, TB.

[BR39-25 - Jacaranda Broccoli Seeds](#)

58 days. Brassica oleracea. (F1) Jacaranda Broccoli. This early maturing compact plant produces good yields of 5" diameter deep purple broccoli. It is a cross between broccoli and cauliflower, bringing out the best of both. It is very tender, very sweet, and delicious. Long shelf life. An excellent choice for home gardens and market growers. A variety from the USA.

[PM6-20 - Jack Be Little Pumpkins](#)

105 days. Cucurbita pepo. Open Pollinated. The plant produces tiny 4" wide orange pumpkins. They are very attractive and are great for making Halloween and Thanksgiving decorations. An excellent choice for home gardens and market growers. Always a great seller at Farmer's Markets.

[PM7-20 - Jack O Lantern Pumpkins](#)

100 days. Cucurbita pepo. Open Pollinated. The plant produces medium size 10 lb orange pumpkins. Excellent for pumpkin pies and making Jack O Lantern carved pumpkins and for Halloween decorations. Kids love them! An excellent choice for home gardens and market growers. Always a great seller at Farmer's Markets!

[PM46-20 - Jack of All Trades Pumpkins](#)

95 days. Cucurbita pepo. (F1) This semi-bush type plant produces good yields of the perfect size and shapes orange pumpkins. Pumpkins have a smooth surface making it the perfect pumpkin for carving and painting. Great for making pumpkin pie. An excellent choice for home gardens and market growers. Always a great seller at Farmer's Markets!

[CU97-20 - Jackson Supreme Cucumbers](#)

52 days. Cucumis sativus. (F1) This early maturing plant produces high yields of dark green pickling cucumbers. Cucumbers are best when harvested when 3 or 4" long. Excellent quality pickling variety. One of the most disease-resistant cucumbers on the market. Grows well in the Southern States of the USA. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

[BN20-50 - Jackson Wonder Lima Bean Seeds](#)

68 days. Phaseolus lunatus. Open Pollinated. Jackson Wonder Lima Bean. The plant produces good yields of medium-sized lima beans which have speckles of purple. Pods are 3 1/2" long and have 3 to 4 beans. This variety is very popular in the South. Plant sets pods even under hot weather conditions. An excellent choice for home gardens. United States Department of Agriculture, PI 549467.

[BN93-50 - Jade Bean Seeds](#)

56 days. Phaseolus vulgaris. Open Pollinated. Jade Bean. This early maturing bush-type plant produces high yields of 7" long deep green beans. This Gourmet bean is one of the best tasting beans ever grown. Remarkably flavorful! Great variety for freezing or canning. This variety does well even under high temperatures. Very sweet and tender. The upright plant keeps the pods clean and straight and off the ground. The seeds need warmer soil to sprout, so delay planting until well after the last frost date, and the soil warms. An excellent choice for home gardens, farmer's markets, market growers, and commercial growers. United States Department of Agriculture, W6 26701. Disease Resistant: BCMV (NY 15), CT.

[BS2-100 - Jade Cross Brussels Sprouts Seeds](#)

[1959 All-America Selections Winner!](#)

80 days. Brassica oleracea. (F1) Jade Cross Brussels Sprouts. The plant produces heavy yields of solid Brussels Sprouts. The heads average 1 1/2 to 2 inches in diameter. Excellent freezing variety. One of the earliest Brussels Sprouts for the short growing season. An excellent choice for home gardens.

[OK18-50 - Jade Okra](#)

70 days. Abelmoschus esculentus. Open Pollinated. This early producing plant produces high yields of dark green okra. The okra stays tender up to 6" long. Great for making fried okra, soups, stews, and gumbo. An excellent choice for home gardens. Developed in 1991 by the University of Arkansas, Arkansas, USA.

[CB25-50 - Jade Pagoda Chinese Cabbage Seeds](#)

65 days. Brassica rapa. (F1) Jade Pagoda Chinese Cabbage. The plant produces good yields of 6 lb size dark green Michihili-type Chinese Cabbage. The plant is slow to bolt and vigorous. Perfect for spring/fall crops. Suitable for home gardens and market growers. United States Department of Agriculture, PI 662675.

[HP2235-10 - Jalafuego Hot Peppers](#)

70 days. Capsicum annuum. (F1) This early maturing plant produces high yields of 4" long by 1½" wide Jalapeno peppers. Plants have green leaves, green stems, and white flowers. One of the hottest Jalapenos with dark green smooth peppers. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: BLS, PVY

[HP128-20 - Jalapeno M Hot Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces high yields of 2 ¾" long by 1" wide hot peppers. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Usually used when green to make salsa or pickled. Also known as Jalapeno Mild. A variety from the USA.

[HP129-10 - Jaloro Hot Peppers](#)

65 days. Capsicum annuum. Open Pollinated. This early maturing compact plant produces good yields of 3" long by 1 ½" wide Jalapeno hot peppers. Peppers are medium hot, have thick flesh, and turn from yellow, to orange, and to red when mature. Peppers as just as hot as regular Jalapenos. It can be used at any color stage. Excellent for Mexican cuisine and for making salsa and pickles. Developed by the Texas Agriculture Extension Service. A variety from the USA. Disease Resistant to 6 types of pepper viruses.

[HP133-20 - Jamaican Hot Yellow Peppers](#)

100 days. Capsicum chinense. Open Pollinated. The compact plant produces good yields of 1 ¾" long by 1 ½" wide wrinkled lantern-shaped hot peppers. Peppers are very hot, have thin flesh, and turn from green to yellow when mature. The plant has green stems, green leaves, and white flowers. An excellent choice for home gardens. A variety from Jamaica. Scoville Heat Units: 200,000.

[TR35-20 - Japanese Black Pine Bonsai Tree](#)

Pinus thunbergii. Open Pollinated. This Bonsai tree produces has small bright green evergreen needles. The needles are in fascicles of two with a white sheath at the base. The bark is gray on young trees and small branches, changing to black and plated on larger branches and the trunk. It has resistance to pollution and salt and is a popular horticultural tree. A variety is native to Japan.

[TM455-20 - Japanese Black Trifele Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 4 to 6 oz mahogany tomatoes. It is one of the best-tasting black tomatoes from Russia. It has a rich old-fashioned tomato flavor. They are very sweet, meaty, juicy, and flavorful. Perfect for sandwiches, salads, slicing, and canning. The attractive tomatoes are the shape and size of a Bartlett pear. A potato leaf variety. Crack Resistant. A variety from Russia. Indeterminate.

[HP1858-20 - Jalapeno Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces high yields of 2" long by 1" wide Jalapeno hot peppers. Peppers are hot, have a thick wall, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Best when harvested when green. Excellent for making salsa and pickling. A variety from the USA.

[HP2336-20 - Jalapeno Traveler Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Jalapeno Traveler Pepper. The plant produces high yields of 3" long by 1 ½" wide Jalapeno hot peppers. Peppers are hot and turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. Excellent for salads, salsa, and pickling. The pepper is named after Larry Pierce of Cabool, Missouri. He brought the seeds with him when he moved to Oklahoma, Wyoming, and then Missouri. A variety from the USA.

[HP131-10 - Jamaican Gold Hot Peppers](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces good yields of 1 ½" long by 2" wide hot peppers. Peppers are very hot and turn from green to golden yellow when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling, and making salsa, hot sauce, and seasoning spice powder. A variety from Jamaica.

[OK30-50 - Jambalaya Okra](#)

50 days. Abelmoschus esculentus. (F1) This extra-early maturing plant produces high yields of 6 to 7" long shiny dark green okra. Great for making fried okra, soups, stews, gumbo, and casseroles. This compact plant is just the right size for a home garden. Suitable for containers. An excellent choice for home gardens.

[PM62-5 - Japanese Black Pumpkins](#)

100 days. Cucurbita maxima. Open Pollinated. The plant produces good yields of small 4 lb black pumpkins. The brilliant yellow-orange flesh has a flavor similar to sweet potatoes. It is very sweet and delicious. Stores well. Try growing black pumpkins in your home pumpkin patch! An excellent choice for home gardens and Farmer's Markets. An heirloom variety from Japan.

[CN10-50 - Japanese Hullless Corn Seeds](#)

83 days. Zea mays. Open Pollinated. Japanese Hullless Corn. The plant produces incredible yields of 4 to 5" long corn. There are 3 to 6 ears on each stalk. This is a great variety suitable for making white popcorn. Great for school projects. It is extremely productive. An excellent choice for home gardens. United States Department of Agriculture, PI 219881.

[TR33-20 - Japanese Larch Bonsai Tree](#)

Larix kaempferi. Open Pollinated. This Bonsai tree produces has small green evergreen needles. The crown is broad conic, both the main branches and the side branches are level, the side branches only rarely drooping. It is used for ornamental purposes in parks and gardens. Disease Resistant. A variety is native to Japan.

[CU99-20 - Japanese Long Pickling Cucumber Seeds](#)

68 days. Cucumis sativus. Open Pollinated. Japanese Long Pickling Cucumber. The plant produces high yields of 18 to 20" long dark green burpless cucumbers. They are very mild, very crisp, and easy to digest. One of the best Japanese burpless cucumbers on the market. Best when harvested when 12" long. Excellent pickling variety with very small seeds! An excellent choice for home gardens.

[RD43-100 - Japanese Minowase Radishes](#)

45 days. Raphanus sativus. Open Pollinated. The plant produces excellent yields of 24" long giant white radishes. The radish has a mild taste and stays mild even when very large. Great pickled, stir-fried, steamed, raw, or used in Oriental dishes. Stores well. Impress your neighbors by growing a world record size radish. An excellent choice for home gardens and market growers.

[TR37-20 - Japanese Yew Bonsai Tree](#)

Taxus cuspidata. Open Pollinated. This Bonsai tree produces has small bright green evergreen needles. This tree can be trimmed to a pleasingly pyramidal shape, and typically grows in conical formation. Also known as Spreading Yew Bonsai Tree. A variety is native to Japan.

[PM18-20 - Jarrahdale Pumpkins](#)

110 days. Cucurbita pepo. Open Pollinated. The plant produces good yields of 10 lb gray pumpkins. The yellow-orange flesh is sweet, dry, and stringless making it suitable for baking or pies. This variety will store for months. Grow white and orange pumpkins too for a colorful decorative display. An excellent choice for home gardens and Farmer's Markets. A variety from Australia.

[TM887-10 - Jasper Tomato](#)

[2013 All-America Selections Winner!](#)

60 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of ½ to ¾ oz red cherry tomatoes. It has a rich old-fashioned tomato flavor. Grows in clusters. Crack-Resistant. The plant requires support, either staking or cages. Excellent choice for home gardens and market growers. Disease Resistant: FF, EB, LB, SLS. Indeterminate.

[TM184-20 - Jaune Flamme Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 3 to 4 oz orange tomatoes. They are very sweet, with a fruity and tart flavor. Perfect for salads, garnishes, gourmet dishes, and making sauce. Also good for drying. Grows in clusters of 8 to 12. Crack Resistant. Also known as Flamme Tomato. Excellent choice for home gardens. An heirloom variety from Norbert Ferreira of Helliner, France. Disease Resistant: LB. Indeterminate.

[TM121-20 - Jelly Bean Red Tomato](#)

65 days. Solanum lycopersicum. (F1) This early maturing plant produces heavy yields of ½ to ¾ oz red grape tomatoes. They are very sweet and flavorful. Perfect for salads and snacks. Grows in clusters of 15 to 30. They hold up well during shipment. Crack Resistant. An excellent choice for home gardens and market growers. Disease Resistant: V, FF, A, St. Indeterminate.

[TM396-20 - Jelly Bean Yellow Tomato](#)

65 days. Solanum lycopersicum. (F1) This early maturing plant produces heavy yields of ½ to ¾ oz yellow grape tomatoes. They are very sweet and flavorful. Perfect for salads and snacks. The plant grows 15 to 30 tomatoes in clusters. The plant requires support, either staking or cages. They hold up well during shipment. An excellent choice for home gardens and market growers. Disease Resistant: V, FF, A, St. Indeterminate.

[CA21-50 - Jenny Lind Melon Seeds](#)

80 days. Cucumis melo. Open Pollinated. Jenny Lind Melon. The plant produces good yields of 1 to 2 lb melons. The turban-shaped melon has creamy lime green flesh which is juicy and delightfully sweet. No cracking when ripe. Excellent choice for home gardens and specialty market growers. An 1840s heirloom variety from the Philadelphia markets that was named after a popular singer of that era, Jenny Lind, known as the Swedish Nightingale.

[TM467-20 - Jersey Devil Tomato Seeds](#)

80 days. Solanum lycopersicum. Open Pollinated. Jersey Devil Tomato. The plant produces high yields of 4 to 6" long bright red tomatoes. They are shaped like banana peppers! They are meaty and juicy with very few seeds. Perfect for making sauces, paste, and salsas. An excellent choice for home gardens. An heirloom variety from Tomato Seed Company of Metuchen, New Jersey, USA. United States Department of Agriculture, PI 639214. Indeterminate.

[BR74-100 - Jet Dome Broccoli Seeds](#)

54 days. Brassica oleracea. (F1) Jet Dome Broccoli. This early-maturing plant produces good yields of dark green broccoli. Suitable for spring, summer, and fall planting. Holds well in the field. Heat Tolerant. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[TM371-20 - Jet Star Tomato Seeds](#)

72 days. Solanum lycopersicum. (F1) Jet Star Tomato. This early maturing plant produces tremendous yields of 7 to 9 oz red tomatoes. They are meaty and very flavorful. Perfect for salads, sandwiches, and canning. In tests, it had the highest yield of total marketable and premium quality tomatoes averaging 100 tomatoes per plant. It is also rated as the top greenhouse tomato. Suitable for commercial growers. Low acidity variety. Crack Resistant. A fresh market and plant sales favorite. To maximize yield potential, either stake or use cages. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: V, F. Indeterminate.

[JA1-25 - Jicama Seeds](#)

150 days. Pachyrhizus erosus. Open Pollinated. Jicama. The plant produces tall climbing vines and a white turnip-shaped root that tastes like water chestnuts. The large tuberous roots can be eaten raw or cooked and are used as a source of starch. The Jicama plant is a vine that grows to a length of 20 feet or more. The roots are light brown in color and may weigh up to 50 pounds. Most of those on the market will weigh between 3 to 5 pounds. Only one root forms per plant. Store in a cool dry place after harvest. Also known as the Mexican potato and Yam Bean. An excellent choice for home gardens, farmer's markets, and market growers. A variety from Dzan, Yucatan, Mexico. United States Department of Agriculture, PI 438902.

Note: The seeds, pods, stems, flowers, and leaves are poisonous! Only use the tasty roots.

[HP621-20 - Joe's Long Cayenne Pepper Seeds](#)

90 days. Capsicum annuum. Open Pollinated. Joe's Long Cayenne Pepper. The plant produces good yields of 11" long by 3/4" wide hot peppers. Peppers are very hot and turn from green to bright red when mature. Excellent for making pepper flakes and hot sauce. A variety from Calabria, Italy.

[CB23-250 - Joi Choi Chinese Cabbage Seeds](#)

50 days. Brassica rapa. (F1) Joi Choi Chinese Cabbage. This early maturing plant produces high yields of flavorful Pak Choi Chinese cabbage. The plant has shiny dark green leaves with tender white stalks. It can be harvested when plants are still young and small or harvested when fully mature at 15" tall. Slow to bolt. This was the first hybrid white stem Pak Choi developed. Cold Tolerant. Heat Tolerant. Excellent choice for home gardens and market growers.

[HP2214-20 - Josephine's Jewel Hot Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces high yields of 3" long by 1/2" wide hot peppers. Peppers are hot, grow upright in clusters, have medium-thin flesh, and turn from green to red when mature. The plant has green stems and green leaves. Excellent cooking and drying pepper. A variety from Queens, New York, USA.

[TM278-20 - Jetsetter Tomato Seeds](#)

64 days. Solanum lycopersicum. (F1) Jetsetter Tomato. This early maturing plant produces high yields of 8 oz red tomatoes. They are very sweet, juicy, and flavorful with a rich old-fashioned tomato flavor. Perfect for sandwiches, salads, and slicing. This variety matures very early offering those in the South a great early harvest. It is one of the most disease resistant tomato varieties available. The type is seen in the fresh vegetable aisle of supermarkets! An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: V, FF, N, A, St, TMV. Indeterminate.

[SP23-20 - Jimmy Nardello Pepper Seeds](#)

90 days. Capsicum annuum. Open Pollinated. Jimmy Nardello Pepper. The plant produces high yields of 8" long by 1" wide sweet peppers. Peppers turn from green to bright red when mature. This is one of the sweetest non-bell varieties on the market. Excellent for salads, cooking, and stir fry. An excellent choice for home gardens. A variety from Italy.

[HP1956-20 - Joe's Round Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3/4" diameter round hot peppers. Peppers are very hot and turn from green to red when mature. Excellent for pickling or making salsa. Also makes a beautiful ornamental plant. A variety from Calabria, Italy.

[TM185-20 - Jolly Tomato](#)

[2001 All-America Selections Winner!](#)

75 days. Solanum lycopersicum. (F1) The plant produces high yields of 1 1/2 oz pink cherry tomatoes. They are very sweet, juicy, and flavorful. It has a peach or oval shape with a distinctive tip. Perfect for salads, snacks, and gourmet dishes. Grows in clusters of 10 to 14. Crack Resistant. Excellent choice for home gardens. Indeterminate.

[CN26-50 - Jubilee Corn Seeds](#)

95 days. Zea mays. (F1) Jubilee Corn. The plant produces high yields of 8 1/2 to 9" long ears of yellow corn. Ears grow on strong sturdy stalks. This variety has excellent flavor and tenderness. It is one of the most popular varieties that commercial canners use and is one of the most widely used hybrids in the world. Great canning and freezing variety. This is a Normal Sugary variety (su). It does well under the widest range of climates and growing conditions. An excellent choice for home gardens and market growers. Disease Resistant: R, SCLB.

[WM12-20 - Jubilee Improved Watermelon Seeds](#)

95 days. Citrullus lanatus. Open Pollinated. Jubilee Improved Watermelon. The plant produces good yields of 35 lb long light green skin watermelon with dark green stripes. The watermelon's red flesh is very sweet. Grows well in warm temperatures. Perfect for backyard home garden. This is an improved version of the Jubilee Watermelon. An excellent choice for home gardens and market growers. Disease Resistant: A, FW.

[WM65-20 - Jubilee Watermelon Seeds](#)

90 days. Citrullus lanatus. Open Pollinated. Jubilee Watermelon. The plant produces high yields of 35 lb oblong watermelons with light green skin and dark green stripes. It has very sweet bright red flesh. One of the most popular watermelons in the United States. It thrives in heat and humidity and adapts well to various climates. Perfect for backyard home garden! A good shipper variety! Heat Tolerant. High Humidity Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety was developed by the Florida Agricultural Experiment Station in 1963, United States Department of Agriculture, NSL 42803. Disease Resistant: A, FW.

[TM71-10 - Juliet Tomato Seeds](#)

1999 All-America Selections Winner!

60 days. Solanum lycopersicum. (F1) Juliet Tomato. This early maturing plant produces high yields of 1 to 2 oz glossy red grape tomatoes. They are very sweet, juicy, and delicious with a rich tomato flavor. Perfect for salads, snacks, and gourmet dishes. They also make good stewing, sauce, and drying tomatoes. Grows in clusters from 12 to 18 like grapes. Heavy producers, about 350 tomatoes per plant. It holds on the vine longer than any other grape tomato. It has a good shelf life too, so you can keep them on hand without picking them every day. They are easy to pick and suitable for storage and shipping. Crack Resistant. The plant requires support, either staking or cages. Good quality tomatoes are used for greenhouse and commercial production. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: St, EB, LB. Indeterminate.

[SP156-20 - Jumbo Stuff Sweet Peppers](#)

68 days. Capsicum annuum. (F1) This early maturing plant produces high yields of 6" long by 3 3/4" wide sweet bell peppers. Peppers are light lemon cream-yellow in color and have thick walls. A hybrid made from the cross-pollination of the Hungarian and Sweet Banana Sweet Peppers. Excellent used fresh in salads, sauteed or stuffed.

[TM70-20 - Jubilee Tomato Seeds](#)

1943 All-America Selections Winner!

80 days. Solanum lycopersicum. Open Pollinated. Jubilee Tomato. The plant produces high yields of 8 to 12 oz bright golden orange tomatoes. They have a thick wall, are meaty, and have a mild flavor. Perfect for salads, salsas, cooking, canning, and making tomato juice. Adds bright color to salads. It is a cross between Tangerine and Rutgers tomato. Also known as Golden Jubilee Tomato. Low acidity variety and high in Vitamin C. Plant requires support, either staking or cages. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. An heirloom variety from the Maule Seed Company of Philadelphia, USA. United States Department of Agriculture, PI 452018. Disease Resistant: A. Indeterminate.

[TM508-10 - Julia Child Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of deep pink beefsteak tomatoes. They are very flavorful, sweet, and juicy. Perfect for sandwiches, salads, and slicing. An heirloom variety named after Julia Child, the "French Chef" and world-renowned cook. The tomato that was selected was the best-tasting tomato heirloom variety in the collection of tomatoes that was handed down for generations by different families from around the country. A potato leaf variety. Excellent choice for home gardens. An heirloom variety dating back to 1997. Indeterminate.

[SQ14-20 - Jumbo Pink Banana Squash](#)

105 days. Cucurbita maxima. Open Pollinated. The plant produces good yields of 3 feet long banana-shaped pinkish color squash. This squash has delicious yellow-orange flesh. It can grow up to 50 lbs. Impress your neighbors and grow a giant squash. An excellent choice for home gardens. United States Department of Agriculture, NSL 5237. A winter squash variety.

[PN1-20 - Jumbo Virginia Peanut Seeds](#)

120 days. Arachis hypogaea. Open Pollinated. Jumbo Virginia Peanuts. The plant produces high yields of large peanuts. They are delicious when roasted. High in protein. Try making your own homemade peanut butter. It requires 4 months of frost-free weather. An excellent choice for home gardens and market growers. A variety was developed by the peanut breeding program at North Carolina State University, North Carolina, USA. Disease Resistant: TSWV. (SHELLED PEANUTS)

[SP36-20 - Jupiter Sweet Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces good yields of large jumbo size 4" long by 4" wide sweet bell peppers. Peppers turn from green to red when mature. Peppers have thick walls which makes them suitable for stuffing and freezing. The plant has good foliage to protect peppers from sunburn. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 601110. Disease Resistant: TMV.

[SQ113-10 - Kabocha Squash Seeds](#)

81 days. Cucurbita maxima. (F1) Kabocha Squash. The plant produces high yields of 4 to 5 lb dark green globe-shaped squash with pale green stripes. The orange-yellow flesh has a sweet and nutty flavor. Kabocha squash is an important vegetable in Japan and is very popular in the Oriental supermarkets on the West Coast. Perfect for making pumpkin curries and bread. An excellent storage variety from 2 to 5 months after harvest and keeps well and improves with storage. Also, known as Naguri Squash. An excellent choice for home gardens, farmer's markets, market growers, and open field production. A winter squash variety.

[BR80-500 - Kailaan Chinese Broccoli Seeds](#)

70 days. Brassica oleracea. Open Pollinated. Kailaan Chinese Broccoli. This early-maturing plant produces good yields of deep green broccoli. It is a popular Oriental green vegetable that is grown for its stalks and leaves. Suitable for spring and fall planting. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[CN18-50 - Kandy Korn Corn Seeds](#)

89 days. Zea mays. (F1) Kandy Korn Corn. The plant produces good yields of 8" long ears of yellow corn. The ears have 14 to 16 rows of tender kernels. It has a creamy texture and delicate flavor. This variety retains sweetness for days after picking. Great for freezing. This is a Sugary Enhanced Variety (se+) which means these varieties will stay sweet and tender for 10-14 days after reaching maturity. Cold Tolerant. An excellent choice for home gardens and market growers. Disease Resistant: SW.

[BR57-100 - Kariba Broccoli Seeds](#)

66 days. Brassica oleracea. (F1) Kariba Broccoli. This late-maturing plant produces good yields of green broccoli with dome-shaped heads. It does well as a fall crop in the East and as a winter crop in the desert Southwest. Suitable for fall and winter planting. Cold Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. Disease Resistant: FY.

[TP6-500 - Just Right Turnips](#)

1960 All-America Selections Winner!

50 days. Brassica rapa. (F1) This early maturing plant produces good yields of 4 1/2 to 6" diameter turnips. The skin and flesh are pure white! It has mild flavored roots and delicious greens. Extremely cold tolerant. Stores well. Will store until spring. Sow in summer/fall for fall/winter harvests. It is not recommended for spring sowing because of a tendency to bolt early. Excellent choice for home gardens and market growers.

[LC46-750 - Kagraner Sommer Lettuce](#)

58 days. Lactuca sativa. Open Pollinated. The plant produces good yields of butterhead lettuce. It has a mild buttery flavor. This is a very hardy plant that is slow to bolt in the summer heat. Does well in hot weather! Heat Tolerant. Also known as Butter Bow Head Lettuce. Excellent choice for home gardens. A variety from Germany. United States Department of Agriculture, PI 634680.

[TM145-20 - Kalman's Hungarian Pink Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 6 to 8 oz pink tomatoes. They are very meaty and have a very outstanding rich tomato flavor. Perfect for making a wonderfully rich tomato paste, but can also be used as a slicer or in salads. Excellent choice for home gardens. An heirloom variety from Hungary. Indeterminate.

[HB91-100 - Kantikari](#)

95 days. Solanum xanthocarpum. Annual. Open Pollinated. The plant produces good yields of Kantikari. The root is used to treat cough, sore throats, asthma, toothaches, and chest pain. This herb has a high concentration of solasodine which is used in manufacturing cortisone and sex hormones. The berries are used in Indian curries. A herb from India.

Lot No: R

Germination: 85%

Test Date: 05/23

[TM186-20 - Kellogg's Breakfast Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces excellent yields of 1 to 2 lb bright orange beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for sandwiches, salads, and slicing. An excellent choice for home gardens. An heirloom variety from Darrell Kellogg and originating from West Virginia, USA. Indeterminate.

[TM809-20 - Kenosha Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 6 to 8 oz red tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for making paste and sauce. An excellent choice for home gardens. An heirloom variety from Italy. Indeterminate. United States Department of Agriculture, PI 303750.

[TM214-20 - Kentucky Beefsteak Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 1 to 2 lb orange beefsteak tomatoes. These giant tomatoes are meaty, juicy, and flavorful. Perfect for sandwiches, salads, and slicing. An excellent choice for home gardens. An heirloom variety from Kentucky, USA. Indeterminate.

[BN54-50 - Kentucky Blue Pole Bean Seeds](#)

1991 All-America Selections Winner!

63 days. Phaseolus vulgaris. Open Pollinated. Kentucky Blue Pole Bean. This high quality pole type plant produces good yields of 7" long delicious dark green beans. It is a cross between Kentucky Wonder and Blue Lake, combining the best of both. For the best flavor, pick when 5" long. The plant has 8-foot-long vines. An excellent choice for home gardens. United States Department of Agriculture, PI 539928.

[PM68-20 - Kentucky Field Pumpkins](#)

90 to 120 days. Cucurbita moschata. Open Pollinated. The plant produces high yields of 10 - 15 lb deep dull orange pumpkins. They will vary in shape but are usually longer than they are wider. It has a nutty flavor with a creamy texture. Excellent for baking and making pumpkin pie. Stores well. Good canning variety. It is the perfect complement to your Pumpkin patch collection! Drought Tolerant. An excellent choice for home gardens and Farmer's Markets. An heirloom pumpkin from the USA.

[BN44-50 - Kentucky Wonder Bush Bean Seeds](#)

65 days. Phaseolus vulgaris. Open Pollinated. Kentucky Wonder Bush Bean. This bush type plant produces heavy yields of 9" long by 1/2" wide delicious medium green beans. Excellent canning and freezing variety. Suitable for small gardens and square foot gardens. An excellent choice for home gardens. A variety from the USA. United States Department of Agriculture, PI 549742.

[BN5-50 - Kentucky Wonder Pole Bean Seeds](#)

65 days. Phaseolus vulgaris. Open Pollinated. Kentucky Wonder Pole Bean. This pole plant produces heavy yields of 9" long by 1/2" wide medium dark green beans. This is one of the all time favorites for the home garden. It is said to be the best pole bean that can be found. Excellent freezing variety. This heirloom was introduced in Kentucky just before the Civil War. Suitable for small gardens and square-foot gardens. Requires trellis. Also known as Old Homestead Beans. An excellent choice for home gardens. United States Department of Agriculture, PI 549742. Disease Resistant: R.

[BN114-50 - Kentucky Wonder Wax Bean Seeds](#)

68 days. Phaseolus vulgaris. Open Pollinated. Kentucky Wonder Wax Bean. This pole plant produces heavy yields of 8" long yellow wax beans. Excellent fresh, canned, or frozen. The most popular fresh market yellow wax pole bean. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 549603. Disease Resistant: R.

[BT16-100 - Kestral Beet Seeds](#)

53 days. Beta vulgaris. (F1) Kestral Beet. This early maturing plant produces good yields of red beets. A dual-purpose variety. It can be harvested early for baby beets, or it can be left in the field to mature to full size. Slow to bolt. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: CLS, DM, PM, RZ.

[SP205-10 - Kevin's Early Orange Pepper Seeds](#)

80 days. Capsicum annuum. Open Pollinated. Kevin's Early Orange Pepper. The plant produces good yields of huge 3 1/2" long by 4" wide sweet bell peppers. Peppers turn from green to orange when they mature. This variety has thick walls and is excellent in salads, sauteed, or stuffed. Excellent choice for home gardens.

[TM616-10 - Kewalo Tomato Seeds](#)

78 days. Solanum lycopersicum. Open Pollinated. Kewalo Tomato. The plant produces high yields of 6 to 8 oz red tomatoes. Perfect for sandwiches, salads, and slicing. This variety is suitable for tropical and sub-tropical regions, like Hawaii, where the disease is a serious problem. While it is well suited for the tropics, it is also well adapted to areas with high humidity and high temperatures. It is the only open-pollinated variety that has these disease-resistance characteristics for tropic regions. Perfect for container gardening, patios, or small gardens where space is very limited! An excellent choice for home gardens and market growers. This variety was developed by Dr. Jim Gilbert at the University of Hawaii, USA. Disease Resistant: N, BW, ToMV. Determinate.

[SP224-10 - Key Largo Sweet Peppers](#)

63 days. Capsicum annuum. (F1) This early maturing plant produces heavy yields of large 7" long by 2" wide sweet Cubanelle peppers. Peppers have thick walls and turn from light green to red when mature. A smooth and attractive Cubanelle pepper. Excellent choice for home gardens, market growers, and open field production.

[SP334-20 - King Arthur Sweet Peppers](#)

72 days. Capsicum annuum. (F1) King Arthur Sweet Peppers. This early maturing plant produces good yields of huge 4 ½" long by 4 ½" wide sweet bell peppers. Peppers turn from green to red when they mature. This early variety is thick-walled and very sweet. Excellent in salads, sauteed or stuffed. An excellent choice for home gardens, market growers, and open field production.

[SP39-20 - King of the North Sweet Peppers](#)

68 days. Capsicum annuum. Open Pollinated. This early maturing plant produces good yields of huge 6" long by 4" wide sweet bell peppers. Peppers have thick walls and turn from green to bright red when mature. A perfect stuffing pepper. Suitable for Northern regions. United States Department of Agriculture PI 592825.

[BR78-100 - Kingdom Broccoli Seeds](#)

70 days. Brassica oleracea. (F1) Kingdom Broccoli. The plant produces good yields of dark green broccoli. It is a good quality variety with and nice dome shape. Suitable for spring and summer planting. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[CA67-50 - Kiwano Melon Seeds](#)

120 days. Cucumis metuliferus. Open Pollinated. Kiwano Melon. The plant produces good yields of thorny oval bright orange fruits that are filled with greenish-gold gel. The plants have hairy leaves and stems and produce 6 to 9" long melons. It has the tart flavor of pomegranate and citrus, a combination of banana, melon, and cucumber flavors! They are very healthy too, full of vitamins A, B, and C as well as essential minerals like calcium, potassium, magnesium, and phosphorus. Also rich in antioxidants, which is always a plus! Grown for garnishes and are excellent decorative fruit. A gourmet variety sold at specialty markets. Vines are excellent climbers and are best when grown on a trellis. Grows best in hot climates. Also known as African Horned Melons and Jelly Melons. Resistant to Melon Aphids and Greenhouse White Flies. Drought Tolerant. An heirloom variety originated from the Kalahari desert in Africa. An excellent choice for home gardens and market growers. United States Department of Agriculture, AMES 19146. Disease Resistant: N, PM.

[PE25-50 - Knight Sweet Pea Seeds](#)

62 days. Pisum sativum. Open Pollinated. Knight Sweet Pea. This early maturing plant variety produces heavy yields of 3 ½ to 4" long sweet peas. The pods have 6 to 10 tender and flavorful peas. This is the highest yielding, early maturing pea available. Perfect fresh in salads, in soups, and used in cooking. This high quality pea is a fresh market favorite. No trellis necessary! An excellent choice for home gardens and market growers. Developed by Dr. Gerald Marx at Cornell University, New York Agricultural Experiment Station, Geneva, New York, USA. United States Department of Agriculture, W6 12580. Disease Resistant: BYMV, PEMV, PM.

[SP38-20 - Keystone Resistant Giant #3 Pepper Seeds](#)

75 days. Capsicum annuum. Open Pollinated. Keystone Resistant Giant #3 Pepper. The plant produces heavy yields of large 4 ½" long by 3 ½" wide sweet bell peppers. Peppers have thick walls and turn from green to red when mature. Produces well even under adverse weather conditions. A perfect stuffing pepper. An excellent choice for home gardens, market growers, and open field production. Disease Resistant: TMV.

[BN6-25 - King of the Garden Lima Bean Seeds](#)

90 days. Phaseolus lunatus. Open Pollinated. King of the Garden Lima Bean. The plant produces record yields of giant lima beans. This is one of the largest lima beans on the market producing record crops up until frost. Pods are 7" long with 5 or 6 beans. Excellent variety for freezing. Needs the support of a strong pole or trellis. An excellent choice for home gardens. United States Department of Agriculture, PI 549468.

[LK2-100 - King Richard Leeks](#)

75 days. Allium ampeloprasum. Open Pollinated. A very early variety that produces high yields of quality leeks. The flavor is mild. Excellent in soups, stews, and salads. Suitable for hydroponics gardening. An excellent choice for home gardens and market growers. United States Department of Agriculture, W6 44541.

[BR79-50 - King's Crown Broccoli Seeds](#)

65 days. Brassica oleracea. (F1) King's Crown Broccoli. This early maturing plant produces good yields of dark green broccoli. It has nice dome heads with small beads. Suitable for spring, summer, and fall planting. Heat Tolerant. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[WM57-20 - Klondike Blue Ribbon Watermelons](#)

90 days. Citrullus lanatus. Open Pollinated. The plant produces good yields of 30 lb scarlet red watermelons. It has a light green rind with dark green stripes. This variety is one of the best-tasting watermelons on the market. It is very sweet. Sunburn resistant! Disease Resistant: A, FW.

[BN128-50 - Knuckle Purple Hull Cowpea Seeds](#)

65 days. Vigna unguiculata. Open Pollinated. Knuckle Purple Hull Cowpeas. This bush-type plant produces heavy yields of short purple pods. Excellent drying, canning, and freezing variety. Brown cowpeas. An excellent choice for home gardens. A variety from the USA.

[HP2404-10 - Komodo Dragon Pepper Seeds](#)

110+ days. Capsicum chinense. Open Pollinated, Komodo Dragon Pepper. The plant produces good yields of 2" long by 1 3/4" wide wrinkled Habanero peppers. Peppers are extremely hot and turn from green to red when mature. The plant has green stems, green leaves, and creamy-yellow flowers. Komodo is particularly interesting because it has a delayed reaction that gives you a false sense of security, but then after about 10 seconds, the full hot sensation hits you and your whole mouth is on fire. Be very, very careful handling this extremely hot pepper. Excellent for beef jerky, jerk sauces, pickling, and making salsa, hot sauce, and seasoning spice powder. This pepper was developed in 2015 by Salvatore Genovese. The pepper is a cross between a Bhut Jolokia and a Trinidad Scorpion. It is currently one of the Hottest Pepper in the World! Try growing the Pepper X and all the Carolina Reapers: Chocolate, Mustard, Orange, Peach, Red, and Yellow versions! A variety from the United Kingdom. Scoville Heat Units: 1,400,000

[TM74-20 - Koralik Tomato](#)

55 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces heavy yields of 1/2 to 3/4 oz bright red cherry tomatoes. They are sweet and flavorful. Perfect for salads and snacks. Grows in clusters of 6 to 8. Perfect for small gardens where space is very limited. They all ripen at the same time! Excellent choice for home gardens and market growers. An heirloom from Russia. Determinate.

[HP1346-20 - Korean Long Green Hot Peppers](#)

85 days. Capsicum annuum. (F1) The plant produces good yields of 4 1/2" long by 3/4" wide hot peppers. Peppers are very hot and turn from dark green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for frying, roasting, and cooking. Perfect choice for home gardens and market growers. A variety from South Korea. United States Department of Agriculture, PI 508433.

[HB3-1000 - Korean Mint](#)

85 days. Agastache rugosa. Perennial. Open Pollinated. The plant produces good yields of flavorful green mint-like leaves with beautiful purple flowers. The leaves smell like licorice. Used in salads, stir-fries, and for seasoning meats and other dishes. Also makes a pleasing tea. It is known to help treat fevers and aid in digestion, chest ailments, and many other conditions. Excellent to make aromatic cut flowers. Easy to grow. Attracts beneficial insects and butterflies. An excellent choice for home gardens.

[HP2449-10 - Korean Shishito Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces high yields of 2 1/2" long by 3/4" wide hot peppers. Peppers are hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent stir-fry and cooking pepper. A variety from South Korea.

[HP1880-10 - Korean Winner Hot Peppers](#)

80 days. Capsicum annuum. (F1) The plant produces good yields of 6" long by 1/2" wide hot peppers. Peppers are medium-hot, have medium-thick skin, and are very flavorful. Peppers are medium-hot and turn from green to bright red when mature. The plant has green stems, dark green leaves, and white flowers. Used fresh or dried in many Korean dishes. An excellent choice for home gardens and market growers. A variety from Korea.

[HP368-10 - Kori Sitakame Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3" long hot peppers. Peppers are medium-hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Heat Tolerant. Peppers are grown in the low desert regions with shade by local farmers at Norogachi, Chihuahua, Mexico.

[GD48-10 - Koshare Yellow Banded Gourd Seeds](#)

100 days. Cucurbita siceraria. Open Pollinated. Koshare Yellow Banded Gourd. This bush type plant produces heavy yields of 5" long dark green and golden yellow gourds. It has between 2 and 5 bands of alternating colors, green and yellow. Perfect for making crafts or Halloween or Thanksgiving decorations. An excellent choice for home gardens.

[TM704-20 - Kosovo Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Kosovo Tomato. The plant produces good yields of large 1 to 2 lb deep pink tomatoes. The tomatoes are heart-shaped, sweet, meaty, solid, and juicy. Perfect for sandwiches, salads, slicing, or making a great tomato sauce. An excellent choice for home gardens. This variety was brought back by a former United Nations worker in Kosovo. Indeterminate.

[K07-25 - Kossak Kohlrabi Seeds](#)

80 days. Brassica oleracea. (F1) Kossak Kohlrabi. The plant produces excellent yields of incredibly large kohlrabi bulbs. The bulbs can grow up to 10" wide, up to 10 lbs. It is very sweet, very flavorful, and very tender with no trace of woodiness. They can be eaten raw, used in coleslaw, cooked, or used in Hungarian soups. Impress your neighbors by growing a World Record Giant Kohlrabi. Keeps well, and has good storage variety. It is an excellent choice for home gardens.

[HP292-20 - Kung Pao Hot Peppers](#)

85 days. Capsicum annuum. (F1) The plant produces high yields of 5" long by ½" wide hot Cayenne-type peppers. Peppers are medium hot, have thin walls, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for making Kung Pao Chicken, beef dishes, and stir fry dishes. An excellent choice for home gardens and Farmer's Markets. Scoville Scoville Heat Units: 10,000

HPLC Test Results: #3

[CT21-750 - Kuroda Long Carrot Seeds](#)

73 days. Daucus carota. Open Pollinated. Kuroda Long Carrot. The plant produces high yields of flavorful 8" long deep orange carrots. They are mild and sweet. Excellent for making carrot juice. Grows well in raised beds and compact spaces. A popular Asian market variety. It tolerates heat better than most carrots and does well in a wide variety of soils. Keeps well. Heat Tolerant. An excellent choice for home gardens, farmer's markets, and market growers. Disease Resistant: ALS.

[CT47-750 - Kyoto Red Carrot Seeds](#)

90 days. Daucus carota. Open Pollinated. Kyoto Red Carrot. The plant produces good yields of 12" long bright red carrots. They are tender and sweet. Great when used fresh, steamed, or used to make carrot juice. Excellent for salads and gourmet dishes. Try growing orange, purple, red, white, and yellow carrots too for a beautiful gourmet dish. An excellent choice for home gardens. An heirloom variety is grown in the Kyoto area of Japan.

[HP2254-10 - La Bomba Hot Peppers](#)

56 days. Capsicum annuum. (F1) This early maturing plant produces high yields of 2 ¾" long by 1" wide Jalapeno hot peppers. Peppers are hot and turn from green to red when mature. Plant has green stems, green leaves, and white flowers. Plant has dense leaf canopy to help prevent against sun scald. Peppers have thick walls and are great used fresh and poppers. Excellent choice for home gardens, market growers, and open field production. Disease Resistance: PVY.

[TM674-10 - La Roma III Tomato Seeds](#)

76 days. Solanum lycopersicum. (F1) La Roma III Tomato. The plant produces high yields of 5 to 8 oz bright red Roma tomatoes. They have thick walls, are meaty, and are very flavorful. Cooking intensifies flavor, too. One of the very best Italian-type tomatoes on the market. Perfect for making tomato puree, paste, and sauce. The flesh is thick and drier so that it will cook down into a thick sauce. The tomato freezes well too for later cooking. One of the most disease-resistant tomato varieties. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. Disease Resistant: V, FF, N, A, St, ToMV. Determinate.

[KL11-750 - Lacinato Kale Seeds](#)

62 days. Brassica oleracea. Open Pollinated. Lacinato Kale. This early-maturing plant produces high yields of flavorful blue-green kale leaves. It is sweet and tender. Used fresh in salads, on sandwiches, in soups, or cooked. It is best eaten when leaves are small and tender. The flavor is enhanced by frost! Also known as Dinosaur Kale, Tuscan Kale, Black Cabbage Kale, Black Kale, Black Palm Kale, Cavolo Palmizio Kale, Nero di Toscana Kale, and Tuscan Black Palm Cabbage. Suitable for hydroponics gardening. Cold Tolerant. An excellent choice for home gardens, market growers, and open field production. Grown by Jefferson at Monticello, Virginia, USA. A 1700s heirloom from Tuscany, Italy.

[BN129-50 - Lady Cowpea Seeds](#)

60 days. Vigna unguiculata. Open Pollinated. Lady Cowpeas. This bush-type plant produces heavy yields of tiny creamy-white cowpeas. Excellent fresh, frozen, or dried. It thrives in hot Southern regions. Also known as Lady Finger Cowpeas. Cream cowpeas. An excellent choice for home gardens. United States Department of Agriculture, PI 17359.

[SP162-10 - Lafayette Pepper Seeds](#)

78 days. Capsicum annuum. (F1) Lafayette Pepper. The plant produces high yields of 3 ½" long by 2 ¼" wide sweet bell peppers. Peppers turn from green to yellow when mature. The plant has green stems, green leaves, and white flowers. Peppers have thick walls making them great for salads, stuffing, and cooking. Suitable for home gardens and market growers. Disease Resistant: PMV, PVY, BLS.

[HP1085-10 - Lal Mirch Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Lal Mirch Pepper. The plant produces good yields of 2 ½" long by ½" wide Cayenne-type hot peppers. Peppers are hot and turn from green to red when they mature. The plant has green stems, green leaves, and white stems. A variety from India.

[EG39-20 - Lao Green Stripe Eggplants](#)

Developed in 1976 by Dr. Henry Munger of Cornell University, Ithaca, New York, USA. Disease Resistant: ALS, Ccu, CMV, DM, PM, PRSV, TLS, ULS, WMV, ZYMV.

[TM268-20 - Marmande Tomato](#)

67 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 6 to 10 oz red tomatoes. An old-time favorite that has the full rich tomato flavor. They are very sweet, meaty, and juicy. Perfect for salads, sandwiches, and gourmet dishes. Widely grown in the field and greenhouses. Excellent choice for home gardens and market growers. An heirloom variety was developed by Vilmorin Seed Company, France in 1897. United States Department of Agriculture, PI 157850. Disease Resistant: V, F, A. Semi-Determinate.

[TM568-10 - Marmara Tomato](#)

75 days. Solanum lycopersicum. (F1) The plant produces good yields of 5 to 7 oz bright red tomatoes. They are sweet and flavorful. Perfect for salads, slicing, and sandwiches. This is a modern version of the Marmande tomato. An excellent choice for home gardens and market growers. Disease Resistant: V, F, TMV. Indeterminate.

[HB80-250 - Marshmallow Seeds](#)

90 days. Althaea officinalis. Perennial. Marshmallow. The plant produces velvety gray-green leaves with beautiful petaled pale pink flowers. Used to treat sore mouths, coughs, and treat wounds. Also said to aid women during childbirth. Roots are used to make Candy Marshmallows and leaves and shoots are used in salads.

[BS13-50 - Marte Brussels Sprouts Seeds](#)

100 days. Brassica oleracea. (F1) Marte Brussels Sprouts. The plant produces high yields of blue-green Brussels Sprouts. This high-quality variety has heads average 1 to 1 1/2" in diameter. Perfect for roasted, grilled, or steamed. The sprouts are smooth and great tasting. Awarded the RHS Award of Garden Merit. It is widely adaptable and suitable for warmer climates than traditional sprout production areas. Heat Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. Disease Resistant: FY.

[GD49-20 - Martin Birdhouse Gourds](#)

100 days. Cucurbita pepo. Open Pollinated. Produces good yields of tan-colored gourds. These gourds are excellent for making birdhouses. It has a flat oval bottom end and a tapered top. They are 16" tall and 12" across. Dries well and holds up outdoors if cured properly. Also known as Martinhouse Gourds. An excellent choice for home gardens and specialty market growers.

[TM810-20 - Martin Tomato](#)

80 days. Solanum lycopersicum. (F1) The plant produces good yields of 8 oz red tomatoes. Perfect for salads, slicing, and sandwiches. These Marmande-type tomatoes are best picked when the crown is dark green and the rest of the tomato is reddish-orange. Excellent choice for home gardens. Indeterminate.

[TM409-10 - Martino's Roma Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Martino's Roma Tomato. The plant produces heavy yields of 2 to 3 oz red plum-shaped tomatoes. They are meaty with few seeds. Perfect for canning and making salsa, sauce, and paste. Tomatoes tend to fall off the plant when ripe. An excellent choice for home gardens and market growers. An heirloom variety from Italy. Disease Resistant: EB. Determinate.

[TM732-20 - Marvel Stripe Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 1 to 2 lb bi-colored yellow-orange beefsteak tomatoes with red-colored streaking. They are sweet and have a fruity flavor. It is one of the gardeners' favorite bi-colored tomatoes because of its beauty, size, and taste. Perfect for salads and sandwiches. Heat-Tolerant. Drought-Tolerant. Always a great seller at Farmer's Markets! Excellent choice for home gardens and market growers. An heirloom variety from the Zapotec people of from Oaxaca, Mexico. Indeterminate.

[TM833-10 - Marzinera Tomato](#)

75 days. Solanum lycopersicum. (F1) The plant produces heavy yields of 2 to 3 oz bright red Roma tomatoes. Perfect for canning, cooking, and making salsa, sauce, and paste. This is a new addition to the popular Heirloom Marriage series. They are a cross between Cream Sausage and San Marzano. An excellent choice for home gardens. Indeterminate.

[TM340-20 - Matina Tomato Seeds](#)

58 days. Solanum lycopersicum. Open Pollinated. Matina Tomato. This early maturing plant produces good yields of 2 to 4 oz red tomatoes. The taste is so good and it normally wouldn't be found in huge beefsteak varieties. Perfect for canning, salads, salsa, slicing, sandwiches, and sauce. The fact is that it ripens up to a full month earlier than many beefsteak varieties. It is a very early-producing variety that bears continuously throughout the season. It does well in cool summer night regions like the Pacific Northwest. The plant has good foliage protecting tomatoes from sun-scaud. Grows in clusters. A potato leaf variety. Suitable for hydroponics gardening. An excellent choice for home gardens. An heirloom variety from Germany. Indeterminate.

[TM80-20 - Matt's Wild Cherry Tomato](#)

60 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of small ¼ to ½ oz red cherry tomatoes. They are very sweet and the flavor is superior. Perfect for salads and snacks. Tomatoes grow in clusters. Suitable for hydroponics gardening. An excellent choice for home gardens. A variety from Hidalgo, Mexico. Disease Resistant: EB, LB. Indeterminate.

[HP1957-20 - Maule's Red Hot Peppers](#)

80 days. Capsicum annuum. Open Pollinated. The plant produces heavy yields of 10" long Cayenne-type hot peppers. Peppers are hot and turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. Originating from the William Maule Seed Company of Philadelphia. Excellent for making hot sauce or dried to make crushed pepper flakes. A variety from Pennsylvania, USA.

[AS1-100 - Mary Washington Asparagus Seeds](#)

Asparagus officinalis. Perennial. Open Pollinated. Mary Washington Asparagus. The plant produces heavy yields of uniform sturdy tender stalks of rich dark green asparagus. It is known for its crisp delicious taste. Asparagus is a perennial vegetable, so you plant it just once and enjoy season after season. The plant will have cuttings in 2 years after planting seeds in the soil, but your asparagus patch can be productive for up to 20 years, so it's well worth the wait. Once the plants start producing they can be harvested for up to two months. Mary Washington is America's most popular asparagus. They are excellent for canning and freezing. An heirloom variety was developed by Dr. J. B. Norton of the U.S. Department of Agriculture in 1919 to improve disease resistance. An excellent choice for home gardens. A variety from the USA. United States Department of Agriculture, NSL 20542. Disease Resistant: Blight, R.

[SN11-100 - Matador Viking Spinach Seeds](#)

45 days. Spinacia oleracea. Open Pollinated. Matador Viking Spinach. The plant produces large smooth dark green spinach leaves. Very flavorful. Usually steamed or boiled for nutritious greens and used to make an exciting salad. Also great for canning and freezing. Used widely in Italy in pasta & risotto. Suitable for container gardening. A slow bolting variety. An excellent choice for home gardens. A 1933 heirloom variety from Italy.

[SP385-10 - Mattadores Sweet Peppers](#)

90 days. Capsicum annuum. (F1) The plant produces good yields of large 8" long by 3" wide elongated sweet peppers. Peppers turn from green to red when they mature. This is a high-quality Italian Roasting pepper. Excellent for grilling, frying, stuffing, salads, and cooking. An excellent choice for home gardens, Farmer's Markets, and Market growers. A variety from the USA. Disease Resistant: Tm.

[HP488-20 - Maui Purple Hot Peppers](#)

95 days. Capsicum annuum. Open Pollinated. The plant produces high yields of 1 ¾" long by ½" wide hot peppers. Peppers are hot, grow upright, and turn from dark purple to red when mature. The plant has dark purple stems, green and dark purple leaves, and violet-purple flowers. A variety from Hawaii, USA.

HPLC Test Results: #10

[BN84-50 - Maxibel Bean Seeds](#)

65 days. Phaseolus vulgaris. Open Pollinated. Maxibel Bean. This bush type plant produces good yields of 7" long green beans. This high quality French Filet type stringless bean is very thin and very flavorful. An excellent choice for home gardens. A variety from the USA.

[BN80-50 - Mayflower Bean Seeds](#)

98 days. Phaseolus vulgaris. Open Pollinated. Mayflower Bean. The plant produces good yields of green beans. They are prized for their great flavor. All-purpose beans that have superior quality and are stringless. Use as a green bean or dry. This heirloom variety is said to have been brought over on the Mayflower in 1620. It has a long history of being circulated in the Carolinas. An excellent choice for home gardens. United States Department of Agriculture, PI 531235. Disease Resistant: A, BCMV (BV-1), R.

[HP412-10 - McMahon's Texas Chiltepin Pepper Seeds](#)

100+ days. Capsicum annuum. Open Pollinated. McMahon's Texas Chiltepin Pepper. The plant produces good yields of ½" long by ¼" wide hot peppers. Peppers are very hot, grow upright, have thin flesh, and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent drying pepper. Botanist Bernard McMahon gave Thomas Jefferson this variety in the late 18th century. Also known as McMahon's Texas Bird Pepper and McMahon's Bird Pepper. An heirloom variety from Texas, USA.

[EG75-10 - Meatball Eggplant Seeds](#)

60 days. Solanum melongena. (F1) Meatball Eggplant. The plant produces good yields of 5" long eggplants. One of the meatiest and tastiest eggplants available. The eggplant is very flavorful and moist. It has the texture of meat, like no other eggplant. These eggplants can be used as the main entrée, as an appetizer, side dish, stir-fry, pasta, salads, or for making baba ghanoush. Excellent choice for home gardens and specialty market growers. A variety from the USA.

[TM235-20 - Mega Tom Tomato](#)

79 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of huge 2 lb red tomatoes. They are very sweet, juicy, and flavorful. Perfect for sandwiches, burgers, salads, and slicing. Impress your neighbors by growing a huge tomato. An excellent choice for home gardens. Indeterminate.

[CB39-50 - Megaton Cabbage Seeds](#)

90 days. Brassica oleracea. (F1) Megaton Cabbage. The plant produces good yields of giant cabbage. The heads average 12 to 16 inches in diameter and weigh 15 to 22 lbs. Even when large, the heads hold without cracking and the solid white interior retains its mild, sweet flavor. Impress your neighbors and grow a giant cabbage. Excellent choice for home gardens. Disease Resistance: FY.

[BN39-50 - McCaslan Bean Seeds](#)

65 days. Phaseolus vulgaris. Open Pollinated. McCaslan Bean. The plant produces good yields of 8" long green beans. These all-purpose beans have superior quality and are stringless. Use as a snap bean or dry. An excellent choice for home gardens. This is one of the oldest heirloom bean varieties around. It was grown in the early 1900s by the McCaslan family who lived in Georgia, USA. A snap bean that is suitable for Southern parts of the United States. Drought Resistant.

[TB18-100 - MD A30 Tobacco](#)

65 days. Nicotiana tabacum. Open Pollinated. The plant produces high yields and good-quality tobacco leaves. This Maryland Tobacco has good disease resistance to mosaic virus and blank shank. It averages 23 to leaves 24 per plant. Try growing your own tobacco. Seeds are very tiny.

[HP486-10 - Medusa Hot Peppers](#)

65 days. Capsicum annuum. (F1) This early maturing plant produces high yields of 2 ½" long hot peppers. Peppers are mildly hot, just a hint of hotness, grow upright in clusters, are twisted like a snake, and turn from ivory, to yellow, to orange, to red when mature. This pepper is named after Medusa's mythological hair. A beautiful ornamental plant that is ideal for both public and residential areas. Excellent indoor container plant, patio, hanging baskets, borders, or small gardens. An excellent choice for home gardens. A variety from the USA.

[EG13-20 - Megal Eggplants](#)

60 days. Solanum melongena. (F1) This early maturing plant produces high yields of flavorful 7 to 9" long purplish-black elongated shaped eggplants. Very flavorful. It has a good shelf life. Perfect for grilling, frying, stuffing, and baking. Excellent choice for home gardens and specialty market growers. Disease Resistant: CMV, TMV.

[HP2476-10 - Megatron Pepper Seeds](#)

65 days. Capsicum annuum. (F1) Megatron Pepper. This early maturing strong compact plant produces high yields of giant 4 ½" long by 1 ½" wide hot peppers. Peppers are medium hot, have thick walls, and turn from glossy dark green to deep red when mature. The plant has green stems, green leaves, and white flowers. Usually used when green. A favorite type for slicing, stuffing, grilling, or pickling. It has an excellent shelf life. Suitable for containers. An excellent choice for home gardens, farmer's markets, and market growers. A variety from the USA. Disease Resistant: BLS, TMV. Scoville Heat Units: 8,000.

[CB24-250 - Mei Qing Choi Chinese Cabbage Seeds](#)

45 days. Brassica rapa. (F1) Mei Qing Choi Chinese Cabbage. This early maturing plant produces good yields of Pac Choi-type Chinese cabbage. The heads average 4 to 6 inches in diameter and weigh ¼ to ½ lbs. The plant has a vase-like shape and the leaves are tasty, crisp, and tender. Excellent flavor and is extra tender. Plants are slow to bolt. Cold Tolerant. Heat Tolerant. An excellent choice for home gardens and market growers.

[BR59-100 - Melody Broccoli Seeds](#)

24 days. Brassica oleracea. (F1) Melody Broccoli. This early-maturing plant produces good yields of green broccoli. It is very tender and sweet with a mild flavor. It is the most tender and flavorful mini broccoli. Suitable for spring and fall planting. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[TM883-20 - Mely Tomato Seeds](#)

75 days. Solanum lycopersicum. (F1) Mely Tomato. The plant produces high yields of 4 to 5 oz dark red tomatoes. They are firm and very flavorful. Perfect for salads, slicing, and sandwiches. These tomatoes are one of the best for open fields and commercial production. Excellent choice for home gardens, market growers, and open field production. Disease Resistance: V, FF, BS, TYLCV. Determinate.

[BT28-100 - Merlin Beet Seeds](#)

55 - 85 days. Beta vulgaris. (F1) Merlin Beet. The plant produces high yields of 3 to 4" diameter dark red beets. It is very sweet, has a high sugar content, and has a superior taste! The roots are uniformly round and smooth. It has bright red stems and dark green tops. Grow them as gourmet baby veggies or full-sized beets. Excellent roasted, baked, or boiled. Drought Tolerant. Slow to bolting. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistance: CLS, DM.

[LC18-750 - Merveille des Quatre Saisons Lettuce](#)

48 days. Lactuca sativa. Open Pollinated. This early-maturing plant produces good yields of flavorful red-tinted butterhead lettuce. The outside leaves are magenta and the interior leaves are apple-green. It is self-blanching. This variety of lettuce forms heads quickly! Very flavorful. Great for salads and garnishes. It can be grown nearly year-round as it keeps firm even under hot weather. It has the ability to withstand summer heat and produce in cool spring and fall-autumn weather. Bolt Tolerant. Also known as Marvel of Four Seasons Lettuce. An excellent choice for home gardens and specialty market growers. An 1885 heirloom variety from France.

[SQ128-20 - Melody Blend Bush Squash Seeds](#)

60 to 90 days. Cucurbita pepo. Open Pollinated. Melody Blend Bush Squash. This early maturing bush plant produces high yields of a mix of summer squash. The mix has the most popular and very flavorful varieties of squash, including Golden Zucchini, Black Beauty Zucchini, Grey Zucchini, and the White Bush Scallop. Also known as Summer Melody Squash. Suitable for containers and small gardens. Heat Tolerant. Drought Tolerant. An excellent choice for home gardens. A variety from the USA. A summer squash.

[SP364-20 - Melrose Pepper Seeds](#)

65 days. Capsicum annuum. Open Pollinated. Melrose Pepper. This early maturing plant produces heavy yields of 4" long red sweet peppers. These sweet peppers turn from green to bright red when they mature and the flavor becomes more intense the longer they ripen. Great for salads, stuffing, fried, and cooking. Excellent choice for home gardens. An Italian heirloom from the Chicago area.

[HP151-20 - Merah Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 5" long by 1" wide hot peppers. Peppers are hot turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Great cooking pepper! A variety from Malaysia.

[SP351-20 - Merlot Pepper Seeds](#)

68 days. Capsicum annuum. (F1) Merlot Pepper. This early maturing plant produces high yields of 5" long by 4" wide sweet black bell peppers. Peppers have thick crisp walls and turn from green to black when mature. Great for salads, stuffing, cooking, and gourmet dishes. Excellent choice for home gardens. A variety from the USA. Disease Resistance: BLS, TMV.

[LC63-750 - Mesclun Mix Lettuce](#)

30 days. Lactuca sativa. Open Pollinated. This early maturing plant produces a flavorful mixture of lettuce and tender greens. A special blend of light green, dark green, and red lettuce and greens. Perfect for salads, pasta, soups, stir-fry, and garnishes. Plant indoors or out. This mix is intended to be harvested continuously for a ready supply of fresh and tender greens. Clip it with scissors and it will regrow. Suitable for hydroponics gardening. An excellent choice for home gardens.

[HP152-20 - Mesilla Hot Peppers](#)

85 days. Capsicum annuum. (F1) The plant produces good yields of 10" long Cayenne-type hot peppers. Peppers are hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. An excellent choice for home gardens, market growers, and open field production. A variety from the USA. Disease Resistant PVY, TEV, TMV.

[CU79-20 - Mexican Sour Gherkin Cucumber Seeds](#)

75 days. Melothria scabra. Open Pollinated. Mexican Sour Gherkin Cucumber. The plant produces heavy yields of 1 to 2" long cucumbers that look like miniature watermelons. They have the sweet cucumber flavor, followed by a surprising sourness, which leads you to believe they are already pickled! Perfect for salads, snacks, and pickling. They fall off the vines when ripe. This cucumber grows best if grown on trellis or stakes. The most cold tolerant of all cucumbers will continue to produce until the first frost. Perfect for container gardening, hanging baskets, or small gardens where space is very limited. Also known as the Cucamelon and Mouse Melon. An heirloom from Mexico and Central America.

[HB147-250 - Mexican Tarragon Seeds](#)

85 days. Tagetes lucida. Perennial. Open Pollinated. Mexican Tarragon. The plant produces good yields of glossy green leaves and orange flowers. Leaves are used in vinegar, sauces, and salads. The flowers are used to garnish desserts and drinks with the same sweet licorice flavor as the leaves. It has a stronger flavor than Russian tarragon. Used by Southwestern chefs. Also known as Mexican Mint, Spanish Tarragon, and Winter Tarragon. Cold Tolerant. Heat Tolerant. Drought Tolerant. High Humidity Tolerant. Easy to grow. Suitable for herb gardens, flower beds, or containers. An excellent choice for home gardens.

[TM250-20 - Mexico Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces large yields of 1 to 2 lb dark pink beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. The plant keeps producing continuously throughout the season. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. An heirloom variety brought into the USA by a Mexican family. Indeterminate.

[CB5-250 - Michihli Chinese Cabbage Seeds](#)

75 days. Brassica rapa. Open Pollinated. Michihli Chinese Cabbage. The plant produces large Napa-type Chinese cabbage. The heads average 6 inches wide and 18" tall and weigh 3 to 5 lbs. The plant is cylindrical, has green and white leaves and stems, and is very tender and delicious. Used in stir-fry dishes, pickling, and other Asian dishes. Also used to make coleslaw. Excellent choice for home gardens. An heirloom variety. United States Department of Agriculture, G 30787.

[TM187-10 - Micro Tom Tomato](#)

88 days. Solanum lycopersicum. (F1) The plant produces good yields of small red tomatoes. Ideal for house plants, window boxes, containers, and patios. Kids love them! Developed by the University of Florida. Determinate.

[HP153-10 - Mexibell Hot Peppers](#)

[1988 All-America Selections Winner!](#)

70 days. Capsicum annuum. (F1) This early maturing plant produces good yields of bell hot peppers with a mild chili flavor. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent stuffing pepper. Excellent choice for home gardens and market growers. A variety from the USA. Disease Resistant: TMV.

[TL10-20 - Mexican Strain Tomatillo](#)

65 days. Physalis ixocarpa. Open Pollinated. This early maturing plant produces heavy yields of large 2" round Mexican tomatillo. Mexican Strain has a more savory flavor than other varieties and is a preferred variety for many Mexican dishes! Excellent for making salsa verde and chili Verde. Tomatillos are fully ripe when it falls from the plant. Suitable for home garden and market growers. A variety from Mexico.

[TM551-20 - Mexico Midget Tomato](#)

65 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces heavy yields of tiny ¼ to ½ oz red cherry tomatoes. It is very sweet and very flavorful. Perfect for salads or snacks. An excellent choice for home gardens. An heirloom variety from Mexico. Indeterminate.

[TM359-20 - Micado Violetto Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 4 to 6 oz pink tomatoes. They are very flavorful. Perfect for salads, slicing, and sandwiches. The plant has good foliage protecting tomatoes from sun-scald. A potato leaf variety. Crack-Resistant. Excellent choice for home gardens. An heirloom from Australia. Indeterminate.

[WM23-10 - Mickylee Watermelon Seeds](#)

88 days. Citrullus lanatus. Open Pollinated. Mickylee Watermelon. The plant produces good yields of very flavorful 15 lb watermelons. The watermelons are very sweet and have bright red flesh. This is a single serving size watermelon. The plant is capable of producing 5 melons per vine. Excellent shelf life. Great for home garden and market growers. United States Department of Agriculture, PI 601307.

[BN60-50 - Midnight Black Turtle Soup Bean Seeds](#)

104 days. Phaseolus vulgaris. Open Pollinated. Midnight Black Turtle Soup Bean. This bush-type plant produces heavy yields of small black beans. Ideal for spicy soups, stews, and frying. A Latin favorite for making soup. The tall plant keeps beans off the ground. This is one of the most productive low-growing semi-runner plants. An excellent choice for home gardens. United States Department of Agriculture, W6 51230.

[PM65-10 - Midnight Pumpkin Seeds](#)

80 days. Cucurbita maxima. (F1) Midnight Pumpkin. This semi bush type plant produces excellent yields of small 1 to 2 lb very dark green (black) pumpkins. Stores well. It is just the right size for restaurant use and excellent for display. Try growing black pumpkins in your home pumpkin patch! It is an excellent choice for home gardens and Farmer's Markets. A variety from the USA. Disease Resistant: PM.

[BR35-100 - Millennium Broccoli Seeds](#)

78 days. Brassica oleracea. (F1) Millennium Broccoli. The plant produces excellent yields of blue-green 7" diameter dome-shaped broccoli. This high-quality broccoli is very flavorful. Great for fresh use in salads, steamed, and stir-fries. Does well in all regions and all weather conditions. Hold well in the field longer than other varieties, and has excellent performance against waterlogging. Cold Tolerant. Drought Tolerant. High Humidity Tolerant. Heat Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production.

[HP2255-10 - Minero Pepper Seeds](#)

90 days. Capsicum annuum. (F1) Minero Pepper. The plant produces high yields of 1 oz Guajillo-type hot peppers. Peppers turn from dark green to red when mature. The plant has green stems, green leaves, and white flowers. Great when eaten fresh or dried. Always a great seller at Farmer's Markets! An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

[TM778-20 - Mini Orange Tomato Seeds](#)

65 days. Solanum lycopersicum. Open Pollinated. Mini Orange Tomato. This early maturing plant produces high yields of small bright orange tomatoes. These golf ball-sized tomatoes are mild but slightly tangy. Perfect for salads and snacks. Grows in clusters of 4 to 6. Excellent choice for home gardens. Indeterminate.

[GD30-10 - Miniature Bottle Gourd Seeds](#)

100 days. Lagenaria siceraria. Open Pollinated. Miniature Bottle Gourd. The plant produces good yields of small gourds. The medium green gourds have a small bulb on top connected by a narrow throat to a larger end bulb. Excellent for making crafts. Also known as Baby Bottle Gourds. Excellent choice for home gardens.

[AS7-25 - Millennium Asparagus Seeds](#)

Asparagus officinalis. (F1) Millennium Asparagus. The plant produces heavy yields of large uniform stalks of dark green asparagus. Asparagus is a perennial vegetable, so you plant it just once and enjoy season after season. A higher proportion of male plants, which means plants produce more spears than seeds, resulting in higher yields. A super disease resistant variety. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety developed by the University of Guelph in Ontario, Canada. Disease Resistant: CLS, FCRR, R.

[EG14-50 - Millionaire Eggplant Seeds](#)

55 days. Solanum melongena. (F1) Millionaire Eggplant. This early maturing plant produces high yields of 8 to 10" long glossy dark purple eggplants. Very delicious and tender. The creamy flesh is nearly seedless too! Great for stir-fry dishes. One of the most popular Japanese eggplant hybrids sold in markets. It does well in hot weather. Heat Tolerant. Suitable for container gardening and greenhouse production. An excellent choice for home gardens, greenhouses, market growers, and open field production.

[SP11-20 - Mini Belle Mix Sweet Peppers](#)

60 days. Capsicum annuum. Open Pollinated. Mini Belle Mix Pepper. This early maturing plant produces heavy yields of 1 ¼" long by 1 ¼" wide sweet bell peppers. Peppers turn from green to yellow and red when mature. Great for salads, stuffing, cooking, and gourmet dishes. Disease Resistant: TMV.

[GD32-10 - Mini Red Turban Gourd Seeds](#)

95 days. Lagenaria siceraria. Open Pollinated. Mini Red Turban Gourd. The plant produces good yields of small Turks Turban gourds. Perfect for painting and making crafts. An excellent choice for home gardens.

[SP197-20 - Miniature Chocolate Sweet Bell Peppers](#)

95 days. Capsicum annuum. Open Pollinated. The plant produces good yields of miniature 2" long by 2" wide sweet bell peppers. Peppers are very sweet, have thick walls, and turn from green to chocolate when mature. The plant has green stems, green leaves, and white flowers. Excellent fresh in salads. Great when these peppers are stuffed with cabbage and then pickled and canned. An excellent choice for home gardens. An heirloom variety from Ohio, USA.

[SP198-20 - Miniature Red Sweet Bell Peppers](#)

95 days. Capsicum annuum. Open Pollinated. The plant produces good yields of miniature 2" long by 2" wide sweet bell peppers. Peppers are very sweet, have thick walls, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent fresh in salads. Great when these peppers are stuffed with cabbage and then pickled and canned. An heirloom variety from Ohio, USA.

[SP199-20 - Miniature Yellow Sweet Bell Peppers](#)

95 days. Capsicum annuum. Open Pollinated. The plant produces good yields of miniature 2" long by 2" wide sweet bell peppers. Peppers are very sweet, have thick walls, and turn from green to yellow when mature. The plant has green stems, green leaves, and white flowers. Excellent fresh in salads. Great when these peppers are stuffed with cabbage and then pickled and canned. An heirloom variety from Ohio, USA.

[CA51-50 - Minnesota Midget Melon Seeds](#)

75 days. Cucumis melo. Open Pollinated. Minnesota Midget Melon. The plant produces good yields of small 1 to 1 ½ lb melons. The melons are very juicy and have orange flesh with high sugar content. These compact plants are ideal for small gardens or containers. An excellent choice for Northern gardeners. An heirloom variety that was developed in 1948 by the University of Minnesota to accommodate shorter growing seasons and cool regions. United States Department of Agriculture, NSL 6813. Disease Resistant: FW.

[RD41-100 - Misato Rose Radishes](#)

65 days. Raphanus sativus. (F1) The plant produces excellent yields of 3 to 4" diameter radishes. It has green and white skin with a pink interior. The radishes are crisp and sweet. Perfect for gourmet dishes. Stays tender and crispy even in cold weather. Keeps well. Also known as Chinese Red Heart Radish. Best for late summer or early fall sowing. Excellent choice for home gardens and specialty market growers.

[CU60-20 - Miniature White Cucumber Seeds](#)

48 days. Cucumis sativus. Open Pollinated. Miniature White Cucumber. This bush-type plant produces high yields of 3" long white cucumbers. One of the best white cucumbers on the market. It does not have bitterness like most white cucumbers. The cucumber is so tender there's no peeling necessary. Excellent for salads, pickles, or gourmet dishes. Impress your neighbors by growing some white cucumbers. Perfect for container gardening. An excellent choice for home gardens.

[CU132-10 - Mini-Me Cucumber Seeds](#)

45 days. Cucumis sativus. (F1) Mini-Me Cucumber. This early maturing plant produces high yields of 3 ½" long sweet, bitter-free, and burpless cucumbers. This mini Beit Alpha is smooth and with shiny green skin. The flesh is crunchy and delicious, and the skin is so mild it does not have to be peeled. It is usually picked small for the best quality. It can be used for pickling or sliced in salads. Long shelf life. Very disease-resistant cucumbers. It is a parthenocarpic variety, producing only female flowers, and does not require pollination, making cultivation super easy. The plant continues to produce all season long. This is the high variety you find in supermarkets. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant. CMV, CVV, DM, PM.

[TM868-20 - Mint Julep Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 ½ to 4 oz bi-colored chartreuse green plum/pear-shaped tomatoes with bright yellow stripes. They have a pleasant tomato taste with a nice sweet overall flavor. Perfect for salads, garnishes, or culinary creations. A variation of the Green Zebra Tomato. Also known as the Michael Pollan Tomato. A Wild Boar Series tomato. The plant produces huge yields, up to 5 gallons from one plant! Excellent choice for home gardens. Indeterminate.

[CO9-5 - Mississippi Brown Cotton Seeds](#)

130 days. Gossypium hirsutum. Open Pollinated. Mississippi Brown Cotton. The plant produces good yields of light tan to golden brown color cotton. This variety was once grown by slaves. The seed came from a plantation near Natchez, Mississippi. Drought Tolerant. An excellent choice for home gardens. This heirloom variety dates back to Pre-1860.

[BN130-50 - Mississippi Cream Cowpea Seeds](#)

70 days. Vigna unguiculata. Open Pollinated. Mississippi Cream Cowpeas. This bush-type plant produces high yields of light-colored cowpeas. This cool-weather plant has 7" long green pods with creamy white peas. The peas change to straw color when dried. You can produce two crops when planted early. Cold Tolerant. Also known as Southern Peas or Cream Peas. A Southern favorite. Excellent variety for fresh, dried, canned, or frozen. Cream cowpeas. An excellent choice for home gardens. United States Department of Agriculture, PI 601086. Disease Resistant.

[BN132-50 - Mississippi Purple Cowpea Seeds](#)

60 days. Vigna unguiculata. Open Pollinated. Mississippi Purple Cowpeas. This early maturing bush-type plant produces high yields of reddish-purple pods. Very delicious large brown peas. This variety has fewer vines and more pods over the plant. The pods are bunched together making it easier to harvest. Very easy to shell pods. Brown cowpeas. An excellent choice for home gardens. United States Department of Agriculture, PI 663149. A variety from Mississippi, USA. Disease Resistant: FW, N.

[MU8-500 - Mizuna Mustard Seeds](#)

60 days. Brassica rapa. Open Pollinated. Mizuna Mustard. The plant produces good yields of flavorful green mustard leaves. The feathery leaves are mild and spicy. Used in salads or cooked. Slow to bolt. Heat Tolerant. Cold Tolerant. Suitable for hydroponics gardening. Excellent choice for home gardens and market growers. A variety from India. United States Department of Agriculture, PI 662687.

[TM621-10 - Momotaro Tomato Seeds](#)

70 days. Solanum lycopersicum. (F1) Momotaro Tomato. This early maturing plant produces high yields of 6 to 8 oz pinkish-red tomatoes. They are very flavorful, rich, and sweet, with just the right amount of acid. This very high-quality tomato is perfectly smooth with no blemishes or imperfections! Perfect for salads, slicing, and sandwiches. Grows in clusters 6 to 7. This is the most popular tomato in Japan. It is named after a hero in Japanese folklore. Crack Resistant. Heat Tolerant. It has a long shelf life and is a good choice for shipping. Good quality tomatoes are used for commercial production. An excellent choice for home gardens, market growers, and open field production. This variety is one of the best tomatoes ever developed by the Takii Seed Company in Japan. Disease Resistant: V, N, FF, St, ToMV. Indeterminate.

[BN131-50 - Mississippi Pinkeye 2 Cowpea Seeds](#)

60 days. Vigna unguiculata. Open Pollinated. Mississippi Pinkeye 2 Cowpeas. This bush-type plant produces high yields of reddish-purple pods. Very delicious large brown peas. The pods turn from green to purple. This variety has fewer vines and more pods over the plant. Very easy to shell pods. This is an improved Mississippi Pinkeye Purple Hull Cowpea with stronger germination and better seedling survival. Cold Tolerant. An excellent choice for home gardens. United States Department of Agriculture, PI 663149. A variety from Mississippi, USA. Disease Resistant: FW, N.

[BN133-50 - Mississippi Silver Cowpea Seeds](#)

65 days. Vigna unguiculata. Open Pollinated. Mississippi Silver Cowpeas. This bush-type plant produces heavy yields of 6 1/2" long silvery pale green pods. Produces large brown cowpeas. This variety is easier to pick than other varieties as fewer vines. Low bushy plant with few runners. Brown cowpeas. An excellent choice for home gardens. United States Department of Agriculture, PI 598335. Disease Resistant.

[TM893-10 - Mochomo Tomato](#)

85 days. Solanum lycopersicum. (F1) The plant produces high yields of 5 to 6 oz dark red Roma tomatoes. They have thick walls, are meaty, and are flavorful. Perfect for salsa, sauces, and canning. The plant has good foliage protecting tomatoes from sun-scaud. It does extremely well in the Southwest and Southern regions of the United States and in Mexico. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: V, FFF, TMV, TSWV, TYLCV. Indeterminate.

[EG56-50 - Money Maker II Eggplant Seeds](#)

60 days. Solanum melongena. (F1) Money Maker II Eggplant. This early plant produces high yields of 5 to 7" long glossy black eggplants. Very flavorful and tender. Perfect for grilling, frying, stuffing, pickling, and baking. Does well in hot weather. Suitable for greenhouse and open field production. It is one of the most famous varieties in markets in Japan. An excellent choice for home gardens, greenhouses, market growers, and open field production.

[TM260-20 - Moneymaker Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Moneymaker Tomato. The plant produces heavy yields of 4 to 6 oz bright red tomatoes. They are very sweet, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. This variety does well in hot and humid climates. Suitable for greenhouse production. An excellent choice for home gardens. An heirloom variety from Bristol, England, UK, dating back to the early 1900s. United States Department of Agriculture, PI 286255. Indeterminate.

[FL12-10 - Mongolian Giant Sunflowers](#)

Annual. Helianthus annuus. Open Pollinated. The plant produces heavy amounts of large 1 ½" long sunflowers seeds. The yellow flowers are enormous, grow 18" across, and yields a lot of seeds. When the backs turn yellow, cut the flower, and let it dry upside down. Easy for kids to grow. Great for school projects.

[TM894-20 - Monticello Tomato](#)

73 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 4 to 5 oz red Roma tomatoes. Tomatoes are firm and very flavorful. Perfect for canning and sauce. This variety has been shown to grow exceptionally in the southeast and in mountain regions. An excellent choice for home gardens, market growers, and open field production. Disease Resistance: V, F, N, St, BS, TSWV. Determinate. (Pelleted Seeds)

[CB26-250 - Monument Chinese Cabbage Seeds](#)

80 days. Brassica rapa. (F1) Monument Chinese Cabbage. The plant produces high yields of Michihli-type Chinese cabbage. The heads average 4" wide by 18" tall and weigh 4 to 4 ½ lbs. The plant forms cylindrical heads with green outer color and white interior. The leaves are crisp. Excellent for stir-fry, soups, and pickling. One of the finest Michihli types available. Heat Tolerant. Cold Tolerant. An excellent choice for home gardens. Disease Resistant: BSP.

[WM62-20 - Moon & Stars Red Flesh Watermelons](#)

105 days. Citrullus lanatus. Open Pollinated. The plant produces good yields of 40 lb deep green watermelon with yellow dots. Some dots are large, look like moons, and some dots are small, and looks like stars. The red flesh is very sweet and flavorful. An excellent choice for home gardens. An heirloom variety from the USA.

[BR53-100 - Monflor Broccoli Seeds](#)

63 days. Brassica oleracea. (F1) Monflor Broccoli. The plant produces high yields of blue-green broccoli with dome-shaped heads. This high-quality variety was bred to be a One-Cut Broccoli. It has a flat and loose head which allows quick and easy separation from the stem. It is tender and has sweet stems and sweet buds. Easy to grow. Easy to harvest. It's a time and labor-saver broccoli. Suitable for spring and fall planting. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

[BR75-25 - Montebello Broccoli Seeds](#)

62 days. Brassica oleracea. (F1) Montebello Broccoli. This early-maturing plant produces good yields of green broccoli. It has tender and very sweet shoots. This variety was developed for those wanting to grow separate shoots of broccoli, it has excellent side shoot production after the main crown harvest. Just break out the initial head and you will get many shoots growing right back. Suitable for summer and fall planting. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[BR26-50 - Monty Broccoli Seeds](#)

56 days. Brassica oleracea. (F1) Monty Broccoli. This early-maturing plant produces good yields of bright green broccoli. The head averages 9 inches in diameter. It is very flavorful. This variety is can be grown for summer or fall harvest. Thrives in adverse weather conditions. Heat Tolerant. An excellent choice for home gardens and market growers.

[WM14-20 - Moon & Stars Cherokee Watermelons](#)

95 days. Citrullus lanatus. Open Pollinated. The plant produces good yields of deep green 25 lb to 45 lb elongated watermelons with yellow dots. Some dots are large and look like moons and some dots are small and look like stars. The watermelons are 24" long. The leaves are also spotted. The bright pink flesh is very sweet and flavorful. Drought Tolerant. Keep the plants well-watered to achieve uniform watermelons. An heirloom variety from the USA.

[WM10-20 - Moon & Stars Van Doren Watermelon Seeds](#)

90 days. Citrullus lanatus. Open Pollinated. Moon & Stars Van Doren Watermelon. The plant produces good yields of deep green watermelon with yellow dots. Some dots are large and look like moons and some dots are small and look like stars. The leaves are also spotted. The pink flesh is very sweet and flavorful. An excellent choice for home gardens. This 1930 heirloom variety is from Merle Van Doren's farm near Macon, Missouri, USA. It had been originally brought from Tennessee, USA.

[TM547-20 - Moonglow Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Moonglow Tomato. The plant produces high yields of 6 to 8 oz bright orange tomatoes. They are very sweet, meaty, and very flavorful. It is considered by many tomato lovers, as the best texture and flavor of an orange tomato. Great for adding color and taste to salads and gourmet dishes. It has a good shelf life. An excellent choice for home gardens. An heirloom variety. Indeterminate.

[TR29-10 - Moringa Tree Seeds](#)

Moringa oleifera. Open Pollinated. Moringa Tree. This tree produces excellent yields of edible slender fruits, commonly known as drumsticks. It is grown for its young seed pods and leaves, used as vegetables, and used as herbal medicine. In the Philippines and Indonesia, it is grown for its leaves, which are used as food. The leaves are the most nutritious part of the plant, being a significant source of Vitamin A, Vitamin B, Vitamin C, Vitamin K, and are high in Beta-Carotene, Manganese, and Protein. The leaves are cooked and used in a similar way as spinach and are dried and crushed into a powder for soups and sauces. The seeds are eaten like peas or roasted like nuts. It is also used for water purification. The fruits are prepared as a culinary vegetable, often cut into shorter lengths and stewed in curries and soups. The taste is similar to asparagus with a hint of green beans. The bark, sap, roots, leaves, seeds, and flowers are used in traditional medicine. It is a fast-growing, drought-resistant tree. It tolerates a wide range of soil conditions but prefers neutral to slightly acidic well-drained, sandy soil. In waterlogged soil, the roots have a tendency to rot. The Moringa is heat tolerant and does not tolerate freezing or frost. Can be grown in large containers and brought indoors during cold temperatures. Moringa is also drought tolerant. Also known as Drumstick Tree, Horseradish Tree, Ben Oil Tree, and Benzolive Tree. An excellent choice for home gardens, open production, and commercial production. A variety from India.

[TM82-20 - Mortgage Lifter Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Mortgage Lifter Tomato. The plant produces heavy yields of 1 to 2 lb pink beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. It has a rich tomato flavor. Perfect for salads, slicing, and sandwiches. This variety was developed in the 1930s by Mr. Byles of Logan, WV to help pay off his home mortgage. He was able to pay off his \$6,000 mortgage in 6 years by selling the plants for \$1 each. He crossed a German Johnson, a Beefsteak, and an Italian & English variety to come up with this unique variety. An excellent choice for home gardens. A family heirloom variety from Logan, West Virginia, USA. United States Department of Agriculture, PI 647467. Disease Resistant: V, F, N. Indeterminate.

[TM83-20 - Moskvich Tomato](#)

60 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces good yields of 4 to 6 oz deep red tomatoes. They are very flavorful with a rich tomato taste. Perfect for salads, slicing, sandwiches, canning, and cooking. Crack Resistant. Does well in cold conditions. Cold Tolerant. Moskvich translates to - a person living in Moscow. [SQ57-20 - Mooregold Squash Seeds](#)

100 days. Cucurbita pepo. Open Pollinated. Mooregold Squash. The plant produces high yields of 7" diameter bright orange butternut squash. The bright orange flesh is extremely sweet and has very thick smooth textured meat. Excellent storage variety. An excellent choice for home gardens, farmer's markets, and market growers. A winter squash variety.

[CD4-750 - Morris Heading Collards Seeds](#)

45 days. Brassica oleracea. Open Pollinated. Morris Heading Collards. This early maturing plant produces heavy yields of delicious blue-green collards. Perfect steamed, boiled, or stir-fried. Harvest young tender leaves for the best flavor. Slow to bolt in hot weather. Heat Tolerant. Also known as Cabbage Collards. Traditional greens are grown in the South. Suitable for hydroponic gardening. Excellent choice for home gardens. An heirloom variety from the USA. United States Department of Agriculture, NSL 6154.

[TB1-100 - Mosaic Virus Resistant Tobacco](#)

85 days. Nicotiana tabacum. Open Pollinated. The plant produces good quality tobacco leaves. This is a quality smoking tobacco. Try growing your own tobacco. Disease Resistant: Mosaic Virus. Very tiny seeds.

[HP2236-20 - Mosquetero Hot Peppers](#)

90 days. Capsicum annuum. (F1) The plant produces high yields of 6" long by 3" wide Ancho hot peppers. Peppers are mildly hot and turn from deep green to red when mature. The plant has green stems, green leaves, and white flowers. Usually used when green. They perform well under cooler climates. Excellent for stuffing into chiles Rellenos or frying. An excellent choice for home gardens and market growers.

[HB146-1000 - Mother of Thyme](#)

95 days. Thymus serpyllum. Perennial. Open Pollinated. This spreading plant produces high yields of thick aromatic dark green Thyme leaves. Purple flowers appear in early summer. Used in salads, rice, and fish dishes. Medicinal herb used to treat sore throats, coughs, and mucus congestion. Also used as tea and massage oil. This is a winter-hardy variety. Makes a good filler between pathway steps or at the front of the border. A sweet fragrance is released when it is walked upon. Cold Tolerant. Also known as Brotherwort Thyme, Wild Thyme, and Creeping Thyme. An excellent choice for home gardens.

[HB50-250 - Motherwort Seeds](#)

85 days. Leonurus cardiaca. Perennial. Open Pollinated. Motherwort. The plant produces good yields of large leaves of Motherwort with tiny pink flowers. Used as a traditional female tonic. Dried leaves can be brewed into tea. A medicinal herb used as an emotional balancer, stress reliever, menstruation, and treatment of infertility. It can also help to treat an overactive thyroid. Also known as Lion's Ear and Lion's Tail. A member of the Mint family. An excellent choice for home gardens.

[TM84-10 - Mountain Fresh Plus Tomato Seeds](#)

79 days. Solanum lycopersicum. (F1) Mountain Fresh Plus Tomato. The plant produces good yields of 8 to 12 oz red tomatoes. They are very sweet, very firm, smooth, and flavorful. Perfect for salads, slicing, and sandwiches. Crack Resistant. The plant has good foliage protecting tomatoes from sunscald. Does well in cool or wet climates. It is the most widely grown market tomato in the East and Midwest. Good-quality tomatoes are used for commercial production. Great fresh market or chain store type. An excellent choice for home gardens, market growers, and open field production. A variety was developed by Dr. Randy Gardner at North Carolina State University, NC, USA. Disease Resistant: V, FF, N, ALS, GW, BER. Determinate.

[TM726-20 - Mountain Gold Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces good yields of 8 to 12 oz golden-yellow tomatoes. They are firm with a mild flavor. Perfect for salads, slicing, and sandwiches. Crack Resistant. Excellent choice for home gardens and market growers. A variety was developed by Dr. Randolph G. Gardner in 1990 at the North Carolina State Mountain Horticultural Crops Research Station, NC, USA. United States Department of Agriculture, PI 547077. Disease Resistant: V, FF. Determinate.

[TM856-10 - Mountain Majesty Tomato Seeds](#)

78 days. Solanum lycopersicum. (F1) Mountain Majesty Tomato. The plant produces high yields of 8 to 14 oz deep red tomatoes. The tomatoes stay firm when ripe. Perfect for slicing, salads, or canning. Crack Resistant. The plant has good foliage protecting tomatoes from sun-scald. To maximize yield potential, either stake or use cages. Good-quality tomatoes are used for commercial production. An excellent choice for home gardens, market growers, and open field production. Disease Resistance: V, FF, TSWV. Determinate.

[HB75-1000 - Mountain Mint Seeds](#)

85 days. Pycnanthemum pilosum. Perennial. Open Pollinated. Mountain Mint. The plant produces good yields of fragrant Mountain Mint leaves. It may be used just like peppermint. It has a wonderful menthol fragrance for potpourri. Used to make teas for indigestion, and fevers, and to regulate the menstrual cycle. White flowers attract bees and butterflies. An excellent choice for home gardens. A variety from the USA.

[TM195-20 - Mountain Delight Tomato](#)

70 days. Solanum lycopersicum. (F1) This early maturing plant produces excellent yields of red tomatoes. They are firm and flavorful. Perfect for salads, slicing, and sandwiches. Excellent choice for home gardens and market growers. A variety developed by NC State University, NC, USA. Disease Resistant: V, FF, ALS, BER, GW. Determinate.

[TM594-10 - Mountain Glory Tomato](#)

72 days. Solanum lycopersicum. (F1) This early maturing plant produces heavy yields of 10 to 12 oz red tomatoes. Perfect for salads, slicing, and sandwiches. This variety has increased firmness that will hold up during shipping. These high-quality tomatoes are used for commercial production. To maximize yield potential, either stake or use cages. Excellent choice for home gardens, market growers, and open field production. A variety was developed by NC State University at the Mountain Research and Extension Center in Fletcher, NC, USA. Disease Resistant: V, FFF, TSWV. Determinate. **(Pelleted Seeds)**

[TM749-10 - Mountain Magic Tomato Seeds](#)

70 days. Solanum lycopersicum. (F1) Mountain Magic Tomato. This early maturing plant produces high yields of large 2 oz bright red cherry tomatoes. They are very sweet and flavorful. Perfect fresh eating right off the vine or in salads. They are known as Campari tomatoes and command high prices at specialty markets and supermarkets. The tomatoes hold well on the plant and hold up very well after harvest. Grows in clusters of 7 to 8. Crack Resistant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: V, FFF, A, EB, LB. Indeterminate. **(Pelleted Seeds)**

[TM830-10 - Mountain Merit Tomato](#)

2014 All-America Selections Winner!

75 days. Solanum lycopersicum. (F1) The plant produces high yields of 8 to 10 oz deep red tomatoes. They are very flavorful. Perfect for sandwiches, salads, slicing, and canning. Crack Resistant. Excellent choice for home gardens and market growers. Disease Resistant: V, FFF, N, LB, TSWV. Determinate.

[TM85-20 - Mountain Pride Tomato](#)

77 days. Solanum lycopersicum. (F1) The plant produces good yields of 6 to 8 oz red tomatoes. They are firm and flavorful. It was bred especially for mountain regions and higher elevation areas. Does well in the Southwest region of the country. Crack Resistant. Excellent choice for home gardens and market growers. A variety was developed by North Carolina State University, NC, USA. United States Department of Agriculture, PI 647558. Disease Resistant: V, FF, A, St, BS. Determinate.

[TM909-10 - Mountain Rouge Tomato](#)

2019 All-America Selections Winner!

72 days. Solanum lycopersicum. (F1) This early maturing plant produces heavy yields of 12 to 14 oz beefsteak pink tomatoes. Some tomatoes grow up to 2 lbs size! One of the best-tasting tomatoes on the market. It has a delicious flavor with just the right balance of acid and sugar. Perfect for sandwiches, salads, slicing, and canning. Performs especially well in cooler climates. An excellent choice for home gardens and market growers. Disease Resistant: F, V, N, LB. Indeterminate. (**Pelleted Seeds**)

[TM86-20 - Mountain Spring Tomato Seeds](#)

69 days. Solanum lycopersicum. (F1) Mountain Spring Tomato. This early maturing plant produces high yields of 10 to 12 oz bright red tomatoes. They are firm and flavorful. Perfect for salads, slicing, and sandwiches. The plant has good foliage protecting tomatoes from sunscald. Suitable for the Southeastern part of the country. Crack Resistant. Excellent choice for home gardens and market growers. A variety was developed by Dr. Randy Gardner in 1991 at the North Carolina State University, NC, USA. Disease Resistant: V, FF, ALS, BER. Determinate.

[WM32-20 - Mountain Sweet Yellow Watermelon Seeds](#)

100 days. Citrullus lanatus. Open Pollinated. Mountain Sweet Yellow Watermelon. The plant produces good yields of large 35 lb dark green watermelons with light green markings. The dark yellow flesh is very sweet. The family will love this variety! Try growing yellow, red, pink, red, and white watermelons for a colorful gourmet fruit salad. An excellent choice for home gardens and Farmer's Markets. A variety from the USA.

[BN55-50 - Mountaineer Half Runner Bean Seeds](#)

56 days. Phaseolus vulgaris. Open Pollinated. Mountaineer Half Runner Beans. This short pole-type plant produces high yields of delicious 4" long by ½" wide medium-light green beans. Beans are very flavorful and are used like green beans and dried beans. Vines are very short and do not require staking. Good freezing and canning variety. An excellent choice for home gardens. An heirloom variety from West Virginia. United States Department of Agriculture, PI 549685. Disease Resistant: BCMV.

[PE4-50 - Mr Big Sweet Pea Seeds](#)

2000 All-America Selections Winner!

58 days. Pisum sativum. Open Pollinated. Mr Big Sweet Peas. The plant produces high yields of 4 ½" long sweet peas. The pods have 8 to 10 tender and flavorful peas. Perfect fresh in salads, in soups, and used in cooking. An excellent choice for home gardens. Disease Resistant: FW (Race 1), PM.

[HP862-20 - Mr Purple Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3 ½" long by 1 ½" wide hot peppers. Peppers are medium-hot and turn from purple, to pale yellow, to red when mature. The plant has green stems, light green leaves with purple streaks, and white-purple flowers. A beautiful pepper for adding color to salads and pickles.

HPLC Test Results: #12

[TM87-20 - Mr Stripey Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 12 to 24 oz bi-colored orange-yellow beefsteak tomatoes with red stripes. No two tomatoes are ever the same. They are very sweet, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. Low acidity variety. The plant requires support, either staking or cages. An excellent choice for home gardens. An heirloom from Virginia, USA, dating back to the 1800s. Indeterminate.

[TM686-20 - Mr Underwood's Pink German Giant Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Mr Underwood's Pink German Giant Tomato. The plant produces excellent yields of 1 ½ to 2 lb pink beefsteak tomatoes. They are sweet and have a rich tomato flavor. Perfect for salads, slicing, and sandwiches. Excellent choice for home gardens. An heirloom variety from Bulgaria. Indeterminate.

[HB114-500 - Mrs Burn's Lemon Basil Seeds](#)

60 days. *Ocimum basilicum*. Annual. Open Pollinated. Mrs Burn's Lemon Basil. The plant produces good yields of 2 ½" long lemon-flavored basil leaves. The most lemony of all lemon basil. The plant has white flowers and very bright green leaves. The finest lemon basil around. Excellent for making vinegar and seafood dishes. Suitable for containers. An excellent choice for home gardens. An heirloom variety from New Mexico, USA.

[TR31-20 - Mugo Pine Bonsai Tree](#)

Pinus mugo var. *mughus*. Open Pollinated. This Bonsai tree produces has small dark green evergreen needles. This is a good one for the beginner Bonsai collector as it has a low-maintenance, is a slow grower, and has a burly frame. The Mugo Pine Tree is very attractive with its natural shape. It can stay outdoors all year long. Drought-Tolerant. Also known as Mountain Pine. A variety with insect tolerance. Disease Resistant. A variety originating from Europe.

[HP293-20 - Mulato Isleno Hot Peppers](#)

90 days. *Capsicum annuum*. Open Pollinated. The plant produces good yields of 6" long by 3" wide Ancho Poblano hot peppers. Peppers are mildly hot and turn from green to brown when mature. The plant has green stems, green leaves, and white flowers. Excellent stuffing pepper. A variety from Mexico.

[CN43-50 - Multi Colored Broom Corn Seeds](#)

110 days. *Zea mays*. Open Pollinated. Multi Colored Broom Corn. The plant produces high yields of beautiful straw used to make crafts and brooms. It grows without ears. It is also used for fall decoration arrangements. Birds love the tops of the corn. This variety grows multicolor straw. An excellent choice for home gardens and market growers. A variety from the USA.

[SS3-100 - Mung Sprouting Bean Seeds](#)

4 to 6 days. *Vigna radiata*. Open Pollinated. Mung Sprouting Beans. The plant produces excellent quality Mung Sprouting Beans. These delicious beans have a crunchy texture and mild bean flavor. They are very crisp and taste like raw peas. They have attractive green leaves and pink stems. Excellent in salads, stir-fry, and other Asian dishes. ¼ cup of seed yields approximately 2 to 3 cups of sprouts. Harvest the sprouts as soon as the first true leaves open for optimal taste and texture. A variety from the USA.

[HP157-10 - Mucho Nacho Pepper Seeds](#)

69 days. *Capsicum annuum*. (F1) Mucho Nacho Pepper. This early maturing plant produces high yields of extra large 4" long by 1 ¼" wide hot Jalapeno peppers. Peppers are medium hot, have thick flesh, and turn from green to red when they mature, but are usually used when green. The plant has green stems, green leaves, and white flowers. These jumbo Jalapeno peppers are an inch longer than most jalapenos, have thicker walls, and are hotter. Excellent for making salsa and perfect for making stuffed peppers. Also used fresh in salads. Superior variety for pickling. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: PVY, TEV. Scoville Heat Units: 6,000.

[HB51-1000 - Mugwort](#)

85 days. *Artemisia vulgaris*. Perennial. Open Pollinated. The plant produces good yields of beautiful fragrant leaves. Used to make tea to treat menstrual and menopausal problems. Also used for digestive problems to reduce bloating. Stimulates and improves memory. Good insect repellent. Easy to grow. An excellent choice for home gardens. A variety from the Medeterrain region.

[TM88-20 - Mule Team Tomato](#)

78 days. *Solanum lycopersicum*. Open Pollinated. The plant produces high yields of 8 to 12 oz bright red tomatoes. They are meaty and have a mild flavor. Perfect for salads, slicing, and sandwiches. Grows in clusters of 3 to 5. An excellent choice for home gardens. An heirloom variety from the USA. Indeterminate.

[CU15-20 - Muncher Cucumber Seeds](#)

60 days. *Cucumis sativus*. Open Pollinated. Muncher Cucumber. The plant produces heavy yields of 6 to 9" long cucumbers. A delicious burpless cucumber that is crisp and non bitter. Best when harvested when 4 to 6" long for pickling. Also can be eaten fresh straight from the garden or used in salads. Excellent for making pickles. An excellent choice for home gardens. Disease Resistant: CMV.

[HB120-1000 - Munstead Lavender Seeds](#)

110 days. *Lavandula angustifolia*. Perennial. Open Pollinated. Munstead Lavender. The plant produces beautiful lavender blue flowers. The plants bloom in early summer and if pruned lightly after flowering may rebloom in late summer. Munstead Lavender is the most fragrant variety. The flowers and leaves are also edible and used in salads and baked goods. The flowers can be used to garnish desserts. Used in bouquets, sachets, and perfumes. Also used to treat headaches, burns, and cuts. Used to repel moths, mosquitoes, and gnats. Cold Tolerant. Perfect for borders, rock gardens, and containers. An excellent choice for home gardens. A variety from the USA.

[SP232-20 - Muscato Sweet Peppers](#)

75 days. Capsicum annuum. (F1) The plant produces heavy yields of 5" long by 4" wide orange sweet bell peppers. Peppers have very thick walls and turn from green to orange when mature. The plant has green stems, green leaves, and white flowers. One of the best orange bell pepper for stuffing! Used in salads and gourmet dishes. An excellent choice for home gardens, farmer's markets, and market growers.

[HP159-20 - Mushroom Red Hot Peppers](#)

95 days. Capsicum chinense. Open Pollinated. The plant produces heavy yields of 1" long by 1 1/2" wide mushroom-shaped hot peppers. Peppers are hot and turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. Excellent for garnishing, pickling, or drying. An excellent choice for home gardens. An heirloom variety from the USA.

[HP160-20 - Mushroom Yellow Hot Peppers](#)

95 days. Capsicum chinense. Open Pollinated. The plant produces heavy yields of 1" long by 1 1/2" wide mushroom-shaped hot peppers. Peppers are hot and turn from green to yellow when mature. The plant has green stems, green leaves, and white flowers. Excellent for garnish, pickling, or drying. An heirloom variety from the USA.

[HP1789-10 - Mustard Habanero Hot Peppers](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces high yields of 2 1/2" long by 1 1/4" wide Habanero hot peppers. Peppers are very hot, have medium-thick flesh, and turn from light green with a tint of purple, to a mustard color orange, then to orange color when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling and making salsa, hot sauce, and seasoning spice powder. A variety from the Caribbean region. Scoville Heat Units: 275,000.

[HP2439-20 - Nadapeno Pepper Seeds](#)

90 days. Capsicum annuum. Open Pollinated. Nadapeno Pepper. The plant produces high yields of 3" long Jalapeno peppers. Peppers have no heat, have thick flesh, and turn from dark green to deep red when mature. Usually used when green. The pepper has the flavor and appearance of a Jalapeno Pepper. This is an excellent choice for those who want the Jalapeno flavor but can't take the heat. The plant has green stems, green leaves, and white flowers. Excellent fresh use, for pickling and making salsa. This variety was developed by A. P. Whaley Seed Company. An excellent choice for home gardens. A variety from the USA.

[EG36-50 - Nadia Eggplant Seeds](#)

67 days. Solanum melongena. (F1) Nadia Eggplant. This early maturing plant produces high yields of tasty 7 to 9" long glossy dark purple eggplants. This outstanding classic Italian variety is firm and very flavorful. Perfect for grilling, frying, stuffing, and baking. It has a long shelf life. Sets well even under cool conditions. The plant is a vigorous high-yielder. It holds the fruit off the ground too. An excellent choice for home gardens, market growers, and open field production. Disease Resistant: TMV.

[HP1986-10 - Naga Morich Hot Peppers](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces good yields of 2 1/2" long by 1" wide elongated Habanero hot peppers. Peppers are extremely hot, have medium-thick flesh, and turn from green, to orange, to red when mature. The plant has dark green leaves, green stems, and white flowers. Excellent for pickling and making salsa, hot sauce, and seasoning spice powder. A variety from Bangladesh. Scoville Heat Units: 1,000,000.

[HP2306-10 - Naga Viper Pepper Seeds](#)

100+ days. Capsicum chinense. Open Pollinated. Naga Viper Pepper. The plant produces high yields of 3 1/4" long by 1" wide Habanero hot peppers. Peppers are extremely hot, have medium thin flesh, and turn from green, to orange, to red when mature. The plant has dark green leaves, green stems, and white flowers. This variety is a cross with the Naga Morich, Bhut Jolokia, and Trinidad Scorpion. It is one of the World's Hottest Peppers. A variety was created in Cumbria, England. Scoville Heat Units: 1,359,000.

[CO2-5 - Nankeen Brown Cotton Seeds](#)

130 days. Gossypium hirsutum. Open Pollinated. Nankeen Brown Cotton. The plant produces good yields of naturally brown color cotton. This heirloom variety comes from the Mansfield State Commemorative Area, Mansfield, Louisiana, and dates back to Pre-1860. Cotton was grown in the Mansfield area for making slave clothing. It grows well in poor dry soil and appears to have slightly better insect resistance. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 528418.

[CT41-750 - Nantes Fancy Carrot Seeds](#)

68 days. Daucus carota. Open Pollinated. Nantes Fancy Carrot. The plant produces good yields of 5 to 8" long orange carrots. The carrots are smooth and cylindrical. It holds well in the field and keeps well. An excellent choice for home gardens and market growers. Developed in the region of Nantes, France. Disease Resistant: ALS.

[CT46-750 - Nantes Mini Core Carrot Seeds](#)

68 days. *Daucus carota*. Open Pollinated. Nantes Mini Core Carrot. The plant produces good yields of 6 to 7" long quality orange carrots. A long-time favorite for canning. A good production variety in North Carolina field test. It holds well in the field and good keeper. Excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 26503.

[CA66-20 - Napoli Melon Seeds](#)

77 days. *Cucumis melo*. (F1) Napoli Melon. This early maturing plant produces good yields of 3 to 3 ½ lb melons. It has bright orange flesh, a tight compact cavity, and a fantastic flavor. The plant has vigorous vines for providing fruit protection. Excellent shipper. Excellent choice for home gardens and market growers. A variety from the USA. Disease Resistant: FW, PM.

[CU16-20 - National Pickling Improved Cucumbers](#)

54 days. *Cucumis sativus*. Open Pollinated. The plant produces heavy yields of 6" long medium green cucumbers. Ideal for making dill pickles or eating fresh in salads. Can also be harvested when very tiny 1 to 2" for making little pickles. They are slightly tapered in shape to fit in a pickle jar. Excellent choice for home gardens and market growers. Developed by the National Pickle Packers Association. United States Department of Agriculture, NSL 5746. Disease Resistant: Ccu, CMV.

[BN116-50 - Navy Bean Seeds](#)

85 days. *Phaseolus vulgaris*. Open Pollinated. Navy Bean. This bush plant produces heavy yields of 4" long pods with 5 to 6 beans in each. This bean is commonly used in soups, stews, purees, and baked beans. They maintain their nutritious content when canned. This bean was used as the main rations for the US Navy during the 19th century. Also known as Boston Beans, Pea Beans, or White Coco Beans. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

[ON60-100 - Nebuka Evergreen Bunching Onions](#)

90 days. *Allium cepa*. Open Pollinated. The plant produces excellent yields of bunching onions. It has white shanks and white skin and grows in clusters. Perfect for salads, soups, stir-fries, fish, and garnishes. Used extensively in Japanese and Chinese cooking. Hardy plants winter over for spring crop. These green onions do not form bulbs and do not multiply by division. This variety is exclusively grown for green bunching onions. Cold-Tolerant. An excellent choice for home gardens and market growers. A variety from Japan. Disease Resistant: PR, S, TH.

[HB108-500 - Napoletano Basil](#)

75 days. *Ocimum basilicum*. Open Pollinated. Annual. The plant produces good yields of giant 3" long by 2" wide basil leaves. The leaves are as big as your hand. Leaves are very flavorful and sometimes ruffled. Great for making spaghetti sauce, salads, and gourmet dishes. Slow to bolt. Suitable for containers. An excellent choice for home gardens. A variety from Italy.

[TM295-20 - Napoli Tomato](#)

79 days. *Solanum lycopersicum*. Open Pollinated. The plant produces heavy yields of 3 to 6 oz red Italian Roma paste-type tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for making sauce, ketchup, and paste. Also great for salads, slicing, sandwiches, soups, stir-fries, canning, and freezing. An excellent choice for home gardens. United States Department of Agriculture, PI 355110. Determinate.

[BS6-50 - Nautic Brussels Sprouts Seeds](#)

120 days. *Brassica oleracea*. (F1) Nautic Brussels Sprouts. The plant produces heavy yields of bright green Brussels Sprouts. The heads average 1 inch in diameter. They are tender and sweet, especially after fall's frosts. The sprouts are spaced further apart, allowing plants to dry out quickly to avoid the spread of disease and making it easier to harvest the sprouts. They also showed the least aphid damage. The flavor is outstanding and only gets better as the cool temperatures arrive. Easy to harvest. Cold Tolerant. An excellent choice for home gardens. Disease Resistant: BL, BR, FY, PM.

[TM90-20 - Nebraska Wedding Tomato](#)

85 days. *Solanum lycopersicum*. Open Pollinated. The plant produces heavy yields of 10 to 16 oz apricot-orange tomatoes. They are very juicy and flavorful. Perfect for salads, garnishes, or culinary creations. Serve sliced on a platter for a delicious gourmet dish. Crack Resistant. To maximize yield potential, either stake or use cages. Mrs. Englert said "Nebraskan brides were given seeds of this tomato as a wedding gift. It was said to have been brought from MN by pioneers in the late 1800s via covered wagons. And it thrived in cold, windy Nebraska." An excellent choice for home gardens. A 1980 heirloom variety from Mrs. Englert of Sandpoint, Idaho, USA. Determinate.

[HP1086-20 - Negro Hot Peppers](#)

90 days. *Capsicum annuum*. Open Pollinated. The plant produces good yields of 4 ½" long by 1 ½" wide hot peppers. Peppers are medium-hot and turn from green to brown when mature. The plant has green stems, green leaves, and white flowers. A variety from Chihuahua, Mexico. United States Department of Agriculture, PI 661077.

HPLC Test Results: #12

[TM341-20 - Nepal Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 10 to 12 oz deep red tomatoes. It has a rich old-fashioned tomato flavor. Perfect for salads, slicing, and sandwiches. It is a great keeper if picked green late in summer and allowed to ripen when wrapped in paper. Does well in cool weather. Cold Tolerant. The plant requires support, either staking or cages. Excellent choice for home gardens. A variety from the Himalayan Mountains, Nepal. United States Department of Agriculture, PI 286426. Indeterminate.

[SP189-20 - New Ace Pepper Seeds](#)

62 days. Capsicum annuum. (F1) New Ace Pepper. This early maturing plant produces heavy yields of 4" long by 3" wide sweet peppers. Peppers turn from green to red when mature. The plant has green stems, green leaves, and white flowers. This is one of the best bell peppers for areas with short or cool summers, even Alaska. Great for salads, stuffing, and cooking. Disease Resistant: ToMV, TMV.

[HP268-20 - New Mexico 6-4 Pepper Seeds](#)

75 days. Capsicum annuum. Open Pollinated. New Mexico 6-4 Pepper. The plant produces good yields of 7" long by 1 ½" wide Anaheim hot peppers. The plant has green stems, green leaves, and white flowers. Excellent for drying, stuffing, roasting, frying, stir-frying, and canning. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Developed by New Mexico State University. A variety from New Mexico, USA. Scoville Heat Units: 1,000.

[LC39-750 - New York 12 Lettuce](#)

1963 All-America Selections Winner!

60 days. Lactuca sativa. Open Pollinated. The plant produces good yields of large crisphead lettuce. The crisp leaves are delicious and perfect for sandwiches, salads, and garnishes. A heat-resistant variety that is excellent for fall crops in the South. It is tolerant to stress, poor soils, and bolting in the summer heat. Heat Tolerant. It was introduced in the 1960s by Cornell University. Good shipper variety for commercial growers. Excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, PI 190235. Disease Resistant: TB.

[TM91-20 - New Zealand Pink Paste Tomato](#)

90 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of pink tomatoes. It is unlike any other paste tomato as it has a fabulous flavor. Perfect for making thick sauce and paste. Also great for slicing. Does well in adverse weather. Heat Tolerant. Drought Tolerant. Also known as New Zealand Pink Pear Tomato. An excellent choice for home gardens. An heirloom variety from New Zealand. United States Department of Agriculture, PI 433016. Indeterminate.

[GD36-10 - Nest Egg Gourd Seeds](#)

95 days. Cucurbita pepo. Open Pollinated. Nest Egg Gourd. The plant produces good yields of chicken egg shaped gourds. Used to make crafts and decorations. Great for school projects! Also known as White Egg Gourds. Excellent choice for home gardens.

[TM623-20 - New Big Dwarf Tomato Seeds](#)

60 days. Solanum lycopersicum. Open Pollinated. New Big Dwarf Tomato. This early maturing plant produces high yields of 8 to 16 oz deep pink beefsteak tomatoes. They are very sweet, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. The plant stays small while producing large and delicious tomatoes. It is a cross of a Ponderosa and a Dwarf Champion. Suitable for containers, pots, small gardens, and square-foot gardens where space is very limited! An excellent choice for home gardens. An heirloom variety was developed by Isbell's Seed Company back in 1909. United States Department of Agriculture, PI 645154. Determinate.

[CB60-250 - New Nabai Chinese Cabbage Seeds](#)

45 days. Brassica rapa. (F1) New Nabai Chinese Cabbage. This early maturing plant produces good yields of small baby dark green Pak Choi Chinese cabbage with a pure white interior. The heads average 4" wide and 6" tall and weigh 2 to 4 lbs. Excellent flavor and are very attractive. Heat Tolerant. Slow bolting. Excellent choice for home gardens and market growers.

[TM353-20 - New Yorker Tomato](#)

63 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 4 to 6 oz red beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, slicing, sandwiches, and canning. The plant does well in cool weather. Cold Tolerant, early-season tomato produces some of the first fruits in your garden. Perfect for Northern regions with a short season. Crack Resistant. An excellent choice for home gardens. A variety was developed by Dr. Robinson of the New York Agricultural Experiment Station in Geneva, New York, USA. United States Department of Agriculture, PI 645319. Disease Resistant: V, A, EB. Determinate.

[HP246-20 - Nippon Taka Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Nippon Taka Pepper. The plant produces high yields of 2 ½" long by ½" hot peppers. Peppers are very hot, grow upright in clusters, and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for making Szechwan dishes. Ornamental pepper plant. A variety from Japan.

[CN56-50 - NK 199 Corn Seeds](#)

84 days. Zea mays. (F1) NK 199 Corn. The plant produces high yields of high-quality 8" long yellow corn. The ears have 18 to 20 rows of tender kernels. The kernels have the perfect sweetness and are particularly good for canning. It has old-fashioned corn tastes. Developed in the 1950s as processing corn for companies. An excellent choice for home gardens and market growers.

[SP48-10 - North Star Sweet Peppers](#)

60 days. Capsicum annuum. (F1) This early maturing plant produces good yields of 4" long by 3 1/2" wide sweet bell peppers. Peppers turn from green to bright red when mature. Suitable for short-season gardens in North. The plant does well under adverse weather conditions. Great for salads, stuffing, and cooking. Disease Resistant: TMV.

[SW16-100 - Northern Lights Mix Swiss Chard Seeds](#)

59 days. Beta vulgaris. Open Pollinated. Northern Lights Mix Swiss Chard. This early maturing plant produces good yields of vibrant colors of white, gold, red, and magenta Swiss Chard. The mix contains some of the most intense colors of chard that we have ever seen. The stalks are broad, very tender, and fleshy, even at full maturity. Great for adding color to salad mixes or harvested young and sold as baby chard. Excellent choice for home gardens.

[BR63-100 - Novantina Riccia di Sarno Broccoli Raab Seeds](#)

90 days. Brassica rapa. Open Pollinated. Novantina Riccia di Sarno Broccoli Raab. The plant produces high yields of green broccoli raab. This plant has tender tops and flower shoots. Their tender tops can be served as a side dish when boiled, stewed, or lightly fried. Excellent for stir fry and salads. When harvesting, cut the long stems and leaves with side branches. Plant from early spring to late summer. An excellent choice for home gardens. A variety from Italy.

[HP2260-20 - NuMex April Fool's Day Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of Cayenne-type hot peppers. Peppers are hot and turn from purple to red when mature. The plant has green stems, green leaves, and white flowers. A beautiful edible dwarf ornamental plant suitable for containers, pots, patio, hanging baskets, and small gardens. Developed by the New Mexico State University. A variety from New Mexico, USA.

[CA64-5 - North Carolina Giant Melon Seeds](#)

110 days. Cucumis melo. Open Pollinated. North Carolina Giant Melon. The plant produces giant 20 to 70 lb cantaloupes. The orange flesh is very flavorful and sweet. This is a Giant Cantaloupe! Try growing a World Record size cantaloupe in your backyard. An excellent choice for home gardens. A rare variety from North Carolina, USA.

[TM92-20 - Northern Delight Tomato](#)

65 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 1 to 2 oz red tomatoes. Perfect for salads and snacks. It was developed to perform in the short season and cooler regions in the Northern States. Cold Tolerant. Suitable for container gardening, patios, or small gardens where space is very limited! Excellent choice for home gardens. A variety was developed by Dr. Boe in 1991 by North Dakota State University, North Dakota, USA. Disease Resistant: V, F. Determinate.

[TM730-20 - Northern Lights Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 8 to 16 oz bi-colored yellow-orange beefsteak tomatoes with a red blush and red interior. They are sweet and flavorful. Perfect for salads, slicing, and sandwiches. Excellent choice for home gardens. Indeterminate.

[HB111-500 - Nufar Basil](#)

75 days. Ocimum basilicum. Annual. (F1) The plant produces good yields of 4" long basil leaves. This is the first fusarium-resistant variety of basil. Used in sauces, salads, and Italian dishes. Suitable for greenhouse, hydroponic, and field production. Disease Resistant: FW.

[HP163-20 - NuMex Big Jim Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. NuMex Big Jim Pepper. The plant produces heavy yields of 12" long by 2 3/4" wide hot peppers. Peppers are mildly hot and turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and open field production. Developed by New Mexico State University. A variety from New Mexico, USA.

Guinness World Record Holder

The NuMex Big Jim was listed in the Guinness Book of World Records as the largest pepper.

[HP164-20 - NuMex Centennial Hot Peppers](#)

95 days. Capsicum annuum. Open Pollinated. The plant produces good yields of ¾" long by ½" wide hot peppers. Peppers are hot and turn from purple, to yellow, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. A beautiful ornamental hot pepper plant. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP2271-20 - NuMex Christmas Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of small hot peppers. Peppers are hot, grow upright, are bullet-shaped, and turn from light green to red. These dwarf ornamental plants are perfect for the holidays. Suitable for containers, pots, patios, and small gardens where space is very limited! This variety was developed by the New Mexico State University, Las Cruces, New Mexico, USA.

[HP1802-20 - NuMex College 64L Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 5" long by 1 ½" wide Anaheim-type hot peppers. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Grown for drying as ristras, making chili powder, and roasting. Used fresh when green. A variety from New Mexico, USA.

[HP2237-20 - NuMex Easter Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces high yields of small hot peppers. They are hot and turn from lavender, light yellow, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Grows in clusters of 4 to 6 peppers. Does well in hot and humid environments. A beautiful edible dwarf ornamental suitable for containers, pots, patios, and small gardens. Drought Tolerant. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP2265-10 - NuMex Garnet Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of Paprika peppers. Peppers have little to no heat and turn from green to red when they mature. Great for making Paprika powder. Excellent choice for home gardens, market growers, and open field production. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP2261-20 - NuMex Chinese New Year Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of small bullet-shaped hot peppers. Peppers are hot, grow upright in clusters, and turn from green, to orange, to red when mature. The plant has green stems, and green leaves, and white flowers. A beautiful edible dwarf ornamental plant suitable for containers, pots, patios, hanging baskets, and small gardens. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP2258-20 - NuMex Cinco de Mayo Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of long thin Cayenne-type hot peppers. Peppers are hot, grow upright, and turn from yellow to red when mature. The plant has green stems, green leaves, and white flowers. A beautiful edible dwarf ornamental plant suitable for containers. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP2263-20 - NuMex Earth Day Pepper Seeds](#)

90 days. Capsicum annuum. Open Pollinated. NuMex Earth Day Pepper. The plant produces high yields of small hot peppers. These bullet-shaped peppers are hot and turn from green to brown when mature. The plant has green stems, green leaves, and white flowers. This edible dwarf ornamental pepper plant is suitable for containers and small gardens. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP1305-10 - NuMex Espanola Improved Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. NuMex Espanola Improved Pepper. The plant produces heavy yields of 6" long Anaheim-type hot peppers. Peppers are hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP2269-20 - NuMex Halloween Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of bullet-shaped orange hot peppers. Peppers are hot, grow upright, and turn from black to orange when mature. A beautiful edible dwarf ornamental plant that is perfect for the Halloween holiday. Suitable for containers, pots, patios, hanging baskets, and small gardens. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP2207-20 - NuMex Heritage 6-4 Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. NuMex Heritage 6-4 Pepper. The plant produces good yields of 7" long by 2" wide Anaheim hot peppers. This is an improved variety of the NuMex 6-4 with a consistent medium heat level. The plant yields 10% more peppers than the old NuMex 6-4 and has 5 times more flavor compounds. Peppers are medium-hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. A perfect variety for frying, stuffing, or using fresh green or dried red. An excellent choice for home gardens and Farmer's Markets. An excellent choice for home gardens, market growers, and open field production. A variety from New Mexico, USA.

[HP2203-20 - NuMex Jalmundo Hot Peppers](#)

70 days. Capsicum annuum. Open Pollinated. This early maturing plant produces good yields of jumbo size Jalapeno peppers. Peppers are medium-hot and turn from green to red when mature and have white flowers. These large Jalapeno peppers are used for making poppers, breaded and deep-fried Jalapeno stuffed with cheese that is popular appetizers throughout the country. It was developed by hybridization between the Keystone Resistant Giant Bell Pepper and the Early Jalapeno Hot Pepper. A variety developed by the New Mexico State University. A variety from New Mexico, USA. Scoville Heat Units: 17,000.

[HP2259-20 - NuMex Las Cruces Cayenne Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of long cayenne hot peppers. Peppers are hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. An excellent choice for home gardens, market growers, and open field production. Developed by the New Mexico State University. A variety from New Mexico, USA. Disease Resistance: BCTV.

[HP2268-20 - NuMex Memorial Day Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of ornamental peppers. Peppers are hot, grow upright, round and turn from ivory to yellow. A beautiful edible dwarf ornamental plant that is perfect for the holidays. Suitable for containers, pots, patios, hanging baskets, and small gardens, Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP2426-20 - NuMex Orange Spice Jalapeno Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of orange Jalapeno hot peppers. Peppers are hot, grow upright, and turn from green to tangerine orange when mature. Excellent for salsa, pickling, or making hot sauce. Suitable for containers and small gardens. Does well in hot climates. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP2206-20 - NuMex Heritage Big Jim Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces heavy yields of 12" long by 2 3/4" wide hot peppers. This is an improved variety of the Big Jim with a consistent hot heat level. The plant yields 10% more peppers than the old Big Jim variety and has 5 times more flavor compounds. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent choice for home gardens, market growers, and open field production. Excellent choice for home gardens and Farmer's Markets. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP167-20 - NuMex Joe E Parker Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. NuMex Joe E Parker Pepper. The plant produces heavy yields of 7" long by 1 1/2" wide hot peppers. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. An excellent choice for home gardens, market growers, and open field production. A variety from the USA.

[HP2427-20 - NuMex Lemon Spice Jalapeno Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of orange Jalapeno hot peppers. Peppers are hot, grow upright, and turn from green to lemon yellow when mature. The color is stunning and really pops out and is great for landscaping or border gardens. Excellent for salsa, pickling, or making hot sauce. Suitable for containers and small gardens. Does well in hot climates. Heat Tolerant. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP1306-20 - NuMex Mirasol Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces heavy yields of 3" long by 3/4" long hot peppers. Peppers are medium hot, grow upright, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Developed by the New Mexico State University. A variety from New Mexico, USA.

[HP312-20 - Numex Pinata Pepper Seeds](#)

75 days. Capsicum annuum. Open Pollinated. Numex Pinata Pepper. The plant produces good yields of Jalapeno hot peppers. Peppers are hot and turn from green, to yellow, to orange, and to red when mature. Make colorful hot pickled peppers all from just one plant. It was developed by Dr. Paul Bosland of New Mexico State University. A variety from New Mexico, USA.

[**HP1118-20 - NuMex Primavera Hot Peppers**](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of large Jalapeno hot peppers. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent fresh or pickled. United States Department of Agriculture, PI 602970. A variety from the USA.

[**HP168-20 - NuMex R Naky Hot Peppers**](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 6" long Anaheim hot peppers. Peppers are very mild and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for roasting or stuffing. An excellent choice for home gardens, market growers, and open field production. This variety developed by Dr. Nakayama of the New Mexico State University in 1985. It was cross-breed between the Rio Grande 21 and the New Mexico 6-4. A variety from New Mexico, USA.

[**HP2267-20 - NuMex St Patrick's Day Hot Peppers**](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of small hot peppers. Peppers are hot, grow upright, are bullet-shaped, and turn from green to orange when mature. A beautiful edible dwarf ornamental peppers with different colors that are perfect for the holidays. Suitable for containers, pots, patios, and small gardens. Developed by the New Mexico State University. A variety from New Mexico, USA.

[**HP1817-20 - NuMex Suave Red Hot Peppers**](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces good yields of Habanero-type hot peppers, but without extreme heat. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. This new variety is not as hot as the traditional Habanero peppers. It has the same flavor and aroma as the Habanero peppers. A variety from New Mexico, USA. Scoville Heat Units: 800

[**HP170-20 - NuMex Sunburst Hot Peppers**](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3 ¼" long by ¼" wide Cayenne hot peppers. Peppers grow upright and turn from green to orange when mature. The plant has green stems, green leaves, and white flowers. Developed by New Mexico State University. A variety from New Mexico, USA.

[**HP2425-20 - NuMex Pumpkin Spice Jalapeno Hot Peppers**](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of bright orange Jalapeno hot peppers. Peppers are hot, grow upright, and turn from green to bright orange when mature. A beautiful plant with pumpkin orange peppers that is perfect for the Halloween holiday. Suitable for containers and small gardens. Does well in hot climates. Developed by the New Mexico State University. A variety from New Mexico, USA.

[CU124-20 - Pick a Bushel Cucumbers](#)

[2014 All-America Selections Winner!](#)

60 days. Cucumis sativus. (F1) Semi bush plant produces high yields of 3 to 6" long green cucumbers. These cucumbers can be picked when they are 3" long for gherkin size or left to grow into 6" long for use in salads. They are tasty with no bitterness. The semi-bush vines grow only 24" long, so they are great for growing in patio containers as well as in small gardens. An excellent choice for home gardens. Heat Tolerant. Disease Resistant: Ccu, CGMMV, CMV.

[BN143-50 - Pigeon Peas Seeds](#)

85 days. Cajanus indicus. Open Pollinated. Pigeon Peas. The plant produces high yields of flavorful pigeon peas. They can be served in the same manner as green peas or cowpeas, combining them with other vegetables. Peas 'n' Rice is a dish made in the Bahamas. It includes onions, celery, tomatoes, rice, and pigeon peas. Pigeon peas are important commercially in India. Plant as you would in the same manner as cowpeas. Most pigeon peas are harvested in the dry stage and marketed as dried peas. This variety will succeed under hot growing conditions. Where intercropping is followed, we recommend Cotton and Pigeon Pea cultivation. A Cotton/Pigeon Pea crop combination allows the food legume to benefit from the insecticide spraying applied on the cotton crop and cotton takes advantage of the nitrogen-fixing ability of pigeon pea. Pigeon peas are remarkably drought-resistant, tolerating dry areas. An excellent choice for home gardens and market growers. A variety from India. Disease Resistant: FW.

[HP186-10 - Pilange Pepper Seeds](#)

90 days. Capsicum baccatum. Open Pollinated. Pilange Pepper. The plant produces good yields of ¾" long by 1 ¼" wide Tomato shaped hot peppers. Peppers are medium hot, have medium-thick flesh, and turn from dark green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling and making salsa, hot sauce, and seasoning spice powder. A variety from Sao Paulo, Brazil. United States Department of Agriculture, PI 497973. Scoville Heat Units: 7,575.

[CO11-5 - Pima Extra Long Cotton Seeds](#)

145 days. Gossypium barbadense. Open Pollinated. Pima Extra Long Cotton. The plant produces good yields of quality white cotton. This cotton variety is more suitable for diverse climatic conditions and can be tried for organic cotton farming. Irrigated and dry land suitable for well-drained soil. Drought Tolerant. An excellent choice for home gardens and market growers.

[SP55-20 - Pimento L Sweet Peppers](#)

95 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 4 ½" long by 2 ½" wide heart-shaped sweet peppers. Peppers turn from green to red when they mature. Excellent pickling variety. Suitable for containers and pots. An excellent choice for home gardens. Disease Resistant: TMV.

[HP1157-20 - Pimiento de Padron Hot Peppers](#)

70 days. Capsicum annuum. Open Pollinated. This early maturing plant produces good yields of 3 ½" long by 1 ¼" wide hot peppers. Peppers are medium hot, have medium thin flesh, and turn from green to dark red when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling, frying, and stir-fry. Usually used in the green stage and pickled. Also fried in olive oil and served as an appetizer called tapa. Peppers are mildly hot when green, but get hotter as they mature. An heirloom variety from Spain.

[WM80-10 - Pinata Watermelons](#)

85 days. Citrullus lanatus. (F1) This plant produces high yields of 22 to 25 lb oblong Allsweet type watermelons with dark green striped rind. It has very sweet crisp deep red flesh with no cracks or splits in the heart. Great for fruit salads and picnics. Excellent storage variety. Great shipper. Good foliage protection from the sun and resist sunburn. Does well under adverse weather conditions. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and commercial production. A variety from the USA. Disease Resistant: FW.

[TL2-100 - Pineapple Tomatillo Seeds](#)

70 days. Physalis ixocarpa. Open Pollinated. Pineapple Tomatillo. This early maturing plant produces good yields of tomatillos. It has a fruity taste that is similar to that of pineapple. Excellent for making a wonderful salsa. The small, cherry size fruit turns from green to yellow-gold when mature. They are surrounded by a papery husk that turns from green to brown as they ripen and splits open when they are ready to harvest. An excellent choice for home gardens.

[EG17-50 - Ping Tung Long Eggplant Seeds](#)

65 days. Solanum melongena. Open Pollinated. Ping Tung Long Eggplant. The plant produces high yields of 12 to 18" long slender dark lavender eggplants. The white flesh is sweet, tender, and very delicious. Perfect for grilling, frying, stuffing, baking, and pickling. One of the best Oriental eggplants on the market. The skin is so tender you don't even need to peel it. Best when harvested when 8" long. Also known as Pingtung Eggplant. Plants should be staked for straight fruit. Heat Tolerant. High Humidity Tolerant. Suitable for container gardening. An excellent choice for home gardens and market growers. An heirloom variety from Pingtung, Taiwan. Disease Resistant: BW.

[TM763-20 - Pink Berkeley Tie Dye Tomato Seeds](#)

70 days. Solanum lycopersicum. Open Pollinated. Pink Berkeley Tie Dye Tomato Seeds. This early maturing plant produces high yields of 8 to 12 oz bi-colored dark pink wine color beefsteak tomatoes with green stripes and deep brick-red interior flesh. It has a rich tomato flavor. The sweet rich flavor repeatedly beats Cherokee Purple in taste tests. Perfect for salads, slicing, sandwiches, garnishes, or culinary creations. A Wild Boar Series variety. An excellent choice for home gardens. Indeterminate.

[SP111-20 - Pimento Sweet Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of heart-shaped sweet peppers. Peppers turn from green to red when they mature. Excellent pickling pepper. Suitable for containers, pots, patios, hanging baskets, and small gardens. A variety from the USA.

[SP56-20 - Pimiento Elite Pepper Seeds](#)

75 days. Capsicum annuum. (F1) Pimiento Elite Pepper. The plant produces extremely heavy yields of 3 ½" long by 3" wide sweet pimento peppers. Peppers have thick walls and turn from green to red when they mature. Similar to Pimento L, but has higher yields. Ideal for canning, salads, and garnishes. An excellent choice for home gardens and market growers.

[TM822-10 - Pineapple Pig Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces excellent yields of 14 to 16 oz bi-colored creamy yellow tomatoes with pink stripes. Perfect for salads, garnishes, or culinary creations. A Wild Boar Series variety. Low acidity variety. Excellent choice for home gardens. Indeterminate.

[TM343-20 - Pineapple Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 2 lb bi-colored yellow beefsteak tomatoes with red streaks both on the outside and inside. They are very sweet, meaty, juicy, and flavorful. It has a rich old-fashioned tomato flavor. Perfect for salads, slicing, and sandwiches. The plant has good foliage protecting tomatoes from sun-scaud. An excellent choice for home gardens. An heirloom variety from the USA. Indeterminate.

[RD24-100 - Pink Beauty Radishes](#)

27 days. Raphanus sativus. Open Pollinated. This early maturing plant produces excellent yields of 1 to 1 ½" diameter pink radishes. The flesh is white crispy and very mild. Perfect for salads, vegetable platters, and garnishes. Not too spicy, great variety for the specialty market. Excellent choice for home gardens and specialty market growers. United States Department of Agriculture, G 30519.

[TM823-20 - Pink Boar Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 2 to 4 oz bi-colored pinkish-wine colored tomatoes with metallic green stripes. They are very sweet, juicy, and flavorful. Perfect for salads, garnishes, or culinary creations. A Wild Boar Series variety. Excellent choice for home gardens. Indeterminate.

[TM874-20 - Pink Bumble Bee Tomato Seeds](#)

70 days. Solanum lycopersicum. Open Pollinated. Pink Bumble Bee Tomato. This early maturing plant produces high yields of ¾ to 1 oz bicolored red cherry tomatoes with orange and yellow stripes. They are beautiful, very sweet, juicy, and flavorful. Perfect for salads, garnishes, or culinary creations. It tolerates cool nights and hot days. An Artisan Series variety. Crack Resistant. Suitable for greenhouse production. Always a great seller at Farmer's Markets. An excellent choice for home gardens, greenhouse production, and market growers. Indeterminate.

[BN110-50 - Pink Half Runner Bean Seeds](#)

50 days. Phaseolus vulgaris. Open Pollinated. Pink Half Runner Bean. This early maturing plant produces excellent yields of 5" long green beans. These beautiful beans can be canned, dried, or used fresh. It has a peanut bean taste. An excellent choice for home gardens.

[RD45-100 - Pink Lady Slipper Radishes](#)

27 days. Raphanus sativus. Open Pollinated. This early maturing plant produces excellent yields of long bright pink radishes. They are crisp, sweet, and mild. Stays tender and crispy even in cold weather. Crack Resistant. Perfect for salads, vegetable platters, and gourmet dishes. Excellent choice for home gardens and specialty market growers.

[TM100-20 - Pink Oxheart Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Pink Oxheart Tomato. The plant produces good yields of 1 to 2 lb pink heart-shaped tomatoes. They are firm, meaty, solid, and very flavorful. Perfect for salads, slicing, and sandwiches. An excellent choice for home gardens. An heirloom dating back to 1925. United States Department of Agriculture, PI 270202. Indeterminate.

[BN134-50 - Pinkeye Purple Hull BVR Cowpea Seeds](#)

63 days. Vigna unguiculata. Open Pollinated. Pinkeye Purple Hull BVR Cowpeas. This early-producing bush-type plant produces heavy yields of purple pods. Similar to the Purple Hull Pinkeye with the same characteristics. Pods contain cream colored peas with maroon eyes. Excellent drying and canning variety. Cream cowpeas. This is the improved version of the Pinkeye Purple Hull Cowpeas, which has better disease resistance. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 663145. Disease Resistant: BLCMV, BVR.

[CU56-20 - Pioneer Cucumbers](#)

51 days. Cucumis sativus. (F1) The plant produces high yields of 3 to 6" long dark green cucumbers. Crunchy flesh makes it great for making pickles. Can be used fresh in salads or pickled. One of the most reliable cucumbers on the market. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: ALS, Ccu, DM.

[TM279-20 - Pink Girl Tomato](#)

76 days. Solanum lycopersicum. (F1) The plant produces heavy yields of 6 to 8 oz pink tomatoes. They are very sweet, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. Crack Resistant. Excellent choice for home gardens. Disease Resistant: V, F, A, St. Indeterminate.

[TM924-20 - Pink Jazz Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of large 1 lb beefsteak bi-color pink tomatoes with yellow stripes. These beautiful tomatoes turn pink when mature and are very sweet. Great in salads, sandwiches, and slicing. Suitable for home gardens, market growers, and open field production. A variety from the USA. Indeterminate. Disease Resistant.

[SW8-100 - Pink Lipstick Swiss Chard](#)

65 days. Beta vulgaris. Open Pollinated. The plant produces good yields of shiny dark green leaves with magenta-pink stalks and veins. They are beautiful and tender when harvested young, as it dresses up salads with their spunky pink color, or harvest at maturity when veins are a true magenta for soups and steaming. An excellent choice for home gardens and specialty market growers.

[TM628-20 - Pink Ping Pong Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 to 3 oz extra-large pink cherry tomatoes. They are about the size and shape of a ping pong ball and are very delicious and juicy. Perfect for salads, garnishes, culinary creations, and canning. The plant requires support, either staking or cages. Excellent choice for home gardens. An heirloom variety from New York, USA. Indeterminate.

[BN81-50 - Pinto Bean Seeds](#)

53 days. Phaseolus vulgaris. Open Pollinated. Pinto Bean. This bush-type plant produces good yields of 4" long flat green beans. It can be used as a snap bean when young. Also used as a dry bean. Great for making baked beans and bean soups. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

[HP1117-10 - Piquillo Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Piquillo Pepper. The plant produces good yields of 3 ½" long by 1 ¾" wide hot peppers. Peppers are mildly hot, grow upright, have thick flesh, and turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. Excellent roasted stuffed, sauteed, or pickled. An heirloom variety from Navarra, Spain.

[HP451-10 - Pizza Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3" long by 1 1/2" wide Jalapeno peppers. Peppers are mild, have very thick walls, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for pizza and pickling. An excellent choice for home gardens. A variety from the USA.

[TM501-10 - Plum Dandy Tomato Seeds](#)

68 days. Solanum lycopersicum. (F1) Plum Dandy Tomato. This early maturing plant produces high yields of red plum-shaped tomatoes. They are firm, very sweet, and very flavorful. A quality paste and saladette tomato. Grows in clusters. Excellent choice for home gardens and market growers. Disease Resistant: EB. Indeterminate.

[TM449-20 - Plum Yellow Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of lemon-yellow plum tomatoes. It has a rich tomato flavor. Perfect for making the sauce, paste, and canning. Grows in clusters of 8 to 10. An excellent choice for home gardens. United States Department of Agriculture, PI 303811. Disease Resistant: A. Indeterminate.

[HP188-10 - Poinsettia Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3" long by 1/2" wide hot peppers. Peppers are hot, grow upright in clusters, and turn from light green to red when mature. The plant has green stems, green leaves, and white flowers. A very beautiful edible dwarf ornamental plant. Suitable for containers, pots, and patios. A variety from Japan.

HPLC Test Results: #6

[TM625-20 - Polar Star Tomato](#)

65 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 3 to 4 oz red tomatoes. It has a sweet and tangy flavor. Perfect for salads, slicing, and sandwiches. A variety developed in Alaska for cold-weather regions. Cold Tolerant. Excellent choice for home gardens. Determinate.

[CA28-50 - Planter's Jumbo Melon Seeds](#)

86 days. Cucumis melo. Open Pollinated. Planter's Jumbo Melon. The plant produces good yields of giant 4 to 5 lb cantaloupes. The flesh is a deep orange and is very juicy and sweet. Does well in drought areas and high rainfall areas. Excellent shipper. Drought Tolerant. An excellent choice for home gardens and market growers. Developed in 1954 by the South Carolina Agricultural Experimental Station, Clemson, South Carolina, USA. United States Department of Agriculture, NSL 74171. Disease Resistant: DM, PM.

[TM804-10 - Plum Regal Tomato Seeds](#)

76 days. Solanum lycopersicum. (F1) Plum Regal Tomato. The plant produces high yields of 3 to 4 oz deep red plum tomatoes. It has a bright red interior and a superior flavor. Perfect for making tomato sauce, paste, salsa, and canning. The plant has good foliage protecting tomatoes from sun-scald. Crack Resistant. An excellent choice for home gardens, farmer's markets, and market growers. Disease Resistant: V, FF, EB, LB, TSWV. Determinate.

[HP187-20 - Poblano L Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 5" long by 2 1/2" wide hot peppers. Peppers are mildly hot and turn from dark green to chocolate brown when they mature. The plant has green stems, green leaves, and white flowers. They are called Poblano when fresh and called Ancho when dried. Always a great seller at Farmer's Markets! A variety from Mexico.

[TM624-20 - Polar Baby Tomato](#)

60 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of deep red tomatoes. It has a rich tomato flavor. Perfect for salads, slicing, and sandwiches. A variety developed in Alaska for cold-weather regions. Cold Tolerant. Excellent choice for home gardens. Determinate.

[TM234-10 - Polish Linguisa Tomato Seeds](#)

73 days. Solanum lycopersicum. Open Pollinated. Polish Linguisa Tomato. This early maturing plant produces heavy yields of 10 to 12 oz red sausage shaped tomatoes. They are very sweet and have few seeds. Perfect for making puree, paste, sauce, salads, canning, drying, or freezing. Excellent choice for home gardens. An 1800s heirloom variety from Poland. Indeterminate.

[TM158-10 - Pompeii Tomato Seeds](#)

76 days. Solanum lycopersicum. Open Pollinated. Pompeii Tomato. The plant produces heavy yields of red Roma tomatoes. They are very flavorful. Perfect for making tomato sauce, puree, paste, and canning. Excellent choice for home gardens. A variety from Italy. Indeterminate.

[TM383-20 - Ponderosa Red Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 lb red beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful with few seeds. It has a rich old-fashioned tomato flavor. Perfect for salads, slicing, sandwiches, and canning. Low acidity variety. An excellent choice for home gardens. An heirloom variety. United States Department of Agriculture, PI 634828. Indeterminate.

[PM60-10 - Porcelain Doll Pumpkin Seeds](#)

120 days. Cucurbita maxima. (F1) Porcelain Doll Pumpkin. The plant produces good yields of 10 to 25 lb pink pumpkins. Pumpkins start out pale yellow, then cream, then pink when fully mature. Multiple harvests are required because pumpkins develop and mature at different times as vines grow. For the best pink color, harvest when the cork has developed on a stem. An excellent choice for home gardens and Farmer's Markets.

Disclaimer Note: Some environmental conditions and stress can cause a plant to produce non-pink pumpkins! Such conditions that may cause non-pink pumpkins are excessive heat, abnormal PH in soil, and too much fertilizing. Depending on conditions, the true pink color of pumpkins can range from 40% to 90% of the harvest. Non-pink pumpkins can exhibit blotchy coloration, ranging from blue-grey to green, to salmon-orange color.

[TM110-20 - Porter Improved Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 3 to 4 oz red tomatoes. They are very flavorful. Perfect for making tomato juice, sauce, salads, and canning. A variety was developed by Porter & Son Seed Company for Southern regions like Texas. It is larger than Porter Tomato but with the same setting ability. Does extremely well in high heat and low humidity. Grows in clusters of 6. Also known as Porter's Pride Tomato. An excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 34407. Disease Resistant: V, F. Indeterminate.

[TM108-20 - Ponderosa Pink Tomato](#)

87 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 to 2 lb pinkish-red beefsteak tomatoes. They are very sweet, meaty, juicy, very flavorful, and are almost seedless. Perfect for sandwiches, burgers, salads, and slicing. Low acidity variety. Also known as Number 400 Tomato and Henderson's Ponderosa Tomato. An excellent choice for home gardens. An heirloom variety was introduced by Peter Henderson & Co. in 1891. United States Department of Agriculture, PI 644770. Indeterminate.

[CU118-20 - Poona Kheera Cucumbers](#)

50 days. Cucumis sativus. Open Pollinated. The plant produces good high yields of 4 to 5" long cucumbers. The best thing about Poona Keera is that it will never, ever get bitter. This cucumber looks like a large russet potato with a russet brown color. It is very tender, crisp, juicy, and delicious. It turns from white, to golden yellow, then to russet brown. It may be eaten at any stage, skin and all, but the flavor is best when the skin is just turning brown. Used in stir-fries, long-marinating dishes, pickles, and chutneys. Very strong vines allow for huge yields. Trellising makes it easier to harvest. It does extremely well in hot climates in the Western part of the country where it is difficult to grow cucumbers. This is an excellent hydroponic variety. Also known as Puneri Cucumber. An excellent choice for home gardens. An heirloom variety from Poona, India.

[TM824-20 - Pork Chop Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 10 to 12 oz bi-colored yellow beefsteak tomatoes with green stripes. It has a rich tomato flavor with hints of citrus. Perfect for salads, sandwiches, garnishes, culinary creations, or a sunny sauce. It has delicate skin, which is sure to please tomato lovers with sensitive stomachs. A Wild Boar Series variety. An excellent choice for home gardens. Indeterminate.

[TM390-20 - Porter Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 2 to 4 oz deep red plum tomatoes. They are very flavorful. Perfect for making tomato juice, sauce, salads, and canning. Crack-Resistant. The plant has good foliage protecting tomatoes from sun-scald. It was developed by Porter & Son Seed Company for Southern regions like Texas. Porter is an old-time drought-tolerant favorite in the Southwest. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 270281. Disease Resistant: V, F. Indeterminate.

[TM859-10 - Poseidon 43 Tomato](#)

78 days. Solanum lycopersicum. (F1) The plant produces good yields of 8 oz deep pink tomatoes. They have very smooth skin. If you're looking for a mild tomato, pick Poseidon 43. Perfect for salads, slicing, and sandwiches. Low acidity variety. Excellent choice for home gardens and market growers. Disease Resistant: V, FF, TMV. Indeterminate.

[TM496-20 - Powers Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Powers Tomato. The plant produces heavy yields of 3 to 5 oz yellow pear-shaped tomatoes. This is an excellent paste tomato similar to that of the Amish Paste. Great in salads and for making a yellow sauce. Excellent choice for home gardens. A 100-year-old heirloom variety from Scott County, Virginia, USA. Indeterminate.

[KL3-750 - Premier Kale](#)

55 days. Brassica oleracea. Open Pollinated. This early variety produces heavy crops of deep green kale leaves. Very flavorful. Used fresh in salads and on sandwiches or cooked. This variety stands 3 to 4 weeks longer than other varieties. Provides higher yields when seeded in the fall for spring harvest. Most gardeners will be able to overwinter plants started in the fall. Spring-started plants will get very large. Extremely high in antioxidants and beta carotene. Also known as Early Hanover Kale. It is a slow bolting variety that is best suited to cooler climates. Great variety for wildlife forage, preferred forage for deer. An excellent choice for home gardens and market growers. United States Department of Agriculture, G 30729.

[CB12-250 - Premium Late Flat Dutch Cabbage Seeds](#)

100 days. Brassica oleracea. Open Pollinated. Premium Late Flat Dutch Cabbage. The plant produces heavy crops of huge heads of cabbage. The heads average 10 to 12 inches in diameter and weigh 10 to 15 lbs. Excellent for making delicious sauerkraut. One of the best winter keepers holds its quality for months! Excellent choice for home gardens and market growers. An heirloom variety dating back to the 1860s. United States Department of Agriculture, NSL 32697.

[HP2451-10 - Pot-A-Peno Pepper Seeds](#)

65 days. Capsicum annuum. (F1) Pot-A-Peno Pepper. This early maturing plant produces high yields of 4" long by 1" wide Jalapeno hot peppers. Peppers are mildly hot and turn from green to red when they mature. The plant has green stems, green leaves, and creamy-yellow flowers. Perfect for hanging baskets, patios, or containers. The plant has excellent foliage to protect pepper from sun-scaud. It is an excellent choice for home gardens and farmer's markets. A variety from the USA. Scoville Heat Units: 500

[TM627-10 - Prairie Fire Tomato](#)

70 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 3" long by 1" wide elongated grape shaped deep red tomatoes. It is very sweet and tied for Frist Place in taster test with a Brix of 10. Perfect for snacks, salads, sandwiches, and slicing. Excellent choice for home gardens. Indeterminate.

[BR5-25 - Premium Crop Broccoli Seeds](#)

[1975 All-America Selections Winner!](#)

58 days. Brassica oleracea. (F1) Premium Crop Broccoli. The plant produces large heads of broccoli. The head averages 9 to 12 inches in diameter. This is an excellent high-quality long-lasting variety. Lasts longer than other varieties. Produces many side shoots after the main harvest. An excellent choice for home gardens and market growers. United States Department of Agriculture, G 26092.

[HP2040-20 - Prik Chi Faa Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Prik Chi Faa Pepper. The plant produces good yields of 5" long by 3/4" wide Cayenne-type hot peppers. Peppers are medium hot, have thin flesh, and turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. Excellent for Oriental cuisine for spicing up soups, sauces, salsa, curries, stir-fries, and for making seasoning spice powder. A variety from Thailand.

[CB64-50 - Primo Vantage Cabbage Seeds](#)

73 days. Brassica oleracea. (F1) Primo Vantage Cabbage. This variety produces good yields of 4 ½ lb green cabbage. The plant is very uniform and holds its shape well. Good for making salads, slaws, stuffed cabbage, and cooked dishes. It holds well in the field. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

[SP337-10 - Pritavit Sweet Peppers](#)

80 days. Capsicum annuum. (F1) The plant produces heavy yields of 2½" long by 4" wide flattened sweet bell peppers. Peppers turn from green to crimson red when mature. It has thick walls is crispy and very sweet. Great in salads, sauteed, or stuffed. Also well suited with cheese, as cruditiés, for pizza toppings, as a healthy snack, and for pickling. Disease Resistant: ToMV.

[LC6-750 - Prizehead Lettuce](#)

45 days. Lactuca sativa. Open Pollinated. This early maturing plant produces heavy yields of crisphead lettuce. The inner leaves are green and the outer leaves are reddish-brown. It is crisp, sweet, and tender, never bitter. The delicious leaves are perfect for salads and garnishes. Slow to bolt. Suitable for hydroponics gardening. An excellent choice for home gardens and market growers. An heirloom variety dating back to 1873. United States Department of Agriculture, PI 536757. Disease Resistant: TMV.

[PM47-20 - Prizewinner Pumpkins](#)

120 days. Cucurbita maxima. (F1) The plant produces huge world-record size pumpkins. It is the Giant Pumpkins that weigh 100 to 300 lbs. The pumpkins are glossy and have the true pumpkin color and shape. You should limit the vines to one pumpkin each for prize-winning size. Try breaking the record yourself! Excellent choice for home gardens.

[HB197-250 - Prospera Basil Seeds](#)

68 days. Ocimum basilicum. Annual. (F1) Prospera Basil. The plant produces good yields of 3" glossy medium green basil leaves. Great for adding seasoning to Italian and tomato dishes. Excellent as a garnish, herb vinegar, or seasoning for poultry, beef, stews, and soups. It is very aromatic and attractive in the herb garden and is suitable for containers. The plant is also resistant to Downy Mildew and Fusarium. An excellent choice for home gardens, farmer's markets, market growers, greenhouses, open production, and commercial production. Disease Resistant: DM, F.

[TM111-20 - Principe Borghese Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Principe Borghese Tomato. The plant produces heavy yields of 1 to 2 oz bright red plum tomatoes. It has a rich tomato flavor. They are meaty, very flavorful, and have little juice and very few seeds. Perfect for making sauce, puree, and paste. Great for thickening tomato sauce. Also one of the best sun drying tomatoes on the market. Suitable for fresh use, canning, and freezing too. Grows in clusters. Crack Resistant. Drought Tolerant. The plant requires support, either staking or cages. Also known as Prince Borghese Tomato. Always a great seller at Farmer's Markets! An excellent choice for home gardens and specialty market growers. An heirloom variety from Tuscany, Italy dating back to 1910. United States Department of Agriculture, PI 639215. Determinate.

[TM512-10 - Prize of the Trials Tomato Seeds](#)

80 days. Solanum lycopersicum. Open Pollinated. Prize of the Trials Tomato. The plant produces high yields of 2 oz orange cherry tomatoes. They are very flavorful. Perfect for salads, garnishes, or culinary creations. Crack Resistant. Does well in dry hot regions. Drought Tolerant. Heat Tolerant. An excellent choice for home gardens. Indeterminate.

[LK5-100 - Prizetaker Leeks](#)

110 days. Allium ampeloprasum. Open Pollinated. The plant produces high quality and very tall leeks. The stalks are pure white and retain their flavor even with their extremely large size. A cold-resistant variety that holds well over the winter. Used in soups, stews, and salads. Also known as Lyon Leek. An excellent choice for home gardens. An 1800s heirloom variety from England.

[WM81-20 - Pronto Watermelons](#)

80 days. Citrullus lanatus. (F1) This early maturing plant produces high yields of 20 to 24 lb oblong watermelons with green striped rind. It has very sweet red flesh. Great for fruit salads and picnics. Excellent choice for dry land planting! Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and commercial production. A variety from the USA. Disease Resistant: FW.

[HB192-250 - Prospera Red Basil Seeds](#)

74 days. Ocimum basilicum. Annual. (F1) Prospera Red Basil. The plant produces good yields of dark purple basil leaves. Great for adding seasoning to Italian and tomato dishes. Excellent as a garnish, herb vinegar, or seasoning for poultry, beef, stews, and soups. It is very aromatic and attractive in the herb garden. Suitable for containers. Bolt Resistant. First purple basil with resistance to Downy Mildew and Fusarium. Suitable for containers. An excellent choice for home gardens, farmer's markets, market growers, greenhouses, open production, and commercial production. Disease Resistant: DM, F.

[EG28-50 - Prosperosa Eggplants](#)

75 days. Solanum melongena. Open Pollinated. The plant produces good yields of large 5 to 6" round deep purple eggplants. This very beautiful eggplant has tender mild white flesh. Perfect for parmesan, curry, and gourmet eggplant dishes. It is very low in calories and includes vitamins B3, B6, magnesium, and potassium. The plant keeps producing throughout the season. Does well in cooler climates. This is a well-known variety in Europe's fine restaurants & markets. Excellent choice for home gardens and specialty market growers. An heirloom variety from Tuscany, Italy.

[BN9-50 - Provider Bean Seeds](#)

50 days. Phaseolus vulgaris. Open Pollinated. Provider Bean. This early maturing compact bush-type plant produces good yields of quality 5 1/2" long stringless green beans. This dependable early variety can germinate in cool soil and does well in adverse weather. Retains flavor after pickling. Good freezing variety. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 549841. Disease Resistant: BCMV.

[HP1824-20 - Pumpkin Hot Peppers](#)

110 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 1 1/2" by 2 1/2" pumpkin-shaped hot peppers. Peppers are mildly hot and turn from green to red when mature. If left in the field, they will bleach to burnt orange. The plant has green stems, large green pumpkin-shaped leaves, and white flowers. These small peppers look so much like real miniature pumpkins that you'll be fooled. They will get hard, hold their shape, and not mold when they are dried. A very unique ornamental hot pepper.

[SQ73-20 - Puritan Butternut Squash](#)

100 days. Cucurbita moschata. Open Pollinated. The plant produces good yields of 11" long by 5" wide butternut squash. The flesh is very flavorful and sweet. The squash can grow up to 2 to 3 1/2 lbs. An excellent choice for home gardens, farmer's markets, and market growers. A winter squash variety.

[TM684-20 - Purple Brandy Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Purple Brandy Tomato. The plant produces good yields of 8 to 16 oz deep pink-purple beefsteak tomatoes. It has a rich tomato flavor as fine as the Brandywine tomato. Perfect for salads, slicing, and sandwiches. This is a cross between the Brandywine and the Marisol Purple. A potato leaf variety. Also known as Purple Brandywine Tomato, Marisol Brandywine Tomato, and Marisol Bratka Tomato. Excellent choice for home gardens. An heirloom variety. Indeterminate.

[SS12-100 - Protein Powerhouse Mix Sprouting Seeds](#)

2 to 4 days. Mixed. Open Pollinated. Protein Powerhouse Mix Sprouting Seeds. The plant produces excellent quality Garbanzo Sprouting Beans. Protein Powerhouse Mix includes four of the most protein-rich sprouting seeds, including the Adzuki, Garbanzo, Green Peas, and Mung Beans. The sprouts are sweet, crisp, and crunchy, and have a nutty flavor. It is high in protein, fiber, iron, potassium, and essential vitamins. It is also one of the best-tasting mixes available. Excellent in salads, soups, and other Asian dishes. A 1/2 cup of seed yields approximately 2 cups of sprouts. A variety from the USA.

[TM112-20 - Pruden's Purple Tomato](#)

72 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces good yields of 12 to 16 oz dark pink beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful with few seeds. One of the best-tasting varieties compares with the Brandywine tomato. It has even ranked higher at times in taste trials. Perfect for salads, slicing, and sandwiches. A potato leaf variety. Crack Resistant. Heat Tolerant. Cold Tolerant. An excellent choice for home gardens. An heirloom variety. Indeterminate.

[HP313-20 - Purira Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 2" long by 1/2" wide hot peppers. Peppers are hot, grow upright, have medium-thick flesh, and turn from light yellow with purple markings, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling and making salsa, hot sauce, and seasoning spice powder. A beautiful ornamental plant. A variety from the USA. Scoville Heat Units: 49,718.

HPLC Test Results: #6

[SP58-20 - Purple Beauty Sweet Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 4" long by 4" wide sweet purple bell peppers. Peppers have thick walls, are mildly sweet, and turn from green to purple when mature. This beautiful pepper holds its dark purple color for a long time. Excellent for salads, stuffing, and gourmet dishes. Suitable for containers. Grow the Chocolate Beauty Peppers and Red Beauty Peppers to complete your gourmet dishes! Disease Resistant: TMV.

[TM875-20 - Purple Bumble Bee Tomato Seeds](#)

70 days. Solanum lycopersicum. Open Pollinated. Purple Bumble Bee Tomato. This early maturing plant produces high yields of 1 to 2 oz purplish-red cherry tomatoes with green stripes. They are very sweet and flavorful. Perfect for salads, garnishes, or culinary creations. An Artisan Series variety. Suitable for hydroponics gardening. Crack Resistant. Excellent choice for home gardens. Indeterminate.

[TM331-20 - Purple Calabash Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 9 to 12 oz deep purple-burgundy beefsteak tomatoes. This is the most truly purple tomato. The Cinderella pumpkin-shaped tomato has a unique tomato flavor, an almost wine-like flavor with a citrus finish. It has a unique shape with a ruffled appearance. Perfect for salads, slicing, and sandwiches. Also great for sauces and paste. The Purple Calabash was grown by Thomas Jefferson at his Monticello home in Charlottesville, Virginia. His 1000 ft terrace garden was used as a source of food for his family and also used as a laboratory where he experimented with more than 70 different types of vegetables. The indeterminate plants produce extremely heavy yields, usually several hundred per plant. The plant requires support, either staking or cages. Crack Resistant. Drought Tolerant. An excellent choice for home gardens. An heirloom variety from Texas, USA. Indeterminate.

[TM926-10 - Purple Cherry Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of dark purple cherry tomatoes. They are very sweet and are perfect for gourmet dishes, salads, snacks, and vegetable platters. Very productive producing over 100 tomatoes. An excellent choice for home gardens. An heirloom variety from the USA. Indeterminate.

[CTS-250 - Purple Dragon Carrot Seeds](#)

90 days. Daucus carota. Open Pollinated. Purple Dragon Carrot. The plant produces very flavorful 6 to 9" long reddish-purple skinned carrots with bright orange and yellowish-orange core. Great fresh or used for making carrot juice. It has a slightly spicy and sweet flavor. The lycopene content is equal to tomatoes! Add color to your favorite dish by growing the red, white, and yellow carrots. Does well in heavy soils. An excellent choice for home gardens. Developed by Dr. John Navazio.

[CT31-250 - Purple Haze Carrot Seeds](#)

2006 All-America Selections Winner!

73 days. Daucus carota. (F1) Purple Haze Carrot. The plant produces sweet and tender 7 to 10" long deep purple-skinned carrots with a bright orange core. Excellent fresh in salads or cooked for gourmet dishes. Makes quite a beautiful display when sliced on a relish tray. The carrot retains its color when lightly cooked, however, it loses its vibrant purple color when it is cooked longer. Add color to your favorite dish by growing yellow, white, and purple carrots. Plant seeds between May and July so it does not bolt. An excellent choice for home gardens.

[HP194-20 - Purple Jalapeno Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Purple Jalapeno Pepper. The plant produces good yields of 2" long by 1½" wide hot peppers. Peppers are medium hot, grow upright, have thick flesh, and turn from green, to purple, to red when mature. The plant has green stems, green leaves, and white flowers. Peppers stay dark purple for a long time before turning red. Excellent for Mexican cuisine and for salads, salsa, and pickling. A variety from the USA.

[RD44-100 - Purple Plum Radish Seeds](#)

30 days. Raphanus sativus. Open Pollinated. Purple Plum Radishes. This early maturing plant produces excellent yields of 1 to 1½" diameter radishes. It has purple skin and white flesh. The radishes are crisp and mild. Perfect for salads, vegetable platters, and garnishes. Fabulous purple color radish to brighten up your salad. Roots hold well in the field and do not crack easily. Excellent choice for home gardens and market growers. United States Department of Agriculture, PI 601220.

[HP452-20 - Purple Cayenne Pepper Seeds](#)

75 days. Capsicum annuum. Open Pollinated. Purple Cayenne Pepper. The plant produces good yields of 2 ¾" long by ½" wide Cayenne hot peppers. Peppers are hot, grow upright, have medium-thin flesh, and turn from pale yellow, to purple, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for salsa and for making hot pepper flakes and seasoning spice powder. A variety from the USA.

[TL8-100 - Purple de Milpa Tomatillo Seeds](#)

70 days. Physalis ixocarpa. Open Pollinated. Purple de Milpa Tomatillo This early maturing plant produces good yields of small to medium size tomatillos. This variety was grown unattended in a cornfield by a family in Mexico. It stores fresh for several weeks. Excellent for making salsa. They are surrounded by a papery husk that turns from green to brown as they ripen and splits open when they are ready to harvest. An heirloom variety from Mexico.

[CT49-750 - Purple Elite Carrot Seeds](#)

75 days. Daucus carota. (F1) Purple Elite Carrot. The plant produces good yields of 7 to 9" long rich purple-skinned carrots with a yellow core. Excellent fresh in salads or cooked for gourmet dishes. Makes quite a beautiful display when sliced on a relish tray. Add color to your favorite dish by growing orange, yellow, white, and purple carrots. Resists bolting in the spring. Plant seeds between May and July so it does not bolt. An excellent choice for home gardens.

[HP1170-10 - Purple Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of hot peppers. Peppers are hot and turn from green, to purple, to red when mature. The plant has green stems, green leaves with a purple tint, and violet flowers. A beautiful ornamental plant. A variety from Japan.

[AS11-25 - Purple Passion Asparagus Seeds](#)

Asparagus officinalis. (F1) Purple Passion Asparagus. The plant produces high yields of dark purple asparagus. Perfect for gourmet dishes. Asparagus is a perennial vegetable, so you plant it just once and enjoy season after season. An excellent choice for home gardens, farmer's markets, and market growers.

[BN91-50 - Purple Podded Bean Seeds](#)

68 days. Phaseolus vulgaris. Open Pollinated. Purple Podded Bean. This pole plant produces high yields of 7" long by ½" wide reddish purple stringless pole beans. A high quality stringless bean that turns light green when cooked. An excellent choice for home gardens. An heirloom variety was discovered by Henry Fields in an Ozark garden in the 1930s.

[BN10-50 - Purple Queen Improved Bean Seeds](#)

52 days. Phaseolus vulgaris. Open Pollinated. Purple Queen Improved Bean. The plant produces good yields of gorgeous purple color bush beans. These gourmet beans are very flavorful and stringless. An excellent choice for home gardens and market growers. Disease Resistant: BCMV.

[TM304-20 - Purple Russian Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 5 to 7 oz oblong purplish-red plum tomatoes. They are meaty and very flavorful. One of the best-tasting purplish-red tomatoes! Perfect for salads, sandwiches, slicing, salsa, sauce, puree, paste, and canning. Also known as Ukrainian Purple Tomato. Crack Resistant. Always a great seller at Farmer's Markets! An excellent choice for home gardens and specialty market growers. An heirloom variety from Ukraine. Indeterminate.

[TL3-50 - Purple Tomatillo](#)

65 days. Physalis ixocarpa. Open Pollinated. This early-maturing plant produces high yields of flavorful purple tomatillos. Excellent for making attractive salsa. A great storage type tomatillo. Excellent choice for home gardens and market growers.

[ON24-250 - Purplette Onions](#)

60 days. Allium cepa. Open Pollinated. This early maturing plant produces excellent yields of small burgundy onions. Best when harvested when very young as bunching onions or when golf ball size. The onion is a glossy rich burgundy color changing to a pastel pink color when cooked or pickled. Perfect in cooked dishes, salads, and pickled. An excellent choice for home gardens and specialty market growers. A short-day variety.

[SP59-20 - Quadrato d'Astiv Yellow Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Quadrato d'Astiv Yellow Pepper, The plant produces good yields of large sweet bell peppers. Peppers turn from green to yellow when they mature. Excellent fresh or stuffed. Also known as Quadrato Asti Giallo. A variety is grown throughout Italy.

[HB81-500 - Quedlinburger Neiderliegende Lemon Balm Seeds](#)

70 days. Melissa officinalis. Perennial. Open Pollinated. Quedlinburger Neiderliegende Lemon Balm. This plant produces good yields of lemon-scented leaves. Used for delightful teas, sauces, salads, and summer drinks. Excellent for colds, flu, depression, headaches, and indigestion. This is an improved variety with increased yields, higher essential oil content, and better winter hardiness. An excellent choice for home gardens.

[HB118-500 - Purple Ruffles](#)

[Basil](#)

[1987 All-America Selections Winner!](#)

85 days. Ocimum basilicum. Annual. Open Pollinated. The plant produces good yields of purple basil leaves. Excellent as a garnish, herb vinegar, or seasoning for poultry, beef, stews, and soups. A very beautiful plant! Suitable for containers. An excellent choice for home gardens.

[SP263-10 - Purple Star Sweet Peppers](#)

65 days. Capsicum annuum. (F1) This early maturing plant produces good yields of 3" long by 3 1/2" wide glossy deep purple sweet bell peppers. Peppers have thick walls, are juicy, crisp, and turn from green to purple to deep red when mature. Excellent for salads, stuffing, and gourmet dishes. Suitable for containers. Try growing Chocolate, Orange, Purple, and Red Bell Peppers too to complete your gourmet dishes!

[TP1-500 - Purple Top White Globe Turnip Seeds](#)

57 days. Brassica rapa. Open Pollinated. Purple Top White Globe Turnip. The plant produces good yields of 4 to 6" diameter turnips. They are deliciously sweet and tender. Roots are white on the bottom and bright purple on top. Best when harvested when roots are 4 to 6". Leaves can be used as greens. Stores well. Excellent choice for home gardens. An heirloom variety dating back to pre-1880. United States Department of Agriculture, NSL 6119.

[HP272-20 - Pusa Jwala Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 5 1/2" long by 1/2" wide hot peppers. Peppers are hot and turn from light green to red when mature. The plant has light green stems, light green leaves, and white flowers. A variety from India.

HPIC Test Results: #6

[TM113-20 - Quarter Century Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 10 to 12 oz red beefsteak tomatoes. They are very flavorful. Perfect for salads, slicing, sandwiches, or canning. Heat Tolerant. An heirloom variety from the USA dating back to 1901. Indeterminate.

[TM240-10 - Queen of Hearts Tomato](#)

80 days. Solanum lycopersicum. (F1) The plant produces good yields of 6 oz bright red tomatoes. Tomatoes grow in clusters of 4 on the vining plant. The tomatoes are very tasty and are perfect for sandwiches and slicing. Excellent variety for the home garden. A variety from the USA. Indeterminate.

[SQ111-20 - Queensland Blue Squash Seeds](#)

120 days. Cucurbita pepo. Open Pollinated. Queensland Blue Squash The plant produces good yields of large 10 to 20 lb dark bluish-grey-green pumpkin-shaped squash. The squash is flattened and ribbed. Very flavorful. The orange flesh is meaty and sweet which is perfect for cooking. Stores well. This squash was introduced to the United States in 1932 by Arthur Yates & Company of Sydney. Australians love this squash and make pumpkin squash soup. An excellent choice for home gardens and specialty market growers. An heirloom variety from Australia. A winter squash variety.

[BN136-50 - QuickPick Pinkeye Cowpea Seeds](#)

70 days. Vigna unguiculata. Open Pollinated. QuickPick Pinkeye Cowpeas. This non-vining bush-type plant produces high yields of dark purple pods. The plant produces 8" long pods that have 11 peas. The cream-colored peas have a maroon eye and are very flavorful. Excellent drying and canning variety. Easily harvest by hand or machine. Cream cowpeas. An excellent choice for home gardens and market growers. Developed for commercial production. United States Department of Agriculture, PI 596576. Disease Resistant: BLCMV.

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of ¾" round hot peppers. Peppers are hot and turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. The pepper resembles a tiny cherry tomato. A variety from Bolivia.

[CU69-20 - Raider Cucumbers](#)

52 days. Cucumis sativus. (F1) This early maturing plant produces high yields of uniform dark green cucumbers. Excellent for salads or slicing. One of the earliest-maturing slicers on the market. A gynoecious hybrid (mostly female) variety that is great for Canada and the Northern United States. Suitable for home gardens and market growers. Disease Resistant: ALS, Ccu, CMV.

[CT36-750 - Rainbow Blend Carrot Seeds](#)

57 to 68 days. Daucus carota. (F1) Rainbow Blend Carrot. The plant produces excellent quality 6" to 11" long rainbow-colored carrots. Beautiful orange, white, and yellow carrots are crisp and very sweet. Excellent for salads and gourmet dishes. An excellent choice for home gardens. A variety from the USA.

[CN34-50 - Rainbow Ornamental Corn Seeds](#)

110 days. Zea mays. Open Pollinated. Rainbow Ornamental Corn. The plant produces good yields of 8 to 10" long bi-colored ears of corn. Beautiful colors of white, red, blue, purple, gold, and orange kernels. Great for Halloween and Thanksgiving decorations. An excellent choice for home gardens and market growers.

[CN5-50 - Quickie Corn Seeds](#)

68 days. Zea mays. (F1) Quickie Corn. This early-maturing plant produces good yields of delicious bi-colored sweet corn very early in the season! Ears will grow 7 ½" long and have 14 rows of golden yellow and creamy white kernels. Good sprouting ability even in cool soil. Excellent mid-season variety. Unbelievable flavor. An excellent choice for home gardens and market growers. A variety from the USA.

[KO13-100 - Quickstar Kohlrabi Seeds](#)

37 days. Brassica oleracea. (F1) Quickstar Kohlrabi. This early maturing plant produces high yields of Kohlrabi. The skin is pale green and the flesh is creamy white. The bulbs are smooth, crisp, tender, and mild. The leaves are dark green and very flavorful. Best to harvest when bulbs are 2 to 3" across. Slow bolting. This is the earliest maturing variety on the market - only 37 days! Suitable for greenhouse production. An excellent choice for home gardens, greenhouses, market growers, and open field production.

[SS5-200 - Radish Sprouting Seeds](#)

2 to 5 days. Raphanus sativus. Open Pollinated. The plant produces excellent quality Radish sprouts. These delicious sprouts have a mild radish flavor. Excellent in salads and other Asian dishes. One tablespoon of seed yields approximately 1 to 2 cups of sprouts. Also known as Daikon Sprouting Seeds. A variety from the USA.

[SP147-20 - Rainbow Bell Sweet Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of colorful sweet bell peppers. Includes a quality mixture of brown, green, orange, purple, red, white, and yellow peppers. Suitable for salads, stuffing, freezing, and frying. An excellent choice for home gardens.

[TM553-20 - Rainbow Cherry Mix Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Rainbow Cherry Mix Tomato. The plant produces heavy yields of 1 oz cherry tomatoes. They are very sweet, juicy, and flavorful. The gourmet mix of colorful cherry tomatoes comes in various colors: gold, orange, creamy white, yellow, pink, green, purple, and red, and even some bi-colors! Perfect for salads and snacks. An excellent choice for home gardens. Indeterminate.

[SW9-100 - Rainbow Swiss Chard](#)

60 days. Beta vulgaris. Open Pollinated. The plant produces good yields of Swiss Chard leaves in shades of red, orange, purple, yellow, and white. Excellent for making a beautiful salad or steamed greens. Many keep their color even after cooking. It can make a great border for your flower garden. Also known as Five Color Silverbeet Swiss Chard. An heirloom variety from Australia. An excellent choice for home gardens.

[CO5-5 - Rajhans White Cotton Seeds](#)

145 days. *Gossypium hirsutum*. Open Pollinated. Rajhans White Cotton. The plant produces good yields of quality white cotton. This cotton variety is more suitable for diverse climatic conditions has a higher tolerance to aphids, jassids, and cotton bollworms, and can be tried for organic cotton farming. Irrigated and dry land suitable for well-drained soil. Drought Tolerant. Excellent choice for home gardens and market growers.

Yields Per Acre: 1263 lbs

[BR82-100 - Ramoso Santana Broccoli Seeds](#)

60 days. *Brassica oleracea*. Open Pollinated. Ramoso Santana Broccoli. This early-maturing plant produces heavy yields of green broccoli. It has a purplish-green head with lots of delicious side shoots. Slow to bolt. Suitable for spring, summer, and planting. An excellent choice for home gardens, market growers, and commercial growers. A heirloom variety from Italy.

[RD27-100 - Rat Tail Radishes](#)

57 days. *Raphanus caudatus*. Open Pollinated. The plant produces heavy yields of 3 to 6" green pods that have a radish taste. They are very delicious, crisp, and mildly pungent. They had a sharp but pleasant radish taste, along with a very nice crunchy texture. After trying this amazing edible-podded radish, you won't get enough of them. It adds a delicious flavor to any dish. Perfect for mixed gourmet vegetable platters, salads, and lightly cooked in stir-fries. Great for pickling too. Best when harvested when pods are young. Requires staking or trellis as it will grow to 5 ft. An excellent choice for home gardens. An heirloom variety from Thailand dating back to the 1860s.

[BN107-50 - Rattlesnake Bean Seeds](#)

60 days. *Phaseolus vulgaris*. Open Pollinated. Rattlesnake Bean. This pole-type plant produces heavy yields of 8" long dark green beans with streaks of purple. Beans turn yellow when mature. The beans are light buff in color with dark brown markings resembling a rattlesnake's color. Excellent fresh, steamed, canned or frozen. Drought Resistant. Also known as Preacher Bean. An excellent choice for home gardens. United States Department of Agriculture, PI 550109.

[CB13-250 - Red Acre Cabbage Seeds](#)

75 days. *Brassica oleracea*. Open Pollinated. Red Acre Cabbage. This early variety produces beautiful round heads of deep reddish-purple cabbage. The heads average 6 to 7 inches in diameter and weigh 3 to 4 lbs. Very flavorful. Excellent for salads, cooking, and coleslaw. Resist splitting. The uniform color stands well and is the best red for storage. Suited for small gardens as it takes up less space than other cabbage varieties. Excellent choice for home gardens. An heirloom variety from the USA. United States Department of Agriculture, PI 246059. Disease Resistant: FY.

[TM891-10 - Rally Tomato](#)

72 days. *Solanum lycopersicum*. (F1) This early maturing plant produces high yields of large red tomatoes. They are very sweet, firm, and flavorful. Perfect for salads, slicing, and sandwiches. Suitable for the Southeast region of the country. An excellent choice for home gardens, market growers, and open field production. Disease Resistant: V, FF, St, ToMV, TYLCV. Determinate.

[TM814-10 - Rapunzel Tomato](#)

70 days. *Solanum lycopersicum*. (F1) This early maturing plant produces good yields of ¾ to 1 oz bright red cherry tomatoes. They are sweet, juicy, and very flavorful. Perfect fresh eating right off the vine, in salads, or vegetable trays. Grows in clusters up to 40. An excellent choice for home gardens. Indeterminate.

[HP996-20 - Rat's Turd Hot Peppers](#)

100 days. *Capsicum annuum*. Open Pollinated. The plant produces high yields of ¾" long by ½" wide hot peppers that look like its name. Peppers are very hot and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. The size of the peppers may be larger or smaller. These peppers look like rat turds! Excellent drying pepper for making hot pepper flakes, hot sauce, and seasoning spice powder. A variety from the USA.

HPLC Test Results: #2

[BT26-100 - Red Ace Beet Seeds](#)

50 days. *Beta vulgaris*. (F1) Red Ace Beet. This early maturing plant produces good yields of 3 to 4" diameter red beets. A recipient of the RHS Award of Garden Merit. A good quality variety is suitable for slicing, dicing, and whole baby beets. The roots are extremely tender, sweet, and smooth with up to 50 percent higher red pigment than standard beets and no interior zoning. It has bright green glossy tops. The beet remains sweet and tender even when older and larger. When the beet is pushing up through the soil, it's ready to harvest! It is widely adaptable and grows in almost every region. Drought Tolerant. Resist bolting. Ideal supermarket or farm market sales. An excellent choice for home gardens, farmer's markets, and market growers. Disease Resistant: CLS

[SP63-10 - Red Beauty Pepper Seeds](#)

85 days. *Capsicum annuum*. (F1) Red Beauty Pepper. The plant produces heavy yields of 4" long by 4: wide sweet bell peppers. Peppers turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. Peppers have a thick wall and are excellent for salads, stuffing, and gourmet dishes. Disease Resistant: TMV.

[CN45-50 - Red Broom Corn Seeds](#)

110 days. Zea mays. Open Pollinated. Red Broom Corn. The plant produces high yields of a beautiful mixture of light to medium to deep red straw used to make crafts and brooms. Also used for fall decorating. It grows without ears. Birds love the tops of the corn. This variety is also grown for deer pastures. Also known as Deer Broom Corn. Excellent choice for home gardens.

[ON45-50 - Red Bull Onions](#)

114 days. Allium cepa. (F1) The plant produces excellent yields of large red onions. It has deep red skins and interior red rings. Great for salads, hamburgers, and sandwiches. Stores well. An excellent choice for home gardens and market growers. A long day variety.

[OK2-50 - Red Burgundy Okra Seeds](#)

1988 All-America Selections Winner!

60 days. Abelmoschus esculentus. Open Pollinated. Red Burgundy Okra. The plant produces high yields of 6 to 8" long burgundy okra. This variety has deep red colored stems with green leaves and would be great for an ornamental plant. Pods can be harvested up to 8" long and still remain tender. Great for making fried okra, soups, stews, gumbo, and casseroles. An excellent choice for home gardens and specialty market growers. Developed by Leon Robbins at the Clemson University, Clemson, South Carolina, USA.

[TM361-20 - Red Calabash Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 2 to 4 oz red tomatoes. It looks like miniature beefsteak tomato. They are very sweet and flavorful. Perfect for salads, garnishes, or culinary creations. Excellent choice for home gardens. An heirloom variety from Chiapas, Mexico. Indeterminate.

[SS4-200 - Red Clover Sprouting Seeds](#)

4 to 6 days. Trifolium pratense. Open Pollinated. Red Clover Sprouting Seeds. The plant produces excellent quality delicious Red Clover Sprouts. The sprouts have a mildly sweet flavor and delicate crunch. Red clover sprouts are healthy and low-calorie. One of the very best sources of vitamins besides the Vitamin B complex. High in vitamins Vitamin D, Vitamin C, and Vitamin E. Excellent in salads, soups, sandwiches, and other Asian dishes. One tablespoon of seed yields approximately 3 to 4 cups of sprouts. A variety from the USA.

[BS11-250 - Red Bull Brussels Sprouts Seeds](#)

85 days. Brassica oleracea. Open Pollinated. Red Bull Brussels Sprouts. The plant produces high yields of dark red Brussels Sprouts. The heads average 1 to 1 1/2" in diameter. They have a milder, nuttier flavor than standard green types and are very flavorful. It keeps its dark red color well when cooked, steamed, or microwaved. The color improves with colder weather. 60 days. Capsicum annuum. Open Pollinated. This early maturing plant produces good yields of 3" wide flat and round-shaped sweet peppers. Its thick flesh is excellent for baking, broiling, or stuffing. Plants have a strong resistance to insects. An heirloom variety from Spain.

[ON8-250 - Red Creole Onion Seeds](#)

110 days. Allium cepa. Open Pollinated. Red Creole Onion. The plant produces excellent yields of sweet red onions. Perfect for salads and sandwiches. They are great additions to salsas, Cajun foods, and other zesty dishes. Stores well. An excellent choice for home gardens. A short-day heirloom variety was developed in 1962 by the Dessert Seed Company. United States Department of Agriculture, PI 662428. Disease Resistant: PR.

[HP854-10 - Red Dominica Habanero Hot Peppers](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces good yields of 2 ½" long by 1 ¼" wide wrinkled hot peppers. Peppers are very hot, have medium-thick flesh, and turn from light green, to orange, to red when mature. The plant has light green stems, light green leaves, and yellowish-cream flowers. Excellent for making salsa, hot sauce, and seasoning powder. A rare variety from the Commonwealth of Dominica.

HPLC Test Results: #6

[HP2459-10 - Red Ember Hot Peppers](#)

[2018 All-America Selections Winner!](#)

75 days. Capsicum baccatum. (F1) The plant produces high yields of 4 ½" long by 1" wide Cayenne hot peppers. Peppers are mildly hot, have thick flesh, and turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. The peppers have a pleasantly sweet and spicy flavor. It has thicker walls and a tastier flavor than the traditional Cayenne pepper. Excellent fresh, cooked, or dried for making pepper flakes. Does well in cooler weather. Suitable for home gardens and market growers. A variety from the USA.

[CB37-250 - Red Express Cabbage Seeds](#)

55 days. Brassica oleracea. Open Pollinated. Red Express Cabbage. This early variety produces excellent yields of reddish-purple cabbage. The heads average 5 to 7 inches in diameter and weigh 2 to 4 lbs. Very flavorful. Excellent for coleslaw, stir fry, and salads. Cuts your growing time in half compared to full-season varieties. Split resistant. Suitable for small gardens as it can be spaced much closer than other varieties. An excellent choice for home gardens.

[HP2431-20 - Red Flame Hot Peppers](#)

80 days. Capsicum annuum. (F1) The plant produces heavy yields of 6 ½" long Cayenne hot peppers. Peppers are hot, have thin walls, and turn from green to bright crimson red when mature. The plant has green stems, green leaves, and white flowers. A perfect pepper for seasoning when dried. It dries very quickly. Also great for making Ristras. A variety from the USA.

[CO10-5 - Red Foliated White Cotton Seeds](#)

120 days. Gossypium hirsutum. Open Pollinated. Red Foliated White Cotton. The plant produces good yields of white color cotton with gorgeous red leaves. The plant has rich red stems, flowers, and leaves. This small beautiful plant is suitable for patio and containers. An excellent choice for home gardens. An heirloom variety from the USA.

[ON39-250 - Red Grano Onions](#)

115 days. Allium cepa. Open Pollinated. The plant produces excellent yields of red onions. They are crisp, mild, and very flavorful. Perfect for sandwiches, salads, soups, and cooking. Great for hamburger topping. Excellent choice for home gardens. A short-day onion variety. United States Department of Agriculture, PI 546234. Disease Resistant: PR.

[TM658-10 - Red Grape Tomato](#)

59 days. Solanum lycopersicum. (F1) This early maturing plant produces good yields of ½ to ¾ oz bright red grape tomatoes. They are very flavorful. Perfect fresh eating right off the vine or in salads. Grows in clusters of 12 to 16. This variety is becoming the top choice for grape production. This variety can be grown in the greenhouse or open field for commercial production. An excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: F, N, TMV. Indeterminate.

[SP339-10 - Red Knight Sweet Peppers](#)

78 days. Capsicum annuum. (F1) The plant produces good yields of 4" long by 4" wide sweet bell peppers. Peppers turn from green to red when they mature. This variety has very thick walls and turns red quickly. Great for salads, stuffing, and cooking. Excellent choice for home gardens and market growers. Disease Resistant: BLS, PVY, TMV.

[SQ79-20 - Red Kuri Squash](#)

90 days. Cucurbita maxima. Open Pollinated. The plant produces high yields of large 3 to 4 lb bright orange teardrop-shaped squash. This Japanese squash is used as a vegetable side dish for winter meals and for making pies. Excellent for making soups, desserts, vegetable tarts, cakes, blinis, pancakes, lasagna, risotto, vegetable stews, and gratins. Also known as Uchiki Kuri, Baby Red Hubbard, and Orange Hokkaido. Excellent choice for home gardens. A winter squash variety.

[HB183-500 - Red Leaf Holy Basil Seeds](#)

75 days. Ocimum basilicum. Annual. Open Pollinated. Red Leaf Holy Basil. The plant produces high yields of beautiful purple-tinted basil leaves. The leaves are aromatic. It produces lots of leaves continuously all season long. Great for stir-fries, soups, and Gai Pad Gra Pow dishes. Suitable for containers. An excellent choice for home gardens.

[HP800-10 - Red Missile Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Red Missile Pepper. The plant produces good yields of 1 ½" long by ¼" wide hot peppers. Peppers grow upright then downward when ripening, are hot, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Peppers are shaped like missiles. A variety from the USA.

[TM598-20 - Red Oxheart Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 1 to 2 lb red tomatoes. These heart-shaped tomatoes are sweet, juicy, and very flavorful. Perfect for salads and making tomato sauce. An excellent choice for home gardens. An heirloom variety dating back to the 1920s. Indeterminate.

[TM444-10 - Red Plum Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of deep red plum tomatoes. It has a rich tomato flavor. Perfect for making tomato sauce, paste, and canning. Grows in clusters. An excellent choice for home gardens. United States Department of Agriculture, PI 645003. Indeterminate.

[BN137-50 - Red Ripper Cowpea Seeds](#)

70 days. Vigna unguiculata. Open Pollinated. Red Ripper Cowpeas. The plant produces heavy yields of cowpeas even under very hot and very dry conditions. The pods are reddish-green and the peas are red. The plant produces 10" long pods that have 18 peas. Red cowpeas. An excellent choice for home gardens, market growers, and open field production. An heirloom variety from North Carolina dating back to the 1850s. United States Department of Agriculture, PI 592363.

[WM66-5 - Red Rock Watermelon Seeds \(Seedless\)](#)

85 days. Citrullus lanatus. (F1) Red Rock Watermelon. The plant produces high yields of 15 to 17 lb dark green striped watermelons. It has very sweet bright red flesh with high Brix content. To produce seedless watermelons, a pollinator is required. We suggest growing Sugar Baby watermelons alongside Red Rock as a pollinator. It is an excellent shipping variety with a good shelf life. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. Disease Resistant: A, FW.

Seedless Watermelons Require Special Attention. The seeds must be started indoors and the Miracle-Gro Seed Starting Mix must be kept at a constant 85 F. Start the seeds at the same time you plant the Sugar Baby pollinator.

[HB190-1000 - Red Opium Poppy Seeds](#)

Papaver somniferum var. glabrum. Annual. Open Pollinated. Red Opium Poppy. A variety with bright red petals. The poppy seeds are used on bread, cakes, bagels, and in Middle Eastern delicacies, such as halva. The seeds also yield a good quality oil used for salads and to make soap, ointments, and paints. The poppy plant is also used as a source of opium. It is used to control pain, cough, and diarrhea. As significant as the plant is medicinal, it is far more important for its culinary uses. This is a cool season annual with a mixture of flowers in an array of colors from pink, to purple, but most are blood red.

[TM104-20 - Red Pear Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 2 to 4 oz bright red pear-shaped tomatoes. Perfect for salads and sauces. Serve alongside the yellow pear tomato to make a very attractive dish. Grows in a cluster of 6 to 9. Crack Resistant. An excellent choice for home gardens. An heirloom variety from the USA dating back to the 1700s. United States Department of Agriculture, PI 647513. Indeterminate.

[TM892-20 - Red Pride Tomato](#)

78 days. Solanum lycopersicum. (F1) Plant produces high yields of 10 to 14 oz red tomatoes. They are sweet and flavorful. It has a rich old-fashioned tomato flavor. Perfect for salads, slicing, and sandwiches. The plant has good foliage protecting tomatoes from sun-scauld. Suitable for containers, patios, or small gardens where space is very limited! Does well in the Northeast parts of the country. Excellent choice for home gardens and market growers. Disease Resistant: V, FF, A, St. Determinate.

[TM114-20 - Red Robin Tomato](#)

55 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces good yields of 1 to 1 ¼ oz red cherry tomatoes. They are very sweet and flavorful. Perfect for salads and snacks. The plant has good foliage protecting tomatoes from sun-scauld. A potato leaf variety. Suitable for containers, patios, and hanging baskets. An excellent choice for home gardens. Determinate.

[HP1895-20 - Red Rocket Hot Peppers](#)

75 days. Capsicum annuum. Open Pollinated. The plant produces heavy yields of 4" long by ½" wide Cayenne hot peppers. Peppers are hot, have thin flesh, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Peppers have a sweet and hot flavor. Excellent for pickling, salsa, and drying pepper for making hot pepper flakes, and seasoning spice powder. A variety from the USA.

[TM631-10 - Red Rocket Tomato Seeds](#)

60 days. Solanum lycopersicum. Open Pollinated. Red Rocket Tomato. This early maturing plant produces heavy yields of 8 to 10 oz bright red tomatoes. They are very flavorful. Perfect for sandwiches, salads, slicing, and canning. These plants take off like a rocket producing loads of tomatoes early in the season. Excellent choice for home gardens. Determinate.

[HB13-500 - Red Rubin Basil](#)

72 day. Ocimum basilicum. Annual. Open Pollinated. The plant produces high yields of very flavorful 3" long reddish-purple basil leaves with purple flowers. This is an improved version of the Dark Opal Basil. Perfect for garnishes and making seasoned vinegar. Suitable for containers. An excellent choice for home gardens. A variety from Denmark.

[KL2-750 - Red Russian Kale](#)

50 days. Brassica napus. Open Pollinated. This early variety produces excellent yields of flavorful red and blue-green kale leaves with pretty purple-red veins and stems. Very flavorful and tender. Perfect steamed, boiled, baked, soups, or stir-fried. Also a good freezing variety. Highly nutritional with powerful antioxidants. Very winter hardy, withstands colder weather, tolerates cold temperatures to -10 F. Cold-Tolerant. It will continuously produce greens throughout the season: spring, summer, fall, and winter. Also known as Buda Kale and Ragged Jack Kale. Suitable for hydroponics gardening. An excellent choice for home gardens, market growers, and open field production. A pre-1885 heirloom from Russia. United States Department of Agriculture, AMES 26645.

[LC16-750 - Red Sails Lettuce Seeds](#)

1985 All-America Selections Winner!

45 days. Lactuca sativa. Open Pollinated. Red Sails Lettuce. This early maturing plant produces excellent yields of delicately crumpled bronze-red leaf lettuce. Excellent flavor. The leaves are perfect for sandwiches, salads, and garnishes. Extremely high in vitamins. One of the slowest bolting red lettuce varieties on the market. Grows well all season but really colors up spectacularly in the fall. Excellent choice for home gardens and market growers. United States Department of Agriculture, PI 601060.

[CE6-750 - Red Treviso Chicory Seeds](#)

85 days. Cichorium endivia. Open Pollinated. Red Treviso Chicory. The plant produces good yields of beautiful red chicory with white veins. The leaves are tender yet crisp. Adds zest and color for a unique mixed salad. Used in salads or cooked as a vegetable. Try Treviso grilled on the barbecue and drizzled with olive oil and balsamic vinegar. Colder weather will produce the best color. Ideal for autumn and early winter use. Cold Tolerant. Also known as Rossa di Treviso Radicchio. Excellent choice for home gardens. A heirloom variety from Treviso, Italy.

[TM827-20 - Red Rose Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 6 to 10 oz dark pink beefsteak tomatoes. They are sweet and flavorful. Perfect for salads, slicing, and sandwiches. It is a cross between a Rutgers and a Brandywine tomato. Crack Resistant. Excellent choice for home gardens. Indeterminate.

[EG41-50 - Red Ruffled Eggplants](#)

75 days. Solanum melongena. Open Pollinated. The plant produces good yields of small 2 to 3" round bright red eggplants. Perfect for grilling, frying, stuffing, baking, and pickling. Well known in Asian cuisine and used in stir-fries. It is not bitter unless allowed to ripen to the red stage. Picked green and prepared as you would any other eggplant. They are unusual, attractive, and very tasty. Used extensively in Asian dishes and Vietnamese cooking. Also, known as Hmong Red Eggplant and Miniature Pumpkin Eggplants. An excellent choice for home gardens and specialty market growers. A variety from Thailand.

[TM117-20 - Red Russian Tomato Seeds](#)

78 days. Solanum lycopersicum. Open Pollinated. Red Russian Tomato. The plant produces high yields of 2 to 5 oz red tomatoes. They are sweet, juicy, and flavorful. Perfect for salads and slicing. It has become the most popular New Zealand home garden variety. Tolerates low night temperatures. Cold Tolerant. Excellent choice for home gardens. An heirloom variety was developed by the Levin Agricultural Research Centre, New Zealand, in 1943. Indeterminate.

[BN151-50 - Red Swan Bean Seeds](#)

55 days. Phaseolus vulgaris. Open Pollinated. Red Swan Bean. The plant produces high yields of 4 to 6" long flat deep purple Romano beans. These stringless beans are very flavorful with superb flavor. The pods turn bright green when steamed. It is a cross between a purple snap bean and a pinto bean. Great fresh or used in soups and stews. The plant keeps producing late into the season. It was developed by Robert Lobitz. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. A variety from the USA.

[OK27-10 - Red Velvet Okra Seeds](#)

70 days. Abelmoschus esculentus. Open Pollinated. Red Velvet Okra. The plant produces good yields of beautiful 5" long scarlet red okra. This variety has deep red colored stems with green leaves. Best when harvested when pods are 3" to 5" long when still tender. A variety from the USA.

[TM548-10 - Red Zebra Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 2 to 4 oz bi-colored red tomatoes with orange stripes. They are very juicy and flavorful. Perfect for salads, garnishes, or culinary creations. An excellent choice for home gardens and specialty market growers. An heirloom variety. Indeterminate.

[TM577-20 - Redfield Beauty Tomato Seeds](#)

80 days. Solanum lycopersicum. Open Pollinated. Redfield Beauty Tomato. The plant produces high yields of 6 to 12 oz red tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. Grows in clusters of 3 to 5. The plant has good foliage protecting tomatoes from sun-scall. Low acidity variety. Also known as Hastings Redfield Beauty Tomato. An excellent choice for home gardens. An heirloom variety was introduced in 1889 by H.G. Hastings & Co. of Interlachen, Florida, USA. United States Department of Agriculture, PI 645105. Indeterminate.

[SP340-10 - Revolution Pepper Seeds](#)

72 days. Capsicum annum. (F1) Revolution Pepper. This early maturing plant produces good yields of 4" long by 4" wide sweet bell peppers. Peppers turn from green to red when they mature. This variety has very thick walls and matures early. Great for salads, stuffing, cooking, and gourmet dishes. Disease Resistant: BLS, CMV.

[SW11-100 - Rhubard Swiss Chard](#)

55 days. Beta vulgaris. Open Pollinated. The plant produces good yields of dark green leaves with red stalks and veins. Cook the stalks as you would asparagus and the leaves as you would spinach, or enjoy both raw in salads. An heirloom dating back to 1857. Excellent choice for home gardens.

[BS14-25 - Redarling Brussels Sprouts Seeds](#)

140 days. Brassica oleracea. (F1) Redarling Brussels Sprouts. The plant produces high yields of reddish-purple Brussels Sprouts. This variety has heads average 1 to 1 1/2" in diameter. Perfect for roasted, grilled, or steamed. They have a wonderful mild flavor that really comes out when roasted or sautéed. These beautiful colored purple-red sprouts are sure to get attention in the garden and on dinner plates. Perfect for gourmet dishes. High in Vitamins A and C. Suitable for early spring or summer planting as you can start harvesting in November and continue well into March. These phenomenal plants stood in prime condition in the open field for 4 months! Cold Tolerant. Easy to grow. Easy to harvest. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

[CU71-20 - Regal Cucumbers](#)

52 days. Cucumis sativus. (F1) This early maturing plant produces high yields of 2 to 4" long dark green cucumbers. A variety with slightly longer, a slimmer shape which makes it perfect for making chips, spears, and whole pickles. An excellent pickling cucumber that produces continuously all season. It can be either hand-picked or machine harvested in the North or South parts of the country. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. Disease Resistant: PM.

[CU88-20 - Rhinish Pickle Cucumbers](#)

55 days. Cucumis sativus. Open Pollinated. The plant produces high yields of 4 to 6" long cucumbers. The cucumbers are crisp and very tasty. Best when harvested at 4" long for pickling. Also good for salads and slicing. Also known as Vorgebirgstrauben. An excellent choice for home gardens. An heirloom variety from Germany.

[TM683-10 - Richardson Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 1 to 3 lb pink beefsteak tomatoes. It has a rich old-fashioned tomato flavor. Perfect for sandwiches, burgers, salads, and slicing. Excellent choice for home gardens. An heirloom variety from the Richardson family of Tennessee, USA. Indeterminate.

[CU128-10 - Richmond Green Apple Cucumbers](#)

70 days. Cucumis sativus. Open Pollinated. The plant produces high yields of 3" round lime green cucumbers with white flesh. These cucumbers are very mild, sweet, juicy, and crunchy. If you like Lemon cucumbers, you will also enjoy these slightly larger lime green cucumbers. Great for gourmet dishes. Excellent choice for home gardens and market growers. An Australian heirloom variety. United States Department of Agriculture, PI 289698.

[SP356-10 - Right on Red Hungarian Cheese Sweet Peppers](#)

65 days. Capsicum annuum. (F1) This early maturing plant produces high yields of flat rounded sweet peppers. The pepper turns from green to red when mature. The plant has green stems, green leaves, and white flowers. These peppers are sweet and have thick walls making an excellent stuffing pepper. It has a good shelf life too! Great for salads, salsa, canning, stuffing, or pickling. You can cut the tops off and use them as bowls for individual dip servings or garnishes. Suitable for small gardens and containers.

[TM425-20 - Rio Fuego Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of red pear-shaped tomatoes. They have a thick wall, are meaty, and have a mild flavor. Perfect salads and for making sauce, puree, and paste. Grows in clusters. An excellent processing variety. An excellent choice for home gardens, market growers, and open field production. Determinate.

[HP273-20 - Rio Grande Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces high yields of 5 1/2" long by 1 1/4" wide hot peppers. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Developed by the New Mexico State University, New Mexico, USA. United States Department of Agriculture, PI 593561.

[CU96-20 - Rockingham Cucumbers](#)

58 days. Cucumis sativus. (F1) The plant produces high yields of 8 1/2" long dark green cucumbers. This cucumber is most appreciated by commercial growers because it produces nice dark green, smooth, and long cucumbers. Vines are strong and vigorous. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: A, Ccu, ALS, CMV, PM.

[TM300-20 - Riesentraube Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Riesentraube Tomato. The plant produces heavy yields of 3/4 to 1 oz red cherry pear-shaped tomatoes. They are sweet, meaty, and very flavorful. The flavor is similar to larger beefsteak varieties. It has the rich old-fashioned tomato flavor that is missing in today's cherry tomatoes. Perfect for salads and snacks. Grows in a cluster of 20 to 40. The name translates to "Giant Bunch of Grapes". The plant produces 200 to 300 tomatoes. Grown by Pennsylvania Dutch as early as 1856. An excellent choice for home gardens. An heirloom from Germany dating back to 1855. United States Department of Agriculture, PI 647531. Indeterminate.

[HP198-20 - Ring of Fire Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces high yields of 6" long by 3/8" wide Cayenne-type peppers. Peppers are very hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent dried and used as pepper flakes. A variety from the USA.

[CN63-50 - Rio Grande Blue Corn Seeds](#)

95 days. Zea mays. Open Pollinated. Rio Grande Blue Corn. The plant produces good yields of 12" long beautiful dark blue corn. Can be ground to make blue flour and blue cornmeal, and also to make blue corn chips. Drought Tolerant. An excellent choice for home gardens. It is an heirloom variety from the Hopi Native American tribe in Rio Grande Pueblos, New Mexico.

[BN59-50 - Rocdor Bean Seeds](#)

53 days. Phaseolus vulgaris. Open Pollinated. Rocdor Bean. This early maturing bush-type plant produces excellent yields of 6 1/2" long deep yellow beans. Excellent freezing variety. One of the best varieties of Yellow Wax beans on the market. The seeds germinate well in cool soil. An excellent choice for home gardens. Disease Resistant: Anthracnose and Bean Mosaic Virus.

[CA13-50 - Rocky Ford Melon Seeds](#)

90 days. Cucumis melo. Open Pollinated. Rocky Ford Melon. The plant produces high yields of 2 to 3 lb cantaloupes. The green flesh is sweet with a spicy distinct flavor. The dark green skin turns yellow-bronze when ripe. This variety does well in the Southern states. Stores well. Excellent choice for home gardens and market growers. Also known as Eden's Gem. An heirloom variety dating back to 1887. United States Department of Agriculture, NSL 5700. Disease Resistant: R.

[TM672-10 - Rocky Tomato](#)

90 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 8 to 12 oz red plum-shaped tomatoes. They have thick walls, are meaty, and are very flavorful. One of the largest and best-flavored sauce tomatoes. Perfect for salads and making sauce, puree, and paste. Excellent choice for home gardens and market growers. An heirloom variety. Indeterminate.

[HP1061-20 - Rocotillo Hot Peppers](#)

90 days. Capsicum chinense. Open Pollinated. The plant produces good yields of 1 ½" long by 1 ¼" wide Habanero hot peppers. Peppers are mildly hot, have medium-thick flesh, and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent drying pepper and great for making seasoning spice powder. An excellent choice for home gardens. A variety from Puerto Rico. Scoville Heat Units: 599.

HPLC Test Results: #13

[HP465-10 - Rocoto Orange Hot Peppers](#)

120+ days. Capsicum pubescens. Open Pollinated. The plant produces good yields of 2" wide by 1 ½" wide hot peppers. Peppers are very hot, have very thick flesh, turn from green to orange when mature. The plant has green stems, hairy green leaves, and blue flowers. Peppers resemble an Apple and have unique black seeds! One of the most cold-tolerant peppers around, but won't tolerate frost. Flowers may require hand pollination to set fruit. Best if brought indoors over the winter. An excellent choice for home gardens. A variety from Peru.

[HP201-10 - Rocoto Red Pepper Seeds](#)

120+ days. Capsicum pubescens. Open Pollinated. Rocoto Red Pepper. The plant produces good yields of 2" wide by 1 ½" wide hot peppers. Peppers are very hot, have very thick flesh, and turn from green to red when mature. The plant has green stems, hairy green leaves, and blue flowers. Peppers resemble apples and have unique black seeds! It's one of the most cold-tolerant peppers around, but it won't tolerate frost. Flowers may require hand pollination to set fruit. Best if brought indoors over the winter. An excellent choice for home gardens. A rare variety from Peru.

[HP200-10 - Rocoto Yellow Pepper Seeds](#)

120+ days. Capsicum pubescens. Open Pollinated. Rocoto Yellow Pepper. The plant produces good yields of 2" wide by 1 ½" wide hot peppers. Peppers are very hot, have very thick flesh, and turn from green to yellow when mature. The plant has green stems, hairy green leaves, and blue flowers. Peppers resemble apples and have unique black seeds! One of the most cold tolerant peppers around, but won't tolerate frost. Flowers may require hand pollination to set fruit. Best if brought indoors over the winter. An excellent choice for home gardens. A variety from Peru.

[BN11-50 - Roma II Bean Seeds](#)

58 days. Phaseolus vulgaris. Open Pollinated. Roma II Bean. This early maturing bush-type plant produces good yields of flavorful Italian green beans. Excellent canning and freezing variety. An excellent choice for home gardens, farmer's markets, and market growers. United States Department of Agriculture, PI 549997. Disease Resistant: BCMV (BV-1 and NY 15).

[TM392-20 - Roma VF Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 2 to 4 oz bright red plum-shaped tomatoes. They have a thick wall, are meaty, and very flavorful with very few seeds. Perfect for salads and making, sauce, puree, paste, soup, ketchup, tomato juice, and canning. A good quality tomato is used for commercial production. An excellent choice for home gardens, greenhouses, market growers, and open field production. United States Department of Agriculture, PI 644859. Disease Resistant: V, F. Determinate.

[TM299-20 - Roman Candle Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Roman Candle Tomato. The plant produces good yields of 5 oz yellow banana-shaped tomatoes. They are very flavorful and have very few seeds. Perfect for making salsa, sauce, and culinary creations. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 639216. Indeterminate.

[HB23-500 - Roman Chamomile Seeds](#)

65 days. Chamaemelum nobile. Perennial. Open Pollinated. Roman Chamomile. The plant produces high yields of daisy-like flowers with an apple flavor. It is known calming effect; both on the body and mind. It is used fresh and dried to make great flavored relaxing tea, desserts, drinks, perfumes, and hair rinses. Aids in digestion and digestive pain, and acts as a gentle sleep inducer. Because of the herb's antiseptic and anti-inflammatory properties, chamomile benefits conditions such as eczema, rashes, or insect bites. Hot tea eliminates mucus buildup. When added to a hot bath, it aids in muscle pain relief. The dried flowers and leaves also make an addition to the potpourri. Used as a ground cover for filling spaces between flagstones, cracks, and paths. An excellent choice for home gardens. A variety from the Mediterranean region.

[BR16-500 - Romanesco Italia Broccoli/Cauliflower Seeds](#)

75 days. Brassica oleracea. Open Pollinated. Romanesco Italia Broccoli/Cauliflower. The plant produces good yields of lime green cauliflower/broccoli. This is a unique Italian variety with a better taste and texture than other cauliflower/broccoli. It is excellent raw or cooked, it boasts a milder, sweeter flavor than white cauliflower. It has beautiful apple green spiraling buds and is especially well adapted to the north. An excellent choice for home gardens. An heirloom variety from Italy. United States Department of Agriculture, PI 462221.

[BN86-50 - Romano 14 Bean Seeds](#)

56 days. Phaseolus vulgaris. Open Pollinated. Romano 14 Bean. This bush plant produces good yields of 6" long Italian-type green beans. The beans are flat, medium green, and very delicious. Excellent canning, freezing, or used fresh. Suitable for small gardens and square-foot gardening where space is limited. An excellent choice for home gardens.

[BN150-50 - Romano Blend Bean Seeds](#)

58 days. Phaseolus vulgaris. Open Pollinated. Romano Blend Bean. The plant produces good yields of 4 to 6" long flat Romano beans. Beans are very flavorful with superb flavor. The blend has a mix of green, purple, and yellow beans. Best when harvested when young. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. An heirloom variety.

[BN72-50 - Romano Gold Bean Seeds](#)

56 days. Phaseolus vulgaris. Open Pollinated. Romano Gold Bean. This bush-type plant produces heavy yields of golden yellow Italian-type green beans. Beans are broad and flat. The plant holds loads of pods well off the ground. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 634344. Disease Resistant: BYMV.

[BN68-50 - Romano Pole Bean Seeds](#)

75 days. Phaseolus vulgaris. Open Pollinated. Romano Pole Bean. The plant produces good yields of 6" long flat stringless green beans. Beans are very flavorful with superb flavor and green in color. Best when harvested when young. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. An heirloom variety. United States Department of Agriculture, W6 21652.

[SQ92-10 - Rondo de Nice Squash Seeds](#)

52 days. Cucurbita moschata. Open Pollinated. Rondo de Nice Squash. This early maturing bush-type plant produces good yields of light-green small round zucchini squash. It is best when harvested when golf ball size. Ideal gourmet squash for stuffing. Good freezer variety. An excellent choice for home gardens and specialty market growers. An heirloom variety from France. A summer squash variety.

[TM362-20 - Ropreco Tomato](#)

65 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of red Roma tomatoes. They have thick walls, are meaty, and very flavorful. Perfect for making sauce, puree, paste, and canning. An excellent choice for home gardens. An heirloom variety from Italy. Disease Resistant: F, BER. Determinate.

[HB95-1000 - Roquette Arugula Seeds](#)

40 days. Eruca sativa. Annual. Open Pollinated. Roquette Arugula. This early maturing plant produces excellent yields of beautiful dark green leaves. It is very flavorful with a spicy taste, similar to horseradish. Used in mixed salads, sandwiches, or stir-fries. It can be steamed, cooked, pureed, and added to soups. Best when harvested when 2 or 3" long. Also known as Wild Rocket Arugula. This item is heavily sought after by chefs. Suitable for greenhouse production. An excellent choice for home gardens. United States Department of Agriculture, AMES 2673.

[EG21-50 - Rosa Bianca Eggplant Seeds](#)

85 days. Solanum melongena. Open Pollinated. Rosa Bianca Eggplant. The plant produces good yields of 5 to 6" long rosy lavender & cream colored teardrop shaped eggplants. They are very delicious, and creamy, with no bitter taste. Perfect for grilling, frying, stuffing, and baking. Prized by gourmet chefs and home gardeners. An excellent choice for home gardens and specialty market growers. An heirloom variety from Italy.

[TM667-20 - Rosalita Tomato](#)

60 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of ½ to ¾ oz rosy pink grape tomatoes. They are sweet and flavorful. Perfect for salads and snacks. It is the only pink grape tomato and it is the size and shape of a red grape. Grows in clusters. Excellent choice for home gardens. Indeterminate.

[TM115-10 - Rose de Berne Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Rose de Berne Tomato. The plant produces heavy yields of 7 to 8 oz dark rose-pink tomatoes. They are very sweet, meaty, juicy, and flavorful. In France, Germany, and Switzerland, it is considered to be the best-flavored tomato. Perfect for salads, slicing, and sandwiches. Crack Resistant. Excellent choice for home gardens. An heirloom variety from Switzerland. Disease Resistant: LB. Indeterminate.

[TM164-20 - Rose Tomato Seeds](#)

78 days. Solanum lycopersicum. Open Pollinated. Rose Tomato. The plant produces good yields of 10 oz rose-pink beefsteak tomatoes. They are very sweet, meaty, juicy, and very flavorful. It has a rich tomato flavor. The flavor is excellent and is considered to rival the Brandywine tomato. Perfect for salads, slicing, and sandwiches. It is a cross between a Brandywine and Rutgers tomato. Crack Resistant. An excellent choice for home gardens. An Amish heirloom variety from New Holland, Pennsylvania, USA. Indeterminate.

[HB63-250 - Rosemary](#)

85 days. Rosemarinus officinalis. Perennial. Open Pollinated. The plant produces good yields of very aromatic needle-like leaves. This variety germinates faster and more uniformly than other varieties. Leaves have a delicious flavor and are fragrant. Excellent fresh or dried. Used to flavor salads, chicken, turkey, meats, stews, soups, seafood, roasted vegetables, stuffing, and sauces. Also is used for treating headaches, and circulation. Used medicinally as a massage oil for rheumatism or aching joints. It traditionally symbolizes happiness, protection, and love, and medieval brides often wore rosemary or carried it in their bouquets. Rosemary is a perennial known to live 15 to 20 years. Cold Tolerant. Drought Tolerant. Suitable for containers. An excellent choice for home gardens.

Note: Germination is naturally low. Growing Rosemary from seed is well known as being difficult as it has a low germination rate and is also slow to germinate.

[EG43-20 - Rosita Eggplants](#)

80 days. Solanum melongena. Open Pollinated. The plant produces good yields of beautiful 6 to 8" long pinkish-lavender teardrop-shaped eggplants. The white flesh is mild, very sweet, without a trace of bitterness. Great for gourmet dishes. Excellent choice for home gardens and specialty market growers. An heirloom variety from Puerto Rico. Developed in the 1940s by the Agriculture Experiment Station in Rio Piedras, Puerto Rico. United States Department of Agriculture, PI 263727.

[TM427-20 - Rossol Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of red Roma tomatoes. An excellent processing variety for commercial production. Perfect for salads and making sauce, puree, and paste. An excellent choice for home gardens, market growers, and open field production. Disease Resistant: V, F, N. Determinate.

[LC12-750 - Rouge d'Hiver Lettuce](#)

60 days. Lactuca sativa. Open Pollinated. The plant produces excellent yields of crisphead lettuce. The beautiful reddish-bronze color leaves are perfect for salads, gourmet dishes, and garnishes. Can be harvested in 28 days as baby lettuce. Cold-Tolerant. Also known as Red Winter Lettuce. Excellent choice for home gardens and specialty market growers. An 1840s heirloom variety from France. United States Department of Agriculture, PI 577121. Disease Resistant: LD, TB.

[HP2453-10 - Roulette Habanero Hot Peppers](#)

2018 All-America Selections Winner!

90 days. Capsicum chinense. (F1) The plant produces high yields of 3" long by 1 1/2" wide Habanero hot peppers. Peppers are not hot, have thick flesh, and turn from green to red when they mature. This is a sweet version of the Habanero. It has a sweet flavor with citrusy habanero flavor, but with little heat. There is just a small bit of heat that is detectable which gives it the flavor of the hot Habanero strain. The plant has green stems, green leaves, and creamy-yellow flowers. Excellent fresh, pickled, roasted, and sauteed. Suitable for home gardens and market growers. A variety from the USA. Scoville Heat Units: 100.

[SP65-10 - Roumanian Rainbow Pepper Seeds](#)

60 days. Capsicum annuum. Open Pollinated. Roumanian Rainbow Pepper. This early maturing plant produces good yields of 5" long sweet peppers. Peppers are very sweet and start as ivory, turn orange, then red all at the same time. Excellent for salads, stuffing, freezing, or gourmet dishes. Excellent choice for home gardens and Farmer's Markets.

[RD18-100 - Round Black Spanish Radishes](#)

55 days. Raphanus sativus. Open Pollinated. The plant produces excellent yields of 3 to 4" diameter radishes. These winter radishes are crisp, pungent, spicy, and very flavorful. Perfect for salads, vegetable platters, and garnishes. Keeps well, these black skin and snowy white flesh will keep all winter long. Suitable for fall planting. Excellent choice for home gardens and specialty market growers. An heirloom variety dating back to 1824. United States Department of Agriculture, NSL 6359.

[EG42-50 - Round Mauve Eggplant Seeds](#)

65 days. Solanum melongena. Open Pollinated. Round Mauve Eggplant. This compact plant produces good yields of beautiful 3 to 4" round mauve eggplants. The flesh is white, tender, and not bitter. Perfect for grilling, frying, stuffing, baking, pickling, and gourmet dishes. Suitable for container gardening. Excellent choice for home gardens and market growers. An heirloom variety from China.

[SC1-100 - Rox Orange Sugar Cane Seeds](#)

110 days. Sorghum bicolor. Open Pollinated. Rox Orange Sugar Cane. The plant produces excellent yields of 8 ft tall sugar cane. The plant is high in sugar content. Perfect for making molasses syrup and an Asian alcoholic beverage called Maotai. Also grown and used as a biofuel and livestock grain. It yields about 100 gallons of syrup per acre. Does well in warm, well-drained, sandy loam. Also known as Waconia Sugar Cane. Sow 9 to 20 lbs per acre. An excellent choice for home gardens, market growers, and open field production. A variety was developed for syrup production by the Wisconsin Agricultural Experiment Station, Wisconsin, USA. United States Department of Agriculture, PI 641836.

[BN14-50 - Royal Burgundy Bean Seeds](#)

51 days. Phaseolus vulgaris. Open Pollinated. Royal Burgundy Bean. This early maturing bush plant produces good yields of flavorful stingless burgundy beans. Excellent canning and freezing variety. Ideal for gourmet dishes. An excellent choice for home gardens. A variety from the USA.

[TM428-20 - Royal Chico Tomato](#)

72 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 3 ½ oz bright red pear-shaped tomatoes. They have thick walls, are meaty, and are very flavorful with few seeds. Perfect for salads and making sauce, puree, paste, and canning. An excellent processing variety. Does extremely well in humid regions. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: V, F, N. Determinate.

[BN82-50 - Royalty Purple Pod Bean Seeds](#)

51 days. Phaseolus vulgaris. Open Pollinated. Royalty Purple Pod Bean. This early maturing bush plant produces good yields of flavorful stringless bright purple pod beans. The beans turn green when cooked. Excellent fresh, frozen, or canned. Seeds germinate well in cold wet soil. An excellent choice for home gardens. United States Department of Agriculture, PI 4549644.

[SQ49-20 - Round Zucchini Squash Seeds](#)

45 days. Cucurbita pepo. Open Pollinated. Round Zucchini Squash. This early maturing compact bush-type plant produces high yields of 2 ½ to 3" round grey-green zucchini. It has delicious creamy yellow flesh. Suitable for small home gardens. An heirloom squash from the United States of America. United States Department of Agriculture, PI 615105. A summer squash variety.

[HP204-20 - Royal Black Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 1" long by ¼" wide hot peppers. Peppers are hot and turn from purple (almost black) to red when mature. Plant has dark purple stems, and dark purple leaves that are almost black, and violet flowers. Excellent for spicy dishes and vinegars. Suitable for containers, pots, patios, hanging baskets, and small gardens.

[CT27-750 - Royal Chantenay Carrot Seeds](#)

70 days. Daucus carota. Open Pollinated. Royal Chantenay Carrot. The plant produces heavy yields of 5 to 7" long orange carrots. Even when very large, they still have fine sweet flavor and texture. Does well in heavy or shallow soils. The roots may be harvested early or left in the ground to grow for weeks to develop maximum yield. Excellent choice for home gardens and market growers. A heirloom dating back to 1952.

[TM682-20 - Royal Hillbilly Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 lb dark pink beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. Excellent choice for home gardens. An heirloom variety developed by Darrell Merrell who bred it from several variations of the Hillbilly tomato. Indeterminate.

[TM633-20 - Royesta Tomato](#)

70 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 6 to 8 oz red tomatoes. They are sweet and flavorful. Perfect for salads, slicing, sandwiches, and canning. Excellent choice for home gardens and market growers. Disease Resistant: FF, N, TMV. Indeterminate.

[CB29-250 - Rubicon Chinese Cabbage Seeds](#)

52 days. Brassica rapa. (F1) Rubicon Chinese Cabbage. This early maturing plant produces high yields of Napa-type Chinese cabbage. The heads average 8" wide by 12" tall and weigh 5 to 6 ½ lbs. Cabbage has deep green leaves and white ribs. Excellent flavor and used in stir-fries, steamed, or raw. Slow bolting. Stores well. An excellent choice for home gardens and market growers. Disease Resistant: BSP.

[CB33-100 - Ruby Perfection Cabbage Seeds](#)

85 days. Brassica oleracea. (F1) Ruby Perfection Cabbage. The plant produces high yields of beautiful reddish-purple cabbage. The heads average 7 to 8 inches in diameter and weigh 3 to 4 lbs. Very flavorful and crisp. Red color enhances any salad or coleslaw. It has a good field-holding ability and stores well. It is easy to grow and perfect for home gardens. This variety is ideal for fresh market and shipping. Stores well. Excellent choice for home gardens and market growers. United States Department of Agriculture, PI 662605. Disease Resistant: TT.

[LC33-750 - Ruby Red Lettuce](#)

1958 All-America Selections Winner!

53 days. Lactuca sativa. Open Pollinated. This early maturing plant produces good yields of red leaf lettuce. This is a very heat-tolerant variety. Slow to bolt. Color does not fade in hot weather. Perfect for salads and garnishes. Adds color to salads. Heat Tolerant. Always a great seller at Farmer's Markets! Excellent choice for home gardens. An heirloom dating back to 1958. United States Department of Agriculture, PI 536761.

[RD47-100 - Rudolf Radish Seeds](#)

24 days. Raphanus sativus. Open Pollinated. Rudolf Radishes. This early maturing plant produces excellent yields of 1 to 1 ½" diameter bright red radishes. These radishes are crisp, sweet, and mild. They stay tender and crispy. You can grow this variety all season long. Plant radishes near beans, beets, celeriac, chervil, cucumber, lettuce, mint, parsnip, peas, spinach, squash, and tomatoes. Crack Resistant. Suitable for outdoor crops as well as growing in greenhouses. An excellent choice for home gardens and market growers.

[CA55-20 - Rugoso di Cosenza Giallo Melon Seeds](#)

100 days. Cucumis melo. Open Pollinated. Rugoso di Cosenza Giallo Melon. The plant produces good yields of 4 to 6 lb yellow oval-shaped melons. The flesh is light pale green which is very sweet, creamy, juicy, and tasty. Excellent for desserts, fruit salads, cold soups, and smoothies. Great for field or greenhouse production. An excellent choice for home gardens and market growers. A variety from Italy.

[TM946-10 - Ruby Crush Tomato](#)

65 days. Solanum lycopersicum. (F1) Ruby Crush Tomato. This early maturing strong compact plant produces high yields of 1 ¼ wide by 1 ¼ long bright red grape tomatoes. They are very sweet and flavorful. Perfect fresh eating right off the vine or in salads. They hold well on the plant. The plant has good foliage protecting tomatoes from sun-scaud. They are very easy to pick. No pruning is required. The plant requires minimal support. Crack Resistant. Suitable for containers and small gardens. An excellent choice for home gardens. Disease Resistant: F, FF, FCRR, ToMV. Determinate.

[BT11-100 - Ruby Queen Beet Seeds](#)

1957 All-America Selections Winner!

52 days. Beta vulgaris. Open Pollinated. Ruby Queen Beet. This early maturing plant produces good yields of exceptionally super sweet dark red beets. A perfectly round beet that has a smooth buttery texture that is more tender than any other beet. Ideal for boiling, pickling, baking, canning, and freezing. Holds color when canning. It performs well in poor soils. An excellent choice for home gardens, farmer's markets, and market growers. United States Department of Agriculture, NSL 6314.

[SW10-100 - Ruby Red Swiss Chard](#)

60 days. Beta vulgaris. Open Pollinated. The plant produces good yields of dark green shiny leaves with ruby red stalks and veins. It can be steamed, stir-fried, added to lasagna, omelets, soups, and stews, and mixed with other greens. Suitable for container gardening. Excellent choice for home gardens.

[TM840-10 - Rugged Boy Tomato](#)

75 days. Solanum lycopersicum. (F1) The plant produces high yields of 6 to 8 oz red tomatoes. They are very sweet, meaty, juicy, with exceptional flavor. Perfect for salads, slicing, burgers, and sandwiches. Suitable for containers, patios, or small gardens where space is very limited! One of the most disease-resistant tomato varieties. An excellent choice for home gardens, farmer's markets, and market growers. Disease Resistant: V, FF, N, St, LB, TMV. Determinate.

[TM702-10 - Russian 117 Tomato Seeds](#)

90 days. Solanum lycopersicum. Open Pollinated. Russian 117 Tomato. The plant produces good yields of 1 lb red heart-shaped tomatoes. They are very sweet, meaty, juicy, and excellent flavor with few seeds. Perfect for sandwiches, burgers, salads, and slicing. Excellent choice for home gardens. A heirloom variety from Russia. Indeterminate.

[TM310-20 - Russian Rose Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces excellent yields of 12 to 16 oz rose-pink beefsteak tomatoes. They are sweet, very meaty, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. It is a very pretty tomato, as pretty as a rose. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. An heirloom variety from Novorossiysk, Russia. Indeterminate.

[TM269-20 - Rutgers Improved Tomato Seeds](#)

72 days. Solanum lycopersicum. Open Pollinated. Rutgers Improved Tomato. This early maturing plant produces high yields of 7 oz dark red tomatoes. They are sweet and flavorful. Perfect for salads, slicing, sandwiches, and canning. This is an improved version of the famous Rutgers tomato. Always a great seller at Farmer's Markets! A high-quality tomato that is used for commercial production. An excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, PI 644777. Disease Resistant: V, F, A, St, TMV. Determinate.

[TM118-20 - Rutgers Tomato Seeds](#)

73 days. Solanum lycopersicum. Open Pollinated. Rutgers Tomato. This early maturing plant produces high yields of 6 to 12 oz bright red tomatoes. They are sweet and flavorful. Perfect for salads, slicing, sandwiches, and canning. It is a cross between a J.T.D., an old New Jersey variety from the Campbell Soup Company, and a Marglobe. Crack Resistant. An excellent choice for home gardens, market growers, and open field production. An heirloom variety was developed in 1934 by the New Jersey Experimental Station, New Brunswick, New Jersey, USA. United States Department of Agriculture, PI 270209. Disease Resistant: V, F, A, St. Determinate.

[HP2443-10 - Saco de Velho Hot Peppers](#)

90+ days. Capsicum chinense. Open Pollinated. This tall plant produces high yields of large 3" long x 3" wide wrinkled Habanero peppers. Peppers are very hot, have medium-thick flesh, and turn from green to bright yellow when mature. The plant has green stems, green leaves, and white flowers. Excellent fresh use, for pickling, making salsa, hot sauce, and seasoning spice powder. The Portuguese name translates to 'Bag Old'. A rare variety from Goias, Brazil.

[HB165-1 - Saffron Bulbs](#)

Crocus sativus. Perennial. Open Pollinated. The plant produces good yields of saffron which is the world's most expensive spice. The plant has violet-purple flowers with brilliant orange-red stigmas that are the source of the aromatic culinary spice. It takes 150,000 orange-red stigmas of the flowers to make two pounds of the spice. Used by Gourmet Chefs around the world. You don't need to purchase this expensive spice again! Grow your own plants for home use or for restaurant use. The lovely lavender blossoms in fall are an added bonus to your garden. Planted in the fall, it bears lovely lavender flowers the following autumn. Order at least 5 to 10 bulbs to produce enough spice for one recipe. Plant 100 bulbs to produce enough space for the entire year. Suitable for containers, patios, borders/ rock gardens, window boxes, square-foot gardening, and small gardens. A variety from Greece.

[HB70-1000 - Russian Tarragon Seeds](#)

85 days. Artemisia dracunculoides. Perennial. Open Pollinated. Russian Tarragon. The plant produces a very mild flavor of seasoning. Pale green leaves are used in vinegar, soups, stews, sauces, salads, and poultry dishes. Pick leaves as needed. Divide the plant every 3 years.

[TM297-20 - Rutgers Select Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 5 to 8 oz red tomatoes. They are sweet and very flavorful. Perfect for salads, slicing, sandwiches, sauce, paste, and canning. An excellent choice for home gardens, market growers, and open field production. An heirloom variety developed at Rutgers University, New Jersey, USA, in the 1920s. United States Department of Agriculture, PI 645198. Disease Resistant. V, F, A, St. Indeterminate.

[BN144-50 - Sa Dandy Cowpea Seeds](#)

70 days. Vigna unguiculata. Open Pollinated. Sa Dandy Cowpeas. This bush type plant produces high yields of 8" long pods with small-sized cream colored peas. The Sa Dandy is similar to the Texas Cream Cowpea, but the peas are slightly smaller. The plant thrives in hotter weather making it suitable for Southern climates. Heat Tolerant. An excellent choice for home gardens.

[HP2199-10 - Sadabahar Hot Peppers](#)

60 days. Capsicum annum. Open Pollinated. This early maturing plant produces high yields of Cayenne-type hot peppers. Peppers are very hot, grow upright, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Suitable for containers, pots, patios, hanging baskets, and small gardens. A variety from India.

[SQ42-20 - Saffron Prolific Straightneck Squash Seeds](#)

44 days. Cucurbita pepo. Open Pollinated. Saffron Prolific Straightneck Squash. This early maturing bush type plant produces heavy yields of very uniform 8" long yellow zucchini squash. This is an improved yellow straightneck. Very flavorful. It has very large leaves giving good sunburn protection. Suitable for the home garden, farmer's markets, and market growers. A variety from the United States of America. United States Department of Agriculture, PI 595838. A summer squash variety.

[HB84-100 - Sage](#)

90 days. *Salvia officinalis*. Perennial. Open Pollinated. The plant produces excellent yields of very flavorful silver-green leaves. Used fresh or dried to season beans, cheese, poultry, pork, sausages, omelets, cheese and bean dishes, meats, sauces, and tomato dishes. Also used as a digestive and nerve tonic. Sage tea is used to gargle for sore throat. Perfect as a border plant in the herb garden. Suitable for containers. Sage naturally dies after about 5 years, so replant every 3 years. Also known as Broadleaf Sage, Common Sage, and Garden Sage. Excellent choice for home gardens. A variety from the USA.

[RD32-100 - Sakurajima Mammoth Radish Seeds](#)

80 days. *Raphanus sativus*. Open Pollinated. Sakurajima Mammoth Radish. The plant produces giant 100 lb size white round radishes. This mammoth round white radish has a mild sweet flavor. Best when harvested when roots reach 10" in diameter. It is grown in Japan and is known as the Largest Radish in the World. It sometimes reaches 100 pounds. Used for pickling and cooking. An excellent choice for home gardens and specialty market growers. A variety from the very southern tip of Japan. United States Department of Agriculture, PI 43066.

[LC23-750 - Salad Bowl Red Lettuce](#)

44 days. *Lactuca sativa*. Open Pollinated. This early maturing plant produces excellent yields of flavorful red leaf lettuce. As outer leaves are picked, inner leaves keep producing. Perfect for salads and garnishes. Slow to bolt. Excellent choice for home gardens. An heirloom dating back to 1955. United States Department of Agriculture, PI 536760.

[CU98-10 - Salad Bush Cucumber Seeds](#)

1988 All-America Selections Winner!

57 days. *Cucumis sativus*. (F1) Salad Bush Cucumber. This early maturing compact bush plant produces good yields of 8" long by 2 1/4" wide glossy dark green cucumbers. Cucumbers are tender and crisp. This small plant is the perfect variety for growing indoors in containers and small gardens as it only uses 2 square feet of space. Also grows well in hanging baskets. An excellent choice for home gardens. Disease Resistant: Ccu, CMV.

[HP2215-10 - Salmon Hot Peppers](#)

90 days. *Capsicum annuum*. Open Pollinated. The plant produces good yields of 2" long by 1/4" wide hot peppers. Peppers are hot, grow upright in clusters, have thin flesh, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for Oriental cuisine and for making hot pepper flakes and seasoning spice powder. A beautiful ornamental plant suitable for containers, pots, patios, and small gardens. An excellent choice for home gardens. A variety from the USA.

[HP1885-10 - Sahuaro Hot Peppers](#)

76 days. *Capsicum annuum*. (F1) The plant produces high yields of 9" long by 2" wide Anaheim-type hot peppers. Peppers are mildly hot, have thick walls, and turn from light green to red when mature. The plant has green stems, green leaves, and white flowers. The plant has a good leaf canopy providing protection against sunscald. Great frying and stuffing variety. Disease Resistant: PMV. Scoville Heat Units: 500.

[LC22-750 - Salad Bowl Green Lettuce Seeds](#)

1952 All-America Selections Winner!

44 days. *Lactuca sativa*. Open Pollinated. Salad Bowl Green Lettuce. This early maturing plant produces excellent yields of flavorful green leaf lettuce. As outer leaves are picked, inner leaves keep producing. Ideal for hot weather as it is slow to bolt. Perfect for salads and garnishes. Suitable for containers. Excellent choice for home gardens. An heirloom variety. United States Department of Agriculture, PI 536762.

[HB105-250 - Salad Burnet](#)

70 days. *Sanguisorba minor*. Perennial. Open Pollinated. The plant produces excellent yields of salad burnet leaves. It is very flavorful and tastes and smells like cucumbers. Used in salads, sandwiches, soups, and stews. Adds cucumber flavor to vinegar, cream cheese, and cold drinks. Also said to be used in facial treatments to improve skin. Also known as Pimpinella. Keep flowers cut to promote leaf growth. Suitable for container gardening. An excellent choice for home gardens.

[LC40-750 - Salinas Lettuce](#)

75 days. *Lactuca sativa*. Open Pollinated. The plant produces high yields of crisphead lettuce. A good standard shipper variety for commercial growers. Heat Tolerant. Cold Tolerant. Resistant to bolting. Salinas is known as the Lettuce Capital of the World! An excellent choice for home gardens, market growers, and open field production. Disease Resistant: LMV, TB.

[CU123-20 - Salt and Pepper Cucumbers](#)

49 days. *Cucumis sativus*. Open Pollinated. This early maturing bush-type plant produces high yields of 3" to 5" long white cucumbers. It is very flavorful and one of the best white cucumbers on the market. Excellent for salads, pickles, or gourmet dishes. Impress your neighbors by growing some white cucumbers. It was the 2011 Green Thumb Award Winner! The Salt and Pepper variety will be replacing the Miniature White Cucumber and the Boothby's Blonde Cucumber. This variety was developed by Jason Cavatorta and Molly Jahn at Cornell University. An excellent choice for home gardens. Disease Resistant: ALS, PM.

[CT37-250 - Samurai Red Carrot Seeds](#)

75 days. *Daucus carota*. Open Pollinated. Samurai Red Carrot. The plant produces very flavorful 11" long deep red carrots. The carrots are crisp and retain a red color when steamed. Add color to your favorite dish by growing the white, purple, and yellow carrots. Great for gourmet dishes. An excellent choice for home gardens and specialty market growers. A variety from Japan.

[EG78-20 - San Marino Eggplants](#)

85 days. *Solanum melongena*. (F1) The plant produces good yields of large elongated shaped black eggplants. They are very flavorful and have a firm texture. Great roasted, grilled, or added to a stir-fry. Also perfect eggplant for making Eggplant Parmesan. A good variety for open-field production. An excellent choice for home gardens, market growers, and open field production. A variety from the USA.

[TM445-20 - San Marzano Determinate Tomato Seeds](#)

80 days. *Solanum lycopersicum*. Open Pollinated. San Marzano Determinate Tomato. The plant produces heavy yields of 4 to 5 oz bright red tomatoes. They have thick walls, are meaty, and are very flavorful. Perfect for making salsa, sauce, puree, paste, drying, and canning. It is known as the greatest sauce tomato in the world. Crack Resistant. Low acidity variety. The plant requires support, either staking or cages because of the heavy yields. An excellent choice for home gardens. An heirloom variety from Italy. Determinate.

[TM661-20 - San Marzano Nano Tomato](#)

85 days. *Solanum lycopersicum*. Open Pollinated. The plant produces good yields of 2 to 3 oz red tomatoes. They have thick walls, are meaty, and are very flavorful. Perfect for salsas, salads, and for making sauce, puree, paste, and canning. The plant has good foliage protecting tomatoes from sun-scald. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. A variety from Italy. Determinate.

[HP1100-20 - Sandia Hot Peppers](#)

75 days. *Capsicum annuum*. Open Pollinated. The plant produces good yields of 7" long by 2" wide Anaheim hot peppers. Peppers are hot, have medium-thick flesh, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for stuffing, roasting, frying, stir-frying, enchilada sauce, stews, and canning. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from Albuquerque, New Mexico, USA.

[HP1887-10 - San Ardo Hot Peppers](#)

75 days. *Capsicum annuum*. (F1) Plant produces high yields of 6" long by 3" wide Ancho type hot peppers. Peppers are mildly hot and turn from glossy dark green to red when mature. Plant has green stems, green leaves, and white flowers. Always a great seller at Farmer's Markets! Excellent choice for home gardens, market growers, and open field production. Disease Resistant: BLS, PVY, PMV, TMV.

[TM660-20 - San Marzano 2 Tomato Seeds](#)

85 days. *Solanum lycopersicum*. Open Pollinated. San Marzano 2 Tomato. The plant produces high yields of 5 to 6 oz bright red plum tomatoes. They have thick walls, are meaty, and are very flavorful. Perfect for making sauce, puree, paste, and canning. This is the standard tomato used to make tomato sauce in Italy. The plant has good foliage protecting tomatoes from sun-scald. Good quality tomato used for commercial production. An excellent choice for home gardens, market growers, and open field production. A variety from Italy. Disease Resistant: V, F. Indeterminate.

[TM152-20 - San Marzano Indeterminate Tomato Seeds](#)

80 days. *Solanum lycopersicum*. Open Pollinated. San Marzano Indeterminate Tomato. The plant produces heavy yields of 4 to 5 oz bright red tomatoes. They have thick walls, are meaty, and are very flavorful. Perfect for making salsa, sauce, puree, paste, drying, and canning. It is known as the greatest sauce tomato in the world. Crack Resistant. Low acidity variety. The plant requires support, either staking or cages. An excellent choice for home gardens. An heirloom variety from Italy. United States Department of Agriculture, PI 237137. Indeterminate.

[TM321-10 - San Marzano Redorta Tomato Seeds](#)

78 days. *Solanum lycopersicum*. Open Pollinated. San Marzano Redorta Tomato. The plant produces good yields of large 8 oz red plum tomatoes. They have thick walls, are meaty, and are very flavorful. It is much larger than the San Marzano. Perfect for making salsa, sauce, puree, paste, and canning. It is named after a mountain, Pizzo Redorta in Bergamo. An excellent choice for home gardens. An heirloom variety from Tuscany, Italy. Indeterminate.

[TM680-10 - Sandul Moldovan Tomato Seeds](#)

85 days. *Solanum lycopersicum*. Open Pollinated. Sandul Moldovan Tomato. The plant produces high yields of 1 lb red beefsteak tomatoes. What makes this tomato so special is its exceptional flavor. It has a high sugar and high acid balance. Perfect for salads, slicing, and sandwiches. Excellent choice for home gardens. An heirloom variety from the Sandul family of Moldova. Indeterminate.

[WM82-5 - Sangria Watermelons](#)

87 days. Citrullus lanatus. (F1) This plant produces good yields of 22 to 26 lb elongated watermelons with dark green rind with narrow light green stripes. It has very sweet red flesh. Great for fruit salads and picnics. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and commercial production. A variety from the USA.

[HP211-20 - Santa Fe Grande Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces heavy yields of 3" long by 1" wide hot peppers. Peppers are mildly hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. One of the best pickling peppers on the market, the types you see in the supermarkets! This variety has thick crunchy walls and is perfect for pickling. Excellent for salads, sandwiches, or salsas. The plant is very productive and produces 25 to 50 peppers! Ideal for containers. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. United States Department of Agriculture, NSL 43583. Disease Resistant: TMV. Scoville Heat Units: 500 to 700.

[BR49-25 - Santee Sprouting Broccoli Seeds](#)

80 days. Brassica oleracea. (F1) Santee Sprouting Broccoli. The plant produces good yields of miniature bright purple broccoli. It is very tender and flavorful. Great fresh, in salads, or gourmet dishes. It can be planted overwintered for early spring production. Suitable for spring and fall planting. An excellent choice for home gardens.

[HB126-250 - Santo Coriander Seeds](#)

55 days. Coriandrum sativum. Annual. Open Pollinated. Santo Coriander. This early maturing plant produces good yields of very pungent leaves and seeds. This high quality coriander is a fast growing strain grown by market growers. Used in seasoning pickles, bean dishes, chicken, meats, salsa, and spicy foods. Excellent in Mexican, Chinese, and Latin American dishes. The leaves are referred to as Cilantro and the seeds are referred to as Coriander. A member of the dill family. Suitable for containers. A slow bolting variety. Attracts beneficial insects. Cold Tolerant. An excellent choice for home gardens and greenhouses.

[TM275-20 - Sasha Altai Tomato](#)

57 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces good yields of 4 to 6 oz bright red tomatoes. They are very sweet, meaty, juicy, and flavorful with an award-winning complex flavor. Perfect for salads, slicing, sandwiches, canning, and making tomato juice. Sets well even during cold evenings. One of the best tomatoes in all of Siberia. Cold Tolerant. Suitable for cooler coastal climates and high altitudes. Excellent choice for home gardens. An heirloom variety from Irkutsk, Siberia, Russia. Determinate.

[TM707-10 - Santa Clara Canner Tomato](#)

84 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 8 to 10 oz red tomatoes. They are absolutely delicious with a rich and complex flavor. They are very sweet, meaty, juicy, and flavorful. Perfect for canning. Also great for salads, making tomato juice, and cooking. It was one of the first tomatoes launching the canning industry in California. Good-quality tomatoes are used for commercial production. Excellent choice for home gardens, market growers, and open field production. A variety from Italy dates back to 1910. United States Department of Agriculture, PI 270226. Indeterminate.

[EG77-50 - Santana Eggplants](#)

65 days. Solanum melongena. (F1) This early maturing plant produces high yields of extra large 8" long glossy purple-black eggplants. Very flavorful and tender. Perfect for grilling, frying, stuffing, pickling, and baking. Does well in hot and cold weather. One of the best for heat tolerance without fruit fading problems. Cold Tolerant. Heat Tolerant. An excellent choice for home gardens, market growers, and open field production.

[TM446-20 - Santiam Tomato](#)

65 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces heavy yields of 5 oz red tomatoes. They are very sweet, juicy, and flavorful with very few seeds. Perfect for salads, slicing, and sandwiches. It is a cross between a Severianin and a Starshot. Suitable for cooler climates and locations with shorter growing seasons. Excellent choice for home gardens. A variety was developed by Dr. James R. Baggett in 1984 at Oregon State University, Oregon, USA. Disease Resistant: V, F. Determinate.

[HP392-10 - Santo Domingo Pueblo Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 3 1/2" long by 1" wide hot peppers. Peppers are hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. A variety from Santo Domingo, New Mexico. United States Department of Agriculture, PI 645492.

[TM541-20 - Saucey Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Saucey Tomato. The plant produces heavy yields of 3 oz red plum-shaped tomatoes. It has a rich tomato flavor. They are sweet, meaty, and very flavorful with very few seeds. Perfect for making sauces, puree, paste, and salsas. They are easy to pick and peel. The tomatoes can be easily shaken from the plants when they mature. Grows in clusters. Excellent choice for home gardens. An heirloom variety was developed by Dr. James R. Baggett in 1993 at Oregon State University, Oregon, USA. Disease Resistant: BER. Determinate.

[TM120-20 - Sausage Tomato Seeds](#)

78 days. Solanum lycopersicum. Open Pollinated. Sausage Tomato. The plant produces good yields of large 6" long red tomatoes. They are meaty and very flavorful. Perfect for making ketchup, sauce, puree, paste, and canning. An excellent choice for home gardens. An heirloom variety from the USA. United States Department of Agriculture, PI 647533. Indeterminate.

[CB50-100 - Savoy Ace Improved Cabbage Seeds](#)

1977 All-America Selections Winner!

80 days. Brassica oleracea. (F1) Savoy Ace Improved Cabbage. The plant produces deep green heads of cabbage. The heads average 10 to 12 inches in diameter and weigh 3 ½ to 4 lbs. This variety produces good yields of fine-quality Savoy-type cabbage. The interior is excellent. Stores well. Sold in supermarkets as cut halves in shrink wrap. This variety adapts to all regions. An excellent choice for home gardens and market growers. A variety from the USA. United States Department of Agriculture, PI 662606.

[SQ129-20 - Scallop Blend Bush Squash Seeds](#)

50 to 90 days. Cucurbita pepo. Open Pollinated. Scallop Blend Bush Squash. This early maturing bush plant produces high yields of a mix of Patty Pan squash. The colorful mix has the most popular and very flavorful varieties of squash. Suitable for containers and small gardens. Heat Tolerant. Drought Tolerant. An excellent choice for home gardens. Heirloom varieties dating back to the 1700s from the USA. A summer squash.

[SQ17-20 - Scallop Yellow Squash](#)

49 days. Cucurbita pepo. Open Pollinated. This early maturing bush-type plant produces high yields of 8 ½" wide by 3 ½" bright yellow squash. Creamy texture and is very flavorful. It is one of the best-tasting varieties around today! Excellent fried or baked. It is easy to grow and rarely bothered by insects. Also known as Patty Pan. The squash has been grown by the Northern tribes in America for hundreds of years. Also known as Patty Pan. Suitable for small home gardens, farmer's markets, and market growers. An ancient Native American heirloom variety. A summer squash variety.

[BN53-25 - Scarlet Runner Bean Seeds](#)

50 days. Phaseolus coccineus. Open Pollinated. Scarlet Runner Bean. This early maturing pole-type plant produces good yields of beautiful green beans. Beans are very flavorful and are used like green beans and dried beans. Excellent freezing and canning variety. An excellent choice for home gardens. United States Department of Agriculture, PI 549448.

[MU3-500 - Savanna Mustard](#)

35 days. Brassica juncea. (F1) This early maturing plant produces excellent yields of flavorful dark green mustard broad leaves. Leaves are round, thick, and smooth. Perfect steamed, boiled, baked, or stir-fried. Heat Tolerant. Cold Tolerant. Drought Tolerant. Excellent choice for home gardens, market growers, and open field production.

[CB45-250 - Savoy Perfection Cabbage Seeds](#)

90 days. Brassica oleracea. Open Pollinated. Savoy Perfection Cabbage. The plant produces a very delicious and sweet cabbage. The heads average 7 to 9 inches in diameter and weigh 6 to 8 lbs. Leaves are sweet, crinkled, and tender. Unlike other cabbages, it does not give off the sulfur smell when cooked. Excellent for stuffing, used fresh to make coleslaw, steamed, used in stir fry, or used to make sauerkraut. The plant is hardy and easy to grow. Excellent choice for home gardens and market growers. An heirloom variety dating back to 1932. United States Department of Agriculture, NSL 22709.

[SQ83-20 - Scallop White Squash](#)

49 days. Cucurbita pepo. Open Pollinated. This early maturing bush-type plant produces high yields of 8 ½" wide by 3 ½" deep white squash. Creamy texture and very flavorful. It is one of the best-tasting varieties around today! Excellent fried or baked. The squash has been grown by the Northern tribes in America for hundreds of years. Also known as Patty Pan. Suitable for small home gardens, farmer's markets, and market growers. An ancient Native American heirloom variety. A summer squash variety.

[CT13-750 - Scarlet Nantes Carrot Seeds](#)

75 days. Daucus carota. Open Pollinated. Scarlet Nantes Carrot. The plant produces good yields of flavorful 6 to 8" long orange carrots. Carrots are very delicate and fine-grained containing almost no core. It is tender, crisp, and ultra-sweet. An excellent quality carrot for salads, soups, stews, and making carrot juice. This variety stores well. Grows well in heavier soils. An excellent choice for home gardens. United States Department of Agriculture, NSL 6191. An 1870s heirloom variety from Nantes, France.

[TM122-20 - Schimmeig Striped Hollow Tomato Seeds](#)

80 days. Solanum lycopersicum. Open Pollinated. Schimmeig Striped Hollow Tomato. The plant produces good yields of 6 oz bi-colored red tomatoes with orange stripes. They resemble bell peppers. The hollow tomato makes a perfect stuffing tomato. Makes an excellent tuna stuffer. Excellent choice for home gardens and specialty market growers. An heirloom variety. Indeterminate.

[BS20-50 - Scorpius Brussels Sprouts Seeds](#)

112 days. Brassica oleracea. (F1) Scorpius Brussels Sprouts. The plant produces high yields of light green Brussels Sprouts. This variety has heads average 1 to 1 1/4" in diameter. Perfect for roasted, grilled, or steamed. The sprouts are easy to snap off the stalk and the leaves shed well making it easy to harvest. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA.

[HP1511-10 - Scotch Bonnet Red Hot Peppers \(Strain 2\)](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces good yields of 2 1/2" long by 1 1/4" wide hot peppers. Peppers are very hot and turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. Excellent for making spicy salsa, pickling, and making hot sauce. A variety from Jamaica. Scoville Heat Units: 350,000.

[HP1889-10 - Scotch Bonnet Red Pepper Seeds \(Strain 5\)](#)

100 days. Capsicum chinense. Open Pollinated. Scotch Bonnet Red Pepper. The plant produces good yields of small wrinkled hot peppers. Peppers are very hot and turn from green to bright red when mature. The plant has green stems, green leaves, and white flowers. One of the hottest in the world! It is so hot that one pepper is enough to spice up a large pot of soup or chili. The plant has a good leaf canopy to protect peppers from sunburn. A variety from Jamaica.

[TM284-20 - Scotia Tomato](#)

60 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 4 oz bright red tomatoes. They are sweet and flavorful. Perfect for sandwiches, salads, slicing, salsas, sauces, tomato juice, and canning. Cold Tolerant. Excellent choice for home gardens. A variety was developed by the Dominion Experiment Farm, Kentville, Nova Scotia, Canada. United States Department of Agriculture, PI 279817. Determinate.

[SQ98-10 - Seneca Prolific Squash](#)

51 days. Cucurbita pepo. (F1) This early maturing plant produces heavy yields of yellow straightneck summer squash. This plant produces higher yields of yellow straightneck summer squash than other varieties. It is very flavorful and tender. Excellent freezing and canning varieties. Best when harvested when 6" long. A variety from the United States of America. A summer squash variety.

[HP1266-20 - Scotch Bonnet Orange Hot Peppers](#)

100 days. Capsicum chinense. Open Pollinated. The plant produces good yields of 2 1/2" long by 1 1/4" wide wrinkled hot peppers. Peppers are very hot and turn from green to orange when mature. The plant has green stems, green leaves, and white flowers. Excellent choice for home gardens and Farmer's Markets. Excellent choice for home gardens, market growers, and open field production. A variety from Jamaica. Scoville Units: 100,000.

[HP1911-20 - Scotch Bonnet Red Pepper Seeds \(Strain 3\)](#)

90+ days. Capsicum chinense. Open Pollinated. Scotch Bonnet Red Pepper. The plant produces good yields of 1 1/2" long by 1 1/4" wide Habanero hot peppers. Peppers are very hot, have medium-thick flesh, and turn from dark green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling and making salsa, hot sauce, and seasoning spice powder. A variety from Jamaica.

[TR32-20 - Scotch Pine Bonsai Tree](#)

Pinus sylvestris var. NY, Boonville. Open Pollinated. This Bonsai tree produces has green evergreen needles. It was first introduced into North America in the 1600s. Also known as Scots Pine. Disease Resistant. A variety originating from northern Europe.

[CF5-500 - Self Blanche Cauliflower Seeds](#)

65 days. Brassica oleracea. Open Pollinated. Self Blanche Cauliflower. The plant produces good yields of large 9 to 12" heads of white cauliflower. Great freezing and pickling variety. Leaves curl upward and cover the head to keep the sun from ruining the white color. Best when grown in cool weather. Plant early spring or fall for the best crops. Excellent choice for home gardens and market growers. An heirloom variety. United States Department of Agriculture, NSL 82635.

[CN39-50 - Seneca Red Stalker Corn Seeds](#)

100 days. Zea mays. Open Pollinated. Seneca Red Stalker Corn. The plant produces good yields of delicious multicolor kernels of corn. Ears are 8 to 9" long and have 18 rows of bi-color kernels. It has beautiful purple-red stalks and husks. Perfect for making cornmeal. Suitable for the home garden and market growers. A variety from the USA. Disease Resistant: Common Smut, Northern Corn Leaf Blight, and Common Rust.

[HP2472-10 - Sequoia Hot Peppers](#)

72 days. Capsicum annuum. (F1) This early maturing plant produces good yields of large 6 ¼" long by 2 ¾" wide Ancho Poblano peppers. The peppers are mildly hot and turn from dark green to deep red when mature. The plant has green stems, green leaves, and white flowers. Good cooking, stuffing pepper, and Mexican cuisine. Suitable for Northeastern regions. An excellent choice for home gardens, farmer's markets, and market growers. A variety from the USA.

[HP216-20 - Serrano Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Serrano Pepper. The plant produces heavy yields of 2 ¼" long hot peppers. Peppers are hot and turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. Excellent for making hot sauce, guacamole, and salsa. Also great for pickling or drying. Create beautiful sauces and hot pickles by combining them with Purple Serrano. An excellent choice for home gardens, market growers, and open field production. A variety from Mexico. United States Department of Agriculture, PI 380521.

[HB66-500 - Sesame](#)

65 days. Sesamun indicum. Annual. Open Pollinated. The plant produces high yields of flavorful leaves and seeds. Leaves are used in tea. Seeds are used in candies, pastries, bread, soups, salads, and Oriental dishes. Produces a lovely bell-shaped flower. Also used for feeding turkey, duck, dove, pheasant, rabbit, quail, and birds. An excellent choice for home gardens. A variety from India.

Seeding Rate: 6 per acre

[CN62-50 - Shades of Blue Corn Seeds](#)

110 days. Zea mays. Open Pollinated. Shades of Blue Corn. The plant produces good yields of 5" long beautiful mixed shades of light and dark blue corn, including sky blue and violet blue. It has attractive husks that are both white and red. Great for making popcorn. An excellent choice for home gardens.

[HP295-10 - Serrano del Sol Hot Peppers](#)

62 days. Capsicum annuum. (F1) This early maturing plant produces good yields of 3" long by ¾" wide hot peppers. Peppers are hot and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. The first hybrid Serrano overcomes the usual complaints about the lateness and small size of open-pollinated Serrano by maturing in only 62 days. The Serrano del Sol is hot, but not excessively hot. It also has a unique flavor, a flavor many people prefer to Jalapenos. Serve whole or chop for sauces and salsa. Excellent for making pickles, salsa, and sauce. Early variety is suitable for short-season regions.

[HP219-20 - Serrano Tampiqueno Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces heavy yields of 2 ¼" long by ½" wide hot peppers. Peppers are medium-hot and turn from green to a bright red when mature. The plant has green stems, green leaves, and white flowers. Great for salsa, sauces, stews, soups, and other dishes. Perfect pickling variety. This is the most popular Serrano gown in Mexico. Excellent choice for home gardens and market growers. A variety from Guanajuato, Mexico. United States Department of Agriculture, PI 640636. Scoville Heat Units: 3,000

[BR64-500 - Sessantina Riccia di Sarno Broccoli Raab Seeds](#)

60 days. Brassica rapa. Open Pollinated. Sessantina Riccia di Sarno Broccoli Raab. The plant produces high yields of green broccoli raab. This plant has tender tops and flower shoots. Their tender tops can be served as a side dish when boiled, stewed, or lightly fried. Excellent for stir fry and salads. You can eat just the flower buds or the entire plant - the leaves, stems, and flower heads. Plant from early spring to late summer. An excellent choice for home gardens. A variety from Italy.

[TMS22-10 - Shady Lady Tomato Seeds](#)

80 days. Solanum lycopersicum. (F1) Shady Lady Tomato. The plant produces high yields of 6 to 10 oz deep red tomatoes. It is one of the sweetest and most delicious full-flavored tomatoes. Perfect for salads, slicing, and sandwiches. This is the number one producer and a favorite at the farmer's marketplace and is one of the most widely grown fresh market tomatoes in California. It has sturdy vines and heavy foliage that provide good protection against sunburn. Suitable for containers, patios, or small gardens where space is very limited! Good quality tomato used for commercial production with excellent transportation ability and extended keeping characteristics. An excellent choice for home gardens, farmer's markets, market growers, and open field production. Disease Resistant: V, F, A, St, TMV. Determinate.

[CN58-50 - Shaman's Blue Corn Seeds](#)

112 days. Zea mays. (F1) Shaman's Blue Corn. The plant produces high yields of high-quality 7 to 9" long dark blue corn. Ears of popping corn that have light purplish-blue kernels with husks that dry white. It offers eye-catching dark blue kernels that pop up tender and white popcorn. It pops up better too than other varieties. Originally domesticated by Meso Americans. An excellent choice for home gardens. An heirloom from the Andes Mountains of Peru.

[SP208-20 - Sheepnose Pimento Pepper Seeds](#)

70 days. Capsicum annuum. Open Pollinated. Sheepnose Pimento Pepper. This early maturing plant produces good yields of 3" long by 4" wide sweet peppers. Peppers turn from green to red when fully mature. It has thick walls, is crisp and juicy, and keeps a long time when refrigerated. This cheese shaped pepper is excellent fresh, freezing, or pickled. An excellent choice for home gardens. An heirloom variety from Ohio, USA.

[TM700-10 - Shilling Giant Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 12 to 16 oz red heart-shaped tomatoes. They are solid, juicy, and delicious. Perfect for salads, slicing, sandwiches, and making rich tomato sauce. Excellent choice for home gardens. An heirloom variety. Indeterminate.

[HP427-20 - Shishito Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Shishito Pepper. The plant produces high yields of 2 ¼" long by ½" wide hot peppers. Peppers are hot and turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. A variety from Japan.

[TP9-500 - Shogoin Turnip Seeds](#)

42 days. Brassica rapa. Open Pollinated. Shogoin Turnips. The plant produces good yields of 6 to 8" diameter turnips. The tops are tender and can be used as greens. Roots are crisp and firm and are best when harvested when young at 3 to 4". Perfect for soups, salads, or stir-fries. Also good for pickling! Thrives in hot dry weather. Grown commercially for greens. An excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, NSL 37048. A variety from Japan.

[TM575-20 - Sheboygan](#)

[Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 4 to 6 oz pink plum-shaped tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for making sauce, puree, and paste. It is one of the best varieties for canning! Excellent choice for home gardens. An heirloom variety dating back to the 1900s. Indeterminate.

[GD20-20 - Shenot Crown of Thorns Gourds](#)

95 days. Cucurbita pepo. Open Pollinated. Produces good yields of 5" diameter multi-color gourds. These unusual gourds have 10 fingers pointing towards the blossom end. Perfect for making crafts. An excellent choice for home gardens. United States Department of Agriculture, PI 282550.

[CT42-750 - Shin Kuroda Carrot Seeds](#)

75 days. Daucus carota. Open Pollinated. Shin Kuroda Carrot. The plant produces good yields of 3 to 5" long bright orange carrots. These can be grown as baby carrots. Very flavorful. Excellent for making carrot juice. Stores well. Easy to harvest with their strong tops. It does well in a wide range of soil and weather conditions. Perfect for Asian specialty markets. An excellent choice for home gardens and market growers. A variety from Japan.

[RD12-100 - Shogoin Globe Radish Seeds](#)

70 days. Raphanus sativus. Open Pollinated. Shogoin Globe Radishes. The plant produces excellent yields of 4 to 6" white round radishes with slightly green necks. The roots develop above ground and the leaves protect the roots well. Stays crisp even when large. Excellent for use in soups, stews, salads, and pickled. Best quality radish for cooking. Does well in heavy clay soils. Excellent choice for home gardens and market growers.

[HB14-500 - Siam Queen Basil](#)

[1997 All-America Selections Winner!](#)

75 days. Ocimum basilicum. Annual. Open Pollinated. The plant produces very flavorful 4" long by 2" wide green basil leaves. This is an improved variety with an outstanding licorice fragrance and flavor. Used in tea, sauces, soups, salads, chicken, seafood, and Thai dishes. Suitable for containers. An excellent choice for home gardens.

[KL7-750 - Siberian Kale](#)

60 days. Brassica napus. Open Pollinated. This early variety produces excellent yields of light blue-green leaves with white stems and ruffled edges. Used fresh in salads and on sandwiches or cooked. It is one of the best varieties for salads. Light frost improves tenderness and flavor. Suitable for Northern parts of the country. Great variety for wildlife forage, preferred forage for deer. An excellent choice for home gardens. An heirloom variety from Russia. United States Department of Agriculture, AMES 26626

[TM123-20 - Siberian Tomato Seeds](#)

48 days. Solanum lycopersicum. Open Pollinated. Siberian Tomato. This early maturing plant produces heavy yields of 2 to 5 oz bright red tomatoes. They are sweet and flavorful. Perfect for salads, slicing, and sandwiches. The plant is capable of setting fruit even at 38 degrees. One of the earliest maturing varieties on the market takes only 7 weeks when transplanted outdoors. A very popular variety grown in Alaska. Cold Tolerant. The plant requires support, either staking or cages. An excellent choice for home gardens. An heirloom variety from Siberia, Russia. Determinate.

[TM481-20 - Sicilian Saucer Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 2 to 3 lb red giant beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, slicing, sandwiches, and making sauces. Try growing the biggest tomato you will ever see! The plant requires support, either staking or cages. An excellent choice for home gardens. An heirloom variety from Sicily, Italy. Indeterminate.

[CA11-50 - Sierra Gold Melon Seeds](#)

90 days. Cucumis melo. Open Pollinated. Sierra Gold Melon. The plant produces good yields of 3 to 4 lb cantaloupes. This variety has a sweet and juicy salmon-colored flesh. It has superb flavor. Perfect when served in halves. Melon has a very small seed cavity. Excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 5704. Disease Resistant: PM.

[TM630-10 - Siletz Tomato Seeds](#)

52 days. Solanum lycopersicum. Open Pollinated. Siletz Tomato. This early maturing plant produces high yields of 10 to 12 oz deep red tomatoes. They are sweet and flavorful. Perfect for salads, sandwiches, and canning. Plants will yield well even in cool weather. Cold Tolerant. It is parthenocarpic, meaning it can set tomatoes without pollination. An excellent choice for home gardens and greenhouses. A variety was developed in 1994 by Dr. James Baggett of Oregon State University, Oregon, USA. Disease Resistant: V, F. Determinate.

[HP1161-10 - Siling Labuyo Pepper Seeds](#)

90+ days. Capsicum frutescens. Open Pollinated. Siling Labuyo Pepper. The plant produces good yields of 1 ½" long by ¼" wide Tabasco hot peppers. Peppers are very hot, grow upright, have thin flesh, and turn from green to green to red when mature. The plant has fuzzy green stems, fuzzy green leaves, and white flowers. Excellent for Oriental cuisine and for making hot sauce, hot pepper flakes, and seasoning spice powder. Also known as Philippine Filipino Bird's Eye Chili. A variety from the Philippines. United States Department of Agriculture, PI 593614.

[CN21-50 - Silver King Corn Seeds](#)

82 days. Zea mays. (F1) Silver King Corn. The plant produces good yields of 8" long ears of delicious sweet white corn. The ears have 16 to 18 rows of tender kernels. Silver King Corn rivals its sister ears, the Silver Queen Corn. This is a Sugar Enhanced Variety (se+). An excellent choice for home gardens, market growers, Farmer's Markets, and commercial and open field production. Disease Resistant: NCLB, R, SW.

[CN2-50 - Silver Queen Corn Seeds](#)

82 days. Zea mays. (F1) Silver Queen Corn. The plant produces good yields of sweet 8 to 9" long ears of white corn. The ears have 14 to 16 rows of tender kernels. The most popular white sweet corn in America and best tasting white corn on the market. It has an old-fashioned flavor and texture. Silver Queen has been a staple at farmer's markets. An excellent choice for home gardens and market growers. Treated with Insect Guard. Disease Resistant: NCLB, R, SW.

[OK22-50 - Silver Queen Okra Seeds](#)

80 days. Abelmoschus esculentus. Open Pollinated. Silver Queen Okra. The plant produces huge yields of 7" long whitish-green okra. Very tender when picked young. Great for making fried okra, soups, stews, gumbo, and casseroles. Excellent choice for home gardens.

[SW12-100 - Silverado Swiss Chard](#)

60 days. Beta vulgaris. Open Pollinated. The plant produces good yields of dark glossy green leaves with white stalks and veins. Leaves are very flavorful and excellent for salads and steamed with other greens. It will be ready to harvest as baby greens in only 25 to 30 days. A slow bolting variety. Excellent choice for home gardens and market growers. United States Department of Agriculture, W6 44534.

[BS16-50 - Silvia Brussels Sprouts Seeds](#)

98 days. Brassica oleracea. (F1) Silvia Brussels Sprouts. This early-maturing compact plant produces high yields of green Brussels Sprouts. This high-quality variety has heads average 1 to 1 ½" in diameter. The compact plant only grows 24" tall. They may be short but they are packed with 45-50 sprouts per stalk. Perfect for roasted, grilled, or steamed. The sprouts are smooth and great tasting. High in Vitamins A and C. For the best flavor, harvest after the first fall frost. It is a great choice for tight spaces and small gardens. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. Disease Resistant: BR, FY.

[TM634-20 - Sioux Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 4 to 6 oz red tomatoes. They are incredibly sweet, tangy, and full of those rich complex flavors that make a delicious tomato. Excellent for salads, slicing, sandwiches, and canning. Continues to produce large harvests even in hot weather and dry regions. Heat Tolerant. The plant requires support, either staking or cages. Excellent choice for home gardens. An heirloom variety was developed in 1944 by the University of Nebraska, USA. United States Department of Agriculture, PI 270210. Indeterminate.

[TM835-20 - Skyreacher Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 4 to 6 oz bi-colored red tomatoes with orange stripes. They are sweet and flavorful. Perfect for salads, slicing, garnishes, or culinary creations. Crack-Resistant. Excellent choice for home gardens. Determinate.

[TM64-10 - Slava Tomato Seeds](#)

65 days. Solanum lycopersicum. Open Pollinated. Slava Tomato. This early maturing plant produces heavy yields of 1 to 2 oz red tomatoes. They are very flavorful. Perfect for salads and slicing. A potato leaf variety. Excellent choice for home gardens. An heirloom variety from the Republic of Czech. United States Department of Agriculture, PI 466917. Indeterminate.

[LC62-750 - Slobolt Lettuce](#)

48 days. Lactuca sativa. Open Pollinated. This early maturing plant produces excellent yields of very flavorful lettuce. The outer leaves may be picked off as it grows. It has a delightful crispness and mild flavor and is never bitter. Grows even in hot weather! Heat-Tolerant. Slow to bolt. Suitable for greenhouse production and outdoor planting. Excellent choice for home gardens, greenhouses, market growers, and open field production. An heirloom dating back to 1946. United States Department of Agriculture, PI 536764.

[LC19-750 - Simpson Elite Lettuce](#)

45 days. Lactuca sativa. Open Pollinated. This early maturing plant produces excellent yields of flavorful leaf lettuce. The leaves are crumpled with curled outer leaves. Very attractive. One of the slowest bolting and earliest growing varieties on the market. Ideal for spring, early summer, and fall harvest. Drought Tolerant. Perfect for salads and garnishes. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 584330.

[HP2091-10 - Skyline Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Skyline Pepper. The plant produces high yields of 1 ¼" long by ½" wide hot peppers. Peppers are hot, grow upright, and turn from dark green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for Asian dishes. United States Department of Agriculture PI 508435. A variety from South Korea.

[FL140-25 - Skyscraper Sunflower Seeds](#)

70 days. Helianthus annuus. Annual. Open Pollinated. Skyscraper Sunflower. This very tall plant produces heavy yields of sunflower seeds. It can grow up to 12 ft tall. The yellow flowers are humongous. When the backs turn yellow, cut the flower, and let it dry upside down. The seeds are edible and great for roasting. At the end of the season, watch for goldfinches, who love the seed! This plant attracts bees, butterflies, and birds. Perfect for planting along a row of fences or alongside a house or barn. Impress your neighbors by growing a giant Sunflower! Easy for kids to grow. Great for school projects. Does well in poor soil. Heat Tolerant. Drought Tolerant. A heirloom variety from the USA.

[BN95-50 - Slenderette Bean Seeds](#)

53 days. Phaseolus vulgaris. Open Pollinated. Slenderette Bean. This early bush plant produces high yields of stringless 5" long dark green beans. Excellent freezing and canning variety. An excellent choice for home gardens. United States Department of Agriculture, PI 549947. Disease Resistant: BCMV (NY 15).

[HB128-250 - Slow Bolt Coriander Seeds](#)

45 days. Coriandrum sativum. Annual. Open Pollinated. Slow Bolt Coriander. This early maturing plant produces very pungent leaves and seeds. Used in seasoning pickles and meats. Excellent in Mexican, Chinese, and Latin American dishes. This variety is very slow to bolt. The leaves are referred to as Cilantro and the seeds are referred to as Coriander. Suitable for containers. A member of the dill family.

[GD42-10 - Small Apple Gourds](#)

110 days. Cucurbita pepo. Open Pollinated. The plant produces good yields of small apple-shaped gourds. They are dark green and turn brown when dried. Excellent for making crafts and birdhouses. Excellent choice for home gardens.

[TM380-20 - Small Red Cherry Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of ¼ to ¾ oz red cherry tomatoes. They are sweet and flavorful. Perfect for salads and snacks. These are smaller and sweeter than the Large Red Cherry Tomato. Grows in clusters. The plant requires support, either staking or cages. An excellent choice for home gardens. An heirloom variety from the United States of America dating back more than 100 years. Indeterminate.

[HP308-10 - Small Thai Chili Hot Peppers](#)

85 days Capsicum annuum. Open Pollinated. The plant produces good yields of 2 ¼" long by ¼" wide hot peppers. Peppers are hot, grow upright, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. This spicy hot pepper is very popular at Oriental supermarkets on the West Coast. Suitable for containers.

[CF6-50 - Snow Crown Cauliflower Seeds](#)

1975 All-America Selections Winner!

50 days. Brassica oleracea. (F1) Snow Crown Cauliflower. This early maturing plant produces heavy yields of 7 to 8" heads of white cauliflower. Terrific quality and is very flavorful. Great fresh or cooked. Leaves grow upright, protecting heads from sun scorch. It matures early and produces heads even under adverse conditions. Top choice of cauliflower growers. An excellent choice for home gardens and market growers. United States Department of Agriculture, G 24611. A variety from the USA.

[CT34-750 - Snow White Carrot Seeds](#)

75 days. Daucus carota. Open Pollinated. Snow White Carrot. The plant produces excellent quality 7 to 8" long white carrots. Beautiful creamy white carrots with a crisp and crunchy texture. Excellent for salads and gourmet dishes. Add color to your favorite dish by growing the red, yellow, and purple carrots. White carrots are again becoming popular with home gardeners and specialty growers. Excellent choice for home gardens and market growers.

[CF15-500 - Snowball Self Blanching Cauliflower Seeds](#)

60 days. Brassica oleracea. Open Pollinated. Snowball Self Blanching Cauliflower. The plant produces large 6 to 9" heads of white cauliflower. Great freezing variety. The heads are pure white and the leaves curl upright. The leaves will self-wrap during cool weather, but will not in warm weather. Good for both early and late-season crops. An excellent choice for home gardens and market growers. An heirloom variety. United States Department of Agriculture, PI 225853.

[GD12-20 - Small Mixed Gourd Seeds](#)

100 days. Cucurbita pepo. Open Pollinated. Small Mixed Gourd Seeds. The plant produces good yields of assorted small-size gourds of various shapes and colors. Perfect for making crafts, birdhouses, dippers, and ornaments. An excellent choice for home gardens.

[PM11-20 - Small Sugar Pumpkins](#)

95 days. Cucurbita pepo. Open Pollinated. The plant produces good yields of 10" diameter bright orange-yellow pumpkin. It is a smaller version of the Connecticut Field. One of the best pumpkins for making pumpkin pies! An excellent choice for home gardens. An early heirloom pumpkin was grown in 1887. United States Department of Agriculture, NSL 20182.

[GD29-10 - Snake Gourd Seeds](#)

120 days. Cucurbita pepo. Open Pollinated. Snake Gourd. The plant produces good yields of 48" long by 6" wide snake-shaped gourds. The gourds have smooth pale green skin and creamy yellow flesh. It is usually eaten like a summer squash when it is 6 inches long. An excellent choice for home gardens. United States Department of Agriculture, PI 642042. A variety from the USA.

[CN27-50 - Snow Puff Corn Seeds](#)

100 days. Zea mays. (F1) Snow Puff Corn. The plant produces high yields of delicious sweet white corn. It is the best-tasting and most tender popcorn on the market. It expands to a huge size when popped. It is hullless too. An excellent choice for home gardens and market growers. A variety from the USA.

[TM188-20 - Snow White Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Snow White Tomato. The plant produces high yields of ½ to 1 oz white cherry tomatoes. They are very sweet and flavorful. Perfect for salads, garnishes, or culinary creations. Try growing red, yellow, and white cherry tomatoes for a colorful salad. An excellent choice for home gardens. Indeterminate.

[TP14-500 - Snowball Turnip Seeds](#)

45 days. Brassica rapa. Open Pollinated. Snowball Turnips. This early maturing plant produces good yields of 3 to 4" diameter white round turnips. They are round and white colored on the interior and exterior. They are sweet, tender, mild, and flavorful. Very delicious when eaten raw like an apple or grated and added to salads. Best when harvested when roots are small 1 to 2" in diameter. Stores well. A long time favorite in the South. Ideal for summer and autumn harvests. Excellent choice for home gardens. A variety from the USA.

[CF8-500 - Snowball Y Improved Cauliflower Seeds](#)

68 days. Brassica oleracea. Open Pollinated. Snowball Y Improved Cauliflower. This early maturing plant produces 6 to 8" heads of pure white cauliflower. A good freezer variety. This is a self-blanching type variety as the leaves curl around heads protecting them from the sun. This cauliflower is known for vigorous and rapid growth and long harvest. It's Suitable for both spring and fall plantings. Frost Tolerant. Excellent choice for home gardens and market growers. An heirloom was introduced by Ferry-Morse Seed Company in 1947. United States Department of Agriculture, NSL 6229.

[CU110-20 - Snow's Fancy Pickling Cucumbers](#)

55 days. Cucumis sativus. Open Pollinated. This early maturing plant produces good yields of 5" long dark green cucumbers. It is firm, crisp, and tender. The ideal pickler! This variety was introduced in 1905 by Vaughan's Seed House of Chicago. It was selected by J. C. Snow of the famous Snow Pickle Farm located in Rockford, Illinois. At that time, it fit the requirements for small pickling manufacturing. Excellent choice for home gardens and market growers. An heirloom variety from Illinois, USA.

[HB106-500 - Soapwort](#)

85 days. Saponaria officinalis. Perennial. Open Pollinated. The plant produces good yields of beautiful flowers and dark green leaves. It is used in making homemade soups, shampoo, or delicate fabric wash by soaking roots and leaves in hot water. Also used to relieve skin itchiness, and pain relief, and as a soap. Attracts bees, butterflies, and hummingbirds. A variety from Europe.

[CT44-750 - Solar Yellow Carrot Seeds](#)

75 days. Daucus carota. Open Pollinated. Solar Yellow Carrot. The plant produces good yields of 7" long yellow carrots. It has buttery yellow flesh and is sweet and crisp. Delicious raw or cooked. Bake or steam the carrot instead of boiling it for the best color. Add color to your salad by adding purple, red, and white carrots. This yellow carrot is a real stand-out at farmer's markets. An excellent choice for home gardens, farmer's markets, and market growers. An heirloom variety.

[TM221-10 - Sophie's Choice Tomato](#)

54 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces good yields of 8 to 10 oz orange-red tomatoes. They are sweet and flavorful. Perfect for salads, slicing, and sandwiches. Suitable for container gardening, patios, hanging baskets, or small gardens where space is very limited! Does well in cold temperatures. Cold Tolerant. An excellent choice for home gardens. An heirloom variety from Edmonton, Canada. Determinate.

[BR21-500 - Sorrento Broccoli Raab Seeds](#)

45 days. Brassica rapa. Open Pollinated. Sorrento Broccoli Raab. This early maturing variety produces good yields of large dark green broccoli raab. The head averages 3 to 4 inches in diameter. Harvest the tender leaves, the stems, and the unopened flower buds. They have a mild broccoli flavor and are excellent for stir fry and salads. Plant from early spring to late summer. This is one of the earliest broccoli raab to mature. Excellent choice for home gardens and market growers.

[BN12-50 - Snowcap Bean Seeds](#)

72 days. Phaseolus vulgaris. Open Pollinated. Snowcap Bean. The plant produces good yields of large white beans with maroon stripes and spots. This heirloom runner is the largest of all the dried beans! Excellent for bean soup. An excellent choice for home gardens.

[EG79-20 - Snowy Eggplants](#)

65 days. Solanum melongena. (F1) This early maturing plant produces good yields of large 7" long oblong ivory eggplants. They are very flavorful and firm and meaty. It holds up well in cooking and does not turn to mush like other varieties. Great roasted, grilled, or added to a stir-fry. Also perfect eggplant for making Eggplant Parmesan. Suitable for containers and small gardens. An excellent choice for home gardens and market growers. A variety from the USA.

[TM825-20 - Solar Flare Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 6 to 10 oz bi-colored red beefsteak tomatoes with gold stripes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. A Wild Boar Series variety. An excellent choice for home gardens. Indeterminate.

[TM156-20 - Soldacki Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Soldacki Tomato. The plant produces high yields of 1 lb pink beefsteak tomatoes. They are very sweet and flavorful. Perfect for salads, slicing, and sandwiches. A potato leaf variety. An excellent choice for home gardens. An heirloom variety from Krakow, Poland dating back to the early 1900s. Indeterminate.

[HB67-500 - Sorrel](#)

60 days. Rumex acetosa. Perennial. Open Pollinated. The plant produces good yields of 8" long greens used in salads, soups, and sauces for fish dishes. It has a lemon flavor and is high in Vitamin C. Used in diets for scurvy. A common native species in the grasslands. An excellent choice for home gardens. United States Department of Agriculture, PI 27761.

[MU1-500 - Southern Giant Curled Mustard](#)

[1935 All-America Selections Winner!](#)

48 days. Brassica juncea. Open Pollinated. This early maturing plant produces good yields of bright green mustard leaves. The frilled leaves have a superb flavor. High in Vitamins A, B, and C. Excellent freezing and canning variety. Cold Tolerant. Slow to bolt. This is one of the fastest-growing open-pollinated mustards on the market. Excellent choice for home gardens. An heirloom from the USA. United States Department of Agriculture, NSL 6133.

[TM124-20 - Southern Night Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 12 to 16 oz brownish-red beefsteak tomatoes. It has a rich tomato flavor. Perfect for salads, slicing, sandwiches, sauce, and canning. A potato leaf variety. Excellent choice for home gardens. An heirloom variety from Russia. Determinate.

[CU23-20 - Spacemaster 80 Cucumber Seeds](#)

60 days. Cucumis sativus. Open Pollinated. Spacemaster 80 Cucumber. This compact bush-type plant produces heavy yields of 7 to 8" long nicely shaped dark green cucumbers. Excellent for pickling when small, and slicing when they get bigger. They are crisp and tasty. A great bush variety cucumber has amazing flavor with no bitterness. Ideal for containers, hanging baskets, or home gardens with limited space. The plant has short vines, only 3 feet long! Also perfect for close commercial cropping. Also suitable for hydroponic gardening. Excellent choice for home gardens and market growers. Developed in 1980 by Dr. Henry M. Munger of Cornell University, Ithaca, New York, USA. Disease Resistant: Ccu, CMV, DM, PM.

[SP67-10 - Spanish Spice Pepper Seeds](#)

65 days. Capsicum annuum. (F1) Spanish Spice Pepper. This early maturing plant produces heavy yields of 8 1/2" long by 2 3/4" wide sweet peppers. Peppers have a spicy taste, not hot, and have thin walls. Peppers turn from green to dark red when mature. Excellent for salads and frying. A variety from the Mediterranean region.

[TM937-10 - Spark's Yellow Tomato](#)

90 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 lb yellow beefsteak tomatoes. They are sweet and mild, meaty, juicy, and flavorful. Excellent for salads, slicing, salsas, paste, sauces, canning, and gourmet dishes. The plant requires support, either staking or cages. A potato leaf variety. An excellent choice for home gardens. Indeterminate.

[ON40-250 - Southport White Globe Onions](#)

110 days. Allium cepa. Open Pollinated. The plant produces excellent yields of medium size onions. It is a firm and pungent onion that has a crisp and mild flavor. This Spanish-type onion is grown for commercial production. Perfect for soups, salads, and cooking. One of the best storage keepers. Also known as Silver Ball Onion and White Rocca Onion. It is named after a town in Connecticut, Southport, and grown along Connecticut's Mill River. Southport was known as the Onion Capital during the Civil War, and pickled onions were used to keep scurvy at bay. It can be grown in just about any climate, but it is particularly noted for its ability to thrive in cooler weather. An excellent choice for home gardens, market growers, and open field production. A long day onion for the Northern States. Cold Tolerant. An heirloom variety dating back to 1906. United States Department of Agriculture, PI 546207.

[CU22-20 - Spacemaster Cucumbers](#)

60 days. Cucumis sativus. Open Pollinated. This compact bush-type plant produces excellent yields of 6 to 8" long slender dark green cucumbers. Great for pickling when small, and slicing when they get bigger. The ultimate cucumber for vegetable gardens with limited space! Its vines are only 2 to 3 feet long. It is ideal for containers, hanging baskets, or small gardens with limited space. It is almost a daily ritual to keep them picked since they grow so rapidly. Suitable for hydroponic gardening too. An excellent choice for home gardens. Developed by Dr. Henry M. Munger of Cornell University, Ithaca, New York, USA. United States Department of Agriculture, NSL 112204. Disease Resistant: Ccu, CMV.

[RD20-100 - Sparkler Radish Seeds](#)

23 days. Raphanus sativus. Open Pollinated. Sparkler Radish. This early maturing plant produces good yields of 1 to 1 1/2" diameter red and white radishes. They are very crisp and flavorful. Perfect for salads, vegetable platters, gourmet dishes, dips, and garnishes. Ready in just over 3 weeks! Excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 22148.

[HB68-250 - Spearmint Seeds](#)

85 days. Mentha spicata. Perennial. Open Pollinated. Spearmint. The plant produces good yields of dark green spearmint leaves. This sweet smelling spearmint is used in candy, teas, jellies, desserts, lamb dishes, and salads. Also used as a garnish on ice cream, iced drinks, and melons. Adds fragrance to toothpaste, lotions, and tinctures. Spearmint tea is used for medical purposes to treat many ailments, including nausea, hiccups, and poor digestion. Suitable for containers. An excellent choice for home gardens. A variety from the USA.

[TM393-20 - Speckled Roman Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 6 to 8 oz bi-colored red tomatoes with golden stripes. They have the real tomato taste with very few seeds. Perfect for salads, and for making sauce, puree, paste, ketchup, and canning. A cross of an Antique Roman and a Banana Legs tomato. Also known as Striped Roman Tomato. Crack-Resistant. Excellent choice for home gardens. Indeterminate.

[CU104-10 - Speedway Cucumber Seeds](#)

56 days. Cucumis sativus. (F1) Speedway Cucumber. This early maturing plant produces high yields of 8" long smooth straight dark green cucumbers. This cucumber variety is popular because of its earliness, its yields, and its disease resistance. This quality cucumber has tender skin and grows best if grown on trellis or stakes. One of the most disease resistant cucumbers on the market. Excellent for home gardens, market growers, and open field production. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

[HP2256-10 - Spicy Slice Pepper Seeds](#)

65 days. Capsicum annuum. (F1) Spicy Slice Pepper. This early maturing plant produces high yields of 4" long hot peppers. Peppers turn from dark green to red when mature. The plant has green stems, green leaves, and white flowers. The plant provides good leaf cover protecting it from sun-scall. Suitable for hydroponics gardening. Excellent choice for home gardens and market growers. Disease Resistance: BS, TEV. Scoville Heat Units: 6,000.

[HP397-10 - Sport Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Sport Pepper. The plant produces high yields of 2 ¼" long by ½" wide Pequin hot peppers. Peppers are medium hot, grow upright, have medium thin flesh, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. This is the popular pepper that is pickled and used on hot dogs and sandwiches. It is especially used on the famous Chicago-style hot dogs. The peppers resemble the Tabasco pepper but are much larger. Excellent pickling variety. A variety from the USA.

[TM461-20 - Sprite Tomato](#)

60 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of ½ to ¾ oz red grape tomatoes. They are sweet, juicy, and very flavorful with thin skin. Perfect for salads and snacks. Suitable for containers, patios, or small gardens where space is very limited! An excellent choice for home gardens. Determinate.

[HP2460-10 - Sriracha Pepper Seeds](#)

70 days. Capsicum annuum. (F1) Sriracha Pepper. This early maturing sturdy plant produces excellent yields of giant 5" long by 1 ¼" wide Jalapeno hot peppers. It is one of the largest Jalapeno peppers available. The peppers are mildly hot, have thick flesh, and turn from shiny dark green to red when they mature. The plant has green stems, green leaves, and white flowers. Excellent for salsa, pickling, and roasting. Suitable for home gardens, market growers, and commercial growers. A variety from the USA.

[GD16-20 - Speckled Swan Gourds](#)

100 days. Cucurbita pepo. Open Pollinated. The plant produces good yields of 12" long medium green gourds with creamy speckles. It resembles a swan with its neck curved down. Perfect for making crafts. Excellent choice for home gardens. United States Department of Agriculture, PI 642045.

[HB15-500 - Spicy Globe Bush Basil](#)

70 days. Ocimum basilicum. Annual. Open Pollinated. This small compact bush-type plant produces very flavorful basil leaves. It is very slow to bolt. Used in sauces, salads, and Italian dishes. Very beautiful. Suitable for containers and landscaping borders. An excellent choice for home gardens.

[TM168-10 - Spitze Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 4 to 6 oz red pear-shaped tomatoes. They are sweet and flavorful. Perfect for salads and making sauce, puree, or paste. Excellent choice for home gardens. An heirloom variety from Romania. Indeterminate.

[BR28-500 - Spring Rapini Broccoli Raab Seeds](#)

42 days. Brassica rapa. Open Pollinated. Spring Rapini Broccoli Raab. This early maturing plant produces good yields of large dark green broccoli rabb. It has no central head but has side shoots. The leaves look like mustard leaves. Excellent for stir fry, fresh in salads, and boiled soups. Plant early in spring and harvest before hot weather, or late in fall. Excellent choice for home gardens.

[SS8-500 - Sprouting Mix Seeds](#)

4 to 6 days. Mixed. Open Pollinated. The plant produces excellent quality delicious mixed sprouts, including alfalfa, broccoli, kale, and radishes. The sprouts have a crisp mildly spicy flavor in various shades of green leaves and pink and white stems. Excellent in salads and other Asian dishes. One tablespoon of seed yields approximately 1 cup of sprouts. A variety from the USA.

[HB69-500 - St John's Wort](#)

85 days. Hypericum perforatum. Perennial. Open Pollinated. This shrubby plant produces good yields of green leaves with bright yellow flowers. It is used as an anti-depressant, sedative, and wound healing. Also an excellent ground cover. Very easy to grow. A variety from the Mediterranean region.

[SP93-20 - Staddon's Select Sweet Peppers](#)

71 days. Capsicum annuum. Open Pollinated. This early maturing plant produces good yields of 4" long by 3 1/4" wide sweet bell peppers. Peppers turn from green to red when they mature. Excellent for salads and frying. An excellent choice for home gardens. United States Department of Agriculture, NSL 21978. Disease Resistant: TMV.

[TR30-5 - Star Apple Tree](#)

Chrysohyllum cainito. Open Pollinated. This tropical tree produces heavy yields of edible 2 to 4" diameter round dark-purple fruit. The tree produces up to 150 lbs of fruit. The skin and rind are not edible. When opening a Star Apple, cut in half and spooned out the fresh. With a combination of chopped Star Apple flesh with Mango, Citrus, Pineapple, other fruits, and coconut water is frozen and served as Jamaica Fruit Salad Ice. It is also used for medicinal uses to soothe inflammation in laryngitis and pneumonia. It is given as a treatment for diabetes mellitus, and as a decoction is gargled to relieve angina. The leaves are used as a cancer remedy. The latex from the tree is applied to abscesses. Also taken as a diuretic, febrifuge, and remedy for dysentery. The wood of the tree is used for heavy building construction used to make furniture and cabinetwork. The Star Apple Tree is a tropical tree that does well only in the warm locations of southern Florida and on the Florida Keys. Trees are seriously injured at 28 F and below temperatures. It was introduced into Ceylon in 1802 and then brought to the Philippines and has become a very common roadside fruit tree. A variety originating from Jamaica.

[BN56-50 - State Half Runner Bean Seeds](#)

52 days. Phaseolus vulgaris. Open Pollinated. State Half Runner Bean. This semi-bush type plant produces excellent yields of 4" long by 1/2" wide light green beans. Beans are very flavorful and are used like green beans and dried beans. Vines are very short and do not require staking. Good freezing and canning variety. This variety thrives in adverse weather conditions. Heat Tolerant. Drought Tolerant. An excellent choice for home gardens. United States Department of Agriculture, PI 549599. Disease Resistant: N.

[TM768-10 - Steak Sandwich Tomato Seeds](#)

70 days. Solanum lycopersicum. (F1) Steak Sandwich Tomato. This early maturing plant produces high yields of 10 oz red beefsteak tomatoes. It has a rich old-fashioned tomato flavor. Perfect for sandwiches, burgers, salads, and slicing. This bush-type plant is produced continuously throughout mid-summer to early fall. Excellent choice for home gardens. Indeterminate.

[TM898-10 - SteakHouse Tomato Seeds](#)

75 days. Solanum lycopersicum. (F1) SteakHouse Tomato. The plant produces high yields of 3 to 4 lb red beefsteak tomatoes. It has a rich old-fashioned tomato flavor. Perfect for salads, slicing, and sandwiches. This is the World's Largest Beefsteak Tomato! Impress your neighbors by growing a humongous-sized tomato in your backyard garden. The plant requires support, either staking or cages. An excellent choice for home gardens. Disease Resistant: V, F. Indeterminate.

[HB141-100 - Stevia](#)

120 days. Stevia rebaudiana. Perennial. Open Pollinated. The plant produces high yields of dark green leaves. It is used as a sweetener. Stevioside is 300 times sweeter than sugar but without calories. It can be used in place of sugar in drinks, baked goods, desserts, preserves, etc. Also plaque retardant and tooth decay inhibitor. It is a useful sweetener for diabetics and dieters and is used to treat blood pressure problems. Suitable for containers. An excellent choice for home gardens. A variety from South America.

[HP1818-20 - Stoked Pepper Seeds](#)

60 days. Capsicum annuum. (F1) Stoked Hot Pepper. The plant produces high yields of 5 1/2" long by 1 1/2" wide banana-shaped hot peppers. Peppers are hot and turn from pure yellow, to scarlet orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling, frying, or stuffing. Stoked is a replacement for Inferno, Volcano, and Surefire. A variety from the USA.

[CB30-250 - Stonehead Cabbage Seeds](#)

[1969 All-America Selections Winner!](#)

67 days. Brassica oleracea. (F1) Stonehead Cabbage. This early maturing plant produces very flavorful green cabbage. The heads average 5 to 6 inches in diameter and weigh 4 to 6 lbs. The solid creamy white interior has a crisp texture all the way to the core. Perfect for small gardens as plants can be planted closer than other varieties. Thrives in cool regions. Holds well in the field. Rarely splits. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 372913. Disease Resistant: BR, FY.

[CU4-20 - Stonewall Cucumbers](#)

53 days. Cucumis sativus. (F1) The plant produces high yields of 8 to 9" long straight dark green cucumbers. It has received high grades for quality, shape, size, and is the No. 1 cucumber variety for commercial production. Perfect for salads and slicing. Stores well. Agriculture researchers and commercial growers are very familiar with this top performer. One of the most disease-resistant cucumbers on the market. Excellent choice for home gardens and market growers. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

[CN28-50 - Stowell's Evergreen Corn Seeds](#)

95 days. Zea mays. Open Pollinated. Stowell's Evergreen Corn. The plant produces good yields of 8 to 9" long ears of delicious sweet white corn. The ears have 16 to 18 rows of tender kernels. This variety has excellent flavor and tenderness. Great fresh, canning, and freezing variety. An excellent choice for home gardens, farmer's markets, and market growers. An 1848 heirloom variety from Burlington, New Jersey, USA. United States Department of Agriculture, AMES 22649.

[CN3-50 - Strawberry Corn Seeds](#)

105 days. Zea mays. Open Pollinated. Red Strawberry Corn. The plant produces good yields of sweet 3 to 6" long red corn. It has 2 to 4 ears per stalk. Great for fall decorations or making popcorn. An excellent choice for home gardens. United States Department of Agriculture, NSL 6831.

[TM716-20 - Striped Cavern Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 8 oz bi-colored orange-red tomatoes with bright yellow stripes. They are hollow like green pepper, but have very thick walls and are perfect for stuffing, salads, garnishes, or culinary creations. Store well for up to 4 weeks or more in a refrigerator. Drought Tolerant. Always a great seller at Farmer's Markets! Excellent choice for home gardens and market growers. An heirloom variety. United States Department of Agriculture, PI 639217. Indeterminate.

[TM542-10 - Striped Stuffer Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Striped Stuffer Tomato. The plant produces high yields of 5 to 7 oz bi-colored red tomatoes with golden orange stripes. These pepper-shaped tomatoes are perfect for stuffing, garnishes, or culinary creations. They are completely hollow. Great for making tuna stuffers. It will keep up to 4 weeks in the refrigerator. An excellent choice for home gardens. An heirloom variety. Disease Resistant: PM. Indeterminate.

[CB40-100 - Storage No 4 Cabbage Seeds](#)

95 days. Brassica oleracea. (F1) Storage No 4 Cabbage. The plant produces very flavorful blue-green cabbage. The heads average 10 to 12 inches in diameter and weigh 6 to 8 lbs. The flavor is superior to the typical cabbages available at the supermarket. An excellent long-term storage variety. Holds well in the field during weather stress. An excellent choice for home gardens and market growers. Disease Resistant: FY.

[CU34-20 - Straight Eight Cucumbers](#)

[1935 All-America Selections Winner!](#)

63 days. Cucumis sativus. Open Pollinated. The plant produces high yields of 8" long dark green cucumbers. One of the best-slicing cucumbers on the market. It is an extremely dependable producing crop. If you had bad luck with other cucumber varieties last season, then this one this year. You will be giving them away to your family, neighbors, and friends there are so many! Grows best if grown on trellis or stakes. Excellent choice for home gardens and market growers. A 1938 heirloom variety named for its perfectly straight 8" long cucumber. United States Department of Agriculture, NSL 5764. Disease Resistant: CMV.

[BN96-50 - Strike Bean Seeds](#)

45 days. Phaseolus vulgaris. Open Pollinated. Strike Bean. This early bush type plant produces high yields of 5" long medium green beans. Beans are of high quality and very smooth. Easy to harvest. Suitable for small gardens and square-foot gardens. An excellent choice for home gardens, farmer's markets, and market growers. United States Department of Agriculture, PI 549970. Disease Resistant: BCMV (NY 15).

[TM884-20 - Striped German Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 to 2 ½ lb bi-colored yellow beefsteak tomatoes with red marbling. They are sweet, fruity, and very flavorful. One of the best-tasting tomatoes. Perfect for salads, slicing, garnishes, or culinary creations. A potato leaf variety. An excellent choice for home gardens. An heirloom variety from Hampshire County, West Virginia, USA. Indeterminate.

[HP2464-10 - Stromboli Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The compact plant produces high yields of Tabasco-type hot peppers. The peppers are medium hot, grow upright, and turn from green to brilliant orange when they mature. The plant has green stems, green leaves, and white flowers. Good for making hot sauce and cooking. Excellent for containers and indoors. Suitable for home gardens, market growers, and commercial growers. A variety from Italy.

[TM679-10 - Stump of the World Tomato Seeds](#)

80 days. Solanum lycopersicum. Open Pollinated. Stump of the World Tomato. The plant produces good yields of 1 lb dark pink beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. It has a rich old fashioned tomato flavor. They are as flavorful as a Brandywine but more productive. One of the very best tasting tomatoes. Perfect for salads, slicing, and sandwiches. A potato leaf variety. An excellent choice for home gardens. An heirloom variety from the USA. Indeterminate.

[PE6-50 - Sugar Ann Snap Pea Seeds](#)

1984 All-America Selections Winner!

56 days. Pisum sativum. Open Pollinated. Sugar Ann Snap Peas. This compact bush plant produces good yields of flavorful large 2 to 3" long snap peas. It is crisp, very sweet, and flavorful. Perfect for stir fry. Its short vines do not require trellising. The plant produces 10 to 14 days earlier than other varieties. Use fresh or cooked. Great freezing variety. Suitable for small home gardens and containers. Received the Award of Garden Merit from the Royal Horticultural Society. An excellent choice for home gardens. Developed by Dr. Calvin Lamborn and Dr. MC Parker of Twin Falls Idaho, USA. Disease Resistant: PEMV, PM.

[BT7-100 - Sugar Beet Seeds](#)

110 days. Beta vulgaris. Open Pollinated. Sugar Beet. The plant produces good yields of large 3 to 5 lb sugar beets. The roots are white and tapered and have a sweet sugar flavor. Shred the beets and add them to other vegetables. They can be made into sugar, syrup, molasses, and wine. It can be enjoyed as a sweet root vegetable, can be used as leafy greens, and can be processed for sugar. That's right, sugar beets can be used to make sugar! It is also used for feeding livestock and deer. Cold Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production.

[PE22-50 - Sugar Daddy Snap Pea Seeds](#)

60 days. Pisum sativum. Open Pollinated. Sugar Daddy Snap Peas. The plant produces heavy yields of 2 to 3½" long snap peas. This variety produces high-quality stringless pods! Perfect in salads and stir-fries. Vines need little support. It is suitable for those early spring plantings when the soil is still cool and wet. An excellent choice for home gardens. United States Department of Agriculture, PI 601028. Disease Resistant: FW (Race 1), PEMV, PLR, PM.

[TM662-20 - Sugar Plum Tomato](#)

102 days. Solanum lycopersicum. (F1) The plant produces heavy yields of ½ to ¾ oz bright red grape tomatoes. They are very sweet and flavorful. It has been rated the best-tasting grape tomato in taste tests! Perfect for salads and snacks. An excellent choice for home gardens. Indeterminate.

[TM471-20 - Stupice Tomato](#)

55 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 2 to 4 oz red tomatoes. One of the best-tasting early tomatoes. Perfect for salads and slicing. Suitable for Northern regions. Cold Tolerant. A potato leaf variety. An excellent choice for home gardens. An heirloom variety from the Czech Republic. United States Department of Agriculture, PI 250436. Indeterminate.

[WM18-20 - Sugar Baby Watermelon Seeds](#)

75 days. Citrullus lanatus. Open Pollinated. Sugar Baby Watermelon. This early maturing plant produces good yields of small 8 to 10 lb oval watermelons. The red flesh is very sweet and flavorful. Just the right size to fit in your refrigerator. It has a tough rind and resists cracking. This bush plant is suitable for small gardens. It grows well in the North, as it's one of the earliest watermelons available. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. An 1859 heirloom variety. United States Department of Agriculture, NSL 5319.

[CN47-50 - Sugar Buns Corn Seeds](#)

72 days. Zea mays. (F1) Sugar Buns Corn. This early producing variety produces good yields of 7" long ears of yellow corn. The ears have 14 to 16 rows of tender kernels. One of the finest tasting corn you can grow! It stays fresher longer too. Excellent for canning and freezing. This is a Sugary Enhanced Variety (se+) which means these varieties will stay sweet and tender for 10-14 days after reaching maturity. An excellent choice for home gardens and market growers. Disease Resistant: NCLB.

[TM556-20 - Sugar Lump Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 1 oz red cherry tomatoes. They are sweet and flavorful. Perfect for salads and snacks. Grows in clusters of 6 to 12. Excellent choice for home gardens. An heirloom variety from Germany. United States Department of Agriculture, PI 355123. Indeterminate.

[PE17-50 - Sugar Snap Pea Seeds](#)

1979 All-America Selections Winner!

66 days. Pisum sativum. Open Pollinated. Sugar Snap Pea. The plant produces high yields of 2 to 3" long sweet snap peas. The superior strain produces sweet crisp pods. Seeds germinate in cold wet soil. The plant yields well over a long season in both hot and cold weather. Perfect fresh right off the vine, steamed, stir-fried, or served on vegetable trays. Cold Tolerant. Heat Tolerant. Requires trellis. An excellent choice for home gardens and market growers. An heirloom variety from the USA. United States Department of Agriculture, PI 642176. Disease Resistant: PLRV, PM.

[TM388-10 - Sugary Tomato](#)

2005 All-America Selections Winner!

60 days. Solanum lycopersicum. (F1) This early maturing plant produces heavy yields of 1 to 2 oz glossy reddish-pink grape tomatoes. They are very sweet and flavorful. Perfect for salads and snacks. Grows in clusters of 15 to 20, like grapes. Crack-Resistant. Suitable for containers, patios, or small gardens where space is very limited! An excellent choice for home gardens. Semi-Determinate.

[WM83-5 - Summer Flavor 720 Watermelons](#)

85 days. Citrullus lanatus. (F1) This plant produces high yields of 28 to 30 lb blocky oblong Nunhem's Jubilee type watermelons with a light to medium green rind with narrow dark stripes rind. It has firm crisp bright red flesh. The watermelons have an irresistible aroma when cut. Great for fruit salads and picnics. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and commercial production. A variety from the USA. Disease Resistant: A.

[HB134-500 - Summer Savory Seeds](#)

70 days. Satureja hortensis. Annual. Open Pollinated. Summer Savory. The plant produces good yields of peppery flavor leaves. Excellent for flavoring sausage, egg dishes, cabbage, sauerkraut, beans, peas, and lentil dishes. A peppery flavor to add to dressings and sauces. It is often called the bean herb. Also used to make tea for sore throats, asthma, the common cold, and a persistent cough. It is often used as a remedy for stings, insect bites, and skin irritations. It has an added benefit as it repels insects. An excellent choice for home gardens.

[TM290-10 - Suncherry Tomato](#)

58 days. Solanum lycopersicum. (F1) This early maturing plant produces heavy yields of ¼ to ½ oz bright red cherry tomatoes. They are very sweet and flavorful with thin skin. Perfect for salads and snacks. Grows in clusters of 20. An excellent choice for home gardens and market growers. Disease Resistant: V, F, St, TMV. Indeterminate.

[TM844-20 - Sungold Select Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces heavy yields of ¼ to 1 oz orange cherry tomatoes. They are very sweet, juicy, and flavorful. Perfect for salads, garnishes, or culinary creations. This is the dehybridized version of the Sungold Tomato. An excellent choice for home gardens, greenhouses, and market growers. Indeterminate.

[BR84-500 - Suiho Chinese Broccoli Seeds](#)

55 days. Brassica oleracea. (F1) Suiho Chinese Broccoli. This early maturing plant produces high yields of dark green broccoli. It has ¾" thick stems with rounded and slightly wrinkled, medium-sized green leaves. An Oriental green vegetable that is grown for its stalks and leaves. Suitable for spring, and fall planting. Also known as Noble Jade Broccoli and Emerald Green Broccoli. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[TM849-20 - Summer Pick Tomato](#)

75 days. Solanum lycopersicum. (F1) The plant produces high yields of 11 oz red beefsteak tomatoes. They are very flavorful. Perfect for salads, slicing, burgers, and sandwiches. Suitable for containers, patios, or small gardens where space is very limited! An excellent choice for home gardens. Disease Resistant: V, FFF, St, TSWV. Determinate.

[TM560-10 - Suncherry Extra Sweet Tomato](#)

55 days. Solanum lycopersicum. (F1) This early maturing plant produces heavy yields of ¼ to ½ oz bright red tomatoes. They are very sweet and flavorful with a 9-10 Brix degree in sugar content. Perfect for salads and snacks. Crack Resistant. An excellent choice for home gardens. Disease Resistant: F, TMV. Indeterminate.

[TM558-20 - Sungella Tomato Seeds](#)

70 days. Solanum lycopersicum. Open Pollinated. Sungella Tomato. This early maturing plant produces high yields of 2 oz orange tomatoes. They are very sweet, juicy, and flavorful. Perfect for salads, salsas, sauces, drying, garnishes, or culinary creations. Cold Tolerant. Low acidity variety. This is the dehybridized version. Suitable for greenhouse production. Always a great seller at Farmer's Markets! An excellent choice for home gardens, greenhouses, and market growers. Indeterminate.

[TM127-20 - Sungold Tomato Seeds](#)

57 days. Solanum lycopersicum. (F1) Sungold Tomato. This early maturing plant produces heavy yields of ¼ to 1 oz tangerine-orange cherry tomatoes. They are very sweet, juicy, fruity, and extremely flavorful with thin skin. One of the sweetest cherry tomatoes on the market with a high Brix count of 9-10. Winner of the prestigious British Horticultural Society Award of Garden Merit. Perfect for salads, garnishes, or culinary creations. It has a good shelf life too. Kids love them! Grows in clusters of 10 to 15 on grape-like trusses. The plant can grow as tall as 10 feet and requires support, either staking or cages. Suitable for greenhouse production. An excellent choice for home gardens, market growers, and greenhouse production. Disease Resistant: V, FF, N, TMV. Indeterminate.

[TM754-20 - Sunkeeper Tomato](#)

72 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 12 oz red tomatoes. They are sweet and flavorful. Perfect for salads, slicing, and sandwiches. The plant produces up to 20% more tomatoes than comparable varieties. Not only does it do well in Florida and other Southeastern states, but it also does well in Mountainous regions. A good quality tomato is used for commercial production. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: V, FFF, St, CR. Determinate.

[TM291-20 - Sunny Goliath Tomato](#)

70 days. Solanum lycopersicum. (F1) This early maturing plant produces good yields of 7 to 8 oz yellow tomatoes. They are very sweet, juicy, and flavorful. It turns from bright yellow to gold when mature, but can be harvested when yellow. This is a great tomato variety for those who don't like the highly acidic taste of most red tomatoes. Perfect for salads, garnishes, or culinary creations. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. Disease Resistant: V, F, N. Indeterminate.

[TM876-20 - Sunrise Bumble Bee Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of ¾ to 1 oz bi-colored yellow cherry tomatoes with red stripes on the outside and pink flesh inside. They are very sweet and delicious. Perfect for salads, garnishes, or culinary creations. It has an attractive appearance with a gemstone-like appeal. An Artisan Series variety. Suitable for greenhouse and open field production. Crack Resistant. An excellent choice for home gardens, greenhouses, market growers, and open field production. Indeterminate.

[TM280-20 - SunSugar Tomato Seeds](#)

62 days. Solanum lycopersicum. (F1) SunSugar Tomato. This early maturing plant produces heavy yields of ¾ to 1 oz orange cherry tomatoes. They are very sweet, juicy, and flavorful with thin skin. It has a rich full tomato flavor. High in Vitamin A. Rated the best-tasting tomato in trials. Perfect for salads and snacks. Grows in clusters. Crack Resistant. The plant requires support, either staking or cages. An excellent choice for home gardens. Disease Resistant: F, TMV. Indeterminate.

[TM253-10 - Super Bush Tomato](#)

70 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 5 to 6 oz red tomatoes. They are sweet and flavorful. Perfect for salads, slicing, and sandwiches. The plant has good foliage protecting tomatoes from sun-scald. Suitable for containers, patios, or small gardens where space is very limited! An excellent choice for home gardens. Disease Resistant: V, F, N. Determinate.

[TM663-10 - Sunny Boy Tomato Seeds](#)

70 days. Solanum lycopersicum. (F1) Sunny Boy Tomato. This early maturing plant produces high yields of 7 to 16 oz bright yellow beefsteak tomatoes. They are very flavorful. Perfect for salads, slicing, sandwiches, garnishes, or culinary creations. These attractive tomatoes will add a lovely addition to your home garden! It is a good shipper variety and holds up well. Excellent for East Coast stake production. Always a great seller at Farmer's Markets! Excellent choice for home gardens, market growers, and open field production. Indeterminate.

[TM447-20 - Sunray Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 8 to 10 oz golden-orange tomatoes. They are very sweet, meaty, and very flavorful. It has a rich full tomato flavor. Perfect for salads, slicing, sandwiches, and for making sauces. Also known as Golden Sunray Tomato. It is a cross between a Pan American and a Jubilee tomato. The plant has good foliage protecting tomatoes from sun-scald. Produces well even in hot, dryer growing regions. Heat Tolerant. Drought Tolerant. An excellent choice for home gardens and market growers. An heirloom variety was developed in 1950 by Dr. W. S. Porte at the USDA Station at Beltsville, Maryland, USA. United States Department of Agriculture, PI 270249. Disease Resistant: V, FF. Indeterminate.

[SP211-10 - Sunrise Orange Sweet Peppers](#)

70 days. Capsicum annuum. (F1) This early maturing plant produces good yields of large sweet bell peppers. Peppers turn from green, to yellow, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. It can be used at any color stage. Great fresh in salads and stuffed.

[TM129-20 - Super Beefsteak Tomato Seeds](#)

80 days. Solanum lycopersicum. Open Pollinated. Super Beefsteak Tomato. The plant produces high yields of 17 oz red beefsteak tomatoes. It has a rich full tomato flavor. Perfect for sandwiches, burgers, salads, and slicing. Crack Resistant. An excellent choice for home gardens and market growers. Disease Resistant: V, F, N. Indeterminate.

[HP226-10 - Super Chili Hot Peppers](#)

[1988 All-America Selections Winner!](#)

85 days. Capsicum annuum. (F1) The plant produces high yields of 1 ½" long by ½" wide hot peppers. Peppers grow upright in clusters, are very hot, and turn from light green to red when mature. The plant has green stems, green leaves, and white flowers. The plant produces 3 times as many peppers as regular chile peppers. Excellent when used in Thai, Szechwan, and Asian dishes. A variety from the USA.

[TM938-20 - Super Choice Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of 1 to 2 lb red beefsteak tomatoes. It has a rich old-fashioned tomato flavor. Perfect for sandwiches, salads, and slicing. An excellent choice for home gardens. An old Amish heirloom variety from Hobart Pearson of Berea, Kentucky. Indeterminate.

[SP148-10 - Super Heavyweight Pepper Seeds](#)

90 days. Capsicum annuum. (F1) Super Heavyweight Pepper. The plant produces good yields of giant 6" long by 8" wide sweet bell peppers. Peppers get as big as ½ lb, have thick walls, and turn from green to gold when mature. High in Vitamin C. Excellent for stuffing or eating fresh. Impress your neighbors and grow a Giant Sweet Pepper. An excellent choice for home gardens and market growers. An excellent choice for home gardens and Farmer's Markets. Disease Resistant: PVY, TMV.

[TM130-20 - Super Italian Paste Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Super Italian Paste Tomato. The plant produces heavy yields of 10 oz reddish-orange tomatoes. They are meaty, have very little juice, and few seeds. Perfect for making sauces, puree, paste, and canning. Low acidity variety. An excellent choice for home gardens. An heirloom variety from Italy. Indeterminate.

[TM262-20 - Super Marmande Tomato Seeds](#)

68 days. Solanum lycopersicum. Open Pollinated. Super Marmande Tomato. This early maturing plant produces high yields of 10 to 16 oz red beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for sandwiches, burgers, salads, slicing, and canning. An excellent choice for home gardens. An heirloom from France. Disease Resistant: V, F, A. Semi-Determinate.

[PM67-10 - Super Moon Pumpkin Seeds](#)

100 days. Cucurbita maxima. (F1) Super Moon Pumpkin. The plant produces good yields of 25 to 50 lb white pumpkins. This unique pumpkin has delicious yellow flesh. Excellent for painting, carving, roasting, or making pumpkin soup. Kids love white pumpkins! An excellent choice for home gardens and Farmer's Markets.

[TM203-10 - Super Fantastic Tomato](#)

70 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 10 oz red beefsteak tomatoes. They are juicy, meaty, and very flavorful. Perfect for salads, slicing, sandwiches, salsas, drying, and canning. The plant requires support, either staking or cages. Plants produce 60 lbs of tomatoes. Excellent choice for home gardens and market growers. Disease Resistant: V, F, N. Indeterminate.

[HP227-10 - Super Hot Hungarian Pepper Seeds](#)

55 days. Capsicum annuum. (F1) Super Hot Hungarian Pepper. This early maturing plant produces good yields of 8" long by 2" wide Hungarian hot peppers. Peppers are very hot and turn from light green, to bright creamy yellow, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for fresh use, pickling, or frying. Suitable for short season regions. An excellent choice for home gardens and market growers.

[HP2480-20 - Super Khi Hot Peppers](#)

75 days. Capsicum annuum. Open Pollinated. This compact ornamental plant produces high yields of 1 ½" long by ½" wide Thai hot peppers. Peppers are hot, grow upright, and turn from green to red when they mature. The plant has green stems, green leaves, and white stems. Excellent for soups, chilis, Chinese dishes, Thai dishes, and making hot sauces. Suitable for containers. An excellent choice for home gardens. A variety from Vietnam. Scoville Heat Units: 50,000.

[CU126-20 - Super Max Cucumbers](#)

50 days. Cucumis sativus. (F1) The plant produces high yields of 4" long dark green cucumbers. These quality cucumbers are perfect for making pickles. They are crunchy, never get soft or mushy, and are very flavorful. They have very few seeds too. This is an improved version of Supremo Cucumber. An excellent choice for home gardens, market growers, and commercial growers. Disease Resistant: CMV, PRSV, WMV, ZYMV.

[SP69-10 - Super Red Pimento Sweet Peppers](#)

70 days. Capsicum annuum. Open Pollinated. This early maturing plant produces good yields of 5 ¾" long by 3 ¾" wide sweet peppers. Peppers turn from green to red when mature. This variety is much larger and thicker than other Pimento varieties. Great for salads, stuffing, pickling, cooking, and gourmet dishes. Suitable for freezing. Disease Resistant: TMV.

[WM70-5 - Super Seedless 7167 Watermelons \(Seedless\)](#)

90 days. Citrullus lanatus. (F1) The plant produces high yields of 16 to 20 lb oval watermelons with light green rinds with wide dark stripes and very narrow light green motley streaks. It is very flavorful with crispy deep red flesh. This is perfect for picnics. To produce seedless watermelons, a pollinator is required. We suggest growing Sugar Baby watermelons alongside Super Seedless 7167 as a pollinator. Good foliage protection from the sun with very large leaves. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. Disease Resistant: A.

Seedless Watermelons Require Special Attention. The seeds must be started indoors and the Miracle-Gro Seed Starting Mix must be kept at a constant 85 F. Start the seeds at the same time you plant the Sugar Baby pollinator.

[TM543-20 - Super Sioux Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 4 to 6 oz red tomatoes. They are sweet and very flavorful. Perfect for salads, slicing, sandwiches, sauce, and canning. It sets well in high temperatures and dry conditions. Heat and Drought Tolerant. Crack Resistant. Also known as Super Lakota Tomato. Excellent choice for home gardens. An heirloom variety was developed in 1944 by the Nebraska Experimental Station, Nebraska, USA. Semi-Determinate.

[HB32-250 - Superdukat Dill](#)

85 days. Anethum graveolens. Annual. Open Pollinated. The plant produces good yields of very flavorful leaves and seeds. This variety has more foliage than other varieties. Seeds are used as a pickling spice and leaves are used in omelets, fish dishes, and salads. Also used as a garnish. Leaves can be dried for later use. An excellent choice for home gardens.

[TM637-20 - Supersonic Tomato](#)

75 days. Solanum lycopersicum. (F1) The plant produces heavy yields of 8 to 12 oz red tomatoes. They are sweet and flavorful. Perfect for salads, slicing, sandwiches, and canning. Suitable for the Northeast region of the United States. Crack Resistant. An excellent choice for home gardens, farmer's markets, and market growers. Disease Resistant: V, F. Indeterminate.

[TM132-20 - SuperSweet 100 Tomato Seeds](#)

65 days. Solanum lycopersicum. (F1) SuperSweet 100 Tomato. This early maturing plant produces high yields of 1 oz red cherry tomatoes. They are super sweet, very flavorful, and extra high in Vitamin C. Perfect for fresh eating right off the vine or in salads. One of the best-tasting bite-sized cherry tomatoes! The plant produces hundreds of cherry tomatoes in clusters. The plant requires support, either staking or cages. An excellent choice for home gardens, farmer's markets, and market growers. Disease Resistant: V, F, N. Indeterminate.

[SP126-20 - Super Shepherd Pepper Seeds](#)

75 days. Capsicum annuum. Open Pollinated. Super Shepherd Pepper. The plant produces good yields of 7 1/2" long by 2" wide Cubanelle sweet peppers. Peppers turn from green to dark red when mature. The plant has green stems, green leaves, and white flowers. They are very sweet, very thick, and very flavorful. Perfect for salads, frying, grilling, roasting, and stuffing. A great freezing variety! An excellent choice for home gardens. A variety from Italy.

[PE18-50 - Super Sugar Snap Peas](#)

66 days. Pisum sativum. Open Pollinated. Super Sugar Snap Peas. The plant produces high yields of 3" long sweet snap peas. The sweetest sugar snap peas ever developed! Perfect fresh right off the vine, steamed, stir-fried, or served on vegetable trays. Suitable for freezing. This variety is more productive than other varieties. An excellent choice for home gardens and market growers. This variety is protected by the Plant Variety Protection Act, #9600007. United States Department of Agriculture, PI 591835 PVPO. Disease Resistant: PLRV, PM.

[TM767-10 - SuperSauce Tomato Seeds](#)

70 days. Solanum Lycopersicum. (F1) SuperSauce Tomato. This early maturing plant produces high yields of 1 to 2 1/2 lb red tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for making sauce, puree, paste, and canning. It is also great for sandwiches, burgers, salads, and slicing. It is so large, 5 1/2" long by 5" wide, one tomato fills an entire sauce jar. The World's Largest Paste Tomato! It is super-easy to peel, making homemade sauce quick and easy. Excellent choice for home gardens. Diseases Resistant. Indeterminate.

[CB62-100 - SuperStar Cabbage Seeds](#)

90 days. Brassica oleracea. (F1) SuperStar Cabbage. This high-quality variety produces good yields of 3 lb green cabbage. The plant is very uniform and holds its shape well. Good for making salads, slaws, stuffed cabbage, and cooked dishes. It holds well in the field. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. Disease Resistant: BR, FY

[TM819-20 - Supremo Tomato](#)

68 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 5 to 6 oz bright red Roma tomatoes. They have thick walls, are meaty, and are very flavorful. Perfect for salads, salsas, making sauce, puree, paste, and canning. It has a long shelf life. Heat Tolerant. Suitable for containers, patios, or small gardens where space is very limited! An excellent choice for home gardens and market growers. Disease Resistant: V, FFF, N, BS, TSWV. Determinate.

[HP2238-10 - Sureno Pepper Seeds](#)

75 days. Capsicum annuum. (F1) Sureno Pepper. The plant produces good yields of large 3 ¼" long by ½" wide Serrano hot peppers. Peppers are very hot and turn from dark green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Sureno is a good substitute for Serrano Del Sol Peppers. Excellent choice for home gardens and market growers. A variety from the USA. Disease Resistant: PVY.

[TM665-20 - Sweet 100 Tomato Seeds](#)

65 days. Solanum lycopersicum. (F1) Sweet 100 Tomato. This early maturing plant produces high yields of ½ to ¾ oz red cherry tomatoes. They are very sweet and flavorful with high vitamin C content. Perfect fresh eating right off the vine or in salads. Grows in clusters. The plant requires support, either staking or cages. Excellent choice for home gardens. United States Department of Agriculture, PI 647568. Indeterminate.

[SP384-20 - Sweet Arrow Sweet Peppers](#)

62 days. Capsicum annuum. (F1) This early maturing plant produces good yields of 8 ½" long by 2" wide elongated sweet peppers. Peppers turn from green to yellow when mature. Excellent for grilling, frying, stuffing, salads, and cooking. An excellent choice for home gardens, Farmer's Markets, and Market growers. A variety from the USA.

[SP381-10 - Sweet Bella Sweet Peppers](#)

73 days. Capsicum annuum. (F1). The plant produces good yields of large 4 ½" long by 3 ½" wide sweet bell peppers. Peppers have thick walls and turn from green to red when mature. This is a very disease-resistant variety. A perfect stuffing pepper. An excellent choice for home gardens, market growers, and open field production. Disease Resistant: BLS, TMV.

[CU25-20 - Suvo Long Cucumber Seeds](#)

65 days. Cucumis sativus. Open Pollinated. Suvo Long Cucumber. The plant produces excellent yields of thin 12 to 18" long cucumbers. It is delicious, tender, crispy, burpless, and non-bitter. It can be picked at any stage, from very young to fully mature. Excellent for salads and bread and butter pickles. Grow it on a trellis for straight cucumbers. This variety grows well in hot weather. An excellent choice for home gardens. An heirloom variety from China.

[SP387-20 - Sweet and Spicy Pepper Mix Seeds](#)

70 - 85 days. Capsicum annuum. Open Pollinated. Sweet and Spicy Pepper Mix. The plants produce good yields of a great mix of both sweet and spicy peppers. The mix includes Cal Wonder Sweet Peppers, Large Red Cherry Sweet Peppers, White Bell Sweet Peppers, Orange Bell Sweet Peppers, Golden Cal Wonder Sweet Peppers, and Hungarian Hot Wax Peppers. Peppers turn from green to red, yellow, and white when they mature. Excellent for salads, stuffing, and cooking. A variety from the USA.

[SP70-20 - Sweet Banana Pepper Seeds](#)

[1941 All-America Selections Winner!](#)

65 days. Capsicum annuum. Open Pollinated. Sweet Banana Pepper. This early maturing plant produces high yields of 7" long by 1 ¼" wide banana shaped sweet peppers. Peppers have thick walls, are sweet, and turn from bright yellow to red when mature. Most commonly used when yellow. Perfect for salads, frying, pickling, and freezing. An excellent choice for home gardens, farmer's markets, and market growers. A variety from the USA. United States Department of Agriculture, PI 592816.

[HP2450-20 - Sweet Bonnet Hot Peppers](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces good yields of 5" long by 1" wide Scotch Bonnet hot peppers. Peppers are not hot, grow upright, and turn from green to red when they mature. This is a sweet version of the hot Scotch Bonnet. It has a sweet flavor with a smoky tint like the true hot Scotch Bonnet, but with little heat. There is just a small bit of heat that is detectable which gives it the flavor of the hot Scotch Bonnet strain. The plant has green stems, green leaves, and creamy-yellow flowers. This pepper is popular in the Caribbean islands and is found in many Caribbean dishes. An excellent choice for home gardens and market growers. A variety from the Caribbean region.

[BR58-50 - Sweet Bunch Broccoli Seeds](#)

25 days. Brassica oleracea. (F1) Sweet Bunch Broccoli. This early-maturing plant produces good yields of green broccoli. The 3 - 4" heads are tight dome-shaped with small green beads. It is very flavorful. It has excellent side shoot production after the main crown harvest. Suitable for spring and fall planting. An excellent choice for home gardens, market growers, and commercial growers. A variety from the USA.

[TM133-20 - Sweet Chelsea Tomato Seeds](#)

65 days. Solanum lycopersicum. (F1) Sweet Chelsea Tomato. This early maturing plant produces high yields of ¾ to 1 oz red cherry tomatoes. They are very sweet and flavorful. Perfect for salads, and snacks. Grows in clusters of 15 to 20. The plant requires support, either staking or cages. Drought Tolerant. Crack Resistant. An excellent choice for home gardens and market growers. Disease Resistant: V, FF, N, TMV. Indeterminate.

[HB87-250 - Sweet Dani Basil](#)

1998 All-America Selections Winner!

61 days. Ocimum basilicum. Annual. Open Pollinated, The plant produces good yields of basil leaves. The leaves are beautiful and have a lemon-scented taste. Excellent for salads and Thai dishes. Good drying and freezing variety. Suitable for containers. An excellent choice for home gardens.

[TM872-20 - Sweet Gold Tomato](#)

60 days. Solanum lycopersicum. (F1) Early maturing plant produces heavy yields of ½ to ¾ oz bright golden yellow cherry tomatoes. They are sweet, fruity, and delicious. Perfect for salads, garnishes, or culinary creations. This is a golden yellow version of the Sweet Million tomato. Grows in clusters. Crack-Resistant. Excellent choice for home gardens and market growers. Disease Resistant: F, TMV. Indeterminate.

[HP2469-10 - Sweet Heat Peppers](#)

56 days. Capsicum annuum. (F1) This early maturing compact plant produces high yields of 4" long by 1 ½" wide red sweet bell peppers with a mildly spicy flavor. The plant has green stems, green leaves, and white flowers. These peppers have a slightly spicy taste with a smoky flavor, similar to the spicy flavor of a Pepperoncini. Good for grilling, salsas, or used fresh in salads. Suitable for containers, pots, patios, hanging baskets, and small gardens.

[SP201-20 - Sweet Cayenne Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Sweet Cayenne Pepper. The plant produces high yields of giant 12" long by ½" wide Cayenne sweet peppers. Peppers are very sweet, have thin walls, and turn from green to crimson red when mature. The plant has green stems, green leaves, and white flowers. The plant is loaded with amazingly long Cayenne peppers. Excellent drying pepper for making pepper flakes and seasoning spice powder. Excellent for stir fry. Enjoy the Cayenne pepper without the heat! Excellent choice for home gardens. A variety from the USA.

[SP196-20 - Sweet Chocolate Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of chocolate sweet peppers. Peppers are very sweet, have thick walls, and turn from green to chocolate when mature. The interior walls are brick red. The plant has green stems, green leaves, and white flowers. Excellent fresh in salads or in gourmet dishes. A variety from the USA.

[SQ20-20 - Sweet Dumpling Squash Seeds](#)

105 days. Cucurbita pepo. Open Pollinated. Sweet Dumpling Squash. The plant produces high yields of ½ lb size ivory and dark green color skin pumpkin-shaped squash. The flesh is golden and is as sweet as honey. Perfect stuffed with meat and baked like bell pepper, or prepared like squash. Very productive and keeps well. An heirloom variety from the Native Americans. Always a great seller at Farmer's Markets! An excellent choice for home gardens, farmer's markets, and market growers. A winter squash variety.

[TM561-10 - Sweet Hearts Tomato](#)

60 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of ¾ to 1 oz bright red grape tomatoes. They are super sugary sweet and delicious. One of the best grape tomatoes on the market! Perfect for salads, snacks, and vegetable platters. Grows in clusters. It has a long shelf life. Crack Resistant. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. Disease Resistant: F, TMV. Indeterminate.

[SQ52-10 - Sweet Mama Squash Seeds](#)

1979 All-America Selections Winner!

100 days. Cucurbita maxima. (F1) Sweet Mama Squash. This semi bush plant produces high yields of 3 to 4 lb dark green kabocha squash. The dark yellow flesh is extremely sweet and nutty. Excellent storage variety that keeps well for 4 months. The plant has space-saving short vines making it ideal for small gardens. Also known as Japanese Pumpkin. An excellent choice for home gardens, farmer's markets, market growers, open field production, and commercial production. A winter squash variety.

[HB61-1000 - Sweet Marjoram Seeds](#)

90 days. Origanum majorana. Perennial. Open Pollinated. Sweet Marjoram. The plant produces good yields of very flavorful Marjoram leaves. This herb has an Oregano-like flavor. Used in meats, stews, casseroles, poultry, sausages, and sauces. The flowers are used to garnish salads, soups, stews, sauces, and stuffing. It can be used dried or fresh. Suitable for containers. [SQ37-20 - Sweet Meat Squash Seeds](#)

110 days. Cucurbita maxima. Open Pollinated. Sweet Meat Squash. The plant produces high yields of 10 to 20 lb deep sea blue-green squash. The flesh is orange and very sweet. The squash can be used in soups and making pumpkin pies. Excellent canning and freezing variety. Sweetness and flavor improve while in storage. A superb keeping quality squash, stores for up to 6 months. Vines grow up to 10 feet long. It was introduced by the Gill Brother's Seed Company in Portland, Oregon in 1947. An heirloom variety from Oregon, USA. An excellent choice for home gardens, farmer's markets, and market growers. United States Department of Agriculture, NSL 22026. A winter squash variety.

[TM135-20 - Sweet Million Tomato Seeds](#)

65 days. Solanum lycopersicum. (F1) Sweet Million Tomato. This early maturing plant produces heavy yields of ¼ to ½ oz red cherry tomatoes. They are very sweet and flavorful. Perfect fresh eating right off the vine or in salads. Winner of the Royal Horticultural Society Award of Garden Merit. It has impressive disease resistance. The plant produces over 500 cherry tomatoes! Crack Resistant. The plant requires support, either staking or cages. An excellent choice for home gardens and market growers. Disease Resistant: V, FF, N, St, TMV, ToMV. Indeterminate.

[TM664-20 - Sweet Pea Currant Tomato Seeds](#)

75 days. Solanum pimpinellifolium. Open Pollinated. Sweet Pea Currant Tomato. The plant produces high yields of tiny ¼ oz red cherry tomatoes. They are very sweet and very flavorful. It has a rich full tomato flavor. Perfect for salads, garnishes, or culinary creations. Grows of clusters of 10 to 12. The plant produces thousands of tiny cherry tomatoes. The best red currant tomato. Suitable for container gardening, patios, hanging baskets, or small gardens where space is very limited! An excellent choice for home gardens. Indeterminate.

[SP75-20 - Sweet Pickle Sweet Peppers](#)

65 days. Capsicum annuum. Open Pollinated. This early maturing plant produces heavy yields of 2" long by 1" wide sweet peppers. Peppers are not hot, grow upright in clusters, have thick flesh, and turn from orange, yellow, purple, to red when mature. Perfect for making beautiful pickled peppers. Excellent for salads and garnishes. Good freezing variety. Suitable for containers, pots, small gardens, square foot gardens, patios, raised gardens, borders/rock gardens. An excellent choice for home gardens. A variety from the USA.

[WM59-20 - Sweet Princess Watermelons](#)

95 days. Citrullus lanatus. Open Pollinated. The plant produces good yields of 30 lb deep pink flesh watermelons. It has a juicy sweet taste. It has a yellow-green rind with a medium-green stripe. This variety has a thin tough rind making it a good shipper variety. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A variety from the USA. Disease Resistant: A, FW.

[HP1697-20 - Sweet Red Habanero Pepper Seeds](#)

85 days. Capsicum chinense. Open Pollinated. Sweet Red Habanero Pepper. The plant produces good yields of ¾" long by 1" wide sweet Habanero peppers. Peppers are sweet, not hot, and turn from light green, to orange, to red when mature. It has the same fruity flavor as Habanero peppers but without the heat. The plant has green stems, green leaves, and white flowers. An excellent choice for home gardens. A variety from the Caribbean region.

[CU26-10 - Sweet Slice Cucumber Seeds](#)

63 days. Cucumis sativus. (F1) Sweet Slice Cucumber. This plant produces high yields of 9 to 12" long dark green cucumbers. They are sweet, bitter-free, burpless, crisp, tender, with thin skin, so thin it requires no peeling. Its superior quality gives it gourmet status. After a sample taste, customers know Sweet Slice is a cut above the rest. Excellent choice for home gardens and market growers. Disease Resistant: CMV, DM, PM, PRSV, WMV, ZYMV.

[CU27-10 - Sweet Success Cucumber Seeds](#)

1983 All-America Selections Winner!

58 days. Cucumis sativus. (F1) Sweet Success Cucumber. The plant produces good yields of 12" long seedless and burpless dark green cucumbers. This high quality cucumber has tender skin and grows perfectly straight if grown on trellis or stakes. This is a parthenocarpic variety and sets fruit without bee pollination making it an excellent variety for greenhouse and open field production. One of the most disease resistant cucumbers on the market. Excellent choice for home gardens, greenhouses, market growers, and open field production. Disease Resistant: ALS, Ccu, CMV, TLS, WMV.

[SP341-20 - Sweet Sunset Sweet Peppers](#)

2015 All-America Selections Winner!

85 days. Capsicum annuum. (F1) The plant produces high yields of 7" long sweet banana peppers. Peppers turn from yellow to red when mature. This variety can be used fresh, fried, pickled or used in salads, sandwiches and pizza toppings.

[HB16-500 - Sweet Thai Basil Seeds](#)

59 days. *Ocimum basilicum*. Annual. Open Pollinated. Sweet Thai Basil. The plant produces very aromatic-spicy anise clove-scented basil leaves. Used in many Thai and Vietnamese dishes. Also known as Horapha in Thailand and Hun Que in Vietnam. Suitable for containers. An excellent choice for home gardens.

[CU2-10 - Sweeter Yet Cucumber Seeds](#)

48 days. *Cucumis sativus*. (F1) Sweeter Yet Cucumber. This early maturing plant produces high yields of 10 to 12" long dark green cucumbers. A dual-purpose non-bitter cucumber that can be used fresh in salads or pickled. Cucumbers are sweet, burpless, bitter-free, and their skins require no peeling. Compact semi-bush type plants produce continually all season long. One of the most disease resistant cucumbers on the market. An excellent choice for home gardens, market growers, and open field production. Disease Resistant: CMV, DM, PM, PRSV, ZYMV.

[HB97-1000 - Sylvetta Arugula Seeds](#)

45 days. *Diplotaxis tenuifolia*. Annual. Open Pollinated. Sylvetta Arugula. This early maturing plant produces excellent yields of beautiful dark green arugula leaves. Used in salads and sandwiches. It is very flavorful with a spicy taste and is added to Pasta dishes. Slower to bolt than other varieties. Also known as Rucola Selvatica. Heat Tolerant. Cold Tolerant. Suitable for hydroponic gardening. Excellent choice for home gardens, greenhouses, market growers, and open field production. A variety from the Mediterranean region.

[HP540-10 - Tabasco Hot Peppers \(McIlhenny-Genuine\)](#)

120 days. *Capsicum frutescens*. The plant produces heavy yields of small 1 ¼" long by ¼" wide hot peppers. The peppers are very hot, grow upright in clusters, and turn from light yellow, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Very productive, produces over 800 peppers on one plant. The seeds were originally obtained from Edmund McIlhenny, Jr. in 1996. Peppers are grown to make the famous Tabasco Hot Sauce. Suitable for growing indoors in a large pot year-round. A variety from Louisiana, USA.

[SQ72-10 - Table Ace Squash Seeds](#)

78 days. *Cucurbita pepo*. (F1) Table Ace Squash. This semi bush plant produces good yields of 6" long by 5" wide black-green Acorn squash. The squash has delicious bright orange flesh. The finest, tastiest acorn you'll ever grow! It's one of the exceptional quality squash that can be found. The flesh has almost no fibers and no stringiness. Stores well all winter. The vines are compact and yield 5 to 7 squash, making them ideal for small home gardens. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. A winter squash variety.

[TM579-10 - Sweet Treats Tomato](#)

70 days. *Solanum lycopersicum*. (F1) This early maturing plant produces heavy yields of ¾ to 1 oz pink cherry tomatoes. They are very sweet and flavorful. Perfect for salads, garnishes, or culinary creations. Grows in clusters of 12 to 25. Crack Resistant. An excellent choice for home gardens. Disease Resistant: FF, St, TMV. Indeterminate.

[TM189-20 - Sweetie Tomato](#)

65 days. *Solanum lycopersicum*. Open Pollinated. This early maturing plant produces high yields of ¾ to 1 oz red cherry tomatoes. They are incredibly sweet and very flavorful. Perfect for salads and snacks. Plants are highly adaptable to adverse growing conditions and are well tolerant of cool, wet conditions. An excellent choice for home gardens. Indeterminate.

[HP291-10 - Tabasco Greenleaf Hot Peppers](#)

120+ days. *Capsicum frutescens*. Open Pollinated. The plant produces high yields of 1 ¼" long by ¼" wide hot peppers. Peppers are very hot, grow upright in clusters, have medium-thin flesh, and turn from pale yellow, to yellow, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for making hot sauce. This variety is more disease-resistant. Variety developed by Auburn University, Alabama, USA. United States Department of Agriculture, NSL 79722. Disease Resistant: TEV.

[HP232-20 - Tabasco Pepper Seeds](#)

120 days. *Capsicum frutescens*. Open Pollinated. Tabasco Pepper. The plant produces heavy yields of small 1 ¼" long by ¼" wide hot peppers. Peppers are very hot, grow upright in clusters, and turn from light greenish-yellow to orange, to red when mature. The plant has green stems, green leaves, and white flowers. An heirloom variety dating back to 1848 which resurfaced after the Civil War and was grown to make the famous Tabasco hot sauce. Suitable for growing indoors in a large pot year-round. [TR12-10 - Tea Leaf Tree](#)

Camellia sinensis. Perennial. Open Pollinated. This small tree produces excellent yields of green tea leaves. Tea is the world's most consumed drink. Young leaves are processed to make tea and green tea beverages. It is used for medicinal use too. Tea stimulates the central nervous system, is diuretic and astringent, relaxes smooth muscles, and increases coronary flow. It has significant anticancer and antioxidant effects and even has been shown to prevent tooth decay on account of its high fluoride content. Can be grown indoors in containers. A variety from India.

[HP2031-10 - Telica Hot Peppers](#)

75 days. Capsicum annuum. (F1) The plant produces heavy yields of extra large 4 3/4" long by 1 1/4" wide Jalapeno peppers. Peppers are hot, have thick flesh, and turn from shiny green to red when mature. The plant has green stems, green leaves, and white flowers. Always a great seller at Farmer's Markets! Excellent choice for home gardens, market growers, and open field production. Disease Resistant: BLS, PVY, TMV.

[TM848-20 - Ten Fingers of Naples Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces heavy yields of giant 3 oz red Roma tomatoes. Tomatoes grow 5 to 6" in length! They have thick walls, are meaty, and are very flavorful. Perfect for making sauce, puree, paste, salsa, cooking, and canning. One of the best-tasting paste tomatoes. Also known as Dix Doights de Naples Tomato. Grows in clusters. Excellent choice for home gardens. An heirloom variety from Naples, Italy. Determinate.

[BN45-50 - Tenderette Bean Seeds](#)

55 days. Phaseolus vulgaris. Open Pollinated. Tenderette Bean. This bush-type plant produces heavy yields of 6" long delicious stringless green beans. It is considered one of the best green beans on the market. Excellent canning and freezing variety. An excellent choice for home gardens, farmer's markets, and market growers. United States Department of Agriculture, PI 549833. Disease Resistant.

[BR36-25 - Tendergreen Broccoli Seeds](#)

67 days. Brassica oleracea. (F1) Tendergreen Broccoli. This early maturing plant produces excellent yields of 7" diameter blue-green dome-shaped broccoli. It is tender and very delicious. Great for fresh use in salads, steamed, and stir-fries. An excellent choice for home gardens and market growers.

[CU38-20 - Tendergreen Burpless Cucumbers](#)

55 days. Cucumis sativus. Open Pollinated. The plant produces heavy yields of 6 to 8" long medium green cucumbers. It is crispy, tender, burpless, bitter-free, and acid-free. It has thin skin and doesn't need any peeling. Great for salads and for pickling when cucumbers are small. Does well in high soil moisture and also cold soil. Best when harvested when 3 to 6" long. An excellent choice for home gardens and market growers. An heirloom dating back to the 1930s. United States Department of Agriculture, NSL 106653. Disease Resistant: CMV, DM, PM.

[CT17-750 - Tendersweet Carrot Seeds](#)

75 days. Daucus carota. Open Pollinated. Tendersweet Carrot. The plant produces flavorful 8 to 10" long rich orange coreless carrots. This high-quality variety holds the color during cooking. Great for cooking, canning, pickling, baking, and making carrot juice. An excellent choice for home gardens. United States Department of Agriculture, PI 634653. An heirloom variety from the USA.

[CA58-50 - Tendral Verde Tardif Melon Seeds](#)

110 days. Cucumis melo. Open Pollinated. Tendral Verde Tardif Melon. The plant produces good yields of melons with dark green skin. It has sweet white flesh. One of the best-tasting melons. Excellent choice for home gardens. An heirloom variety from Spain. United States Department of Agriculture, AMES 13324.

[PN4-20 - Tennessee Red Valencia Peanut Seeds](#)

110 days. Arachis hypogaea. Open Pollinated. Tennessee Red Valencia Peanut. This bush-type plant produces high yields of large peanuts. Each shell contains 2 to 5 red-skinned peanuts. Perfect boiled, roasted, made into peanut butter, or pressed for oil. This variety can grow in different types of soils. This variety does not need to be hilled, as most peanuts do, and it will produce even in clay soils. An excellent choice for home gardens, market growers, and open field production. An heirloom variety dating back to the 1930s. United States Department of Agriculture, PI 262119. **(SHELLED PEANUTS)**

[HP239-20 - Tepin Hot Peppers](#)

200 days! Capsicum annuum. Open Pollinated. The plant produces good yields of 1/2" pea-size hot peppers. Peppers are very hot and turn from green, to orange to red when mature. The plant has green stems, green leaves, and white flowers. Plant in pots and bring them indoors over the winter. Excellent choice for home gardens. Plants grow wild in Mexico and parts of the United States.

Important Notice: Seeds can take 3 to 12 weeks to germinate at 85 F. Please follow the Planting Instructions on the website for better results.

[BN46-50 - Tendergreen Improved Bean Seeds](#)

53 days. Phaseolus vulgaris. Open Pollinated. Tendergreen Improved Bean. This early maturing bush-type plant produces good yields of 5 1/2" long by 1/2" wide straight stringless green beans. Excellent canning and freezing variety. Foliage provides protection from the sun. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 549566. Disease Resistant: BCMV.

[WM19-20 - Tendersweet Watermelon Seeds](#)

85 days. Citrullus lanatus. Open Pollinated. Tendersweet Watermelon. The plant produces good yields of 35 to 40 lb watermelons. It has orange flesh which is very sweet and delicious. The family will love this variety! An excellent choice for home gardens and specialty market growers. United States Department of Agriculture, NSL 5330.

[SP95-20 - Tennessee Cheese Pepper Seeds](#)

82 days. Capsicum annuum. Open Pollinated. Tennessee Cheese Pepper. The plant produces good yields of apple or tomato-shaped sweet peppers. Peppers have thick walls and turn from green to red when mature. Excellent for making high-quality paprika. Also good stuffing and pickling pepper. A heirloom variety from a family of Kingston, Tennessee, USA. A variety originally from Spain.

[SQ118-10 - Tennessee Sweet Potato Squash Seeds](#)

95 days. Cucurbita mixta. Open Pollinated. Tennessee Sweet Potato Squash. The plant produces excellent yields of 12 lb creamy white pear-shaped squash with very faint green stripes. The plant has huge vines. The flesh is thick and creamy white and is more delicious than a sweet potato. Great when fried in a skillet with onions, garlic, and a little salt. Perfect for making pies and custards. Excellent keeper stores well for 6 months. It was grown by Thomas Jefferson at Monticello, Virginia. An heirloom variety that was introduced in the 1780s from Jamaica via the slave trade. An excellent choice for home gardens. United States Department of Agriculture, NSL 5197. A winter squash variety.

[BN138-50 - Texas Cream 40 Cowpea Seeds](#)

65 days. Vigna unguiculata. Open Pollinated. Texas Cream 40 Cowpeas. This semi-bush plant produces high yields of 6 to 8" long pods. The plants are small and have light-colored peas. They are highly tolerant of drought and a wide variety of soil conditions, including heavy clay and sandy soils. White cowpeas. An excellent choice for home gardens. United States Department of Agriculture, PI 293577.

[BN139-50 - Texas Cream 8 Cowpea Seeds](#)

80 days. Vigna unguiculata. Open Pollinated. Texas Cream 8 Cowpeas. This bush type plant produces good yields of light-colored cowpeas. The plants are small. They are highly tolerant of drought and a wide variety of soil conditions, including heavy clay and sandy soils. Cream cowpeas. An excellent choice for home gardens.

[HB184-500 - Thai Basil](#)

75 days. Ocimum basilicum. Annual. Open Pollinated. The plant produces high yields of basil leaves. The leaves are very aromatic. It has a unique flavor that is unlike other traditional basil. The aroma is stronger, it is sweeter, and has a peppery flavor. The Thai Basil has purple stems with green leaves. Excellent for soups, curry, and Vietnamese dishes. Suitable for containers. An excellent choice for home gardens. A variety from Thailand.

[HP2307-20 - Thai Hot Culinary Hot Peppers](#)

90 days. Capsicum annuum. Open Pollinated. The plant produces high yields of 3 ½" long by ¼" wide upright hot peppers. Peppers are very hot, grow in clusters, and turn from medium green to dark red when mature. The plant has green stems, green leaves, and white flowers. Peppers are thin walls and easily dried. Peppers are very flavorful and perfect for cooking. A beautiful edible dwarf ornamental plant.

[HP1963-20 - Thai Hot Peppers \(Strain 2\)](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces high yields of ½" long hot Tabasco-type peppers. Peppers are very hot, grow upright, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. The plant averages 200 fruits per plant. Great for salsa, pickling, drying, and making hot sauce. Also used in many Oriental dishes. Suitable for small gardens and containers. A variety from Thailand.

[HP827-10 - Thai Orange Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Thai Orange Pepper. The plant produces heavy yields of 2" long by ¼" wide hot peppers. Peppers are very hot and turn from green to orange when mature. The plant has green stems, green leaves, and white flowers. Excellent cooking pepper and stir-fire. A rare variety from Thailand.

[HP1601-20 - Thai Bangkok Hot Peppers](#)

90 days. Capsicum frutescens. Open Pollinated. The plant produces heavy yields of 2" long by ¼" wide hot peppers. Peppers are hot and turn from green to purple-tinted when mature. The plant has green stems, green leaves, and white flowers. A variety from Thailand.

[HP244-20 - Thai Dragon Pepper Seeds](#)

85 days. Capsicum annuum. (F1) Thai Dragon Pepper. The plant produces good yields of 2 ½" long by ½" wide hot peppers. Peppers are very hot and turn from green to red when they mature. The plant has green stems, green leaves, and white flowers. Used in Thai and Vietnamese cuisine. An excellent choice for home gardens and market growers. Scoville Heat Units: 100,000.

[HP245-20 - Thai Hot Ornamental Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 1" long by ¼" wide hot peppers. Peppers are very hot, and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. This edible pepper is used in Oriental dishes. Perfect Ornamental house plant. A variety from Thailand. Scoville Heat Units: 100,000.

[EG44-20 - Thai Long Green Eggplants](#)

85 days. Solanum melongena. Open Pollinated. The plant produces good yields of beautiful 10 to 12" long light green eggplants. One of the best-tasting eggplants. The white flesh is mild and flavorful. The tender skin does not require peeling. Used extensively in Thai dishes. Drought Tolerant. Suitable for container gardening. Excellent choice for home gardens and market growers. United States Department of Agriculture, PI 666079. An heirloom variety from Thailand.

[HP243-20 - Thai Pepper Seeds \(Strain 1\)](#)

85 days. Capsicum annuum. Open Pollinated. Thai Pepper. The plant produces good yields of 2" long by ¼" wide hot peppers. Peppers are very hot and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Peppers can be dried and used for making hot pepper sauce. Peppers are used in many Oriental dishes. A beautiful ornamental pepper plant that is suitable for border planting and containers. A variety from Thailand. United States Department of Agriculture, PI 547069.

[TM599-20 - Thai Pink Pear Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of pink pear-shaped tomatoes. They are mildly sweet and flavorful. Perfect for salads, garnishes, or culinary creations. It is similar to the Thai Pink Egg tomato, but a shorter plant. It has an extended shelf life and stores well. Suitable for containers, patios, or small gardens where space is very limited! Excellent choice for home gardens. An heirloom variety from Thailand. Determinate.

[TM376-20 - Thessaloniki Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 6 to 8 oz red tomatoes. They are beautifully smooth, sweet, and very flavorful. It has a rich old-fashioned tomato flavor. Perfect for salads, slicing, sandwiches, and canning. The plant has good foliage protecting tomatoes from sun-scald. Crack Resistant. It has an extended shelf life and stores well. An excellent choice for home gardens and market growers. An heirloom variety from Greece dating back to the 1950s. United States Department of Agriculture, PI 303795. Indeterminate.

[TM459-20 - Three Sisters Tomato](#)

82 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 4 to 6 oz pink beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. It was developed in search of a perfect tomato! It is a cross of three distinctive tomatoes, a Roma type, a large salad type, and a flattened globe type. A potato leaf variety. Always a great seller at Farmer's Markets! Excellent choice for home gardens and market growers. An heirloom variety. Indeterminate.

[CU105-20 - Thunder Cucumbers](#)

55 days. Cucumis sativus. (F1) This early maturing plant produces high yields of 8 ½" long smooth glossy dark green cucumbers. A top commercial quality slicing variety with strong disease resistance. One of the most disease-resistant cucumbers on the market. An excellent choice for home gardens, market growers, and open field production. Disease Resistant: A, ALS, Ccu, CMV, DM, ZYMV.

[SQ120-20 - Thelma Sanders Sweet Potato Squash](#)

90 days. Cucurbita pepo. Open Pollinated. The plant produces high yields of 8" long cream-colored acorn squash. It matures to a creamy tan color. The golden-orange flesh is thick and delicious with a sweet potato and chestnut flavor. Perfect for making sauces, curries, and pies. Keeps well for months, with the longest shelf life of any squash, and sweetens during storage. This lighter-colored squash helps prevent sunscald in the deep South. An excellent choice for home gardens. An heirloom variety from Adair County, Missouri. A winter squash variety.

[PE20-50 - Thomas Laxton Sweet Pea Seeds](#)

68 days. Pisum sativum. Open Pollinated. Thomas Laxton Sweet Peas. The plant produces heavy yields of 3 to 4 ½" long pods of dark green sweet peas. The pods have 8 to 10 tender and flavorful peas. Perfect fresh in salads, in soups, and used in cooking. An excellent choice for home gardens and market growers. This pea carries Thomas Laxton's name but was bred by his sons William and Edward Laxton and named in honor of Thomas' contribution to horticulture and plant breeding. Thomas Laxton died in 1893 and this pea first appeared in 1898. An English heirloom variety dating back to 1898. United States Department of Agriculture, PI 210582. Disease Resistant: FW, PM.

[CT25-750 - Thumbelina Carrot Seeds](#)

[1992 All-America Selections Winner!](#)

60 days. Daucus carota. Open Pollinated. Thumbelina Carrot. The plant produces good yields of small 1 to 2" round orange carrots. Their pumpkin-colored orange skin is tender and requires no peeling. Chefs use this variety in gourmet dishes. These baby-size carrots are excellent in stews. Very flavorful and retains its orange color when cooked. Stores well. This is a very popular carrot that can be grown in containers. Grows well in clay soil. Excellent choice for home gardens and market growers.

[TM677-20 - Tidwell German Tomato Seeds](#)

80 days. Solanum lycopersicum. Tidwell German Tomato. Open Pollinated. The plant produces excellent yields of 1 to 3 lb pink beefsteak tomatoes. They are sweet, meaty, and very flavorful. Perfect for salads, slicing, and sandwiches. Excellent choice for home gardens. A 1920s heirloom variety from the Tidwell family of Tennessee, USA. Indeterminate.

[TM846-20 - Tidy Treats Tomato](#)

55 days. Solanum lycopersicum. (F1) This early producing plant produces high yields of ¾ to 1 oz bright red cherry tomatoes. Perfect fresh eating right off the vine or in salads. Grows in clusters. Suitable for containers, patios, or small gardens where space is very limited! Excellent choice for home gardens. Disease Resistant: V, F. Determinate.

[TM813-20 - Tiger Pink Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 1 to 2 oz bi-colored deep pink cherry Roma tomatoes with orange stripes. They are very sweet, juicy, and flavorful. Perfect for salads, garnishes, or culinary creations. They can also be picked prematurely and allowed to ripen off the vine without compromising the flavor. An Artisan Series variety. Crack Resistant. Does well outdoors or in the greenhouse. Excellent choice for home gardens and greenhouses. Indeterminate.

[CA14-50 - Tigger Melon Seeds](#)

90 days. Cucumis melo. Open Pollinated. Tigger Melon. The plant produces heavy yields of 1 lb melons with yellow with brilliant fire-red, zigzag stripes skins. The melon has ivory-white flesh. It has a rich melon flavor without being overly sweet. Very fragrant. It does well in dry conditions. An excellent choice for home gardens. An heirloom variety from Armenia.

[HP749-20 - Tiny Samoa Hot Peppers](#)

75 days. Capsicum annum. Open Pollinated. This small plant produces high yields of ¾" long by ¼" wide Pequin hot peppers. Peppers are very hot, grow upright, have thin flesh, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. A beautiful edible ornamental for indoor plants, containers, pots, patios, hanging baskets, and small gardens. A variety from Samoa.

[HP480-20 - Tobago Seasoning Hot Peppers](#)

100+ days. Capsicum chinense. Open Pollinated. The plant produces good yields of 2 ½" long by 1 ½" wide elongated Habanero hot peppers. Peppers are medium hot, have medium-thick flesh, and turn from light green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for pickling and making salsa, hot sauce, and seasoning spice powder. A variety from Trinidad & Tobago.

[TM136-20 - Tiffen Mennonite Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces excellent good yields of 13 to 16 oz pink beefsteak tomatoes. It has a rich old-fashioned tomato flavor. They have an outstanding flavor similar to the Brandywine tomato. It has won a few tomato taste awards. Perfect for salads, slicing, and sandwiches. A potato leaf variety. Excellent choice for home gardens. An heirloom variety from the Mennonites in Wisconsin, USA. Indeterminate.

[TM490-20 - Tigerella Tomato](#)

55 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of 2 to 4 oz bi-colored bright red tomatoes with orange stripes. They are meaty, juicy, and have a rich tangy flavor. One of the finest preferred supermarket tomatoes around. The plant requires support, either staking or cages. Suitable for both greenhouse and open field production. An excellent choice for home gardens, farmer's markets, market growers, greenhouses, open production, and commercial production. An heirloom variety developed by Dr. Lewis Darby of the United Kingdom Glasshouse Crops Research Institute. Indeterminate.

[HP2239-10 - Time Bomb Hot Peppers](#)

68 days. Capsicum annum. (F1) This early maturing plant produces high yields of cherry hot peppers. Peppers are mildly hot and turn from dark green to red when they mature. The plant has green stems, green leaves, and white flowers. Perfect pickling variety. A variety from the USA. Scoville Heat Units: 1,000.

[TM266-20 - Tiny Tim Tomato Seeds](#)

45 days. Solanum lycopersicum. Open Pollinated. Tiny Tim Tomato. This early maturing plant produces heavy yields of bright red cherry tomatoes. They are very sweet and flavorful. Perfect fresh eating right off the vine or in salads. The dwarf plant is suitable for container gardening, patios, hanging baskets, window sill gardens, or small gardens where space is very limited! An excellent choice for home gardens. An heirloom variety was developed in 1945 by the University of New Hampshire, USA. United States Department of Agriculture, PI 303797. Determinate.

[TM676-10 - Todd County Amish Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Todd County Amish Tomato. The plant produces excellent yields of 1 to 2 lb dark pink beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. It has a rich old fashioned tomato flavor. Perfect for salads, slicing, and sandwiches. A potato leaf variety. An excellent choice for home gardens. An Amish heirloom variety from Minnesota, USA. Indeterminate.

[TP3-500 - Tokyo Cross Turnip Seeds](#)

1969 All-America Selections Winner!

35 days. Brassica rapa. (F1) Tokyo Cross Turnip. This early maturing plant produces good yields of 2 to 6" diameter high-quality pure white turnips. The white flesh is firm, crisp, mild, and flavorful. Excellent pickling variety. Leaves are delicious and used as greens. Easy to grow and can be sown from spring to fall. They are cold-tolerant and also slow to bolt. An excellent choice for home gardens and market growers.

[ON14-250 - Tokyo Long White Bunching Onions](#)

65 days. Allium cepa. Open Pollinated. The plant produces excellent yields of Japanese-type bunching onions. Onions have stiff shanks and are mostly single stems. A sweet and mild non-bulbing onion. Looks like a long slim leek. Perfect for soups, salads, and garnishes. These green onions do not form bulbs and do not multiply by division. Suitable for summer and fall harvests. Heat Tolerant. An excellent choice for home gardens and market growers. Disease Resistant: PR, S, TH.

[SP195-20 - Tollies Sweet Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of 5" long scarlet-red sweet peppers. Peppers are very sweet, have thick walls, and turn from green to red when mature. The plant has green stems, green leaves, and white flowers. Excellent fresh in salads, frying, canning, or added to tomato sauce. Also known as Tolli's Pepper. An heirloom variety from Italy.

[LC13-750 - Tom Thumb Lettuce](#)

65 days. Lactuca sativa. Open Pollinated. This small compact plant produces excellent yields of small butterhead lettuce. Each head is a perfect size, 3 to 4" across, for a crispy and tasty salad. Perfect for salads and garnishes. It is excellent summer lettuce as it tolerates high temperatures at maturity and resists bolting better than larger varieties. Heat Tolerant. Perfect for container gardening, hanging baskets, or small gardens where space is very limited! Suitable for greenhouse. An excellent choice for home gardens and specialty market growers. An 1850 heirloom from England. United States Department of Agriculture, PI 536767.

[PE33-50 - Tom Thumb Sweet Pea Seeds](#)

55 days. Pisum sativum. Open Pollinated. Tom Thumb Sweet Peas. This dwarf plant produces good yields of sweet peas. Perfect fresh in salads, in soups, and used in cooking. Suitable for indoor or outdoor containers. Great for your patio or close to the kitchen. This variety is also suitable for cold frame production and hydroponics gardening. This pea can take temperatures down to 20 F. Also known as Half Pint Pea. An excellent choice for home gardens. An English heirloom variety dating back to 1854.

[WM63-20 - Tom Watson Watermelon Seeds](#)

87 days. Citrullus lanatus. Open Pollinated. Tom Watson Watermelon. The plant produces good yields of 40 lb watermelons. It has a very tough rind that will resist bruising making it a reliable shipper variety. This variety has very delicious sweet deep dark red flesh. A Tom Watson Watermelon Festival is held in Georgia each year in August at Hickory Hill in Thomson, Georgia. Suitable for home gardens, farmer's markets, and market growers. A 1900 heirloom variety from Georgia, USA.

[TL4-100 - Toma Verde Tomatillo Seeds](#)

60 days. Physalis ixocarpa. Open Pollinated. Toma Verde Tomatillo. This early maturing plant produces good yields of large green tomatillos. Used to make salsa and other Mexican dishes. One of the early producing varieties. They are surrounded by a papery husk that turns from green to brown as they ripen and splits open when they are ready to harvest. An excellent choice for home gardens and market growers.

[TM416-10 - Tomatoberry Tomato](#)

60 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 1 to 2 oz bright red strawberry-shaped tomatoes. They are firm, meaty, and very flavorful. These are perfect for salads, garnishes, or culinary creations. It won the third place innovation award at the Fruit Logistica Show in Berlin in 2008. Also won a major taste trial. Grows in clusters of 25 to 30. Crack Resistant. It has an extended shelf life and stores well. Suitable for container gardening, greenhouse, and open field production. Always a great seller at Farmer's Markets! An excellent choice for home gardens, greenhouses, market growers, and open field production. A variety developed in Japan. Disease Resistant: F, N, TMV. Indeterminate.

[TM344-20 - Tommy Toe Tomato](#)

70 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces heavy yields of ½ to ¾ oz bright glossy red cherry tomatoes. They are mild, juicy, and flavorful. It has a rich old-fashioned tomato flavor. Perfect for salads, snacks, vegetable platters, and making tomato juice. It has won many blue ribbons and taste tests around the world. Also known as Steakhouse Tomato. The plant produces hundreds of small cherry tomatoes. It does extremely well in hot and humid regions. An excellent choice for home gardens. An heirloom variety from the Ozarks, Arkansas, USA. Disease Resistant: BR, EB. Indeterminate.

[CA34-50 - Top Mark Melon Seeds](#)

90 days. Cucumis melo. Open Pollinated. Top Mark Melon. The plant produces good yields of 3 to 4 lb melons. The flesh is very thick, firm, and deep salmon color. It has a small seed cavity. Excellent shipper. Tolerates hot dry climates. It does well in the southern and southwestern regions of the United States. One of the two best West Coast cantaloupe varieties. An excellent choice for home gardens and market growers. An heirloom variety. United States Department of Agriculture, NSL 30032. Disease Resistant: ALS, DM, PM, PRSV, S, WMV.

[BN63-50 - Top Notch Golden Wax Bean Seeds](#)

53 days. Phaseolus vulgaris. Open Pollinated. Top Notch Golden Wax Bean. This early maturing pole-type plant produces heavy yields of flavorful 5 ¼" long by ¼" wide golden yellow wax beans. The beans are very delicious with a buttery flavor! Excellent canning and freezing variety. This bean is thought to be a bush bean or a half-runner bean because of its lack of height but is classified by the USDA as a pole variety. This variety is stringless and suitable for canning. Does well in Northern and Southern regions. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 549658. Disease Resistant.

[BN140-50 - Top Pick Pinkey Cowpea Seeds](#)

70 days. Vigna unguiculata. Open Pollinated. Top Pick Pinkey Cowpeas. This small bushy plant produces good yields of 8" long pods. Produces small-sized cream-colored peas, similar to California Blackeye Cowpeas. They are best when picked young for use as snap peas. Cream cowpeas. An excellent choice for home gardens.

[BN13-50 - Topcrop Bean Seeds](#)

1950 All-America Selections Winner!

50 days. Phaseolus vulgaris. Open Pollinated. Topcrop Bean. This early maturing bush type plant produces heavy yields of very flavorful straight 5 ½" long by ¼" wide green beans. This high quality variety was developed by the USDA and is noted for its flavor and disease resistance. The bean is stringless and perfect for canning and freezing. An excellent choice for home gardens. United States Department of Agriculture, PI 549568. Disease Resistant: BCMV (NY 15 and PV-1).

[WM67-20 - Topgun Watermelons](#)

85 days. Citrullus lanatus. (F1) The plant produces good yields of 25 lb round watermelons. A very attractive watermelon with light and dark green striped rind. Its flesh is bright red, very delicious, and very sweet. This variety produces better quality than any other Crimson Sweet Watermelons. This variety is suitable for long-distance shipping. Perfect watermelon for your backyard or for market growers. Disease Resistant: A, FW.

[TP11-500 - Topper Turnips](#)

36 days. Brassica rapa. (F1) This early maturing plant produces heavy yields of high-quality dark green turnip greens. It takes 80 days for roots to develop. Greens grow 28" tall. Roots can be eaten. Highly bolt resistance. Vigorous re-growth ability! The plant can have up to three harvests in addition to the first harvest. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 662790. Disease Resistant: TuMV.

[TM524-20 - Torbay Tomato Seeds](#)

75 days. Solanum lycopersicum. (F1) Torbay Tomato. The plant produces good yields of 6 to 8 oz pink tomatoes. They are mild, meaty, juicy, and flavorful. A very beautiful tomato that is perfect for salads, garnishes, or culinary creations. Low acidity variety. Always a great seller at Farmer's Markets! Excellent choice for home gardens and market growers. Disease Resistant: V, FF. Determinate.

[CU65-20 - Tortarello Verde Scuro Cucumbers](#)

58 days. Cucumis flexuosus. Open Pollinated. The plant produces heavy yields of 9 to 12" long dark green cucumbers. Very flavorful and delicious. It is really a melon but tastes like cucumber and is used like a cucumber. Great for salads and slicing cucumber. An excellent choice for home gardens. A variety from Italy.

[TM448-10 - Totem Tomato](#)

70 days. Solanum lycopersicum. (F1) This early maturing plant produces heavy yields of bright red cherry tomatoes. They are very sweet and flavorful. Perfect fresh eating right off the vine or in salads. The dwarf plant is suitable for container gardening, patios, hanging baskets, window sill gardens, or small gardens where space is very limited! An excellent choice for home gardens. Determinate.

[SP342-10 - Touchdown Pepper Seeds](#)

72 days. Capsicum annuum. (F1) Touchdown Sweet Pepper. This early maturing plant produces high yields of extra-large 5" long by 4" wide sweet bell peppers. Peppers turn from green to red when mature. The plant has green stems, green leaves, and white flowers. This quality bell pepper has very thick walls and matures early. Strong and prolific plants set peppers continuously all season long. A variety from the USA. Disease Resistance: BLS, TMV.

[SQ105-20 - Triamble Squash](#)

105 days. Cucurbita maxima. Open Pollinated. The plant produces good yields of large 8 lb triangular-shaped slate blue skin squash. This high-quality variety is very flavorful and perfect for baking. Stores well. An excellent choice for home gardens. An heirloom variety from Australia. A winter squash variety.

[HP1951-20 - Tricolor Variegata Hot Peppers](#)

72 days. Capsicum annuum. Open Pollinated. This early maturing plant produces high yields of small hot peppers. The peppers are hot and turn from deep purple to bright red at maturity. The plant has leaves with shades of white, green, and purple in a never-ending, variegated display, with no two leaves the same. It has purple stems and purple flowers. The peppers are used as garnish or pickled. A very beautiful edible ornamental variety that can be planted in containers, pots, patios, hanging baskets, and small gardens.

[HP1029-20 - Trifetti Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of ¾" long by ½" wide hot peppers. Peppers are hot and turn from glossy purple to red when mature. The plant has purple stems and green leaves with white markings. A beautiful edible ornamental hot pepper plant. Suitable for containers, pots, patios, hanging baskets, and small gardens.

[TM306-20 - Traveler 76 Tomato](#)

78 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 6 to 8 oz dark pink tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for sandwiches, salads, slicing, and canning. One of the best-tasting pink tomatoes. It is much earlier and more dependable than the Brandywine tomato. Crack-Resistant. Heat and humidity tolerant. An excellent choice for home gardens. The Arkansas Traveler version was developed in 1971. Later in 1976, the Traveler 76 heirloom version was developed by Joe McFerran at the University of Arkansas Horticulture Department, Arkansas, USA. Indeterminate.

[HP2424-10 - Tricked You Jalapeno Pepper Seeds](#)

90 days. Capsicum annuum. (F1) Tricked You Jalapeno Pepper. The plant produces high yields of giant 4" long Jalapeno peppers. These are an improved version of the Fooled You Jalapeno Peppers. They have no heat, zero heat, but have the flavor of a Jalapeno pepper. Peppers turn from green to bright red when mature, but are usually used when green. This Jalapeno pepper has absolutely no heat. Excellent for salsa, hot sauce, pickling, and stir fry. An excellent choice for home gardens and farmer's markets. A variety from the USA. Disease Resistant: BLS.

[HP2461-10 - Trident Hot Peppers](#)

85 days. Capsicum annuum. (F1) The plant produces high yields of giant 7" long by 3 ¼" wide Ancho hot peppers. One of the largest Ancho peppers available. The peppers are mildly hot, have thick flesh, and turn from glossy dark green to deep red when they mature. The plant has green stems, green leaves, and white flowers. [**SQ44-10 - Tromba d'Albegna Squash**](#)

75 days. Cucurbita pepo. Open Pollinated. The plant produces good yields of 20" long Italian squash that is pale green with yellow stripes and long curved with a bulb at the end. The dark yellow flesh is very flavorful. Excellent sliced, fried, or steamed. The plant has climbing vines like a pumpkin, so give them plenty of space as they will run 20 to 25 feet. The plants will grow well on a trellis or fence. An excellent choice if squash bugs are a problem in your garden. An heirloom variety from Italy. A summer squash variety.

[SQ40-20 - Tromboncino Zucchini Squash Seeds](#)

70 days. Cucurbita moschata. Open Pollinated. Tromboncino Zucchini Squash. The plant produces high yields of 36" long light green to tan zucchini squash. It has a tender, mild, sweet, and nutty flavor. It is one of the best-eating summer squash. Excellent steamed, grilled, or used fresh in salads. The Italians use it for stuffing in Gnocchi and Ravioli. Zucchini Rampicante Squash. An excellent choice for home gardens and specialty markets. An heirloom variety from Italy. A summer squash variety.

[TM386-20 - Trophy Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The Trophy Tomato plant produces high yields of 5 to 8 oz red tomatoes. They are mildly sweet, firm, juicy, and flavorful. Perfect for salads, slicing, sandwiches, and canning. In 1870, Colonel George E. Waring, Jr., of Newport, Rhode Island, sold these seeds at the enormous price of \$5.00 per packet (equivalent to \$80 dollars today). Many gardeners purchased these seeds in hopes of winning the \$100 grand prize at the local fair. With national exposure, people planted it all over the country, and it was carried by most seed companies at that time. It remained very popular from 1872 until about 1926. It is a cross of a Large Red Tomato and an Early Red Smooth Tomato. Grows in clusters of 4 to 5. Excellent choice for home gardens. An heirloom variety from Rhode Island, USA. United States Department of Agriculture, PI 636255. Indeterminate.

[HP883-10 - Trottolino Amorooso Pepper Seeds](#)

85 days. Capsicum annuum. Open Pollinated. Trottolino Amorooso Pepper. The plant produces good yields of 3 ¼" long by 1 ½" wide hot peppers. Peppers are hot, grow upright, and turn from green with dark purple markings, to red when mature. The plant has green stems, green leaves, and white flowers. Good foliage protects sun-scauld. Great cooking and stuffing pepper. A variety from Italy.

[TM509-20 - Trucker's Favorite Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces excellent yields of 6 to 12 oz pink beefsteak tomatoes. They are very sweet and flavorful. It has a rich old-fashioned tomato flavor. Perfect for salads, slicing, and sandwiches. Grows in clusters of 3 to 4. Crack-Resistant. Excellent choice for home gardens. A pre-1900 heirloom variety from Burlington County, New Jersey, USA. Indeterminate.

[CN44-50 - Trucker's Favorite White Corn Seeds](#)

75 days. Zea mays. Open Pollinated. Trucker's Favorite White Corn. The plant produces high yields of delicious sweet white corn. Ears are 8 to 9" long ears of white kernels. The ears have 14 to 18 rows of tender kernels. It is ground for flour, grits, and cornmeal. Perfect for making hominy. Great fresh, roasted, canned, or freezing. Resists corn earworms! This variety does well under adverse weather conditions. Heat Tolerant. A great choice for Southern growers. An 1899 heirloom variety. An excellent choice for home gardens. United States Department of Agriculture, PI 311245.

[CN24-50 - Trucker's Favorite Yellow Corn Seeds](#)

100 days. Zea mays. Open Pollinated. Trucker's Favorite Yellow Corn. The plant produces high yields of 8 to 12" long yellow corn. The ears have 14 to 16 rows of tender kernels. Particularly popular in the Cotton Belt and all parts of the South. Resists corn earworms! This variety does well under adverse weather conditions. Heat Tolerant. An excellent choice for home gardens and market growers. An heirloom variety from the USA.

[TM639-5 - Trust Tomato Seeds](#)

78 days. Solanum lycopersicum. (F1) Trust Tomato. The plant produces high yields of 8 to 10 oz bright red beefsteak tomatoes. They are very sweet, firm, and flavorful. Perfect for salads, slicing, and sandwiches. One of the best greenhouse tomatoes in the United States. Suitable for hydroponics gardening. It has an extended shelf life and stores well. An excellent choice for home gardens, greenhouses, and market growers. Disease Resistant: V, FF, FCRR, LM, TMV. Indeterminate.

[TM563-10 - Tumbler Tomato](#)

48 days. Solanum lycopersicum. (F1) This early maturing plant produces heavy yields of 1 oz bright red cherry tomatoes. They are very sweet, juicy, and flavorful. Perfect fresh eating right off the vine or in salads. The plant produces up to 6 lbs. Heat-Tolerant. It was specially bred for hanging baskets. Suitable for container gardening, patios, hanging baskets, and small gardens where space is very limited! An excellent choice for home gardens. Determinate.

[TM565-10 - Tumbling Tom Yellow Tomato Seeds](#)

63 days. Solanum lycopersicum. Open Pollinated. Tumbling Tom Yellow Tomato. This early maturing plant produces high yields of 1 to 2 oz yellow cherry tomatoes. They are very sweet and flavorful. Perfect fresh eating right off the vine or in salads. Produces up to 4 lbs of tomatoes per plant. It is ideal for hanging baskets. Suitable for container gardening, patios, hanging baskets, window boxes, and small gardens where space is very limited! Disease Resistant: V, F, N. Determinate.

[CU92-10 - Turbo Cucumber Seeds](#)

67 days. Cucumis sativus. (F1) Turbo Cucumber. The plant produces high yields of 9" long dark green slicing cucumbers. It is crisp and very delicious. This quality cucumber grows best if grown on trellis or stakes. Does well in the Northeast parts of the country. One of the most disease resistant cucumbers on the market. An excellent choice for home gardens, market growers, and open field production. Disease Resistant: A, ALS, Ccu, CMV, DM, PM.

[PM66-20 - Turkeyneck Pumpkins](#)

95 days. Cucurbita moschata. (F1) The plant produces high yields of large 10 lb delicious tan color neck pumpkins. The rich orange flesh is very sweet with a butternut flavor. An excellent choice for home gardens. A variety from the USA. Disease Resistant: PM, ZMV.

[EG54-50 - Turkish Orange Eggplants](#)

85 days. Solanum melongena. Open Pollinated. The plant produces high yields of 3" round vibrant orange eggplants. The eggplants are very flavorful. Best when harvested when they are green to light orange. Perfect for grilling, frying, stuffing, baking, and even putting on veggie pizzas. The plant will require support because it's so prolific. The plant also appears to be insect resistant. An excellent choice for home gardens and market growers. An heirloom variety from Turkey.

[GD27-20 - Turk's Turban Gourds](#)

100 days. Cucurbita maxima. Open Pollinated. The plant produces high yields of 10" bright orange squash-type gourds with red, white, and dark green markings. Also known as the Mexican Hat. Perfect for baking and stuffing. Very popular at roadside vegetable stands. An excellent choice for home gardens and market growers. United States Department of Agriculture, NSL 92000.

[TM865-20 - Tye-Dye Orange Tomato Seeds](#)

65 days. Solanum lycopersicum. (F1) Tye-Dye Orange Tomato. This early maturing plant produces high yields of 7 oz bi-colored bright yellow-orange tomatoes with a blush of red both inside and outside. They are mildly sweet and flavorful. Perfect for salads, garnishes, or culinary creations. An excellent choice for home gardens. Disease Resistant: V, F, A. Indeterminate.

[SN10-100 - Tye Spinach](#)

37 days. Spinacia oleracea. (F1) This early maturing plant produces high yields of very flavorful dark green spinach leaves. Tye is the most bolt resistant of all spinach varieties allowing spinach production much further into the summer than is possible with other varieties. Excellent choice for home gardens, market growers, and open field production. Disease Resistant: DM.

[AS5-100 - UC 157 F2 Asparagus Seeds](#)

Asparagus officinalis. Perennial. (F2) UC 157 F2 Asparagus. The plant produces heavy yields of light green asparagus spears. Asparagus is a perennial vegetable, so you plant it just once and enjoy season after season. UC 157 is still the most widely planted fresh market asparagus variety in the world. This variety grows in cold regions as well as warmer regions. Cold Tolerant. Heat Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. The UC 157 Asparagus was developed by Frank Takatori and Frank Southers at the University of California at Riverside in 1978. Disease Resistant: CR, FCRR, R.

[AS2-100 - UC 72 Asparagus Seeds](#)

Asparagus officinalis. Open Pollinated. Perennial. UC 72 Asparagus. The plant produces heavy yields of dark green asparagus spears. Asparagus is a perennial vegetable, so you plant it just once and enjoy season after season. It is usually larger than the Mary Washington variety. Heat Tolerant. Drought Tolerant. It was developed at UC Davis for better production and tolerance to Fusarium Wilt. An excellent choice for home gardens, farmer's markets, and market growers. Disease Resistant: FCRR, FW.

[EG45-50 - Udmalabet Eggplants](#)

90 days. Solanum melongena. Open Pollinated. The plant produces heavy yields of 3 to 4" long lavender-purple eggplants with white stripes. They are very flavorful. Delicious when used in curries & chutneys. Best when harvested when eggplants turn yellow with purple stripes, which is when they fully ripen. Great for gourmet dishes. [TM312-20 - Ukrainian Pear Tomato](#)

84 days. Solanum lycopersicum. Open Pollinated. The plant produces excellent yields of 6 oz dark pink pear-shaped tomatoes. They are very sweet and flavorful. Perfect for salads and for making sauce, puree, and paste. Excellent choice for home gardens. An heirloom variety from Yalta, Ukraine. Indeterminate.

[TM640-10 - Ultra Boy II Tomato](#)

68 days. Solanum lycopersicum. (F1) This early maturing plant produces good yields of 8 to 14 oz red tomatoes. It has a rich old-fashioned tomato flavor. Perfect for salads, slicing, and sandwiches. Grows in clusters. The plant requires support, either staking or cages. An excellent choice for home gardens and market growers. Disease Resistant: V, F, N. Indeterminate.

[BR40-500 - Umpqua Broccoli Seeds](#)

60 days. Brassica oleracea. Open Pollinated. Umpqua Broccoli. The plant produces high yields of very flavorful and uniform heads of dark green broccoli. The head averages 4 to 6 inches in diameter. The plant produces many side shoots and produces over a long season. It is the highest-yielding Open Pollinated broccoli. It is named after the Umpqua River in Oregon. Developed in 1990 by Tim Peters. An excellent choice for home gardens. A variety from the USA.

[HP2462-20 - Utri Pepper Seeds](#)

75 days. Capsicum annuum. Open Pollinated. Utri Pepper. The plant produces high yields of Hungarian-type hot peppers. The peppers are medium hot, have thin flesh, and turn from light dark green to dark red when they mature. The plant has green stems, green leaves, and white flowers. Excellent for eating fresh, cooking, and for making spicy paprika. Suitable for home gardens. An heirloom was brought to the USA in 1909 by Rose Utrie of Hungary.

[TM733-20 - Valencia Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces excellent yields of 8 to 10 oz orange tomatoes. They are meaty and have a tangy flavor with very few seeds. Perfect for salads, slicing, garnishes, or culinary creations. It ripens earlier than many other orange varieties making it a good choice for gardeners with shorter seasons. Excellent choice for home gardens. An heirloom variety from Maine, USA. Indeterminate.

[TM384-10 - Ultimate Opener Tomato Seeds](#)

57 days. Solanum lycopersicum. (F1) Ultimate Opener Tomato. This early maturing plant produces high yields of 8 oz bright red tomatoes. They are very sweet, juicy, and flavorful. They are so sweet and juicy that you can't stop eating them. Some gardeners say it is one of the best tasting tomatoes! Perfect for salads, slicing, and sandwiches. The best early season opening tomato in the world! These tomatoes are a third larger than the Early Girl tomato. Crack Resistant. A variety was developed by Dr. Paul Thomas, the same plant breeder who developed Better Boy and pioneered Early Girl Hybrid tomatoes. An excellent choice for home gardens and market growers. Disease Resistant: V, F. Indeterminate.

[TM776-20 - Umberto Pear Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 2 oz dark pink pear-shaped tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads and making sauce, puree, paste, and drying. Also known as King Umberto Tomato or King Humbert Tomato. Named after King Umberto (1844-1900) of Italy. The plant produces up to 250 tomatoes. An excellent choice for home gardens. An heirloom variety from Italy. Indeterminate.

[ON64-250 - Utah Yellow Sweet Spanish Onion Seeds](#)

115 days. Allium cepa. Open Pollinated. Utah Yellow Sweet Spanish Onion. The plant produces heavy yields of extra-jumbo 1 lb size onions. Bulbs are very mild and sweet and have yellowish-brown skin. An all-purpose onion perfect for soups, salads, and cooking. Short-term storage. Cold Tolerant. An excellent choice for home gardens, farmer's markets, market growers, greenhouses, open production, and commercial production. A long day onion.

[TM600-20 - Uva Roja Tomato](#)

85 days. Solanum lycopersicum. (F1) The plant produces heavy yields of ¾ oz red grape tomatoes. They are very sweet and flavorful. Perfect fresh eating right off the vine or in salads. Grows in clusters of 7 to 9. It makes a nice presentation selling them on trusses or packed fruit. Always a great seller at Farmer's Markets! Excellent choice for home gardens and market growers. Disease Resistant: V, TMV. Indeterminate.

[HB103-500 - Valerian](#)

85 days. Valeriana officinalis. Perennial. Open Pollinated. The plant produces good yields of roots that are used for nervous tension, anxiety, migraine, insomnia, pain relief, and to relax tense muscles and soothe digestive discomfort. Easy to grow. One of nature's best herbal sedatives. It can help you to wind down and get a good night's sleep. Also known as Garden Heliotrope, Cat's Valerian, Setwell, and St. George's Herb. An excellent choice for home gardens. A variety from the Mediterranean region.

[CD3-750 - Vates Collards Seeds](#)

75 days. Brassica oleracea. Open Pollinated. Vates Collards. The plant produces heavy yields of delicious green collards. Perfect steamed, boiled, stir-fried, and in soups. High in Vitamin A, B1, B2, and C. Good freezing and canning variety. A winter hardy variety to the mid-Atlantic region, producing a crop into very cold autumn weather. Bolt Resistant. Tolerates cold and frost well. Cold Tolerant. Traditionally greens are grown in the South. Excellent choice for home gardens. A 1950s heirloom variety from Virginia, USA. United States Department of Agriculture, NSL 67978.

[SQ18-20 - Vegetable Spaghetti Squash Seeds](#)

100 days. Cucurbita pepo. Open Pollinated. Vegetable Spaghetti Squash. The plant produces good yields of 3 to 5 lb oblong cylindrical shaped Spaghetti squash. The creamy colored squash is filled with spaghetti like strands of buttery light yellow flesh. Bake for 40 to 50 minutes, then cut open and scrape out strands, top off with spaghetti sauce and cheese to make low-carb pasta! Stores well can be stored for 6 months in a cool, dry place. An excellent choice for home gardens, farmer's markets, and market growers. An heirloom variety was originally from China and was introduced to Japan in 1921 by a Chinese agricultural research company. United States Department of Agriculture, PI 381323. A winter squash variety.

[HP884-10 - Venezuela Hot Peppers](#)

85 days. Capsicum annuum. Open Pollinated. The plant produces good yields of ½" long by ¼" wide Pequin hot peppers. Peppers are medium hot, grow in clusters, have medium thin flesh, and turn from green, to dark purple (almost black), to red when mature. The plant has dark purple stems, green-dark purple leaves, and violet-purple flowers. A beautiful edible ornamental plant. Excellent drying pepper and great for making seasoning spice powder. Suitable for containers, pots, patios, hanging baskets, and small gardens. A rare variety from Venezuela. United States Department of Agriculture, PI 593598. Scoville Heat Units: 13,592.

[BN16-50 - Vermont Cranberry Bean Seeds](#)

85 days. Phaseolus vulgaris. Open Pollinated. Vermont Cranberry Bean. This semi-bush type plant produces good yields of the flavorful bean. This high-quality bean is the most popular bush-type plant. Used fresh or as a dried bean. Excellent for soups and baking. An excellent choice for home gardens. A New England heirloom variety dating back to the 1700s. United States Department of Agriculture, PI 549769.

[CF17-25 - Veronica Cauliflower Seeds](#)

78 days. Brassica oleracea. (F1) Veronica Cauliflower. The plant produces 6 to 8" heads of lime green cauliflower. The heads have pointed spiral pinnacles. It is sweeter and milder than other varieties with a nutty taste. Excellent raw, cooked, or pickled. Heat Tolerant. Best if planted in summer for fall harvest. Also known as Veronica Romanesco Cauliflower. An excellent choice for home gardens. Disease Resistant: FW, FY.

[SQ50-20 - Vegetable Marrow White Squash](#)

85 days. Cucurbita pepo. Open Pollinated. This compact plant produces good yields of 10" long snow-white Lebanese-type squash. It can be picked young when pale green too. Excellent when topped with spaghetti sauce and cheese. The creamy white interior is great for stuffing and baking. Best when harvested when 8" long or less. Perfect for small home gardens, containers, and raised beds. A summer squash variety.

[HP2475-10 - Velociraptor Hot Peppers](#)

80 days. Capsicum chinense. (F1) The plant produces high yields of 2 ½" long wrinkled Habanero peppers. Peppers are very hot, have medium-thick flesh, and turn from green to deep red when mature. The plant has green stems, green leaves, and white flowers. Excellent fresh use, for pickling, making salsa, hot sauce, and seasoning spice powder. This early-producing Habanero pepper was developed with disease resistance for commercial production. A variety from the USA. Disease Resistant: PMV, TSWV.

[HB55-1000 - Vera Lavender Seeds](#)

85 days. Lavandula angustifolia. Perennial. Open Pollinated. Vera Lavender. The plant produces a beautifully aromatic herb that has dark purple flowers. Makes an excellent ornamental hedge. Used in bouquets, sachets, and perfumes. Tender stalks are sometimes used in salads. The flowers and leaves are also edible. Used to repel moths, mosquitoes, and gnats. Suitable for containers.

[CE7-750 - Verona Red Chicory Seeds](#)

85 days. Cichorium endivia. Open Pollinated. Verona Red Chicory. The plant produces excellent yields of 6" round burgundy red chicory. Adds sharp flavor to salads. Used in salads or cooked as a vegetable. May also be sauteed, steamed, or grilled with meats. Colder weather will produce the best color. Cold Tolerant. Also known as Rossa di Verona Radicchio. Excellent choice for home gardens. An heirloom variety from Italy.

[RB1-100 - Victoria Rhubarb Seeds](#)

Perennial. Rheum rhabarbarum. Open Pollinated. Victoria Rhubarb. The plant produces high yields of 24 to 36" long deep crimson red Rhubarb stalks. Used to make pies, preserves, and other desserts. The best cooking rhubarb on the market. This plant will live for many years so plant it where you know you are going to keep it. An excellent choice for home gardens. An 1837 heirloom from England. United States Department of Agriculture, PI 665997.

[HP1027-20 - Vietnamese Tear Jerker Hot Peppers](#)

95 days. Capsicum annuum. Open Pollinated. The plant produces heavy yields of 1 ¼" long by ¼" wide hot peppers. Peppers are very hot and turn from green, to green with black markings, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. The heat of these small peppers will make you cry tears! A variety from Vietnam.

HPLC Test Results: #3

[CA61-50 - Vine Peach Melon Seeds](#)

80 days. Cucumis melo. Open Pollinated. Vine Peach Melon. The plant produces high yields of baseball-sized cantaloupes. The melon has yellow skin and resembles a peach. The flesh is white and has a flavor and texture much like a mango. It has a delightful aroma, a couple of vine peaches in a bowl will perfume the room with peaches and mangoes scent. The melons are the same size and color as tree peaches. Vine Peaches make excellent preserves, pies, butter, and pickles. They are grown just like the cantaloupes and muskmelons. Drought Resistant. Excellent choice for home gardens. Also known as Mango Melon. Introduced in the United States in the 1880s. An heirloom variety from China. United States Department of Agriculture, NSL 5768.

[TM757-20 - Vinson Watts Tomato](#)

85 days. Solanum lycopersicum. Open Pollinated. The plant produces good yields of 10 to 18 oz deep pink beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, slicing, and sandwiches. A tomato was grown by Vinson Watts of Morehead, Kentucky. He perfected the variety over 50 years and the result was a great tomato that had excellent flavor and texture. The tomato has won many taste tests and is considered by many to be the best tomato they ever tasted. An heirloom variety from Lee County, Virginia, USA, dating back to 1956. Indeterminate.

[TM536-20 - Vintage Wine Tomato Seeds](#)

85 days. Solanum lycopersicum. Open Pollinated. Vintage Wine Tomato. The plant produces good yields of 1 to 1 ½ lb bi-colored pink beefsteak tomatoes with golden stripes. They are mildly sweet and flavorful. Perfect for salads, slicing, and sandwiches. A potato leaf variety. An excellent choice for home gardens and specialty market growers. An heirloom variety from K. Sahin, Zaden B.V., Netherlands. Indeterminate.

It has a rich full tomato flavor. One of the best tasting, most beautiful, and best producing bi-colored tomatoes. Perfect for salads, slicing, sandwiches, and culinary creations. An excellent choice for home gardens. An heirloom variety from Virginia, USA. Indeterminate.

[SN7-100 - Viroflay Spinach Seeds](#)

21 to 45 days. Spinacia oleracea. Open Pollinated. Viroflay Spinach. This early maturing plant produces good yields of very flavorful smooth dark green spinach leaves. If used for baby leaves, they can be harvested in just 21 days. This variety has a low acid taste. The leaves can grow up to 10" long. Usually steamed or boiled for nutritious greens and used to make an exciting salad. Viroflay Spinach is also used to treat illness, boost brain health, and aid in digestion. This fast-growing spinach can be planted in the third week of August for fall crops. Also known as Monster of Viroflay Spinach and Monstrueux de Viroflay Spinach. An excellent choice for home gardens and market growers. An 1866 heirloom from France. United States Department of Agriculture, PI 192146.

[LC44-750 - Waldman's Green Lettuce](#)

50 days. Lactuca sativa. Open Pollinated. This early maturing plant produces excellent yields of light green frilled leaf lettuce. It tolerates cold weather well. Slow to bolt. Suitable for hydroponics gardening. Waldman's Green is highly productive lettuce that is the standard for commercial growing. Excellent choice for home gardens, greenhouses, market growers, and open field production. United States Department of Agriculture, PI 536769. Disease Resistant: TB.

[ON16-250 - Walla Walla Onion Seeds](#)

105 days. Allium cepa. Open Pollinated. Walla Walla Onion. The plant produces excellent yields of large white onions. Perfect for soups, salads, and cooking. The Spanish type onion is very sweet and very mild. Bulbs can reach 2 lbs. If you like sweet onions like the ones grown in Vidalia, Georgia but don't have the short day climate required to grow them, you'll love this ultra-mild variety from Washington State! Maturing up to 2 weeks sooner than other Spanish types. Does well in the Northwest. Very cold hardy. An excellent choice for home gardens and market growers. Long day variety.

[BR6-500 - Waltham 29 Broccoli Seeds](#)

85 days. Brassica oleracea. Open Pollinated. Waltham 29 Broccoli. The plant produces very flavorful heads of dark blue-green broccoli. The head averages 5 to 6 inches in diameter. Excellent for spring planting mid-season, or fall planting. This variety does extremely well on the East Coast and Pacific Northwest of the United States. Excellent choice for home gardens. Developed in the 1950s by the University of Massachusetts, Waltham, Massachusetts, USA. United States Department of Agriculture, NSL 6300.

[SW17-100 - Virgo Swiss Chard](#)

60 days. Beta vulgaris. Open Pollinated. The plant produces excellent yields of dark green leaves with white stems. It is very flavorful. Usually used fresh in salads or lightly steamed. It does well in spring, summer, and fall plantings. An heirloom variety from Italy. Excellent choice for home gardens and market growers.

[TM282-20 - Viva Italia Tomato Seeds](#)

75 days. Solanum lycopersicum. (F1) Viva Italia Tomato. The plant produces high yields of 3 to 4 oz deep red Roma tomatoes. They have thick walls, are meaty, and are very flavorful. Perfect in salads, for making paste, sauce, salsa, tomato soup, ketchup, canning, and freezing. It sets fruit much better in hot weather than other Roma varieties. Heat Tolerant. An excellent choice for home gardens and market growers. Disease Resistant: V, FF, N, A, BS. Determinate.

[AS8-25 - Walker Deluxe Asparagus Seeds](#)

Asparagus officinalis. (F1) Walker Deluxe Asparagus. The plant produces high yields of green asparagus with slight purple at the tip and butt of the spear. This high-quality variety does well in cool and warm climates. Asparagus is a perennial vegetable, so you plant it just once and enjoy season after season. A higher proportion of male plants, which means plants produce more spears than seeds, resulting in higher yields. Cold Tolerant. Heat Tolerant. An excellent choice for home gardens, farmer's markets, market growers, open production, and commercial production. Disease Resistant: FCRR, R.

[TM356-10 - Walter Tomato Seeds](#)

75 days. Solanum lycopersicum. Walter Tomato. The plant produces high yields of 8 oz red tomatoes. They are very flavorful. A low acid variety does well in the Southern regions. Excellent for salads, slicing, and sandwiches. Excellent choice for home gardens, farmer's markets, and market growers. An heirloom variety from Gisborne, New Zealand. Indeterminate.

[SQ22-20 - Waltham Butternut Squash Seeds](#)

[1970 All-America Selections Winner!](#)

100 days. Cucurbita moschata. Open Pollinated. Waltham Butternut Squash. The plant produces high yields of 6 lb tan butternut squash. The squash has yellow orange flesh which is solid, dry, and very sweet. Excellent baked, steamed, or microwaved. Keeps well. One of our best selling winter squash. Vines grow 8 to 10 feet long so leave plenty of room in your garden. A 1940s heirloom variety developed by Bob Young of Waltham, Massachusetts which continues to set the standard in butternut squash. An excellent choice for home gardens, farmer's markets, and market growers. United States Department of Agriculture, NSL 73985. A winter squash variety.

[PE9-50 - Wando Sweet Pea Seeds](#)

68 days. Pisum sativum. Open Pollinated. Wando Sweet Peas. The plant produces high yields of 3 ½ to 4" long pods of sweet peas. The pods have 7 to 9 tender and flavorful peas. Perfect fresh in salads, in soups, and used in cooking. Excellent freezing and canning variety. A remarkable high-quality variety that is resistant to warm weather and drought conditions. It will grow during the driest and hottest summer months, at a time when other varieties fail. Suitable for Southern regions. Heat Tolerant. Drought Tolerant. An excellent choice for home gardens, market growers, and open field production. Developed by the Southeastern Vegetable Breeding Laboratory crossing Laxton's Progress Pea with the Perfection Pea. An heirloom dating back to 1943. United States Department of Agriculture, NSL 15641.

[TM139-20 - Washington Cherry Tomato](#)

60 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of ¾ to 1 oz red cherry tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, snacks, and vegetable platters. Great shipping and storage tomato. This bush-type plant doesn't require staking. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and open field production. A variety developed by the Washington State University, Washington, USA. Determinate.

[TM192-20 - Watermelon Beefsteak Tomato Seeds](#)

75 days. Solanum lycopersicum. Open Pollinated. Watermelon Beefsteak Tomato. The plant produces high yields of 1 to 2 lb pink beefsteak tomatoes. They are very sweet, meaty, juicy, and flavorful. It has a rich old-fashioned tomato flavor. Perfect for salads, slicing, and sandwiches. A plant can produce up to 50 lbs of tomatoes. An excellent choice for home gardens. An heirloom variety from West Virginia dating back to the 1800s. Indeterminate.

[LC65-750 - Wayahead Lettuce](#)

68 days. Lactuca sativa. Open Pollinated. The plant produces good yields of butterhead lettuce. Leaves are flavorful green, smooth, and soft. Also known as Way-A-Head Lettuce and Burpee's Wayahead Lettuce. Excellent choice for home gardens and market growers. An heirloom variety dating back to 1908. United States Department of Agriculture, PI 536770.

[LC42-750 - Webb's Wonderful Lettuce Seeds](#)

65 days. Lactuca sativa. Open Pollinated. Webb's Wonderful Lettuce. The plant produces good yields of very large crisphead lettuce. It has an exceptional buttery and mild flavor like butterhead lettuce. The crisp leaves are perfect for sandwiches, salads, and garnishes. Does well in hot weather, dry or wet conditions. Slow to bolt. Suitable for the Southern region of the country. Excellent choice for home gardens and market growers. An 1890 heirloom variety from England. United States Department of Agriculture, PI 234624. Disease Resistant: V.

[TM405-20 - Wapsipinicon Peach Tomato Seeds](#)

78 days. Solanum lycopersicum. Open Pollinated. Wapsipinicon Peach Tomato. The plant produces heavy yields of 2 to 3 oz creamy-yellow, almost white, tomatoes that are fuzzy like a peach. They are sweet and very flavorful. Perfect for salads, garnishes, or culinary creations. One of the best-tasting tomatoes. It has won many tomato taste tests with its fruity sweet flavor. Also known as Yellow Peach Tomato and White Peach Tomato. An excellent choice for home gardens. An 1890 heirloom variety from the Wapsipinicon River area, Iowa, USA. Indeterminate.

[HB166-250 - Water Pepper](#)

78 days. Polygonum hydropiper. Perennial. Open Pollinated. The plant produces good yields of peppery flavored leaves. The peppery herb is hot but does not linger. Served on sashimi (sliced raw fish), tempura, and sushi. Also known as Asian Marshpepper, Knotweed, and Smartweed. An excellent choice for home gardens. A variety from Japan.

[RD48-100 - Watermelon Radishes](#)

30 days. Raphanus sativus. Open Pollinated. This early maturing plant produces excellent yields of white radishes with pink and red flesh. Perfect for salads, vegetable platters, gourmet dishes, dips, stir-fries, and garnishes. They have large tops for easy picking. Also known as Red Meat Radish and Roseheart Radish. Does best when planted in the fall. Excellent choice for home gardens and specialty market growers. An heirloom variety. United States Department of Agriculture, G 30470.

[TM206-20 - Wayahead Tomato](#)

63 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces good yields of 6 to 8 oz bright red tomatoes. They are very sweet, meaty, juicy, and flavorful. Perfect for salads, slicing, sandwiches, and making tomato juice. One of the best varieties for making tomato juice. They ripen early as it's name indicates, way ahead of other varieties. The seeds were saved from the most select plants that had premium quality traits. Also known as Jung's Wayahead Tomato, Hudson Valley Tomato, and Earliana Tomato. A potato leaf variety. Excellent choice for home gardens. An heirloom variety dating back to 1921. United States Department of Agriculture, PI 633493. Determinate.

[PM14-20 - Wee Be Little Pumpkin Seeds](#)

1999 All-America Selections Winner!

85 days. Cucurbita pepo. Open Pollinated. Wee Be Little Pumpkin. The plant produces excellent yields of small 4" deep orange pumpkins. These adorable little pumpkins are ideal for carving. Kids love them! An excellent choice for home gardens and Farmer's Markets. United States Department of Agriculture, PI 602592.

[HP255-20 - Wenk's Yellow Hots Peppers](#)

An excellent choice for home gardens, greenhouses, and specialty market growers. An 1893 heirloom variety from New York, USA. United States Department of Agriculture, NSL 5773.

[CN60-50 - Whiteout Corn Seeds](#)

74 days. Zea mays. (F1) Whiteout Corn. This mid-season plant produces excellent yields of 8" long ears of white kernels. The ears have 16 to 18 rows of kernels. The sturdy plant is covered well with green husk. It is sweet and tender. Excellent freezing and canning variety. This is a good choice for early planting. An excellent choice for home gardens and market growers. Disease Resistant: NCLB, SW.

[TM649-20 - Wild Cherry Tomato](#)

60 days. Solanum lycopersicum. Open Pollinated. This early maturing plant produces high yields of tiny ½" bright deep red cherry tomatoes. It has a rich full tomato flavor. Just right for snacking or tossing into salads. An excellent choice for home gardens. A variety from Mexico where these tomatoes grow wild. Indeterminate.

[TM908-10 - Wild Galapagos Yellow Tomato](#)

70 days. Solanum cheesmaniae. Open Pollinated. This early maturing plant produces high yields of very tiny ¼ to ½ oz bright yellow cherry tomatoes. They are very sweet and flavorful. Perfect for salads, garnishes, or culinary creations. This tomato was discovered growing to within a few feet of the surf line, clinging to the black volcanic rocks of the Galapagos Islands. They are a favorite of the marine iguanas that bask there. Excellent choice for home gardens. Indeterminate.

[TB8-100 - Wild Tobacco](#)

85 days. Nicotiana tabacum. Open Pollinated. The plant produces good quality tobacco leaves. The wild tobacco was used by North American Indians for thousands of years and is still in use in native ceremonies. More potent than cultivated tobaccos. Try growing your own tobacco. Seeds are very tiny! This variety is also known as Aztec Tobacco.

[PE34-50 - Willet Wonder Sweet Peas](#)

70 days. Pisum sativum. Open Pollinated. Willet Wonder Sweet Peas. The plant produces high yields of 3 to 4" long pods of sweet peas. The pods have 9 to 11 tender and flavorful peas. Perfect fresh in salads, in soups, and used in cooking. Excellent for fresh use or for freezing. It has long been grown in the South for fresh peas. An excellent choice for home gardens and market growers. An 1890s heirloom variety developed by the Willet Seed Company of Augusta, Georgia, USA. United States Department of Agriculture, PI 151739.

[WM86-20 - Willhite's Sweetheart Watermelons](#)

85 days. Citrullus lanatus. (F1) The plant produces good yields of beautiful 22 to 24 lb blocky oblong watermelons with light green rind and dark green stripes. It has firm dark pink flesh. Great for fruit salads and picnics. Great for fruit salads and picnics. Good foliage protection from the sun and resist sunburn. Always a great seller at Farmer's Markets and Fruit Stands! An excellent choice for home gardens, market growers, and commercial production. A variety from the USA. Disease Resistant: FW.

[PN9-20 - Wild Jungle Peanut Seeds](#)

130 days. Arachis hypogaea. Open Pollinated. Wild Jungle Peanut. The plant produces high yields of delicious peanuts. They are delicious when boiled or roasted. High in protein. Try making your own special homemade peanut butter. Also suitable for making nut milk. It requires 4 months of frost-free weather. An excellent choice for home gardens and market growers. Any heirloom variety that grows in the jungle of the Amazon. (SHELLED PEANUTS)

[TM159-20 - Willamette Tomato](#)

75 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 4 to 7 oz red tomatoes. They are very sweet and flavorful. Perfect for salads, slicing, and sandwiches. Low acidity variety. Crack-Resistant. Suitable for Northwest regions, Canada, New York, and Michigan. An excellent choice for home gardens. An heirloom variety was developed in the 1950s by Dr. Frazier at Oregon State University, Oregon, USA. United States Department of Agriculture, PI 645394. Disease Resistant: V, F. Determinate.

[WM85-20 - Willhite's Sweet Texas Red Watermelons](#)

80 days. Citrullus lanatus. (F1) This early maturing plant produces good yields of 22 to 25 lb oblong watermelons with dark green rind and light green stripes. It has very sweet crisp deep red flesh with high sugar content. Great for fruit salads and picnics. Great for fruit salads and picnics. Always a great seller at Farmer's Markets! An excellent choice for home gardens, market growers, and commercial production. A variety from the USA. Disease Resistant: FW.

[WM71-5 - Willhite's Yellow Gem Watermelons \(Seedless\)](#)

100 days. Citrullus lanatus. (F1) The plant produces good yields of 20 to 22 lb round watermelons with dark black rind. It has very delicious lemon yellow flesh and is very sweet with a Brix of 13. This is perfect for picnics and fruit salads. To produce seedless watermelons, a pollinator is required. We suggest growing Sugar Baby watermelons alongside Willhite's Yellow Gem as a pollinator. Heat Tolerant. Perfect for hot summer days. Always a great seller at Farmer's Markets! An excellent choice for home gardens and market growers. Disease Resistant: FW.

Seedless Watermelons Require Special Attention. The seeds must be started indoors and the Miracle-Gro Seed Starting Mix must be kept at a constant 85 F. Start the seeds at the same time you plant the Sugar Baby pollinator.

[BN104-25 - Willow Leaf Lima Bean Seeds](#)

80 days. Phaseolus lunatus. Open Pollinated. Willow Leaf Lima Bean, The climbing pole plant produces heavy yields of small white lima beans. They have 3 to 4 seeds per pod. The narrow small leaves resemble those of a willow. This variety is becoming exceedingly rare. Drought Tolerant. Heat Tolerant. An excellent choice for home gardens. An heirloom variety was introduced in 1891 by Burpee. United States Department of Agriculture, PI 549474.

[KO11-100 - Winner Improved Kohlrabi Seeds](#)

55 days. Brassica oleracea. (F1) Winner Improved Kohlrabi. The plant produces excellent yields of large Kohlrabi. The bulbs are crisp and very flavorful. The best-tasting white Kohlrabi on the market. It is very flavorful in salads and coleslaw or cooked lightly. Holds well in the field without splitting. An excellent choice for home gardens and market growers.

[LC52-750 - Winter Density Lettuce Seeds](#)

65 days. Lactuca sativa. Open Pollinated. Winter Density Lettuce. The plant produces heavy yields of dark green romaine lettuce. Leaves are tightly folded and have a sweet flavor. Also known as Craquerelle du Midi lettuce. Heads sit high on the stem for good airflow. Heat Tolerant. Frost tolerant. Slow to bolt. Grow year-round with winter protection in cold climates. An excellent choice for home gardens. A 19th-century heirloom from France. United States Department of Agriculture, PI 536774.

[CP4-200 - Winter Rye Cover Crop](#)

180 - 210 days. Secale cereale. Open Pollinated. The plant produces excellent yields of Winter Rye. This is one of the most beneficial cover crops for home gardens and commercial farming. It adds vital nitrogen to the soil and breaks up heavy clay and compact soils. It can be tilled for green manure and mulch. Sow between September and October. It begins growing during the cold months and has green growth in the early spring. A variety from the USA.

Seeding Rate: 1 lb per 250 square feet, 125 lbs per acre

[HP1177-10 - Wiri Wiri Hot Peppers](#)

90+ days. Capsicum frutescens. Open Pollinated. The plant produces high yields of small ½" long by ¼" wide berry-shaped hot peppers. Peppers are very hot, grow upright, have medium-thin flesh, and turn from green, to orange, to red when mature. The plant has green stems, green leaves, and white flowers. Excellent for making salsas, curries, seasoning spice powder. A variety from Guyana.

[TM292-20 - Window Box Roma Tomato](#)

70 days. Solanum lycopersicum. (F1) This early maturing plant produces high yields of 2 to 3 oz red pear-shaped tomatoes. They are sweet and flavorful. Perfect for salads and for making sauce and paste. It has an extended shelf life and stores well. Suitable for containers, patios, or small gardens where space is very limited! Excellent choice for home gardens. Disease Resistant: V, F, N. Determinate.

[TM537-20 - Wins All Tomato](#)

80 days. Solanum lycopersicum. Open Pollinated. The plant produces high yields of 1 to 2 lb deep pink beefsteak tomatoes. They are sweet, tangy, juicy, and very flavorful. It has a rich full tomato flavor. Perfect for salads, slicing, and sandwiches. The plant has a heavy cover that resists foliage diseases and blossom-end rot. It is an offspring of the popular heirloom Pink Ponderosa. A potato leaf variety. Excellent choice for home gardens. An heirloom variety dating back to 1924. Indeterminate. Disease Resistant: BR.

[SQ58-20 - Winter Luxury Squash Seeds](#)

100 days. Cucurbita moschata. Open Pollinated. Winter Luxury Squash. The plant produces high yields of 6 lb orange squash. One of the finest pie squash in the land! The perfect size for two pies.
